

Brand Identity Concept: PAR-JZ Participation Loop

PAR-JZ = Participation • Jing-Zhang

PROVISIONAL boundary • not an official redline • recalculate after official data

Three-Areas-Two-Wings, Three Positionings & Five Functions Framework

PROVISIONAL boundary • not an official redline • recalculate after official data

Three-Areas-Two-Wings, Three Positionings & Five Functions Framework

Positioning 1: Centennial Jing-Zhang Culture Belt
green belt & heritage -> participation carriers (raise, verify, share)

Positioning 2: Metropolitan AI Life Experience Belt
participation mechanism embedded in Haidian daily life

Positioning 3: AI Integration Innovation Belt
university-tech-station-neighborhood issue coordination network

PROVISIONAL boundary • not an official redline • recalculate after official data

Five functions (focus: governance + scenario enablement)

Full-stack AI innovation

World-class AI ecosystem

AI+ scenario paradigm

Smart AI vital city

Global AI governance voice

Three areas, two wings (concept mapping)

Haidian main area (anchor) • Two wings: green cultural axis + innovation link axis (concept)

Beiwei community

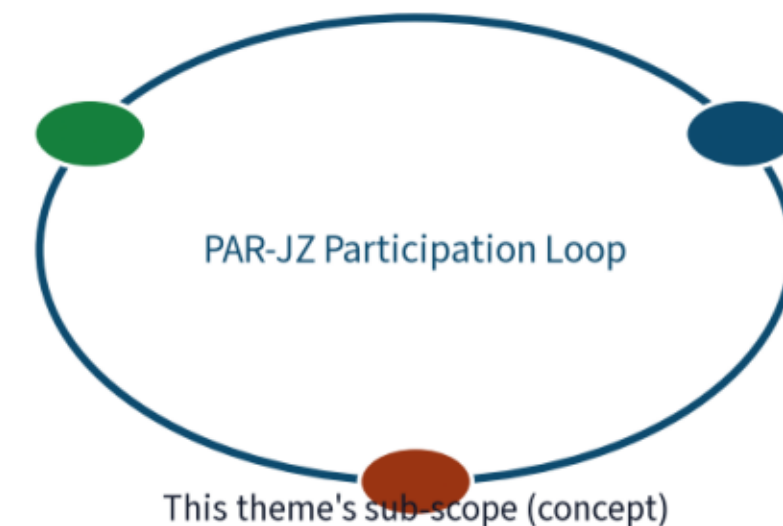

Future Science City

Huairou Science City

Econ-dev zone

Jing-Jin-Ji synergy

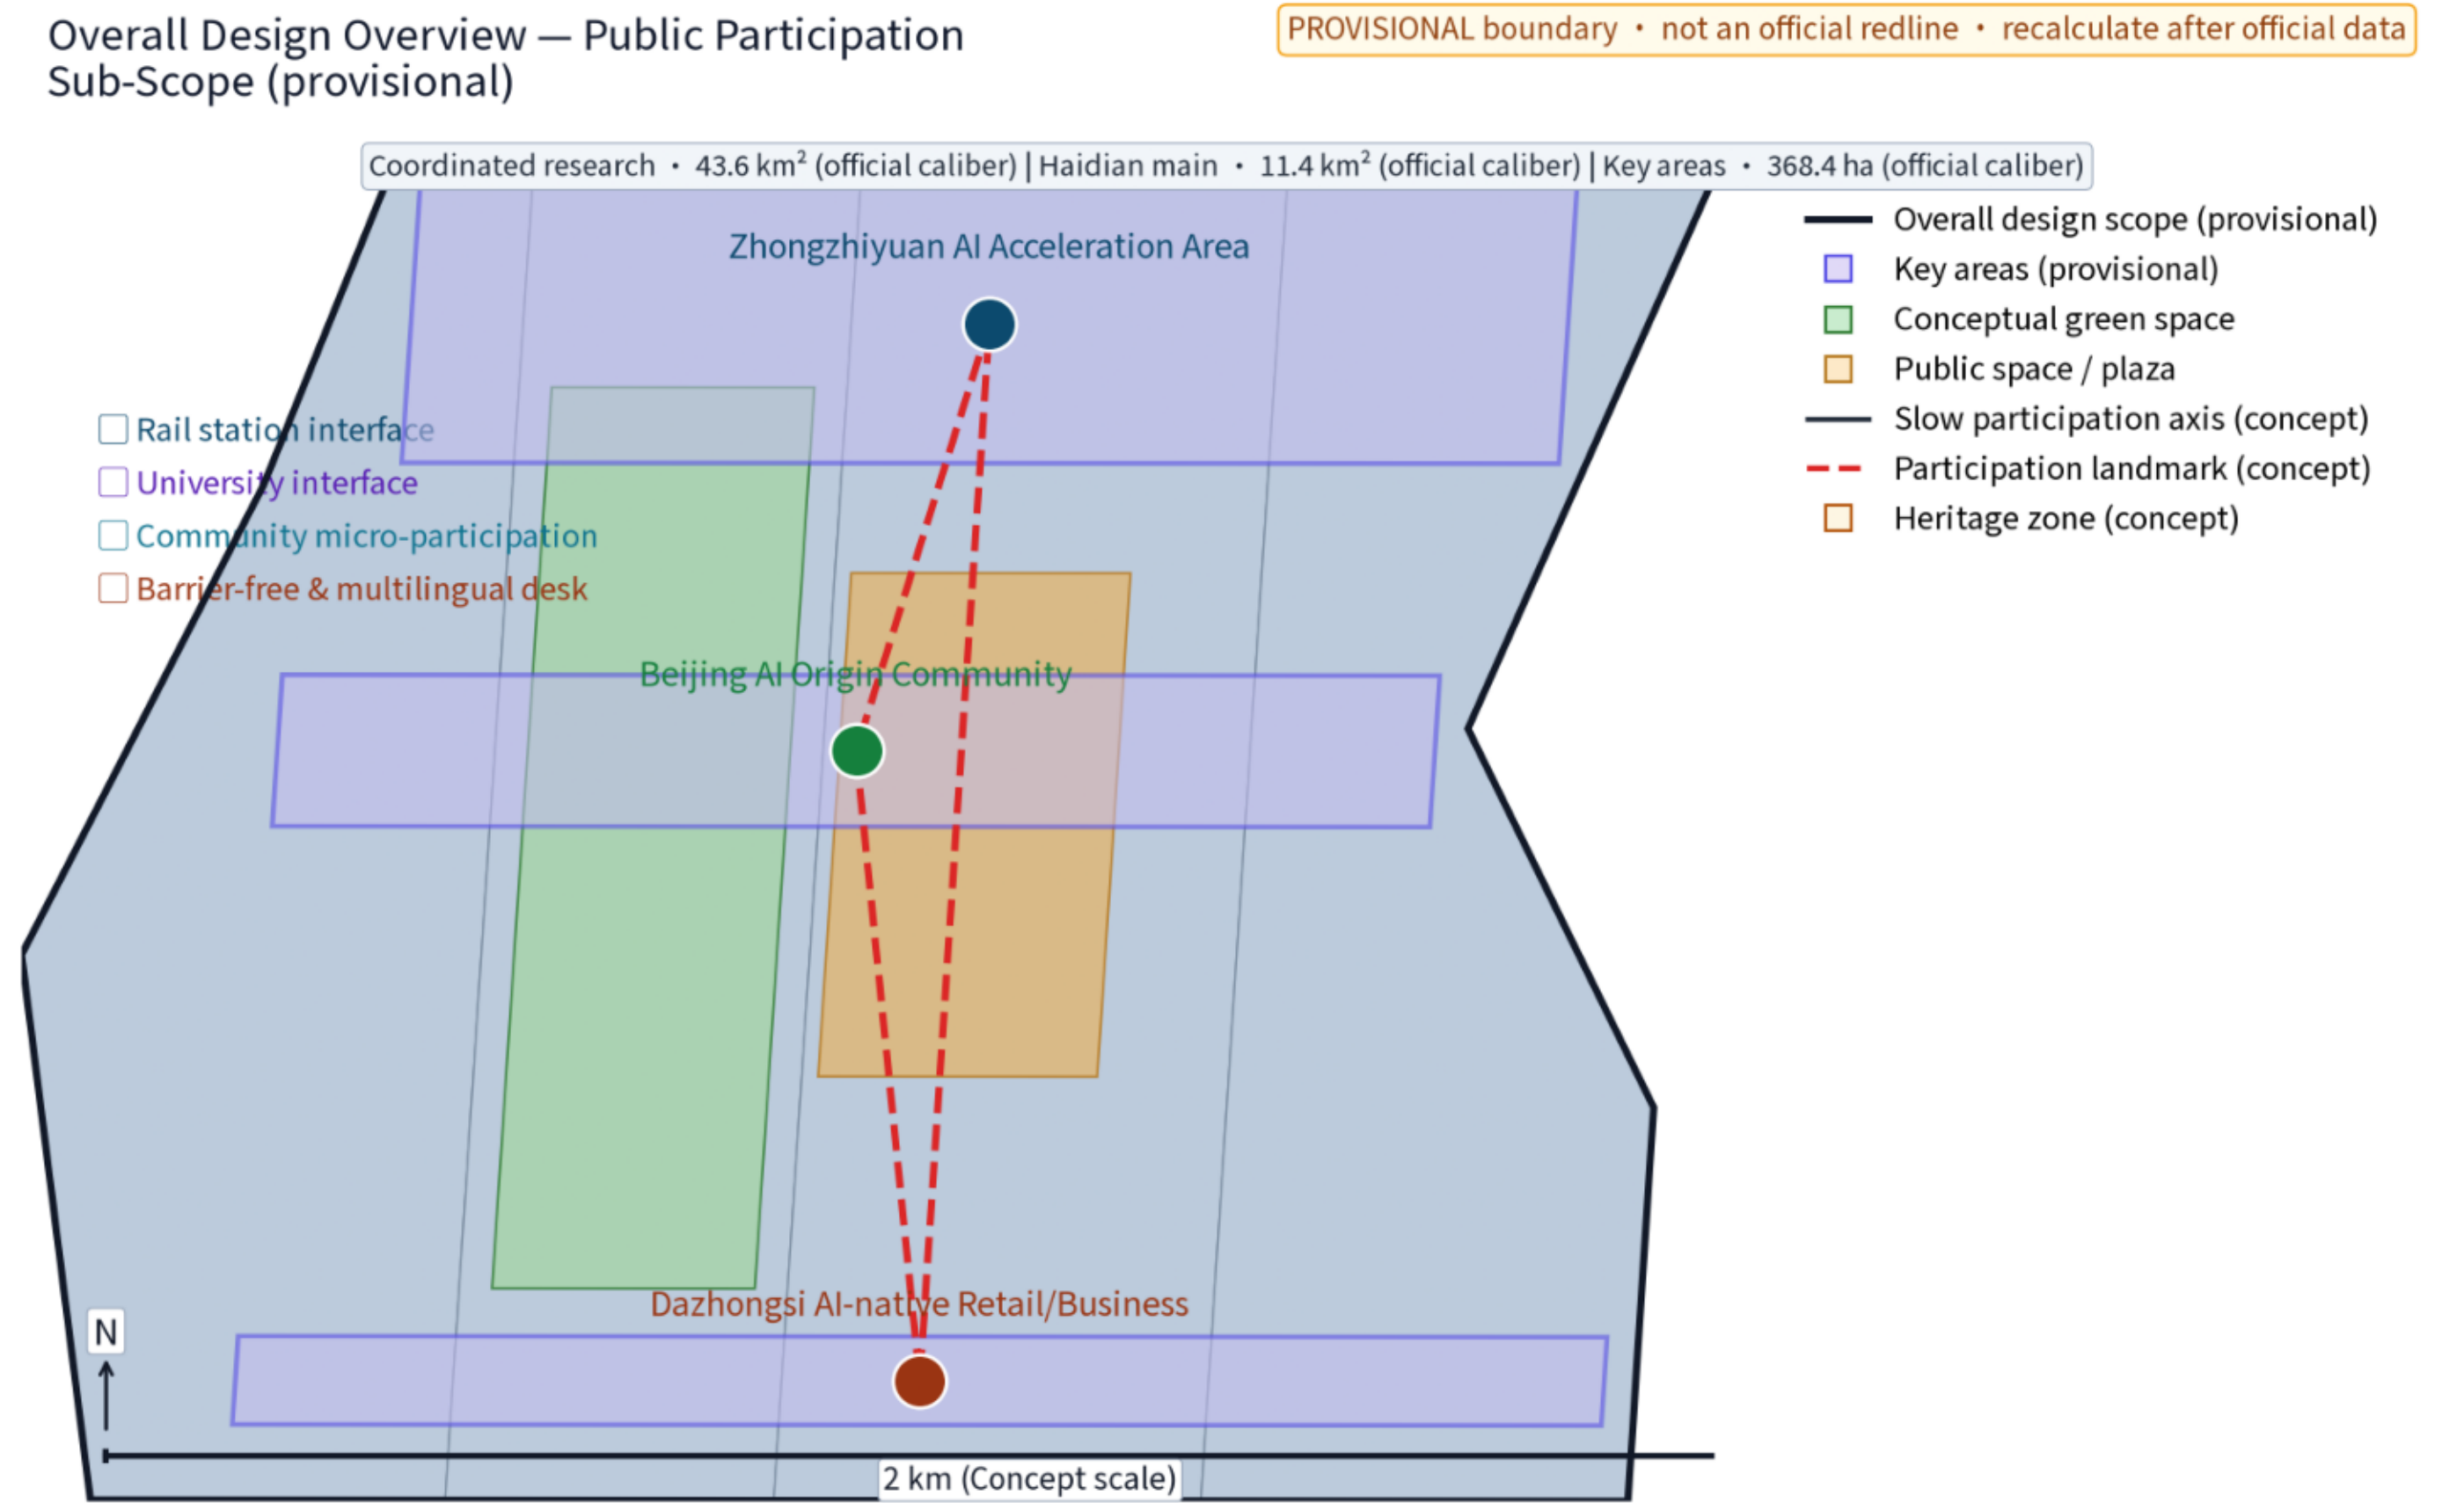

Regional synergy interfaces (concept; no cross-region commitment)

- Inside the overall design area (~11.4 km²)
- Three nodes + continuous slow participation axis
- covenant/assembly/points/publicity/filing
- alliance/volunteer/booking/rotation/grading
- official geometry, heritage/green lines, controls pending
- all pending survey and official-data recompute

Overall Design Overview — Public Participation Sub

PROVISIONAL boundary • not an official redline • recalculate after official data

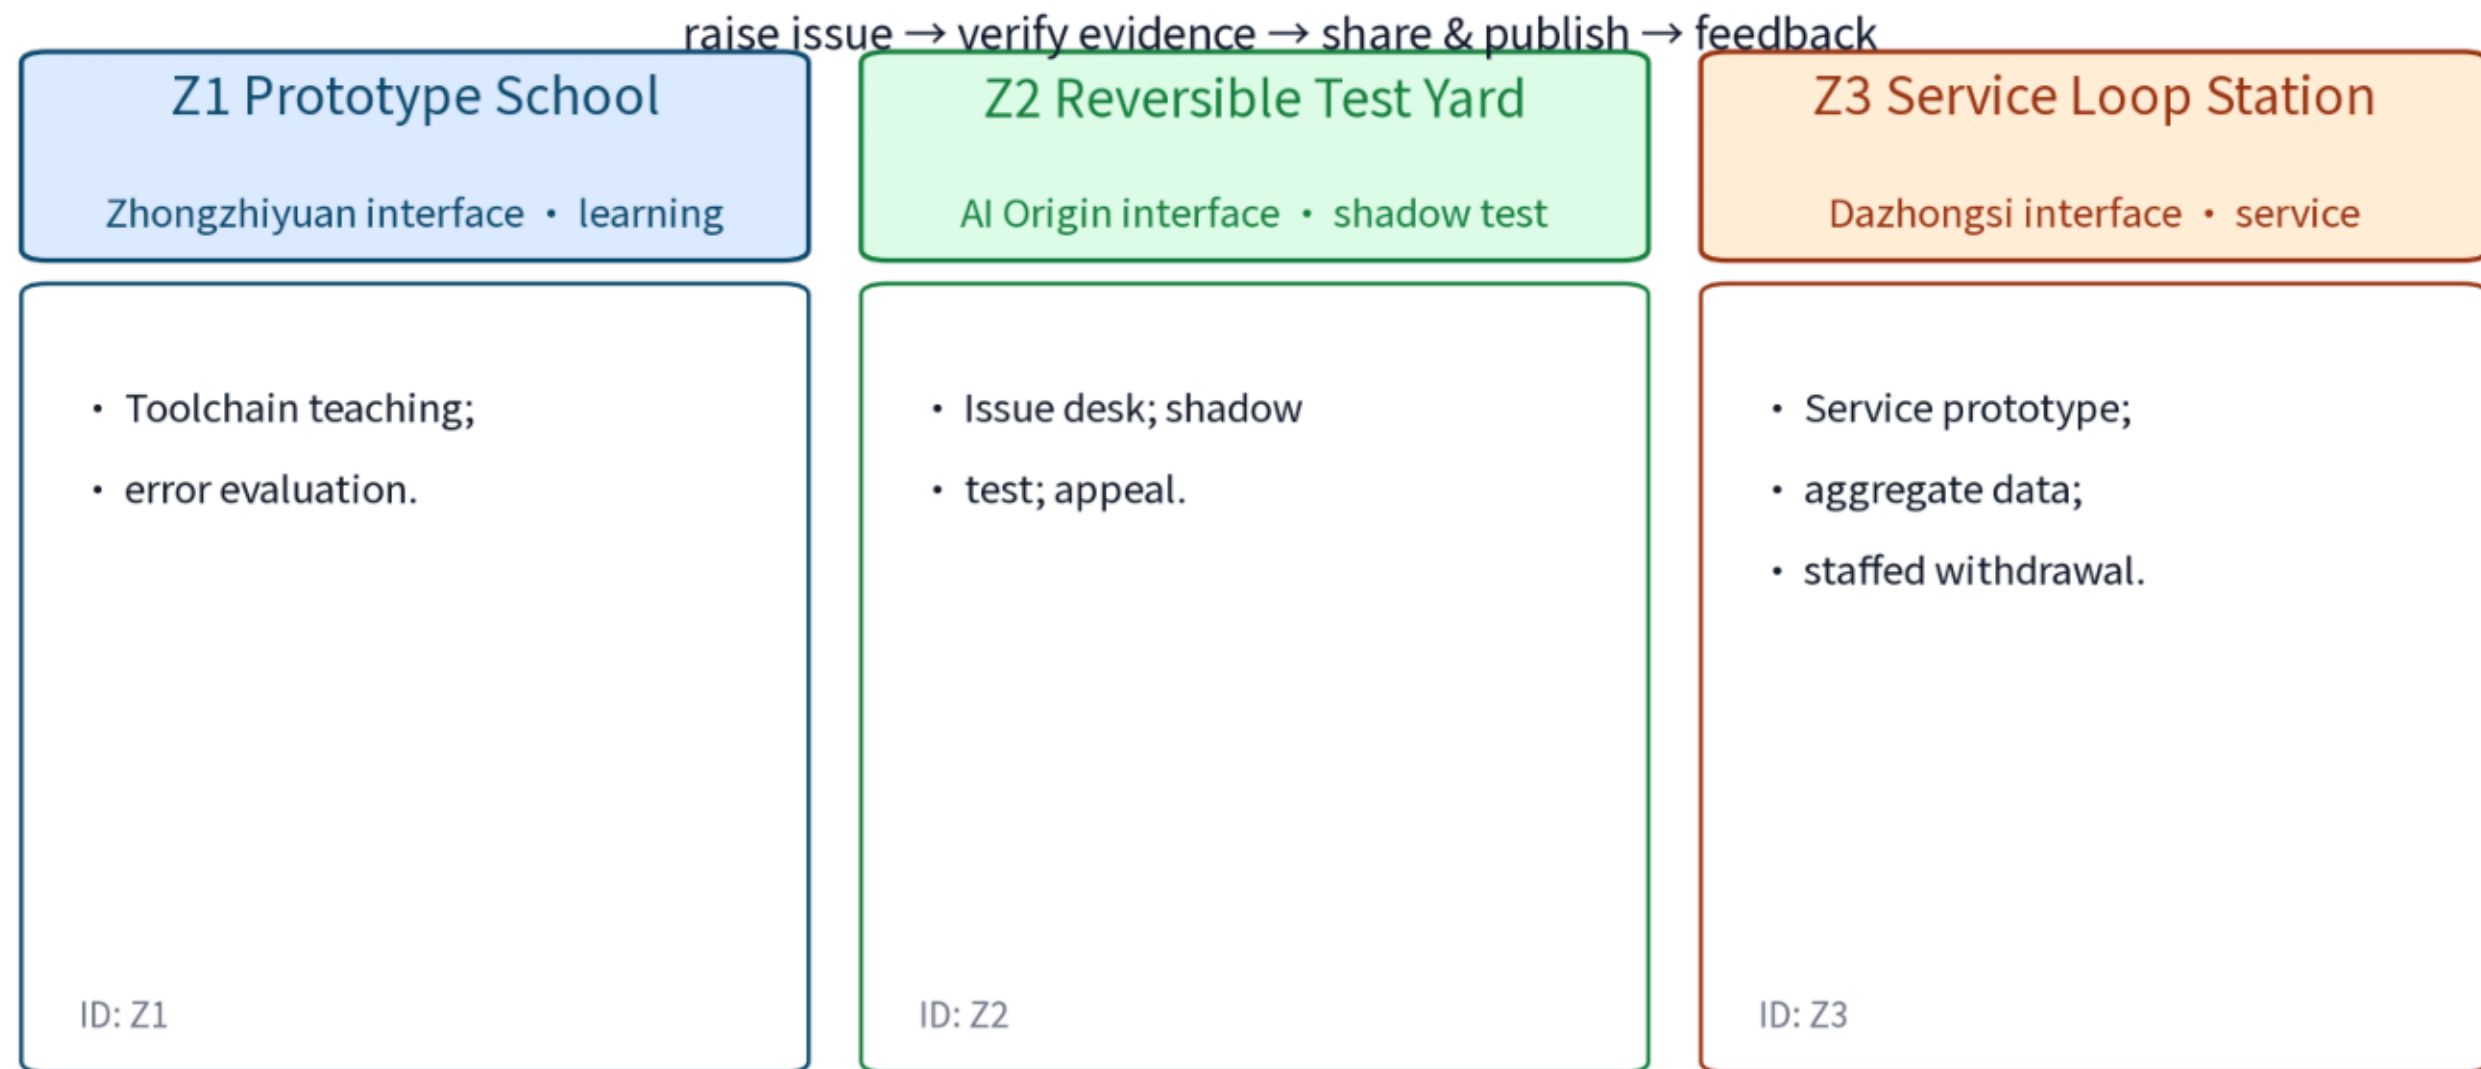

Three-Node Index with Differentiated Design Tasks

PROVISIONAL boundary • not an official redline • recalculate after official data

Three-Node Index with Differentiated Design Tasks

PROVISIONAL boundary • not an official redline • recalculate after official data

Three nodes differentiated by the three key areas: Zhongzhiyuan, Beijing AI Origin, Dazhongsi; conceptual sites pending official boundary confirmation.

Slow Participation Axis and Blue-Green Network Concept

PROVISIONAL boundary • not an official redline • recalculate after official data

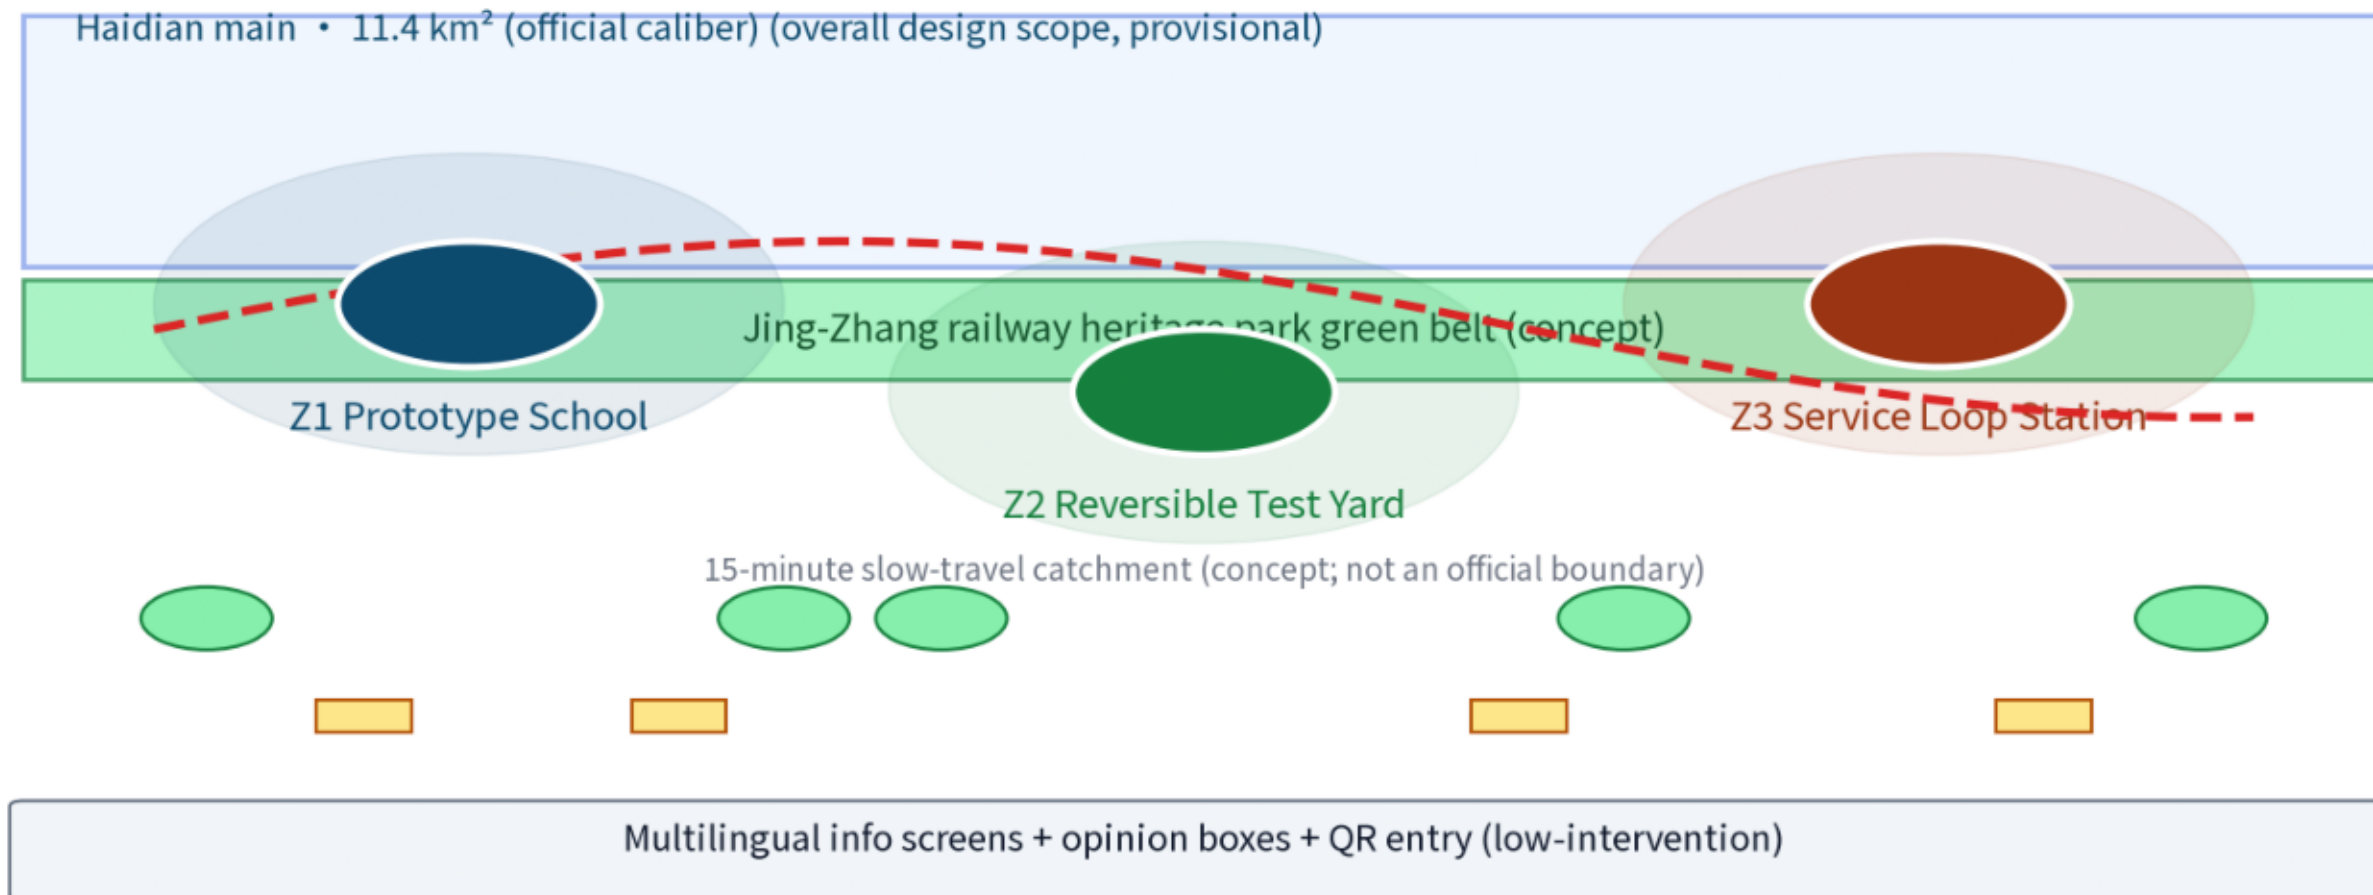

Slow Participation Axis and Blue-Green Network Concept Analysis

PROVISIONAL boundary • not an official redline • recalculate after official data

Rail station interface

Rail station interface

- Overall design scope (provisional)
- Green belt and pocket parks (concept)
- - Slow participation axis (walk & cycle first)

- Public space / plaza
- Barrier-free age-friendly assistive route (concept)

Slow axis threads three nodes; blue-green nodes anchor on the Jing-Zhang heritage park green belt; reversible low-intervention facilities.

Core Metric Evidence Chain (single caliber • recompute

PROVISIONAL boundary • not an official redline • recalculate after official data

Core Metric Evidence Chain
(single caliber • recompute
trigger)

PROVISIONAL boundary • not an official redline • recalculate after official data

geometry layer -> formula recompute -> reduced-precision display (provisional)

Metric	Formula / source (conf)	Displayed value (reduced)	Recompute trigger
site_area_sqm	polygon area (provisional, EPSG:4548) conf: low	about 11.4 km ² (participant provisional model)	on official geometry
green_ratio	green_space_area / site_area conf: low	about 12.3%	on official green-line data
public_space_ratio	public_space_area / site_area conf: low	about 7.3%	on official land-use data
Issue response rate	issues answered / issues raised (process) conf: low	no hard target	at annual review
Feedback handling rate	opinions answered / opinions received (process) conf: low	no hard target	at annual review
Share compliance rate	compliant shares / all shares (human sample) conf: low	no hard target	at annual review

All displayed values are reduced-precision concept calibers (participant provisional model data, not authoritative); ratios and counts use separate axes; this is an evidence chain, not a value comparison.

Brand Identity Concept: PAR-JZ
Participation Loop

PROVISIONAL boundary • not an official redline • recalculate after official data

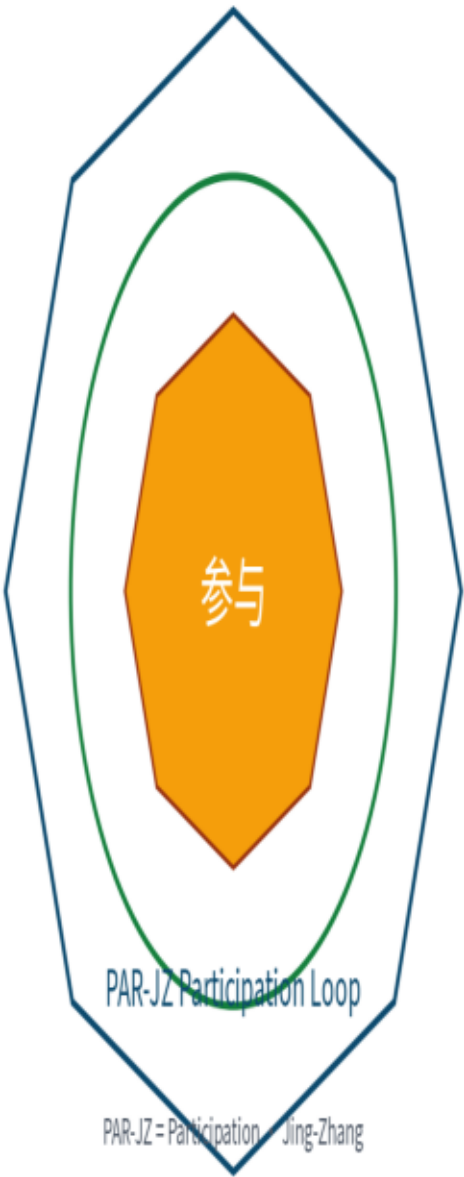

Visual grammar

Loop • rail octagon • sleeper rhythm

Industrial grey • innovation blue • rail green

Reversible public-space component library (info screens, bulletin boards, movable seats, modular pavilions, demountable signage)

Logo uses participation loop + railway-spike octagon (concept); no trademark search completed; treated as internal working codename.
