

JINGZHANG CAREWORKS: FROM RAIL CARE TO CITY CARE

Human-first infrastructure for urban repair and care

JINGZHANG CAREWORKS · SPATIAL SYSTEM

From rail care to city care: one line, three yards, ten shifts

- 01

CARE LINE

An accountable service connection across the existing green corridor; no new road redline.
- 03

CAREWORKS YARDS

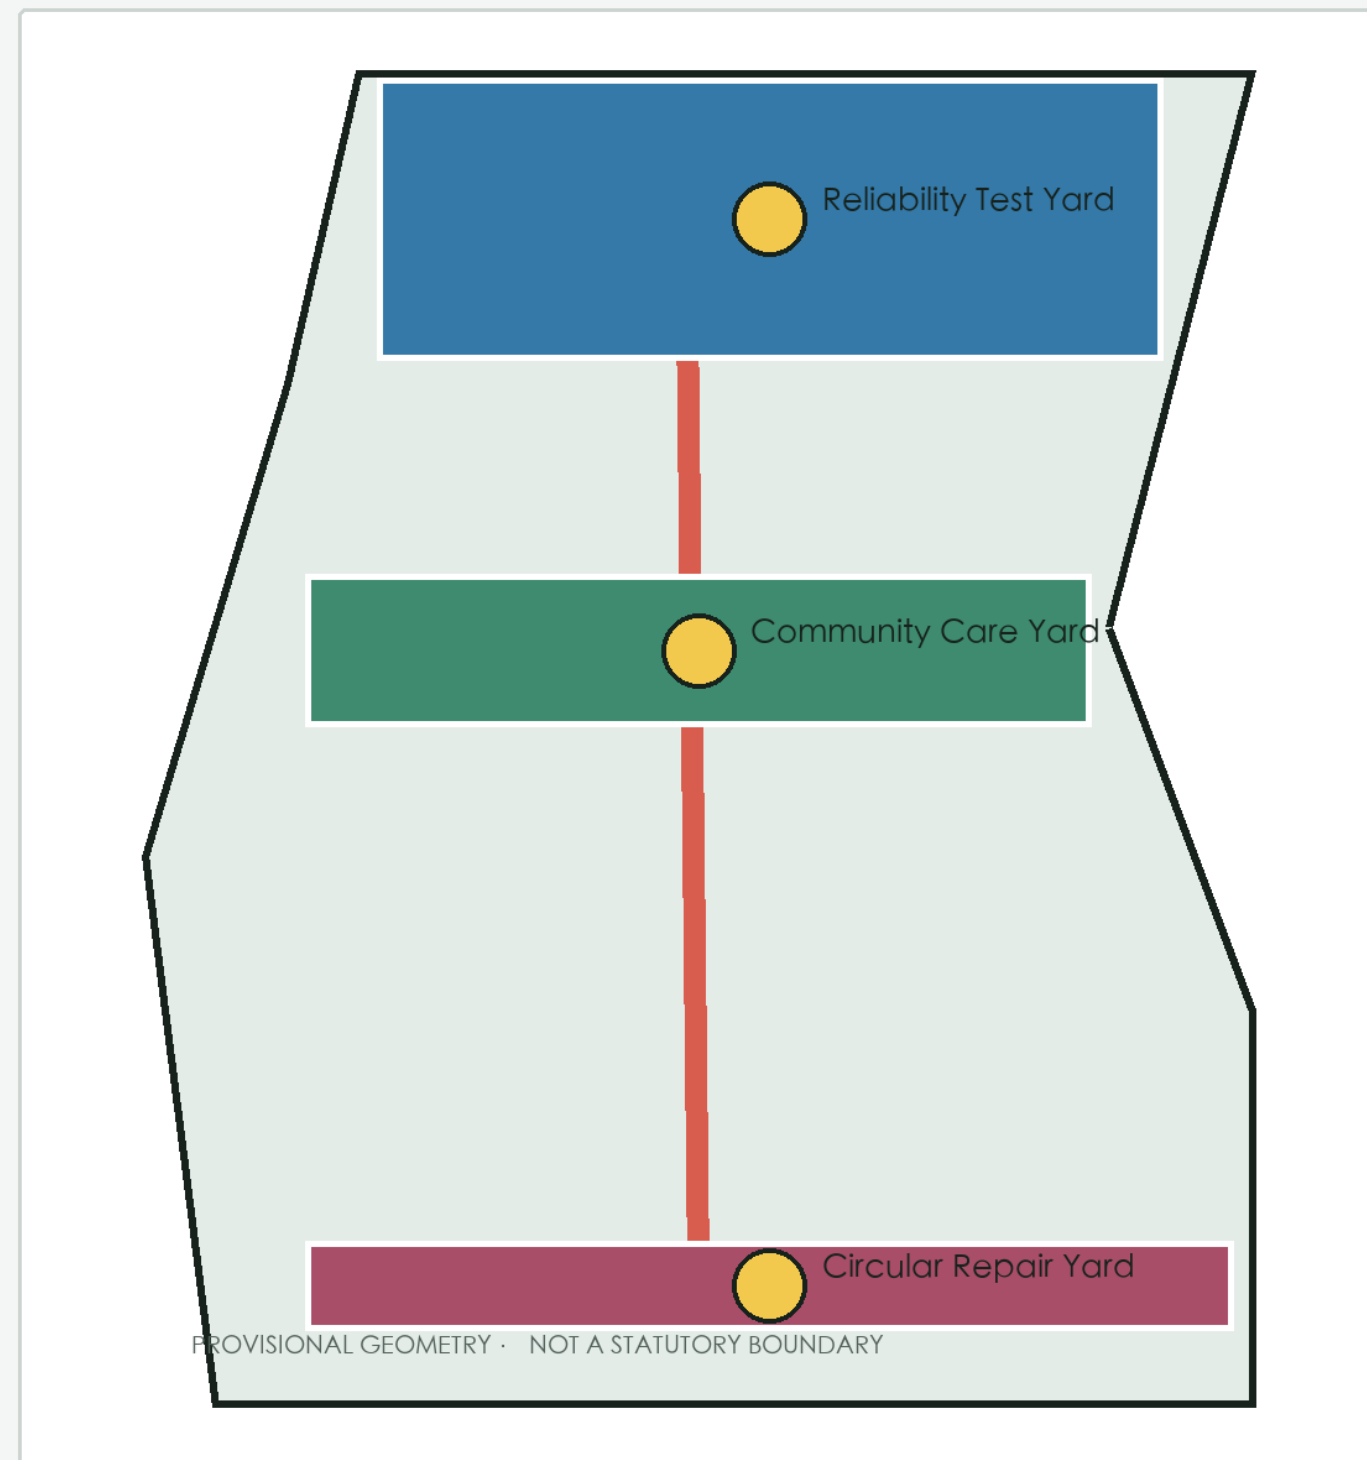

Test reliability, share community reports, and repair through a circular supply chain.
- 10

RELIABILITY SHIFTS

01 Public Toilet Uptime Shift	02 Stormwater Clearance Shift
03 Heat Care Shift	04 Accessible Continuity Shift
05 Night Worker Rest Shift	06 Landscape Care Shift
07 Repair Library Shift	08 Low-speed Robot Inspection Shift
09 Civic Spares Shift	10 Public Reliability Ledger Shift

LAND USE · NOT A DEVELOPMENT INTENSITY CLAIM

Four land-use roles, one reliability chain

Reliability R&D and testing

LAND USE 0802

Test and evaluate; no FAR claim

Park and heat shelter

LAND USE 1401

Shade, water, irrigation and pre-rain clearance

Repair manufacturing and circular service

LAND USE 05

Shared spares, remanufacturing and small repair

Community care and public service

LAND USE 0702

Toilets, accessibility, night work and offline desks

Official FAR, height, ownership and demolition data are absent. All intensity values remain unknown.

KEY AREAS · PROVISIONAL BOUNDARIES

Three areas, three different responsibilities

01

ZHONGZHIYUAN

RELIABILITY TEST YARD

enclosed track · shadow mode ·
human takeover

P-02

90 days / baseline / stoppable

02

AI ORIGIN COMMUNITY

COMMUNITY CARE YARD

toilets · accessibility · heat · offline
desk

P-01

90 days / baseline / stoppable

03

DAZHONGSI

CIRCULAR REPAIR YARD

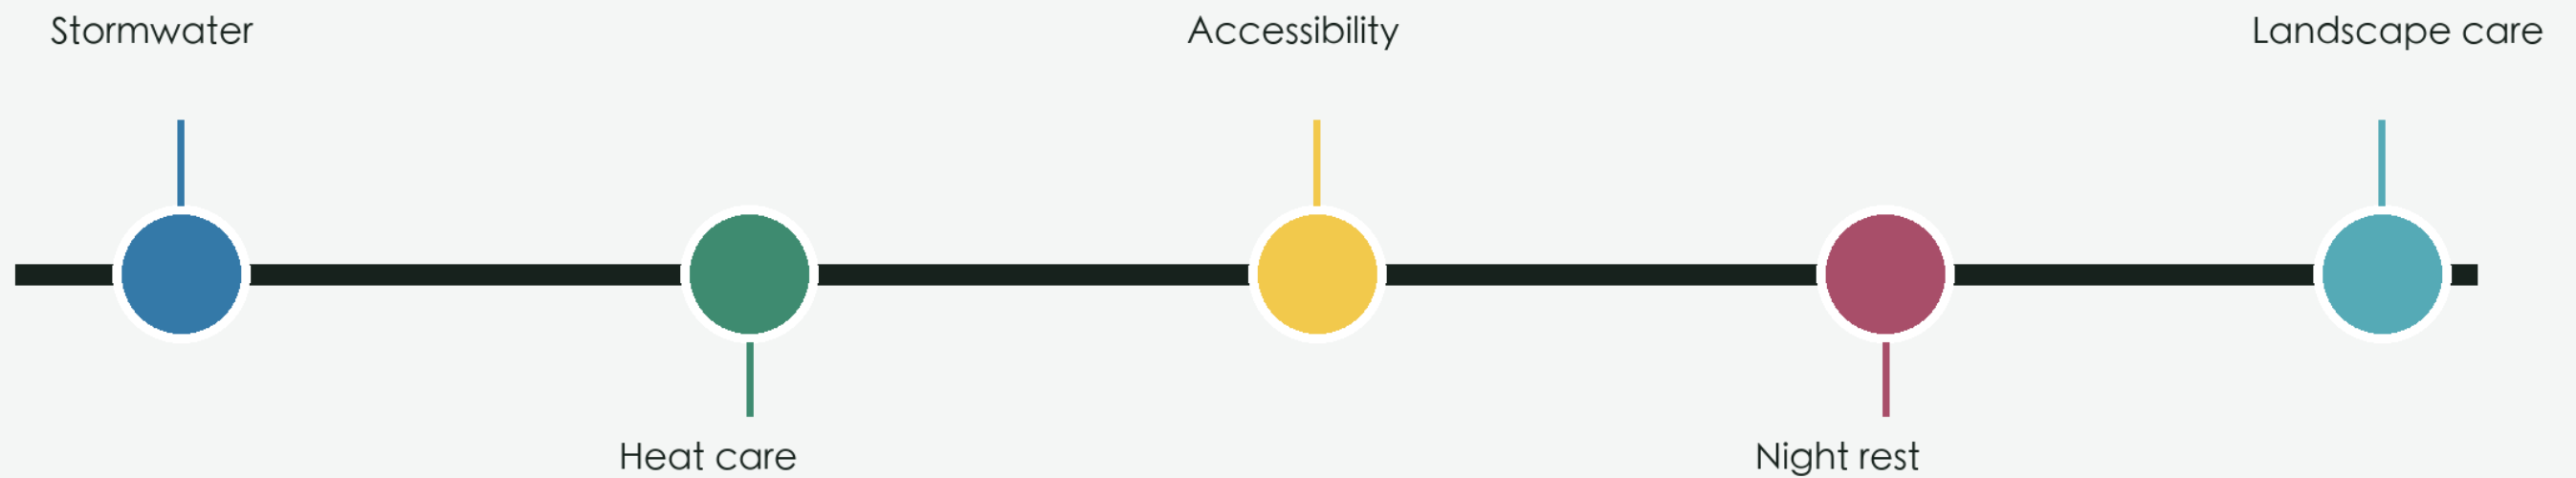

shared spares · remanufacture · human
procurement

P-03

90 days / baseline / stoppable

ACTIVE TRAVEL · BLUE-GREEN · MAINTENANCE

One line carries five shifts without adding a redline

People move first

active travel remains open when systems fail

Workers decide

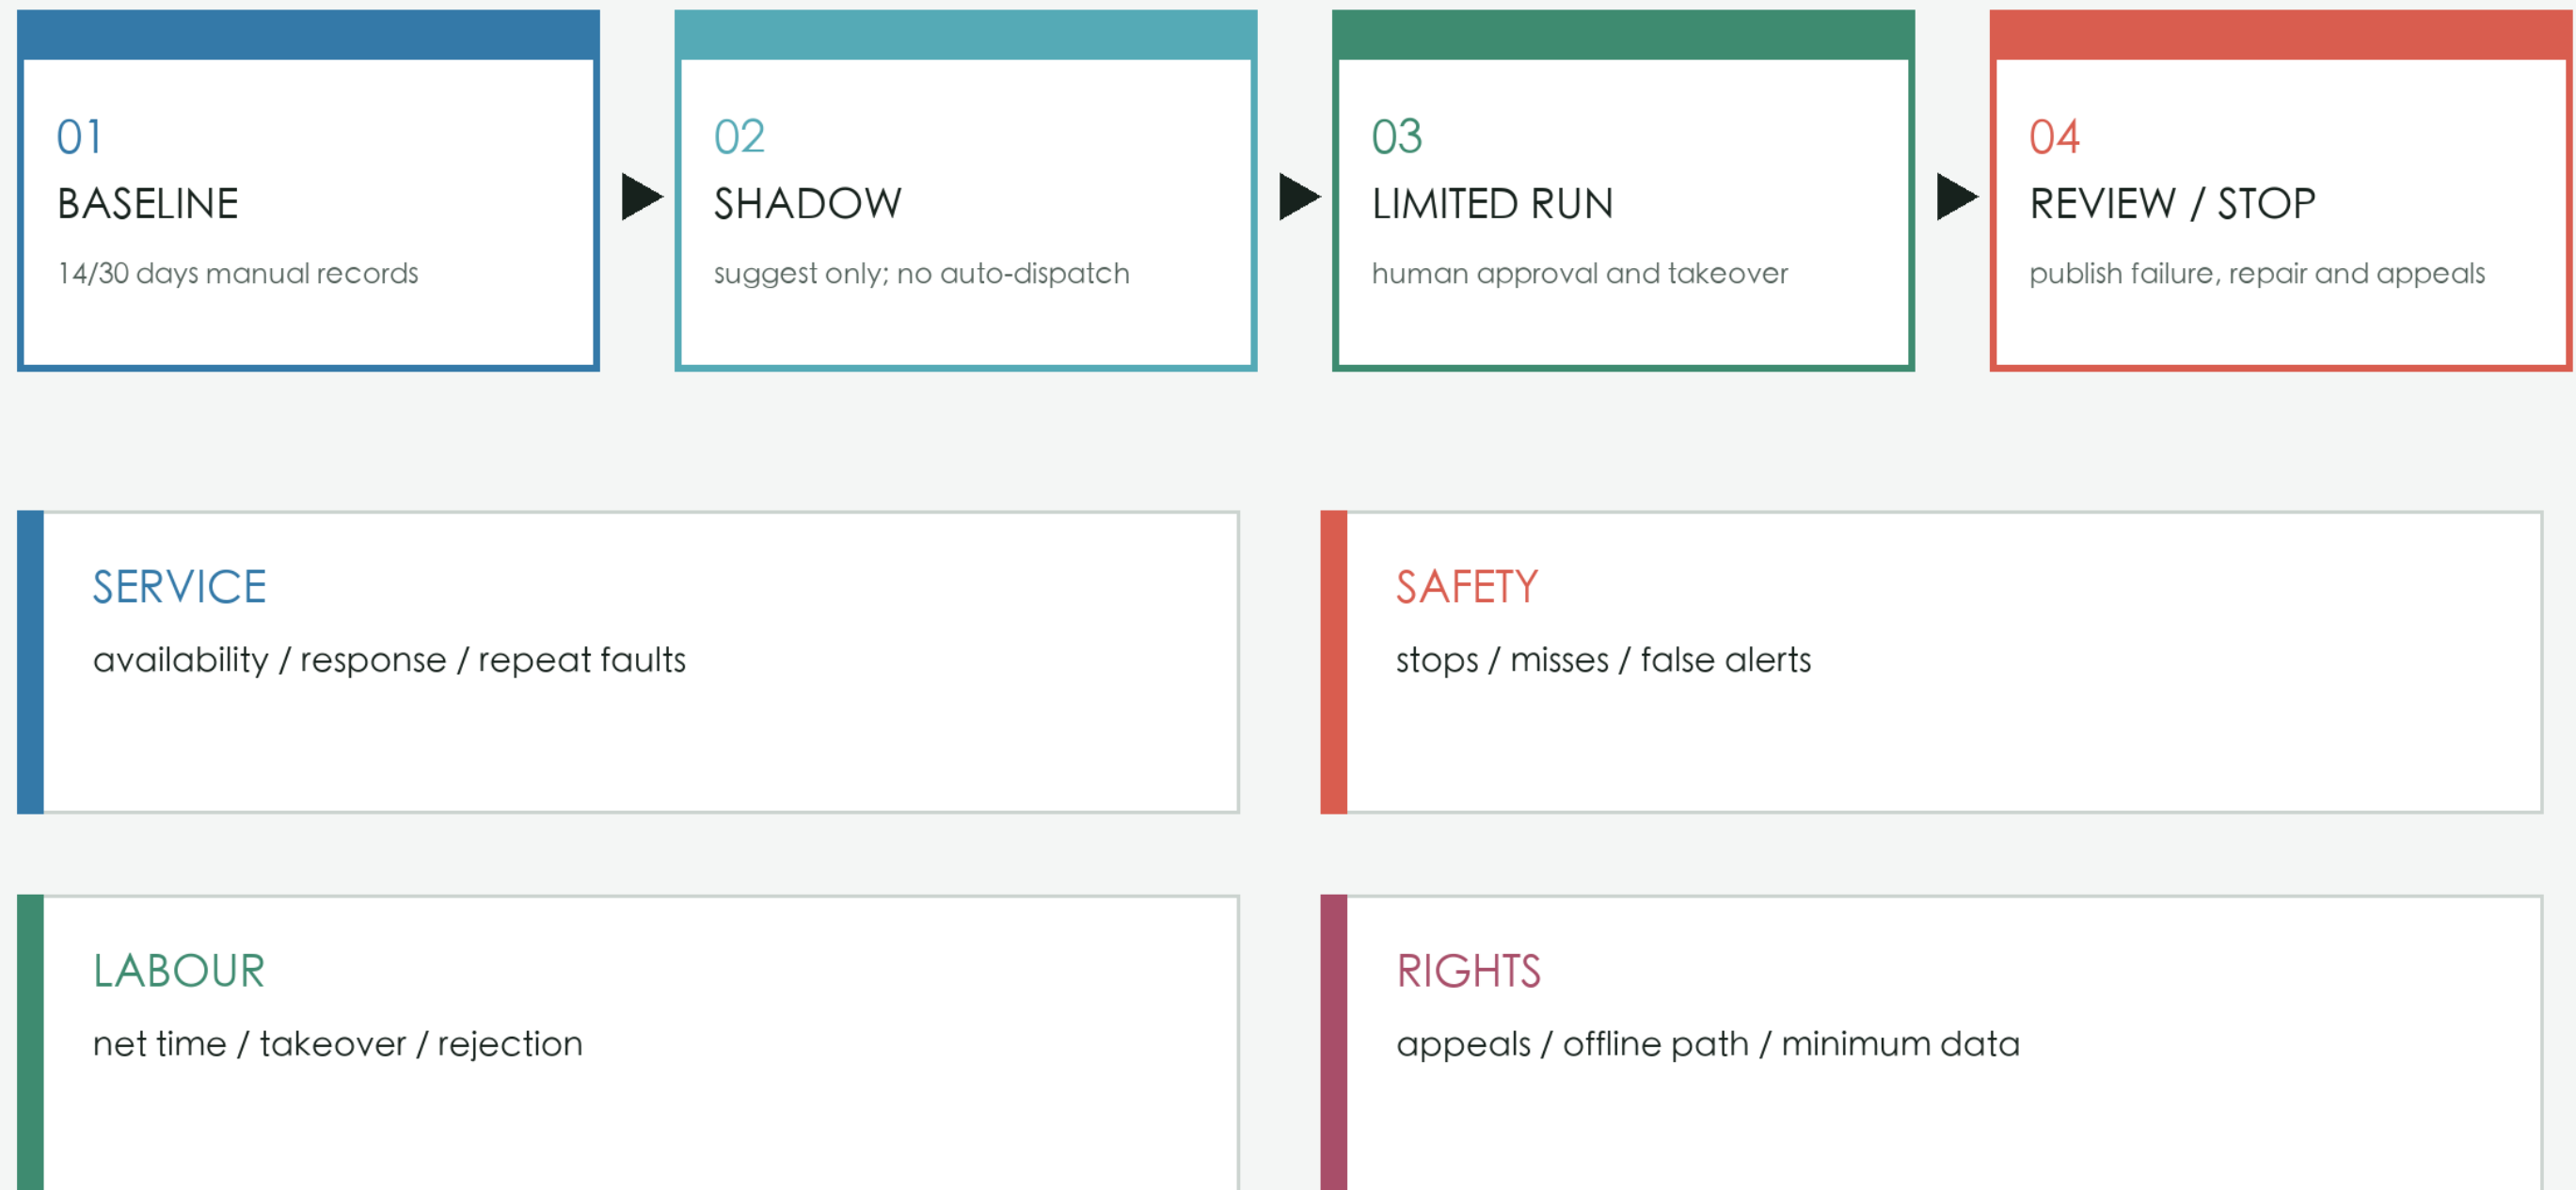

suggestion, verification, action and review are distinct

Robots stay enclosed

stop on geofence breach, link loss or human approach

METRICS · EVIDENCE · FALLBACK

A ledger of accountability and stopping, not an accuracy dashboard

01 Public Toilet Uptime Shift

open-hours availability, accessible-fixture uptime, p95 response time

02 Stormwater Clearance Shift

ponding duration, false-alert rate and human takeover rate

03 Heat Care Shift

shaded-seat availability and hydration-point downtime

04 Accessible Continuity Shift

continuous access hours, complaint closure and detour distance

05 Night Worker Rest Shift

service downtime and overnight inspection workload

06 Landscape Care Shift

water intensity, planting survival and recommendation rejection rate

07 Repair Library Shift

items repaired, reuse rate and safety incidents

08 Low-speed Robot Inspection Shift

safety takeovers, missed-defect rate and net crew time saved

09 Civic Spares Shift

parts-related downtime, inventory turns and remanufactured share

10 Public Reliability Ledger Shift

data completeness, appeal closure and repeat-fault rate
