

LAST JZ Loop: Jing-Zhang AI Innovation Belt, Last-Mile Delivery Network (Concept)

Job / concept only - provisional boundary - recalculate after official data

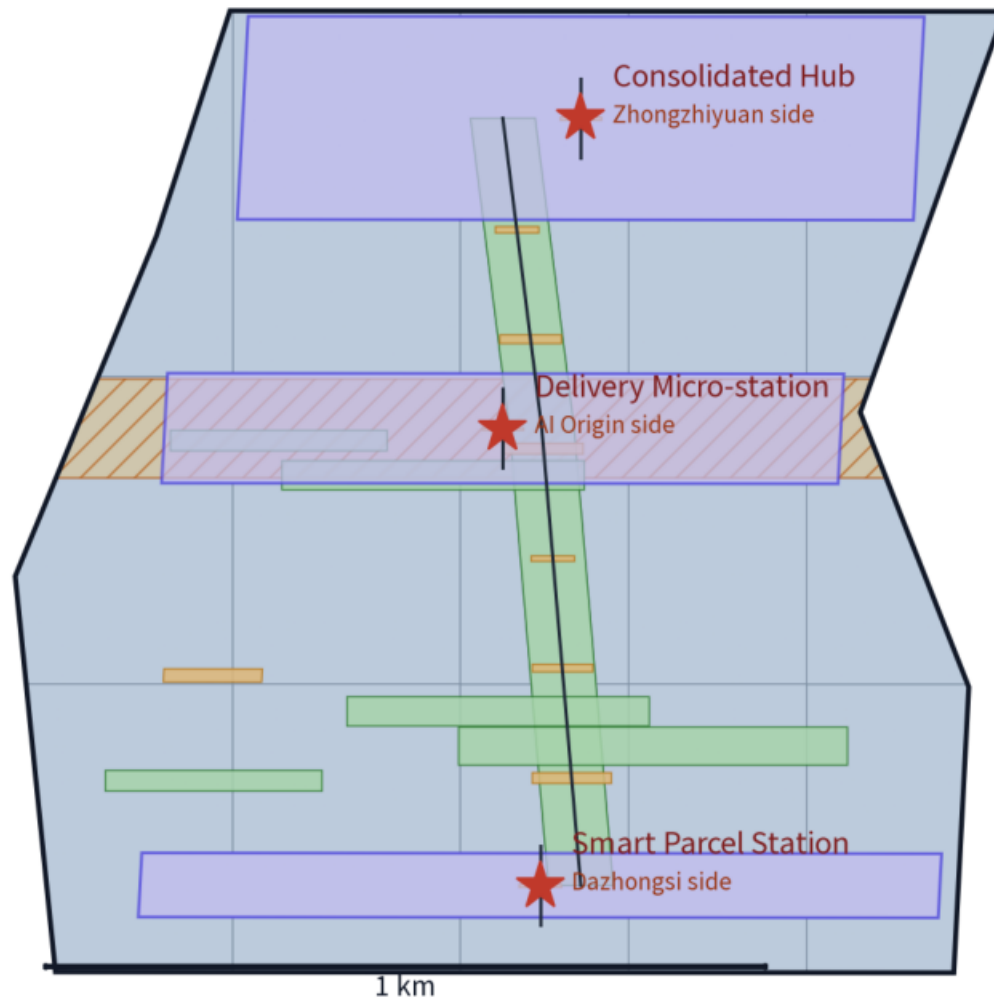

Three formal core metrics, 10 AI scenario cards, 3 AI landmarks, 7 personas, 4 annual programs

PROVISIONAL boundary • not an official redline • recalculate after official data

Overall Design Overview: LAST JZ Loop (Concept, Provisional)

PROVISIONAL boundary • not an official redline • recalculate after official data

Package overall scope ~11.4 km² - one hub two stations one point - provisional (not an official redline).

Legend

- Overall design scope (provisional)
- Three key areas (provisional)
- Green space (concept)
- Public space / plaza
- Slow-traffic spine (concept)
- Heritage awareness zone (to be verified)
- AI landmark (concept location)

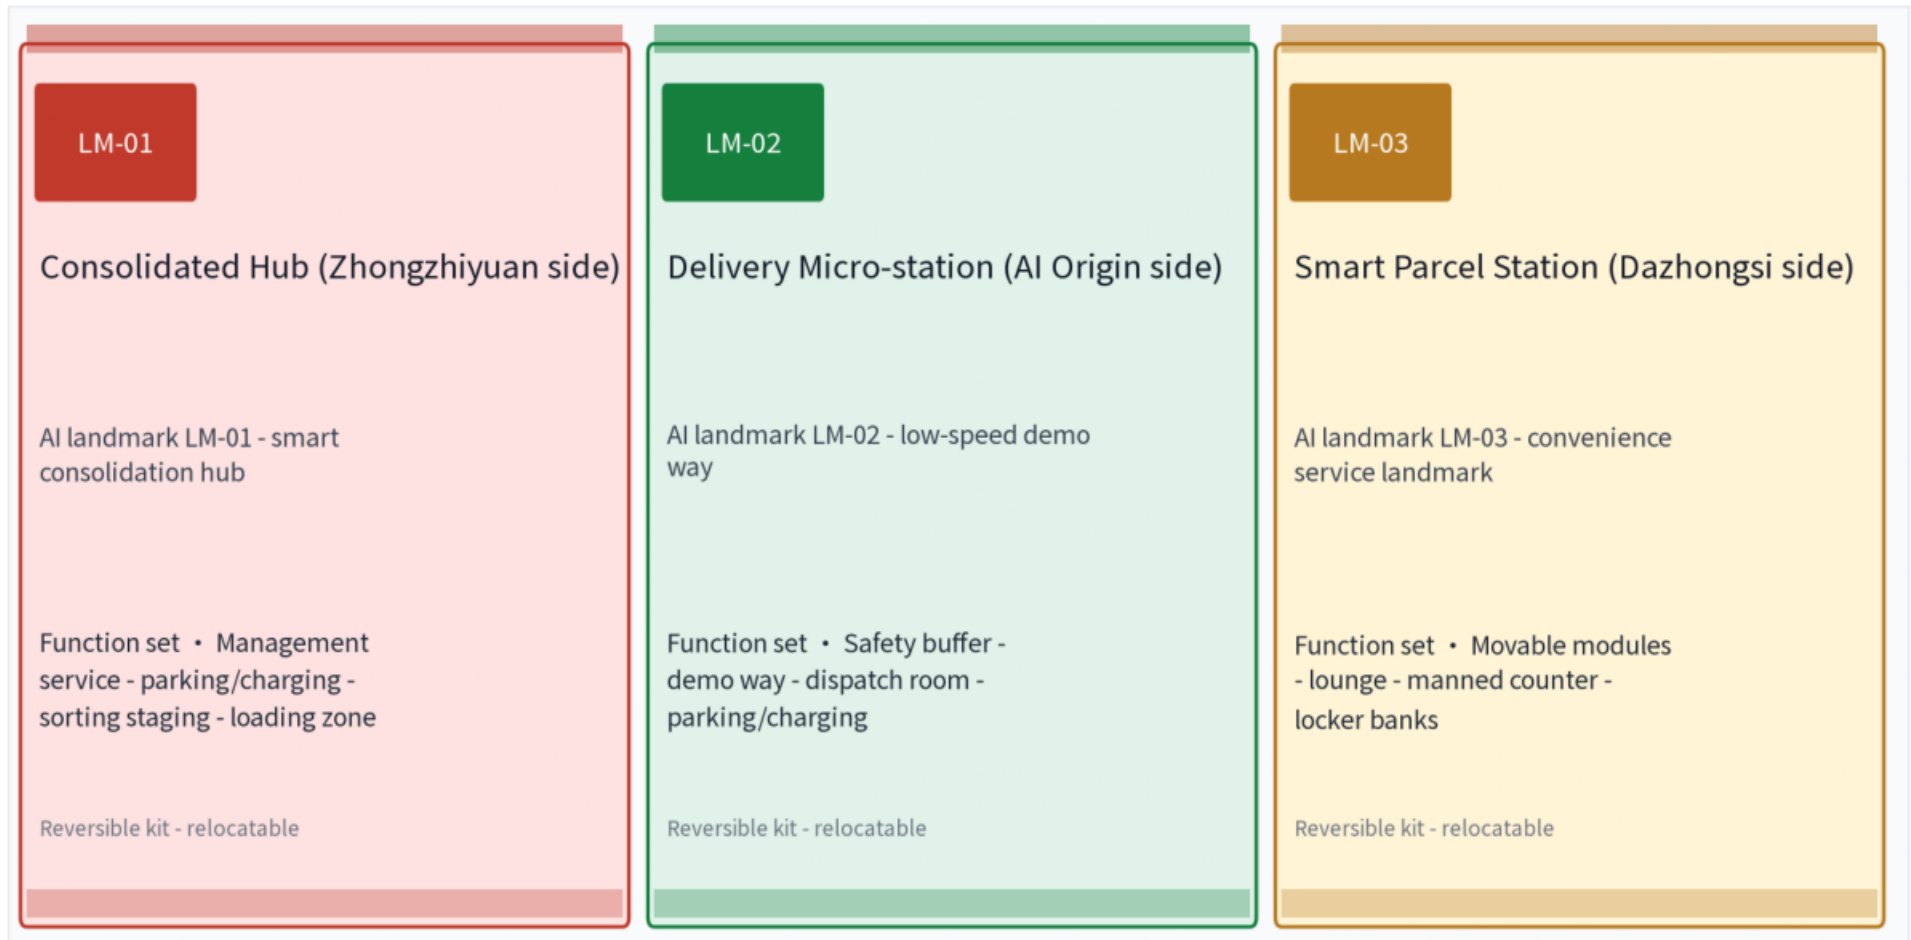

Three nodes (concept)

- Consolidated Hub
Zhongzhiyuan side
- Delivery Micro-station
AI Origin side
- Smart Parcel Station
Dazhongsi side

Three Key Areas Detailed Design Tasks (Concept, Provisional)

PROVISIONAL boundary • not an official redline • recalculate after official data

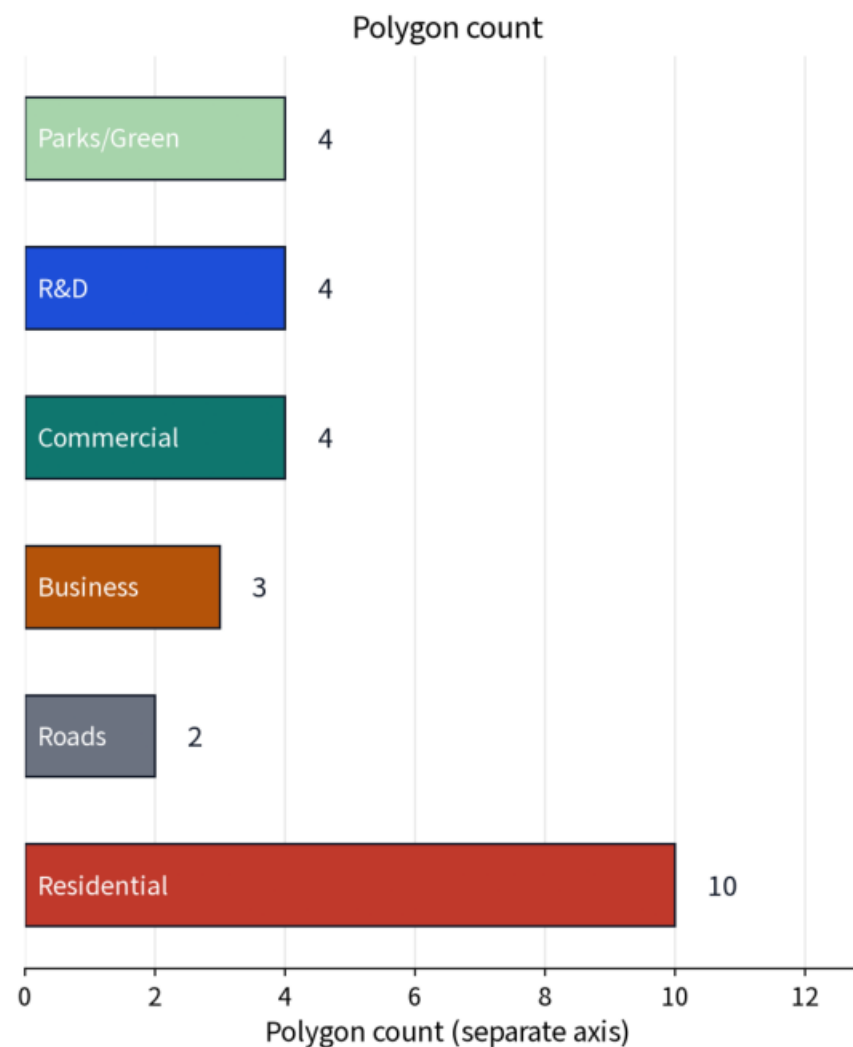

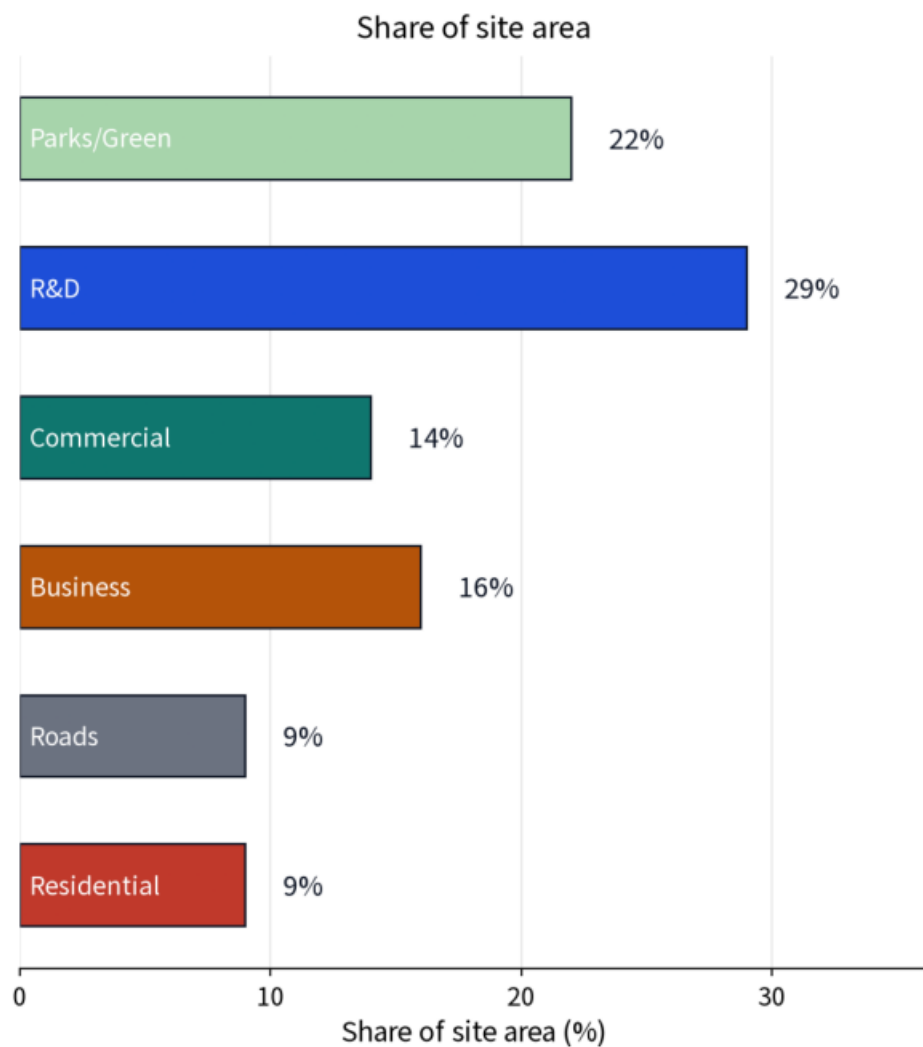

Consolidated Hub / Delivery Micro-station / Smart Parcel Station (LM-01 / LM-02 / LM-03)

Concept sites; final locations follow the organizer's official boundaries and field survey; facilities reversible, fully relocatable.

Conceptual Land-Use Structure (Single Caliber, Provisional)

PROVISIONAL boundary • not an official redline • recalculate after official data

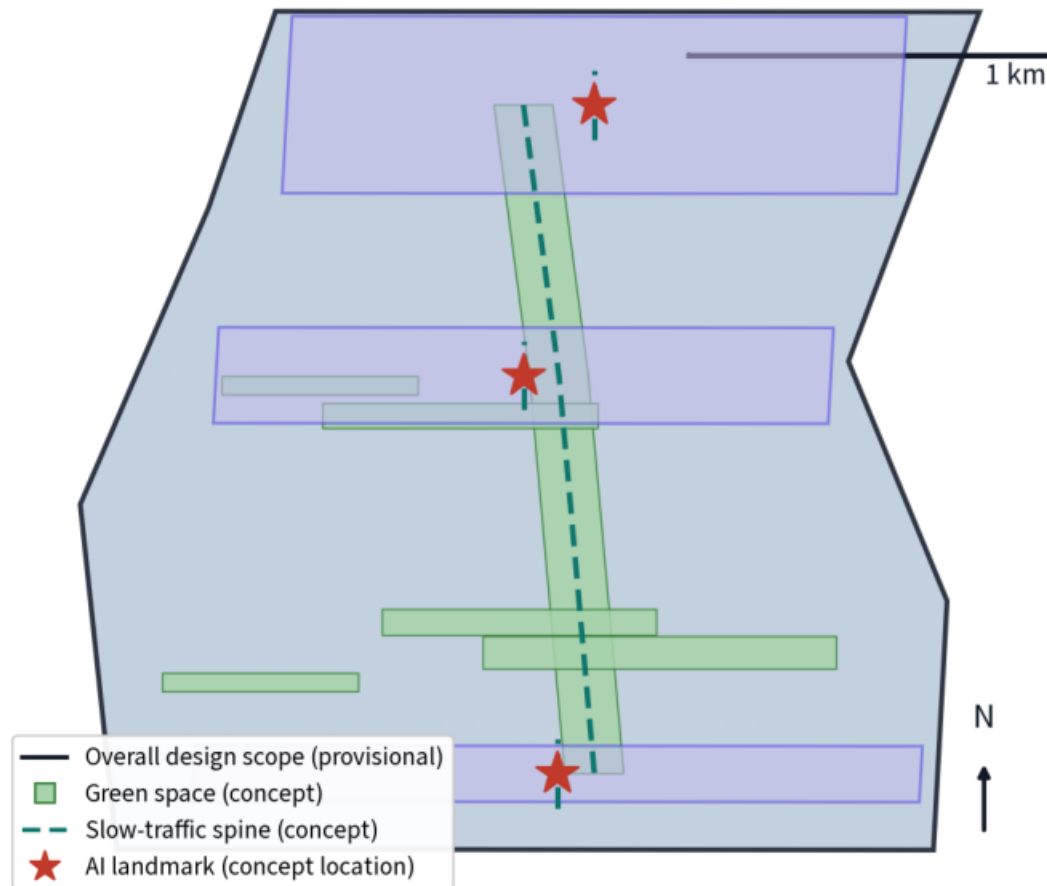

Recomputed from package land_use.geojson in EPSG:4548; six class shares sum to ~99%; same formula as figures, HTML, PDF; recalculate after official data.

Slow-Traffic and Blue-Green Network: Low-Speed Delivery x Greenbelt x Publi...

PROVISIONAL boundary • not an official redline • recalculate after official data

Last-mile route and slow-traffic system integrated; all three nodes at greenbelt/slow-traffic intersections.

Slow-Traffic Priority Rules (Concept)

- Low-speed, time-shared right-of-way intent (no new road redline)
- Yield to pedestrians; slow at crossings; observe at junctions
- Delivery vehicles on non-motorized lanes at low speed
- Pilot segments require filing and traffic-impact assessment

Reversible Public-Space Component Kit

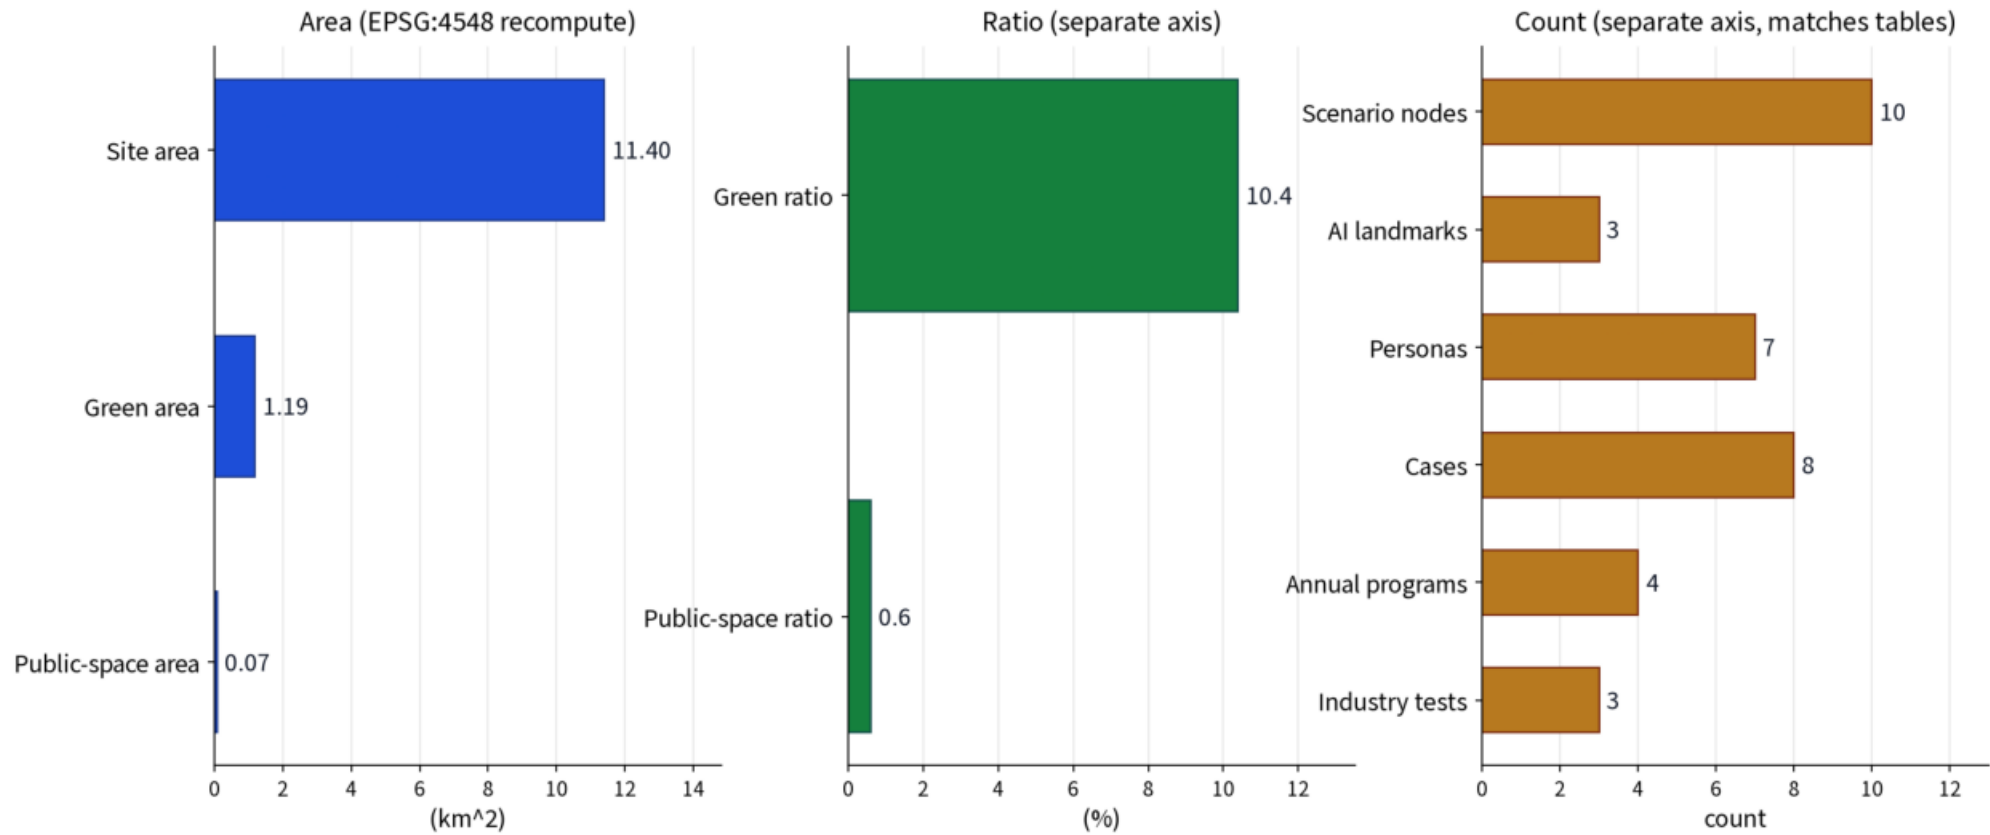

- Seating - shade/rain shelters
- Drinking fountains - info stands
- Large-type signage - help buttons
- Movable planters - temporary barriers
- Bike racks
- Accessibility ramp modules

Blue-green network with the JZ Railway Heritage Park greenbelt as the spine; relation to green/blue/heritage control lines depends on official control-line survey.

Core Metric Evidence (Area / Ratio / Count on separate charts)

Recomputed from package geometry; provisional concept values; recalculate after official data.

PROVISIONAL boundary • not an official redline • recalculate after official data

All displayed values are reduced-precision concept figures (participant temporary model data, not authoritative); ratios and counts on separate axes; not a numerical comparison.
