

Overall design overview — three scope layers / one pilot strip

Scope cards — separated from node cards

1 Research coordination scope

43.6 km² • industry / city / governance
research frame; not a construction redline

2 Overall design scope

~11.41 million m² / 11.4 km²
urban renewal + control-depth concept

3 Key-area scope

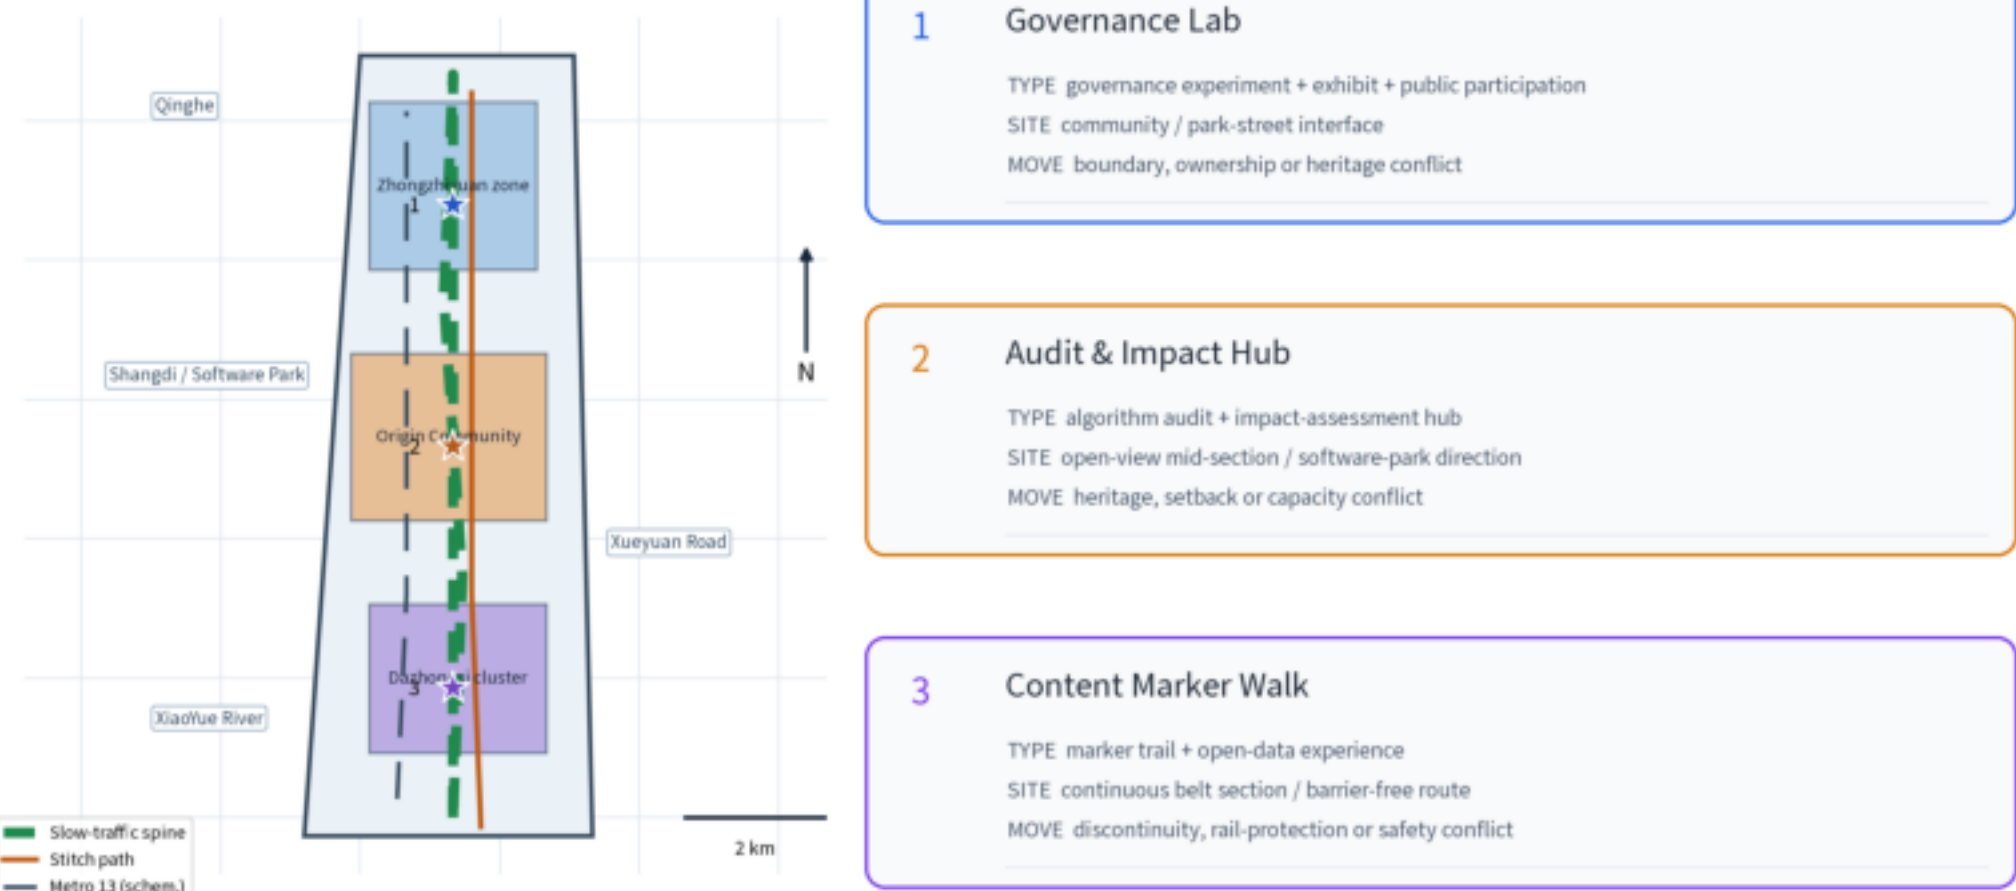

368.4 ha • three areas + two wings
node siting is concept-only; boundary first

Pilot strip crosses the overall-design and key-area layers; node cards are on the next sheet.

PROVISIONAL concept boundary • not an official redline • recompute after official release

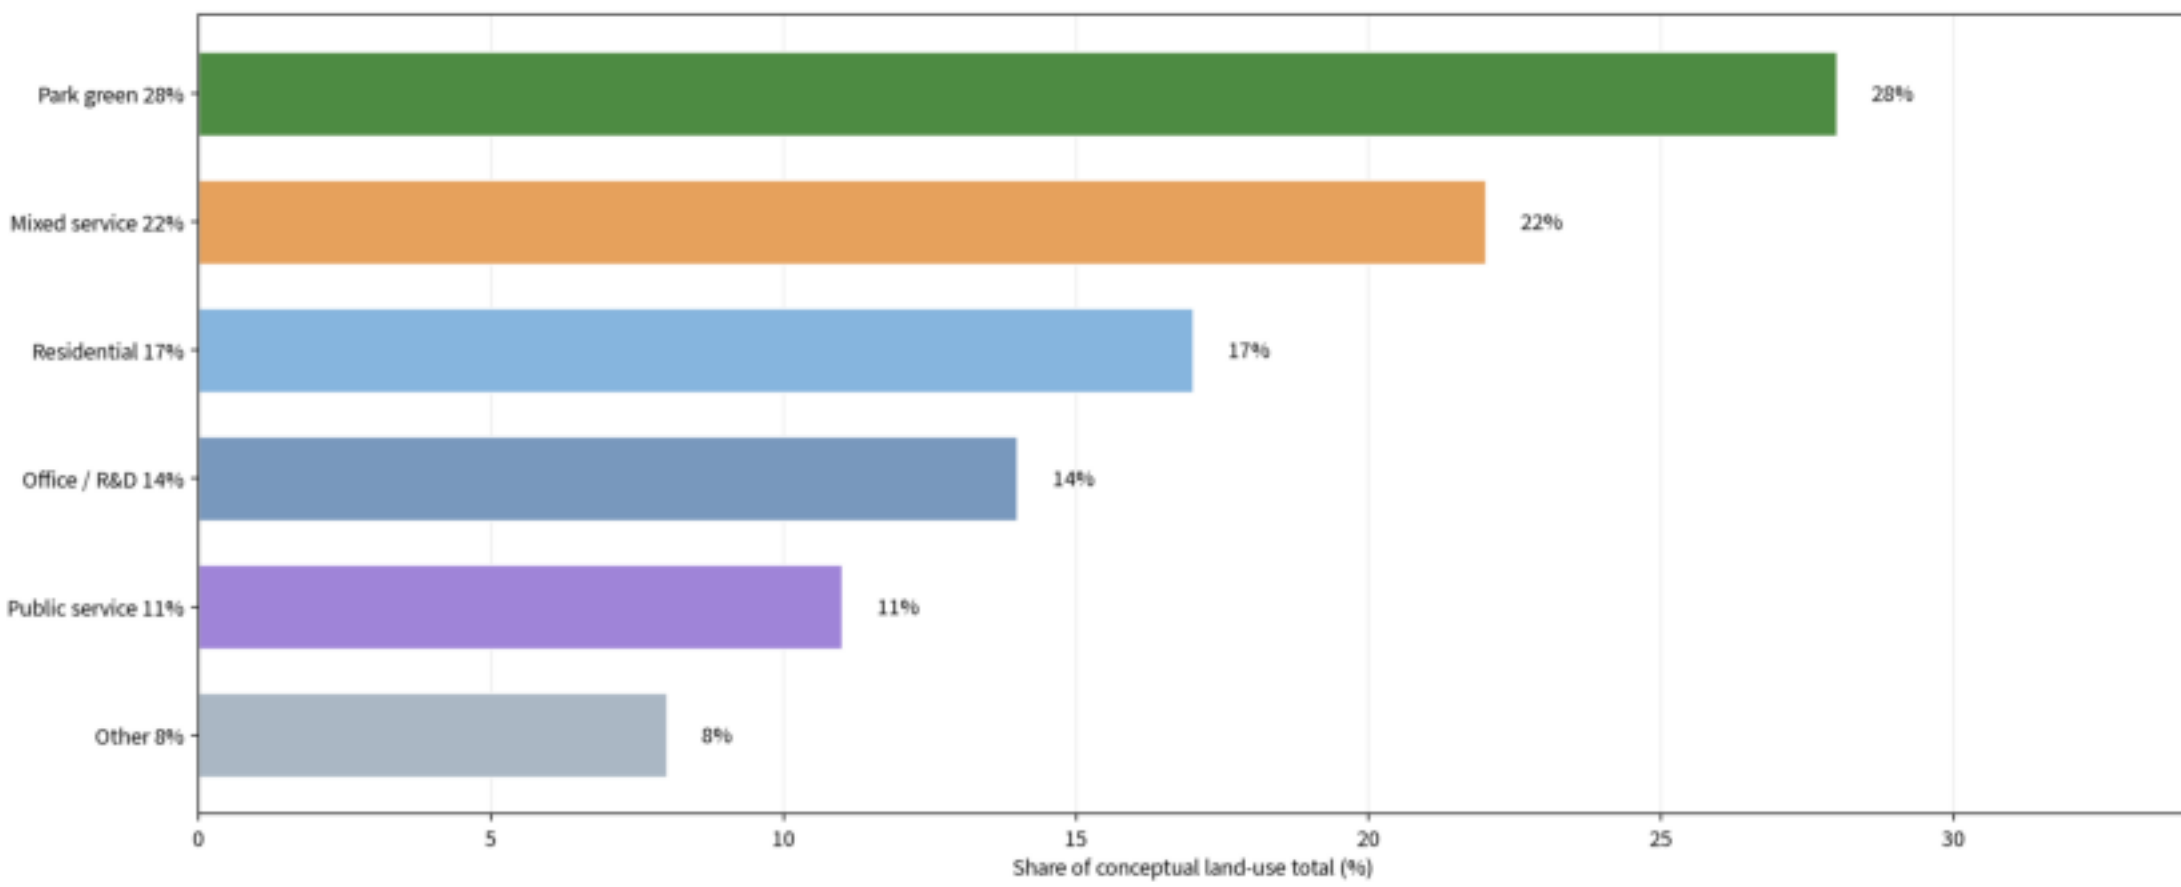

Three node cards — type / siting / relocation trigger

Functional node labels • concept locations only • official boundaries prevail
Functional identity • no logo #111827 #2563EB #16A34A #D97706 #7C3AED

Self-drawn functional diagrams • no exclusive logo or mark • provisional geometry

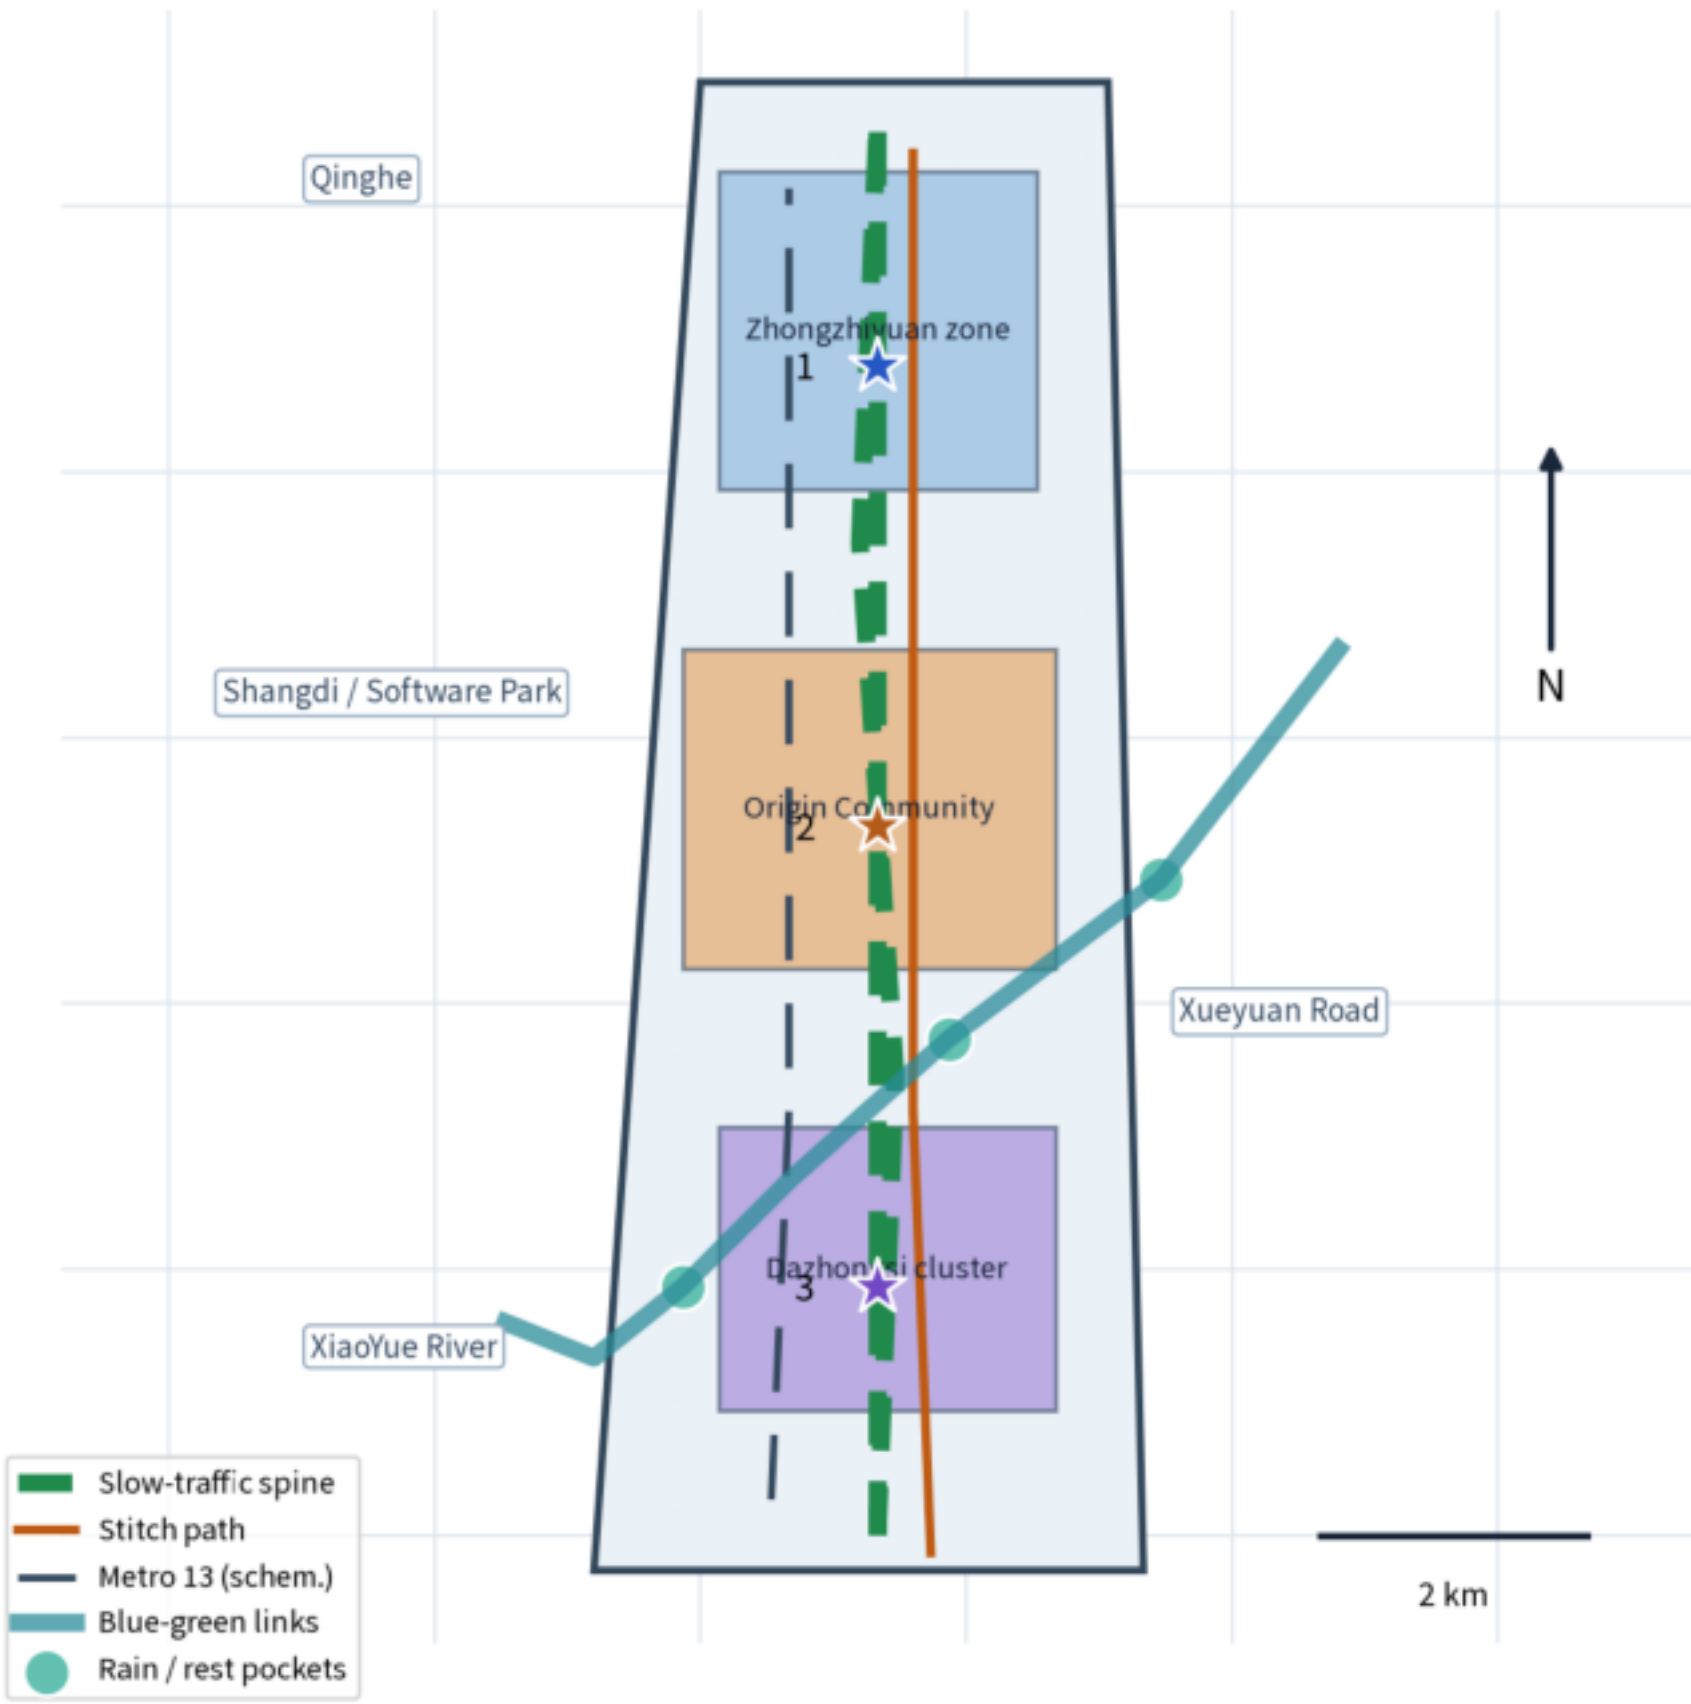

Land-use structure — concept classification, denominator kept explicit

Park-green 28% is a land-use classification share; green_ratio 0.122 uses green polygons / site area.

PROVISIONAL concept boundary • not an official redline • recompute after official release

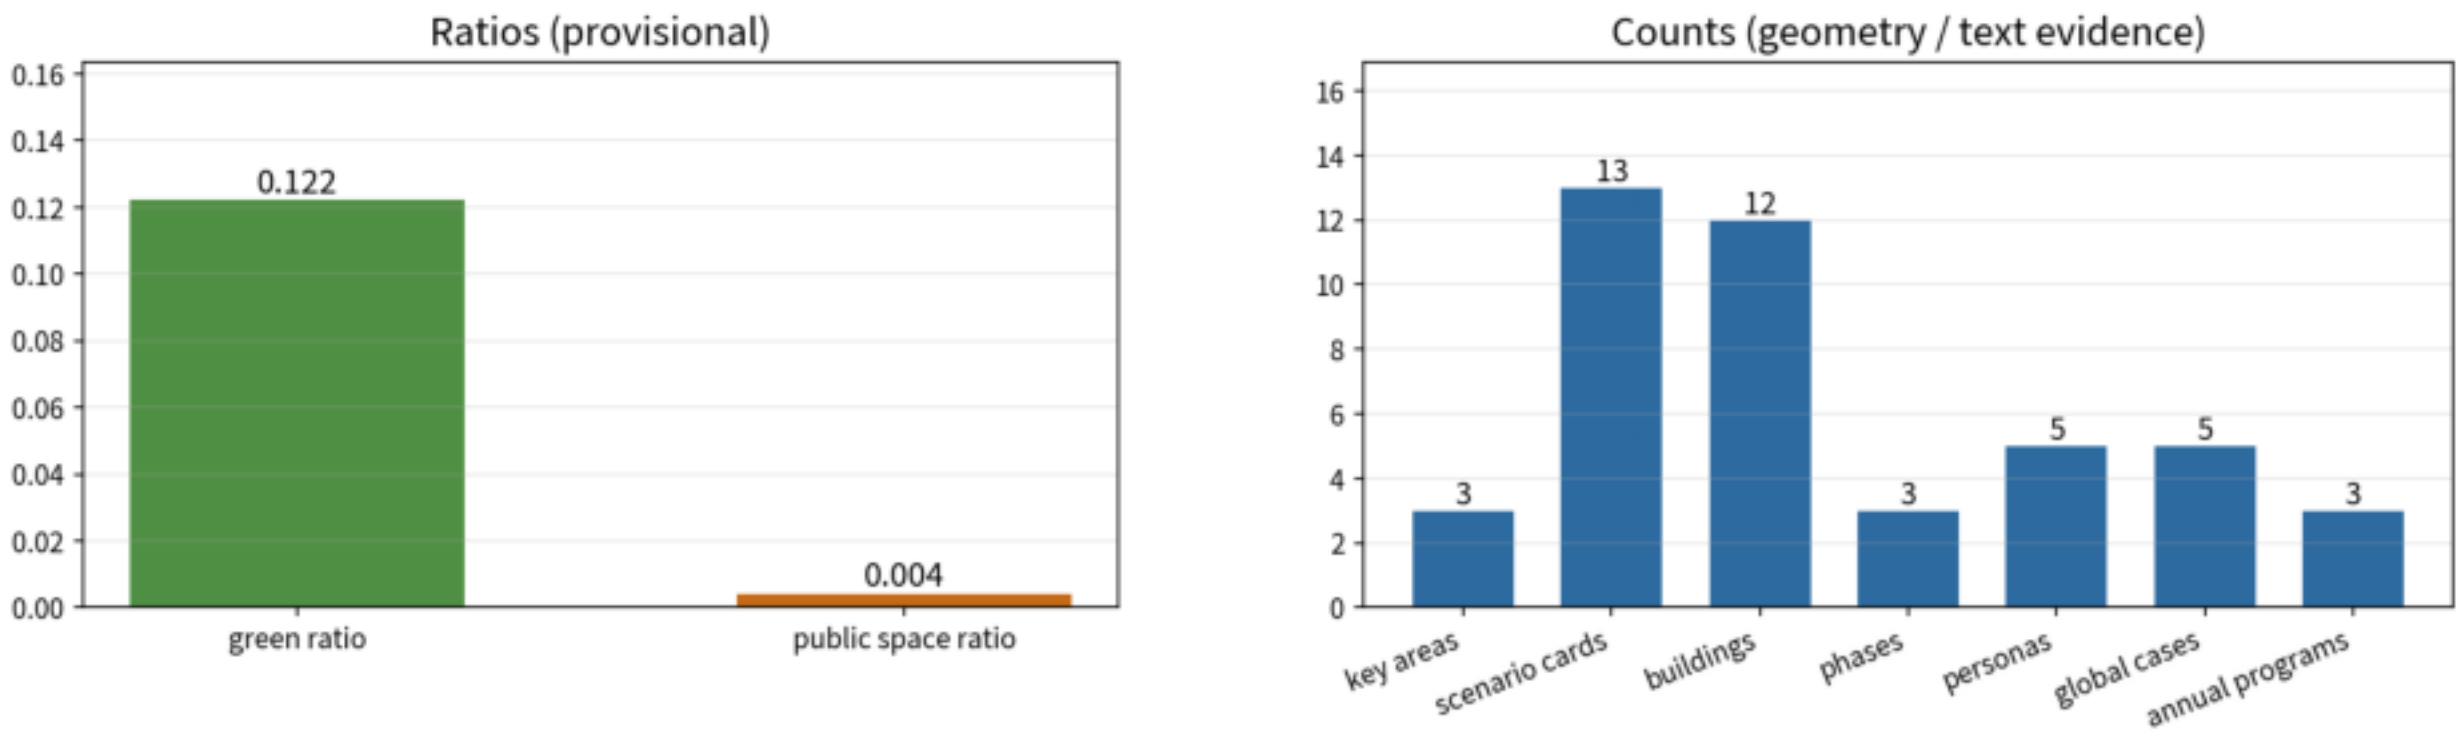

Mobility + blue-green stitch — low-intervention concept

Design checks

- 01 Slow spine remains continuous
- 02 Metro and rail memory stay legible
- 03 No individual identification devices
- 04 Accessibility and manual service at each node
- 05 Recompute after official geometry

Core indicator evidence — distinct cases and annual cadence

Indicator	Trace	Formula / definition	Conf.	Use limit
Distinct global cases	proposal.md + sources.json	de-duplicated mechanism/city count	high	concept reference
Annual programs	proposal.md	open day + audit week + marker expo; each once per year	high	concept suggestion
green_ratio	green_space / site_boundary	green area / site area	low	recompute after official geometry

PROVISIONAL concept boundary • not an official redline • recompute after official release

All values are provisional concept evidence; the five global cases are distinct and the three annual programs each occur once per year.
