

Site Analysis & Spatial Structure

Centennial Jingzhang AI Innovation Belt · Zhan Tianyou Protocol (Visibility · Stoppable · No-AI-equivalent · Intergenerational equity)

Three Key Areas

Area	Scale	Positioning
Zhongzhiyuan	192.1 ha	AI frontier R&D and full-stack innovation engine
AI Origin Community	104.3 ha	Global AI talent source & youth community
Dazhongsi	72.0 ha	AI commercialization & immersive experience window

Zhan Tianyou Protocol • Four Principles

- 1 Visibility Every design decision traceable to a spatial layer; every metric recalculable by formula
- 2 Stoppable Each AI scenario has a human responsibility role + exit mechanism; named owners assigned at implementation stage
- 3 No-AI-equivalent Public space fully works without AI; AI augments, never replaces
- 4 Intergenerational equity Serves youth talent and children, elders, disabled and low-income groups

Key Metrics Summary

Measured design scope: 11.41 km² (EPSG:4548 recalculation)
Green ratio: 12.42% (141.8ha / 1141.28ha)
Public space ratio: 3.0% (34.24ha / 1141.28ha)
Road network density: 8.5 km/km² (97km / 11.4km²)
Transit coverage (target): 85% (800m buffer)

Scenarios & Highlights

12 scenario cards SC1-SC12 (4 industry test + 8 public experience) · 5 AI pilgrimage landmarks L1-L5 · 6 user personas P1-P6 · Appendix A per-scenario data governance & exit

Governance: government-guided + market operation · scenarios failing 2 consecutive quarters are paused
