

JINGZHANG CAREWORKS · SPATIAL SYSTEM

From rail care to city care: one line, three yards, ten shifts

- 01

CARE LINE

An accountable service connection across the existing green corridor; no new road redline.
- 03

CAREWORKS YARDS

Test reliability, share community reports, and repair through a circular supply chain.
- 10

RELIABILITY SHIFTS

01 Public Toilet Uptime Shift

02 Stormwater Clearance Shift

03 Heat Care Shift

04 Accessible Continuity Shift

05 Night Worker Rest Shift

06 Landscape Care Shift

07 Repair Library Shift

08 Low-speed Robot Inspection Shift

09 Civic Spares Shift

10 Public Reliability Ledger Shift

KEY AREAS · PROVISIONAL BOUNDARIES

Three areas, three different responsibilities

01

ZHONGZHIYUAN

RELIABILITY TEST YARD

enclosed track · shadow mode · human takeover

P-02

90 days / baseline / stoppable

02

AI ORIGIN COMMUNITY

COMMUNITY CARE YARD

toilets · accessibility · heat · offline desk

P-01

90 days / baseline / stoppable

03

DAZHONGSI

CIRCULAR REPAIR YARD

shared spares · remanufacture · human procurement

P-03

90 days / baseline / stoppable

THREE STOPPABLE 90-DAY PILOTS

P-01

AI Origin Community: toilet and accessible-route continuity

基线 / BASELINE

14 days of manual rounds recording opening, faults and complaints

停止 / STOP

pause if false dispatch exceeds 10% for two weeks or one severe accessible-detour error occurs

Manual fallback remains operational

P-02

Zhongzhiyuan: stormwater, heat and low-speed inspection loop

基线 / BASELINE

two rainfall events or 30 days of manual records, whichever comes first

停止 / STOP

stop on geofence breach, failure to halt on link loss or proximity, or one missed critical defect

Manual fallback remains operational

P-03

Dazhongsi: shared spares and circular repair

基线 / BASELINE

30 days recording parts-related downtime, quote requests and disposal routes

停止 / STOP

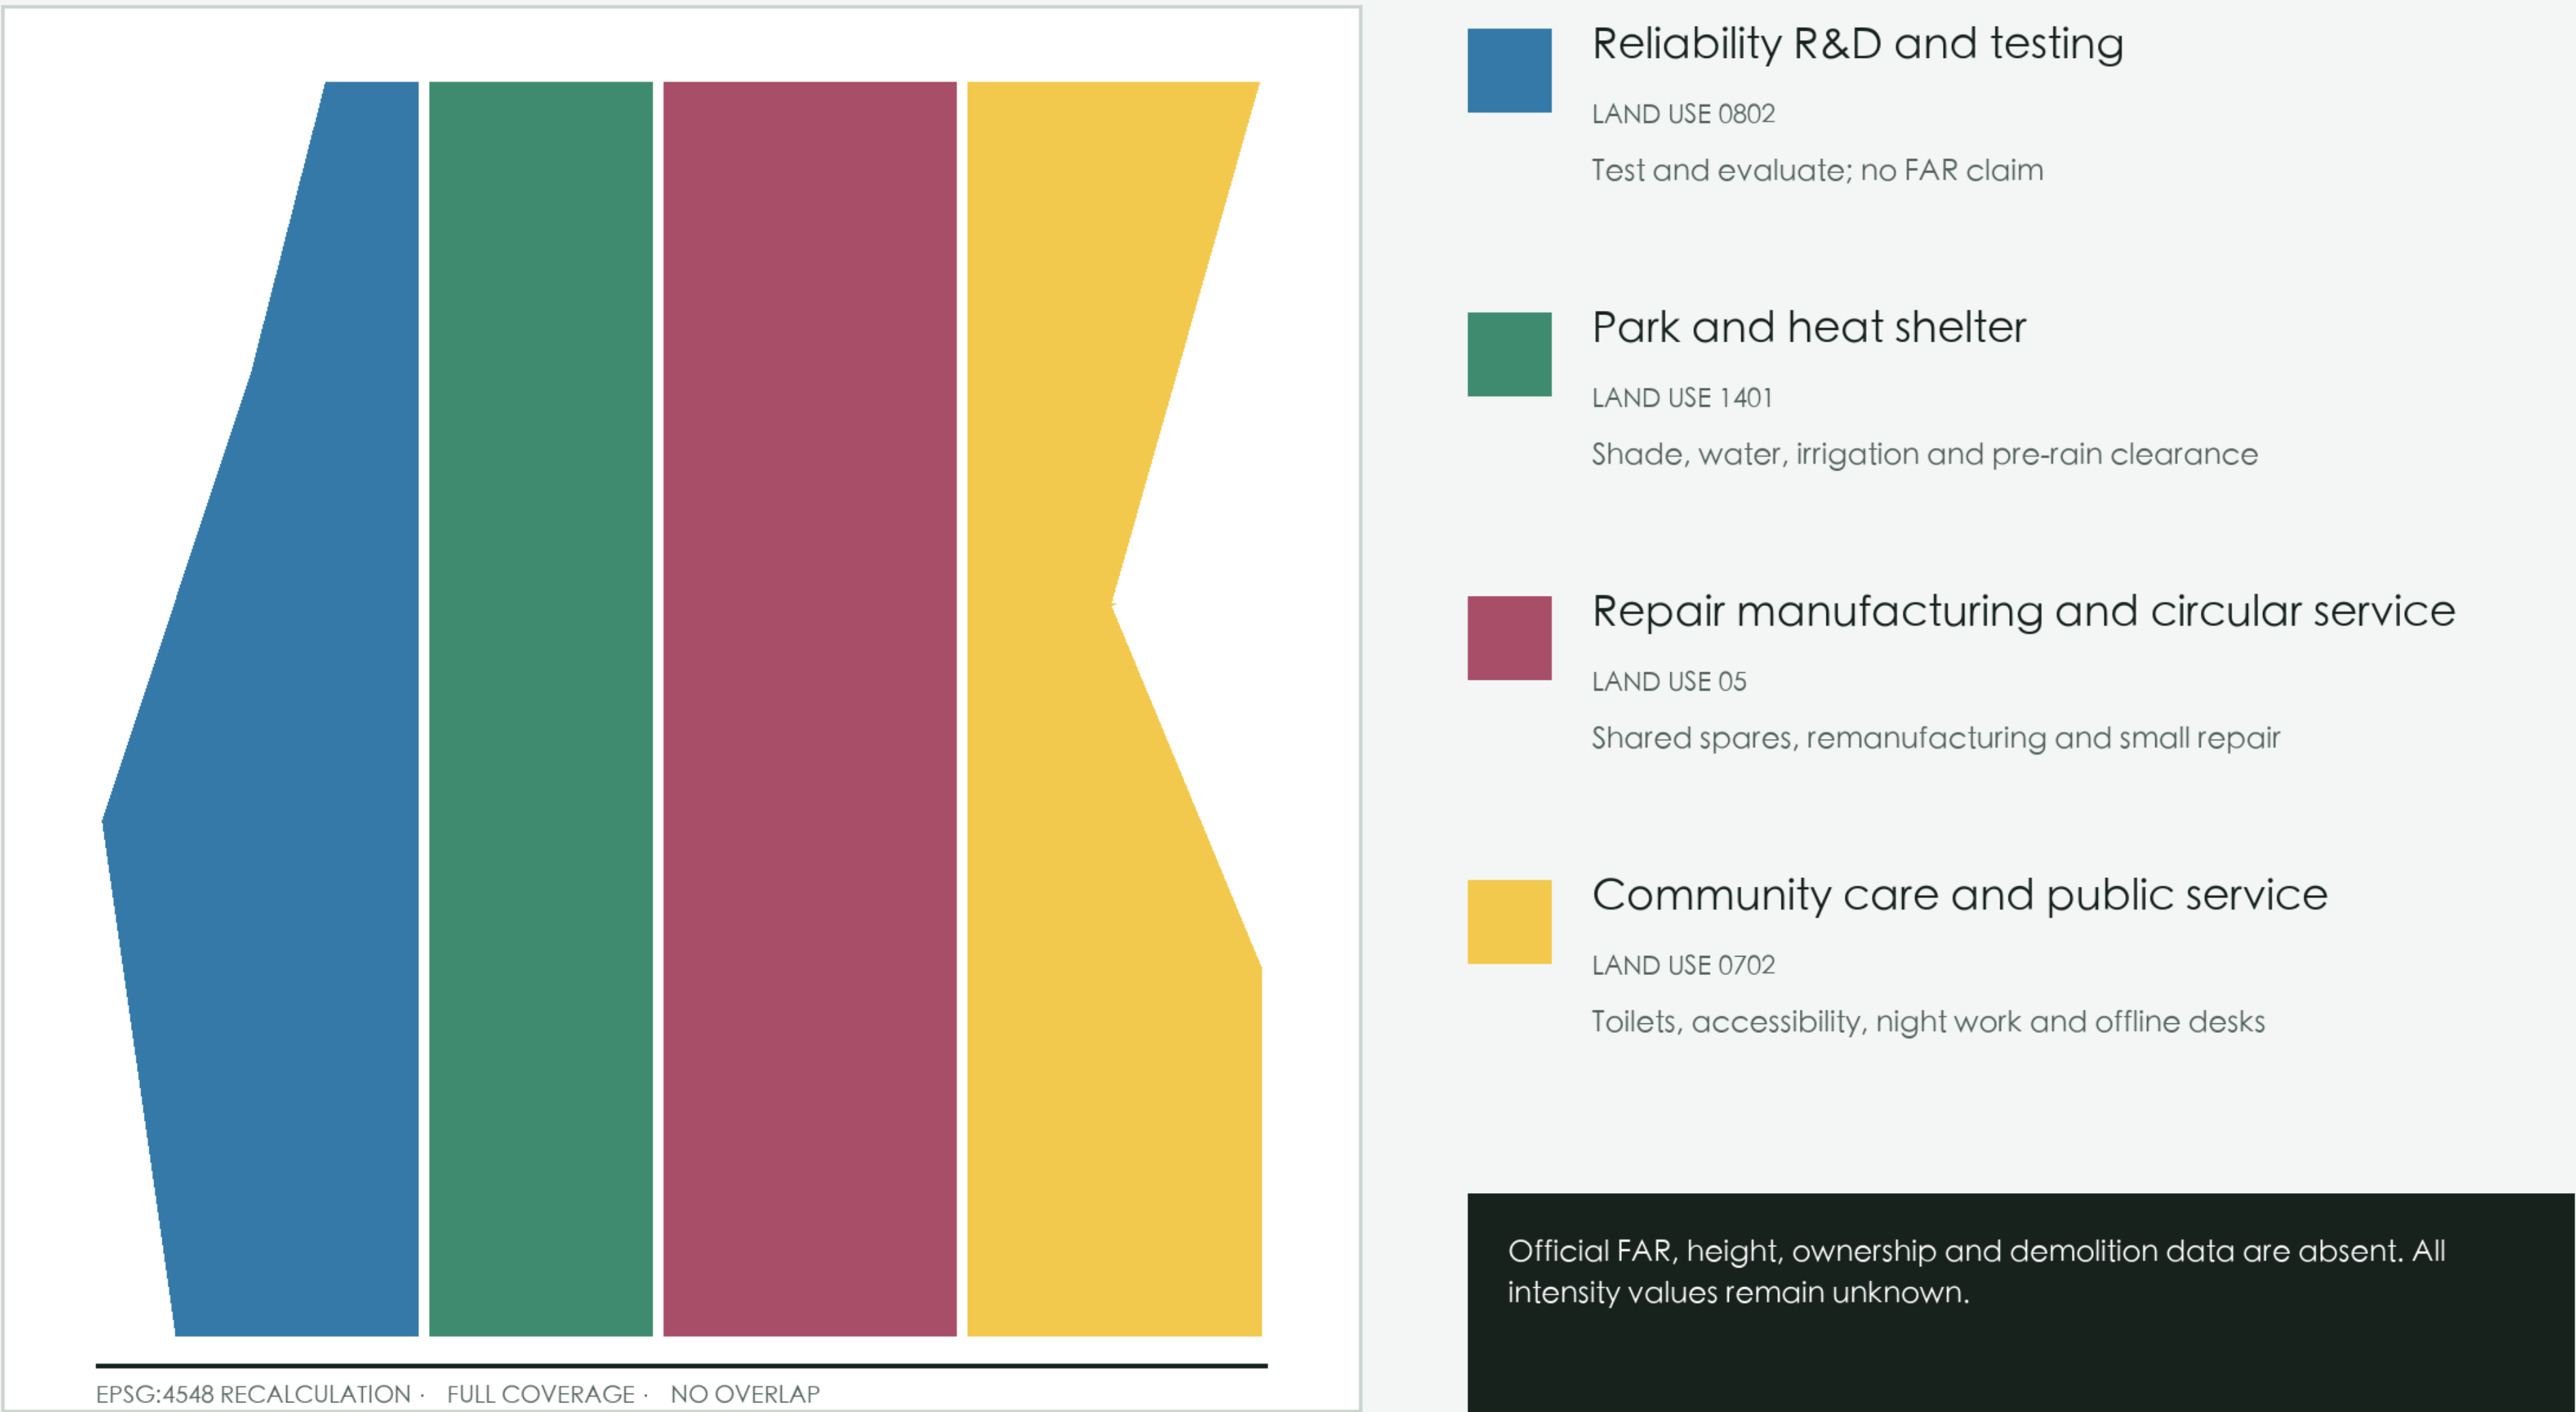

stop if one supplier exceeds 60% without explanation or any unauthorised purchase occurs

Manual fallback remains operational

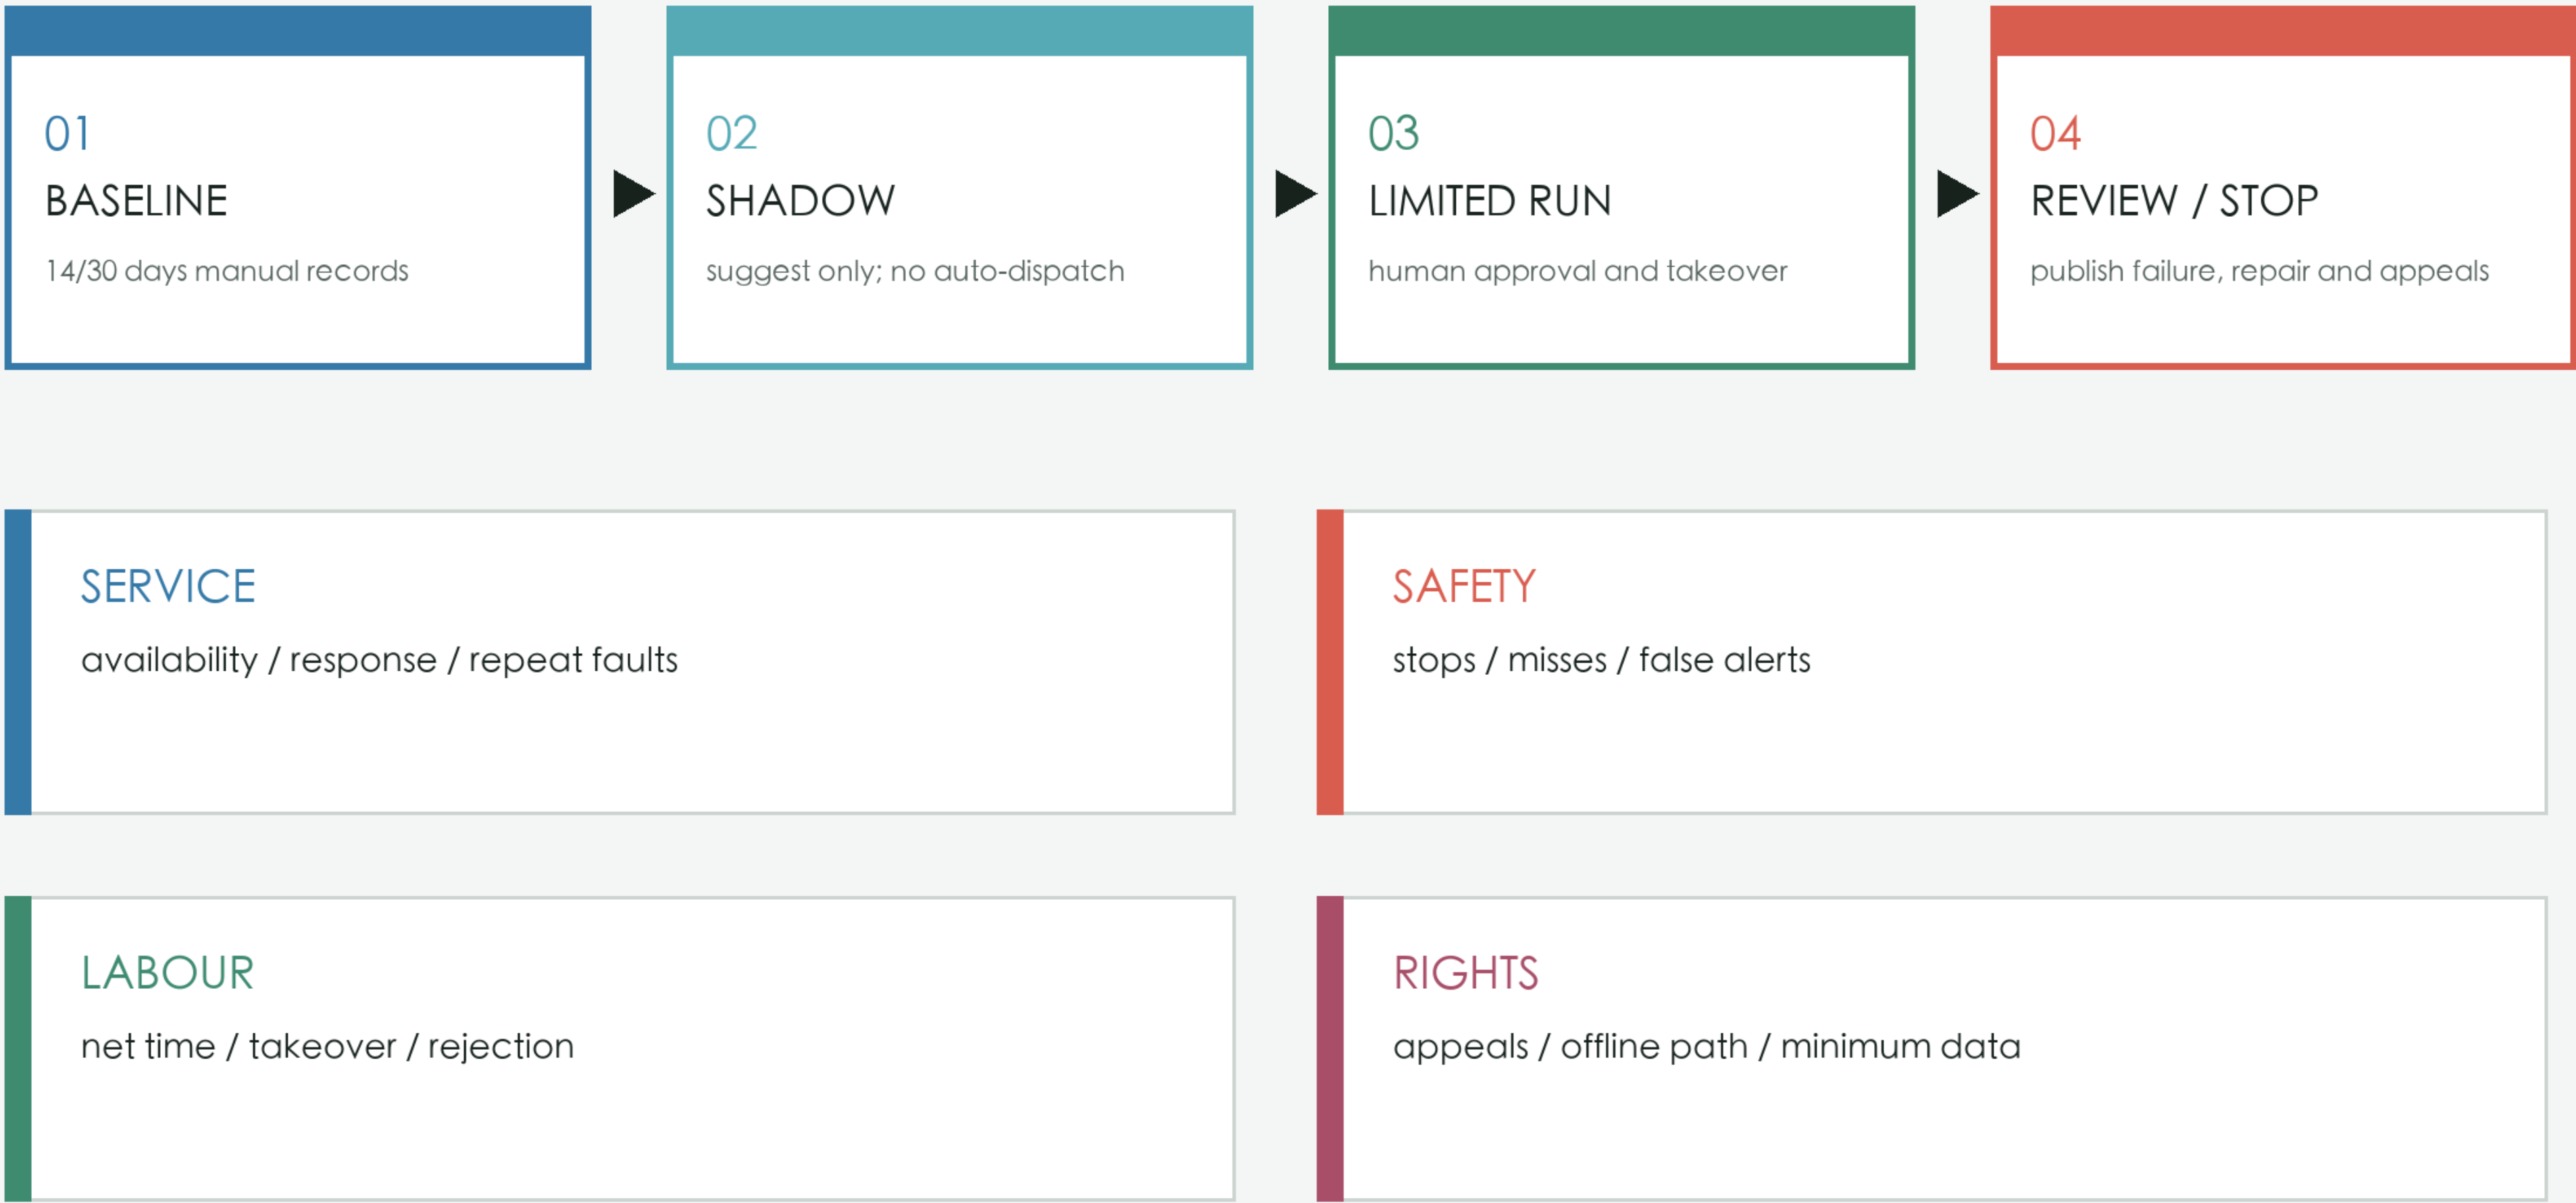

LAND USE · NOT A DEVELOPMENT INTENSITY CLAIM

Four land-use roles, one reliability chain

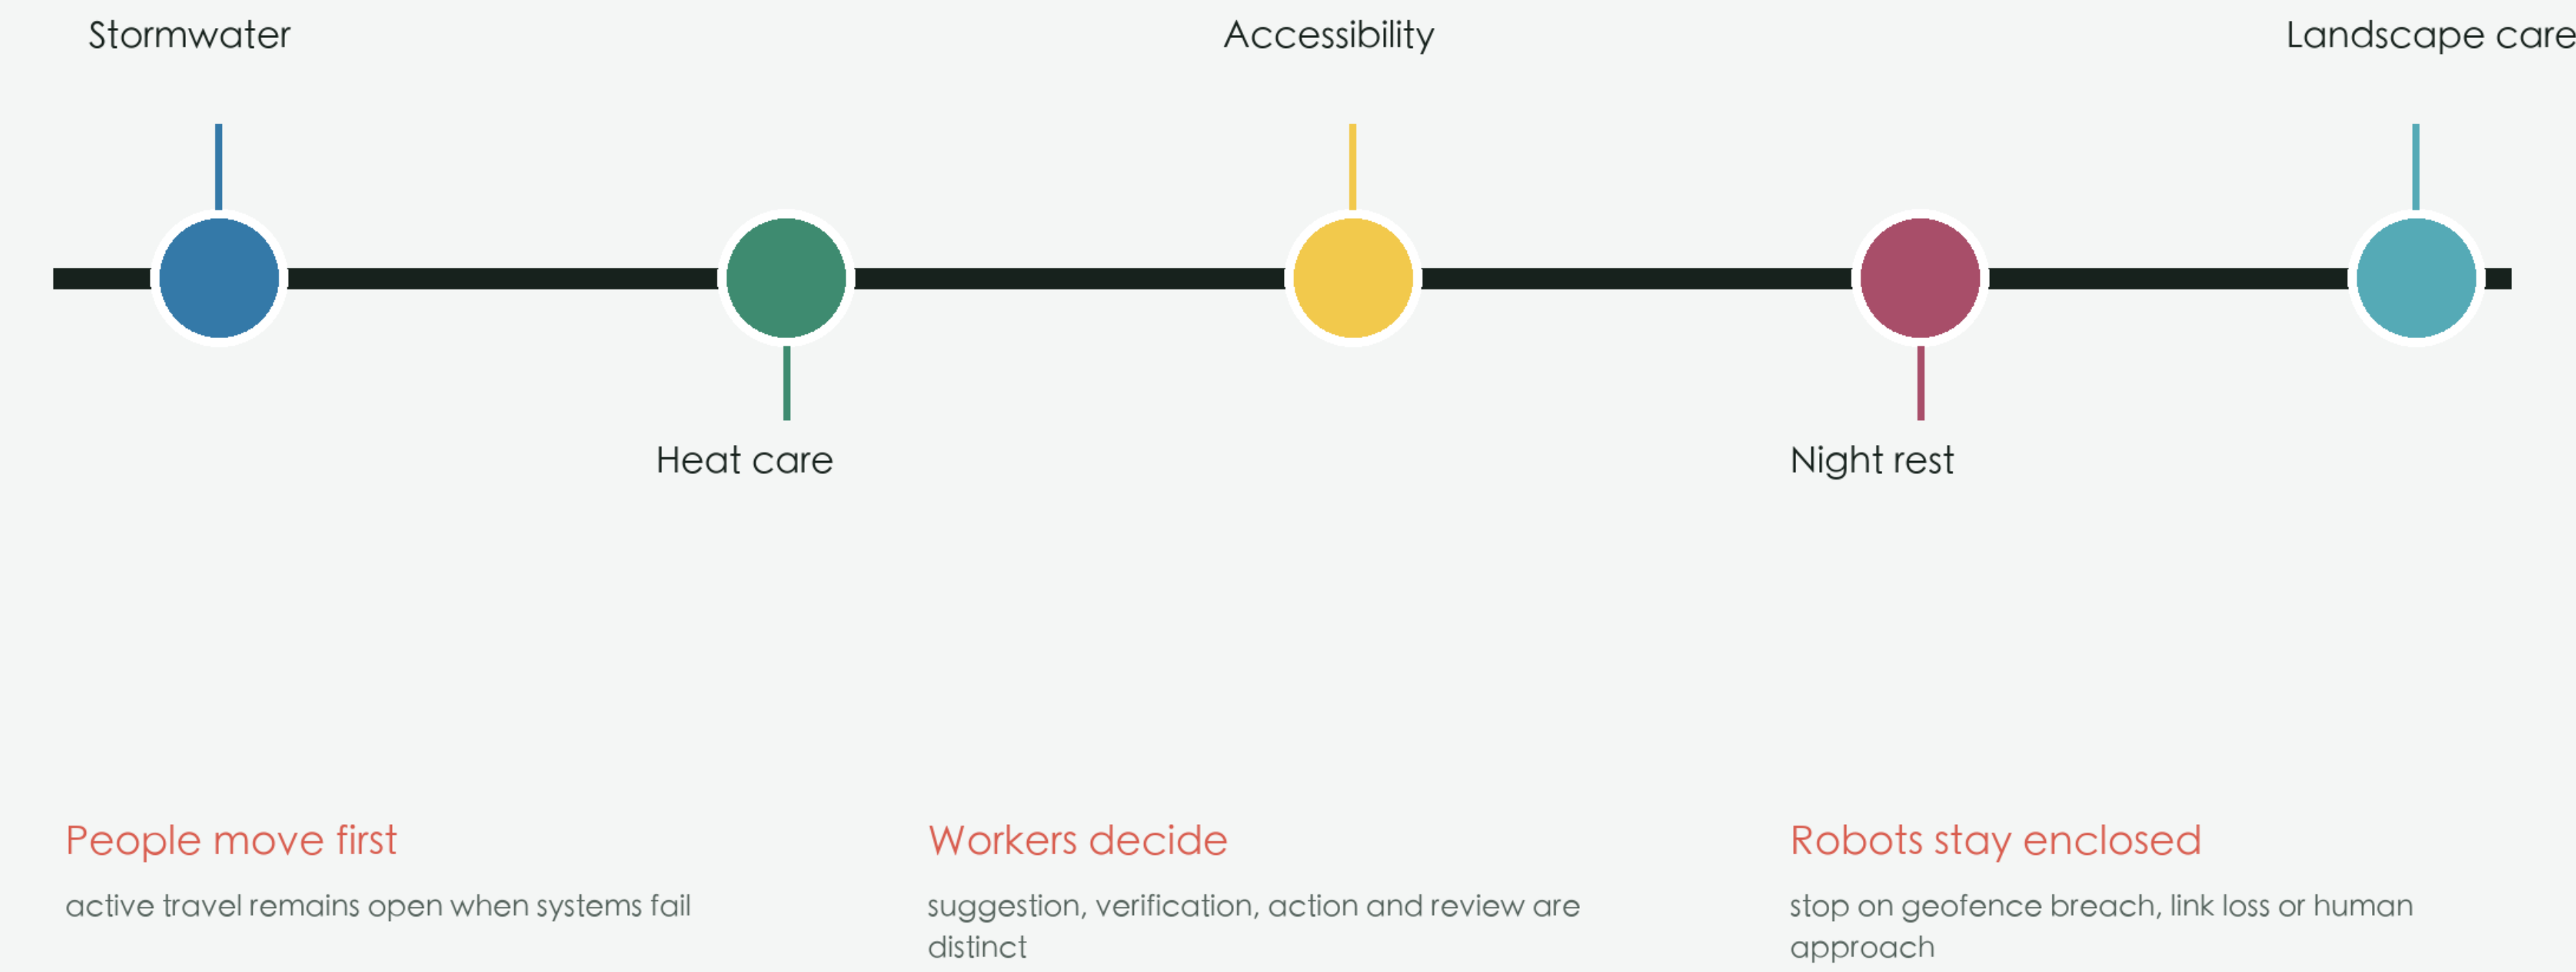

METRICS · EVIDENCE · FALLBACK

A ledger of accountability and stopping, not an accuracy dashboard

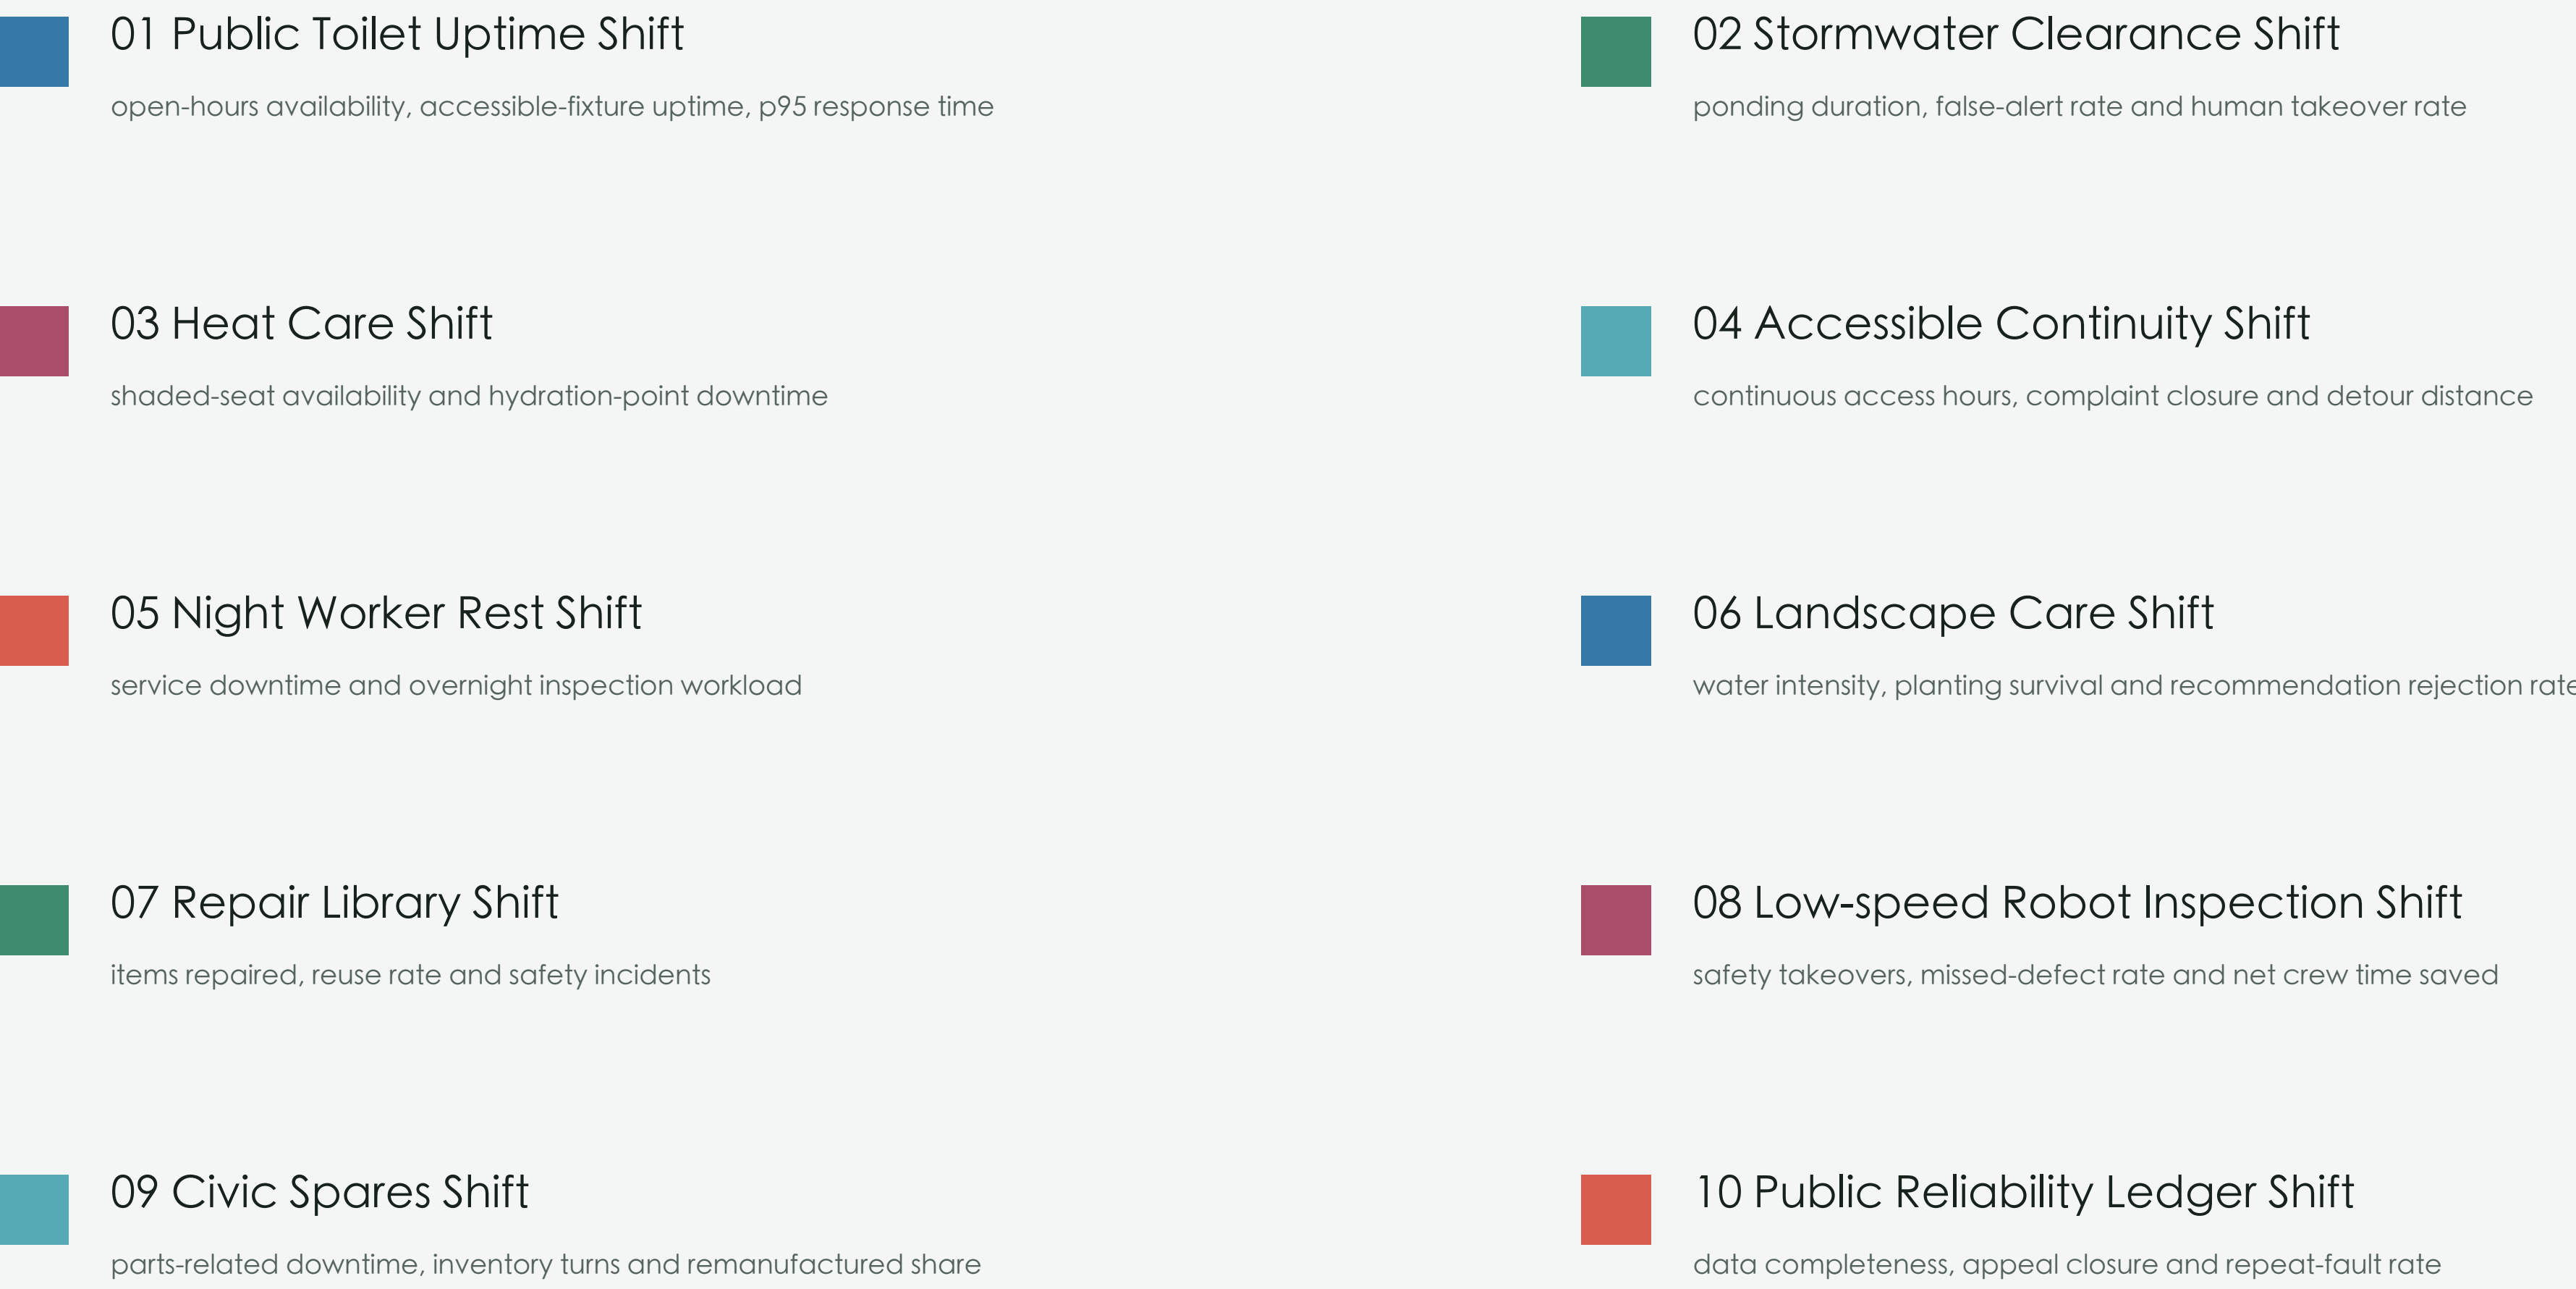

ACTIVE TRAVEL · BLUE-GREEN · MAINTENANCE

One line carries five shifts without adding a redline

TEN URBAN RELIABILITY SHIFTS

AI clusters, alerts and suggests; people verify, act, appeal and fall back.
