

Site overview - three nodes - land-use structure (concept, provisional)

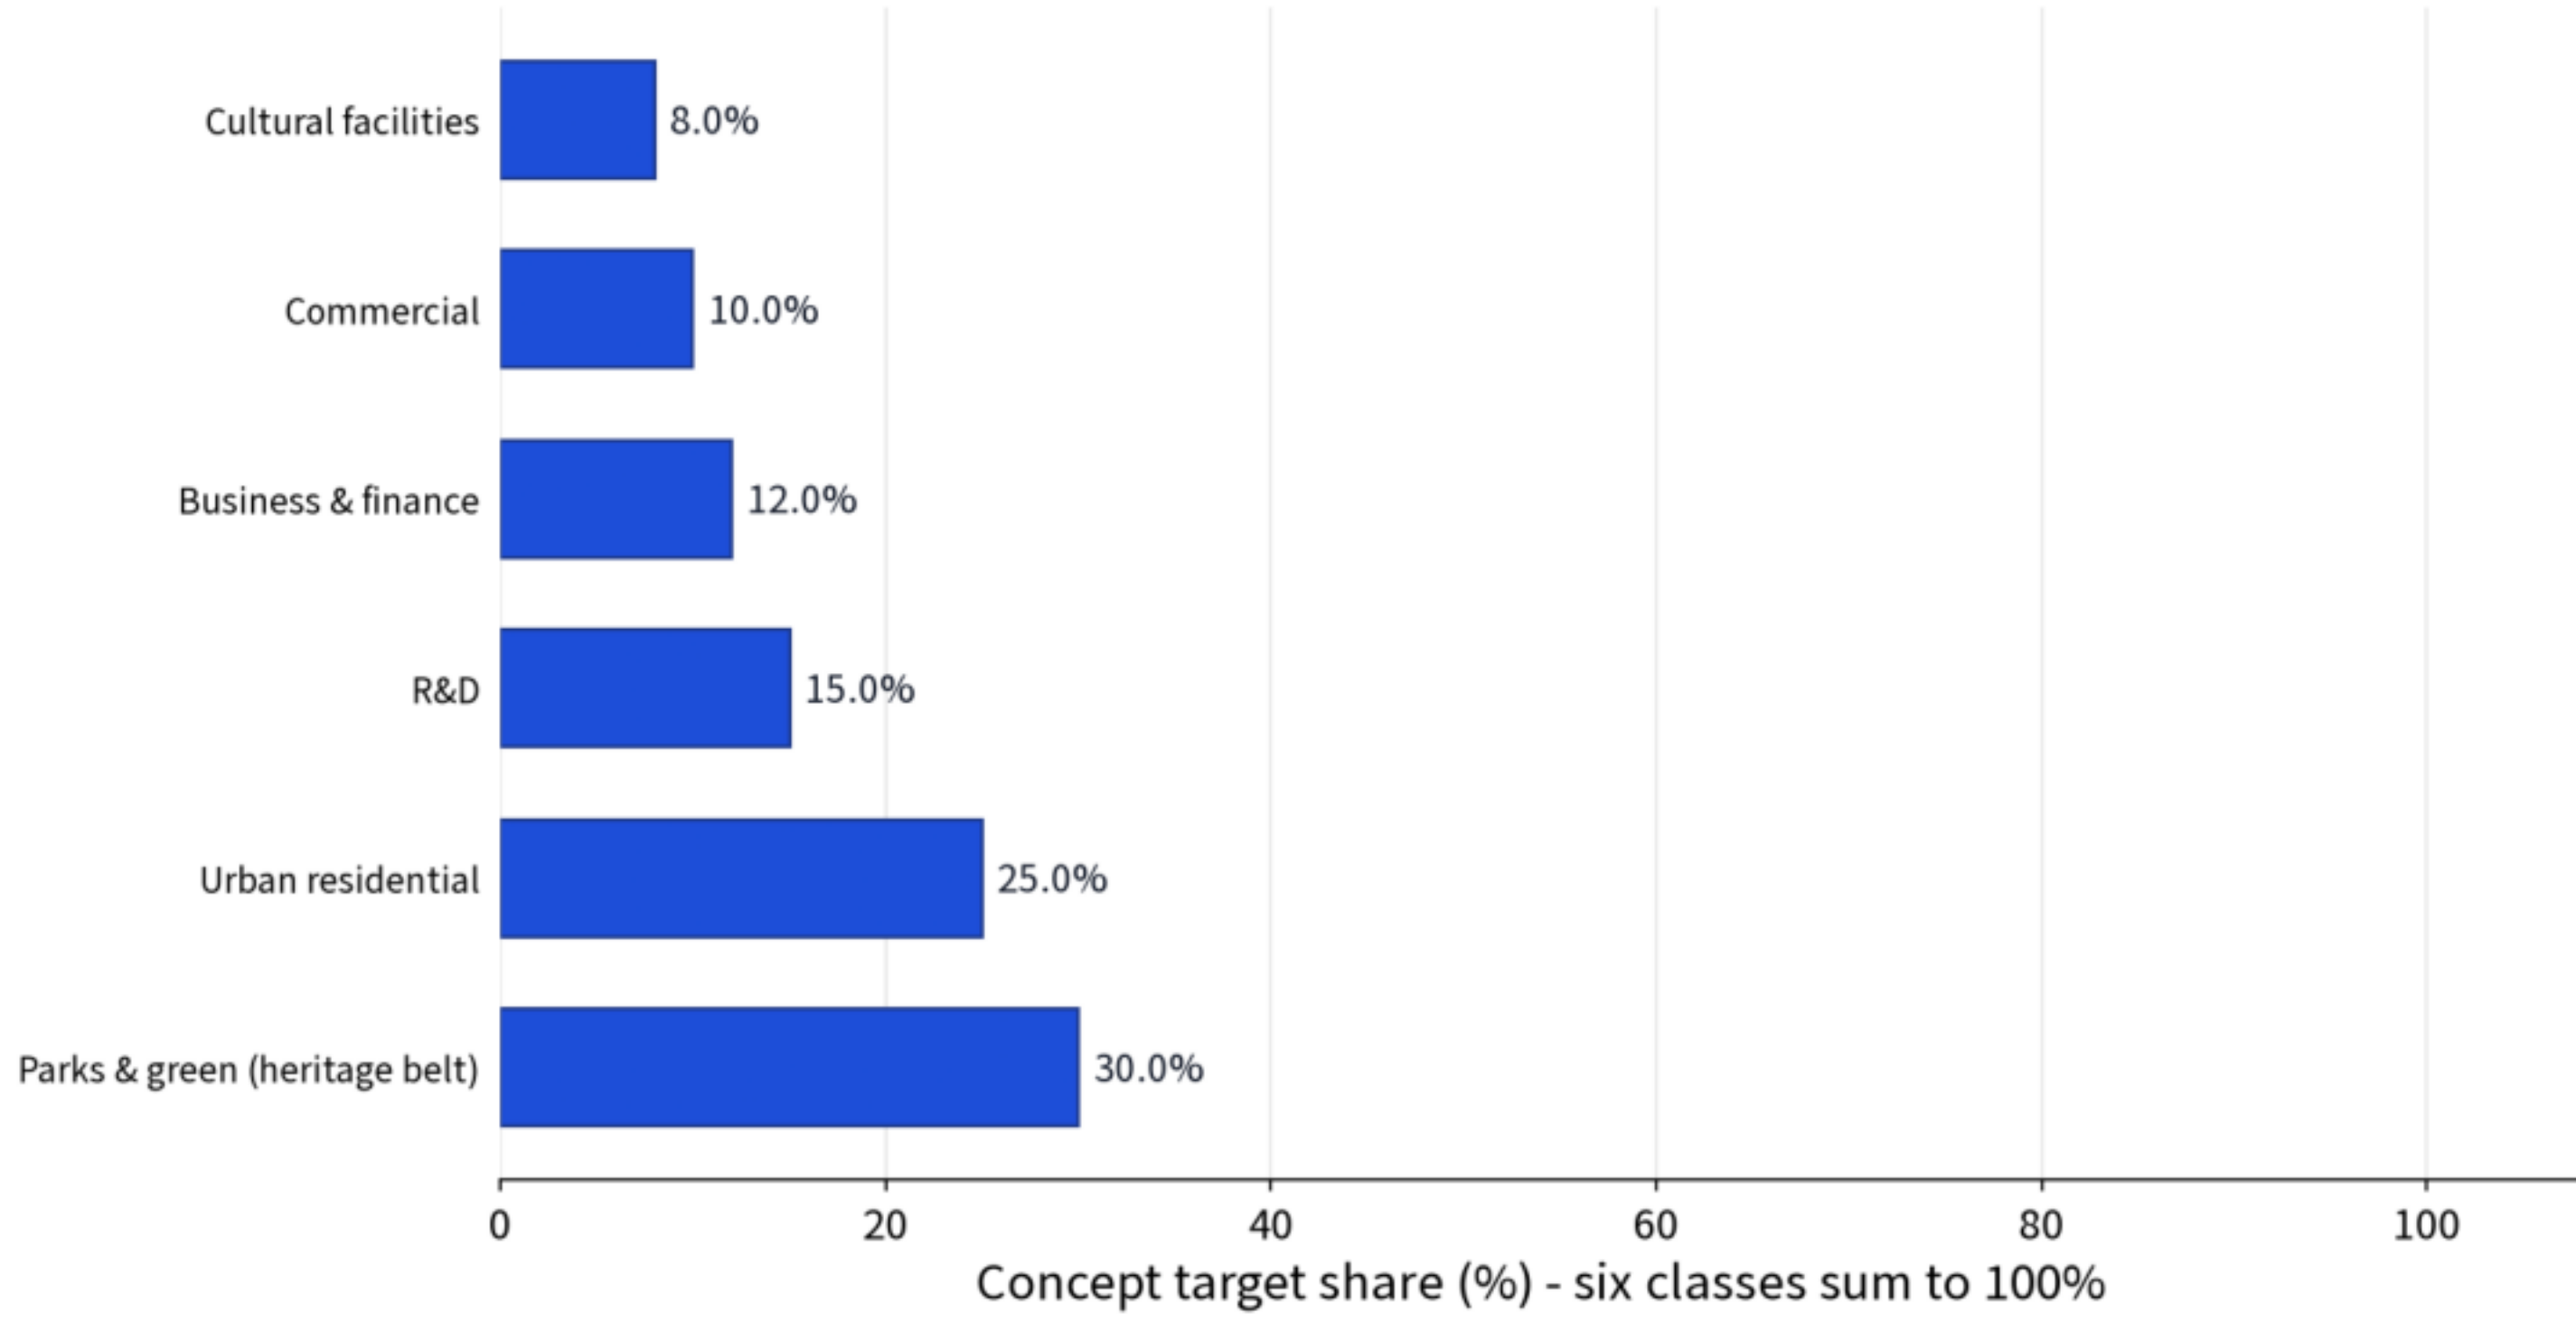

Overall Design Overview (provisional geometry • concept)

Overall design area ~11.4 km^2 (announcement) - corridor is a linear reference; three key areas keep separate area_id overlays; nodes are operation interfaces

Concept Land-Use Target Shares (Not Current or Geometric)

Provisional concept boundary • Not an official redline • Recalculate after official data

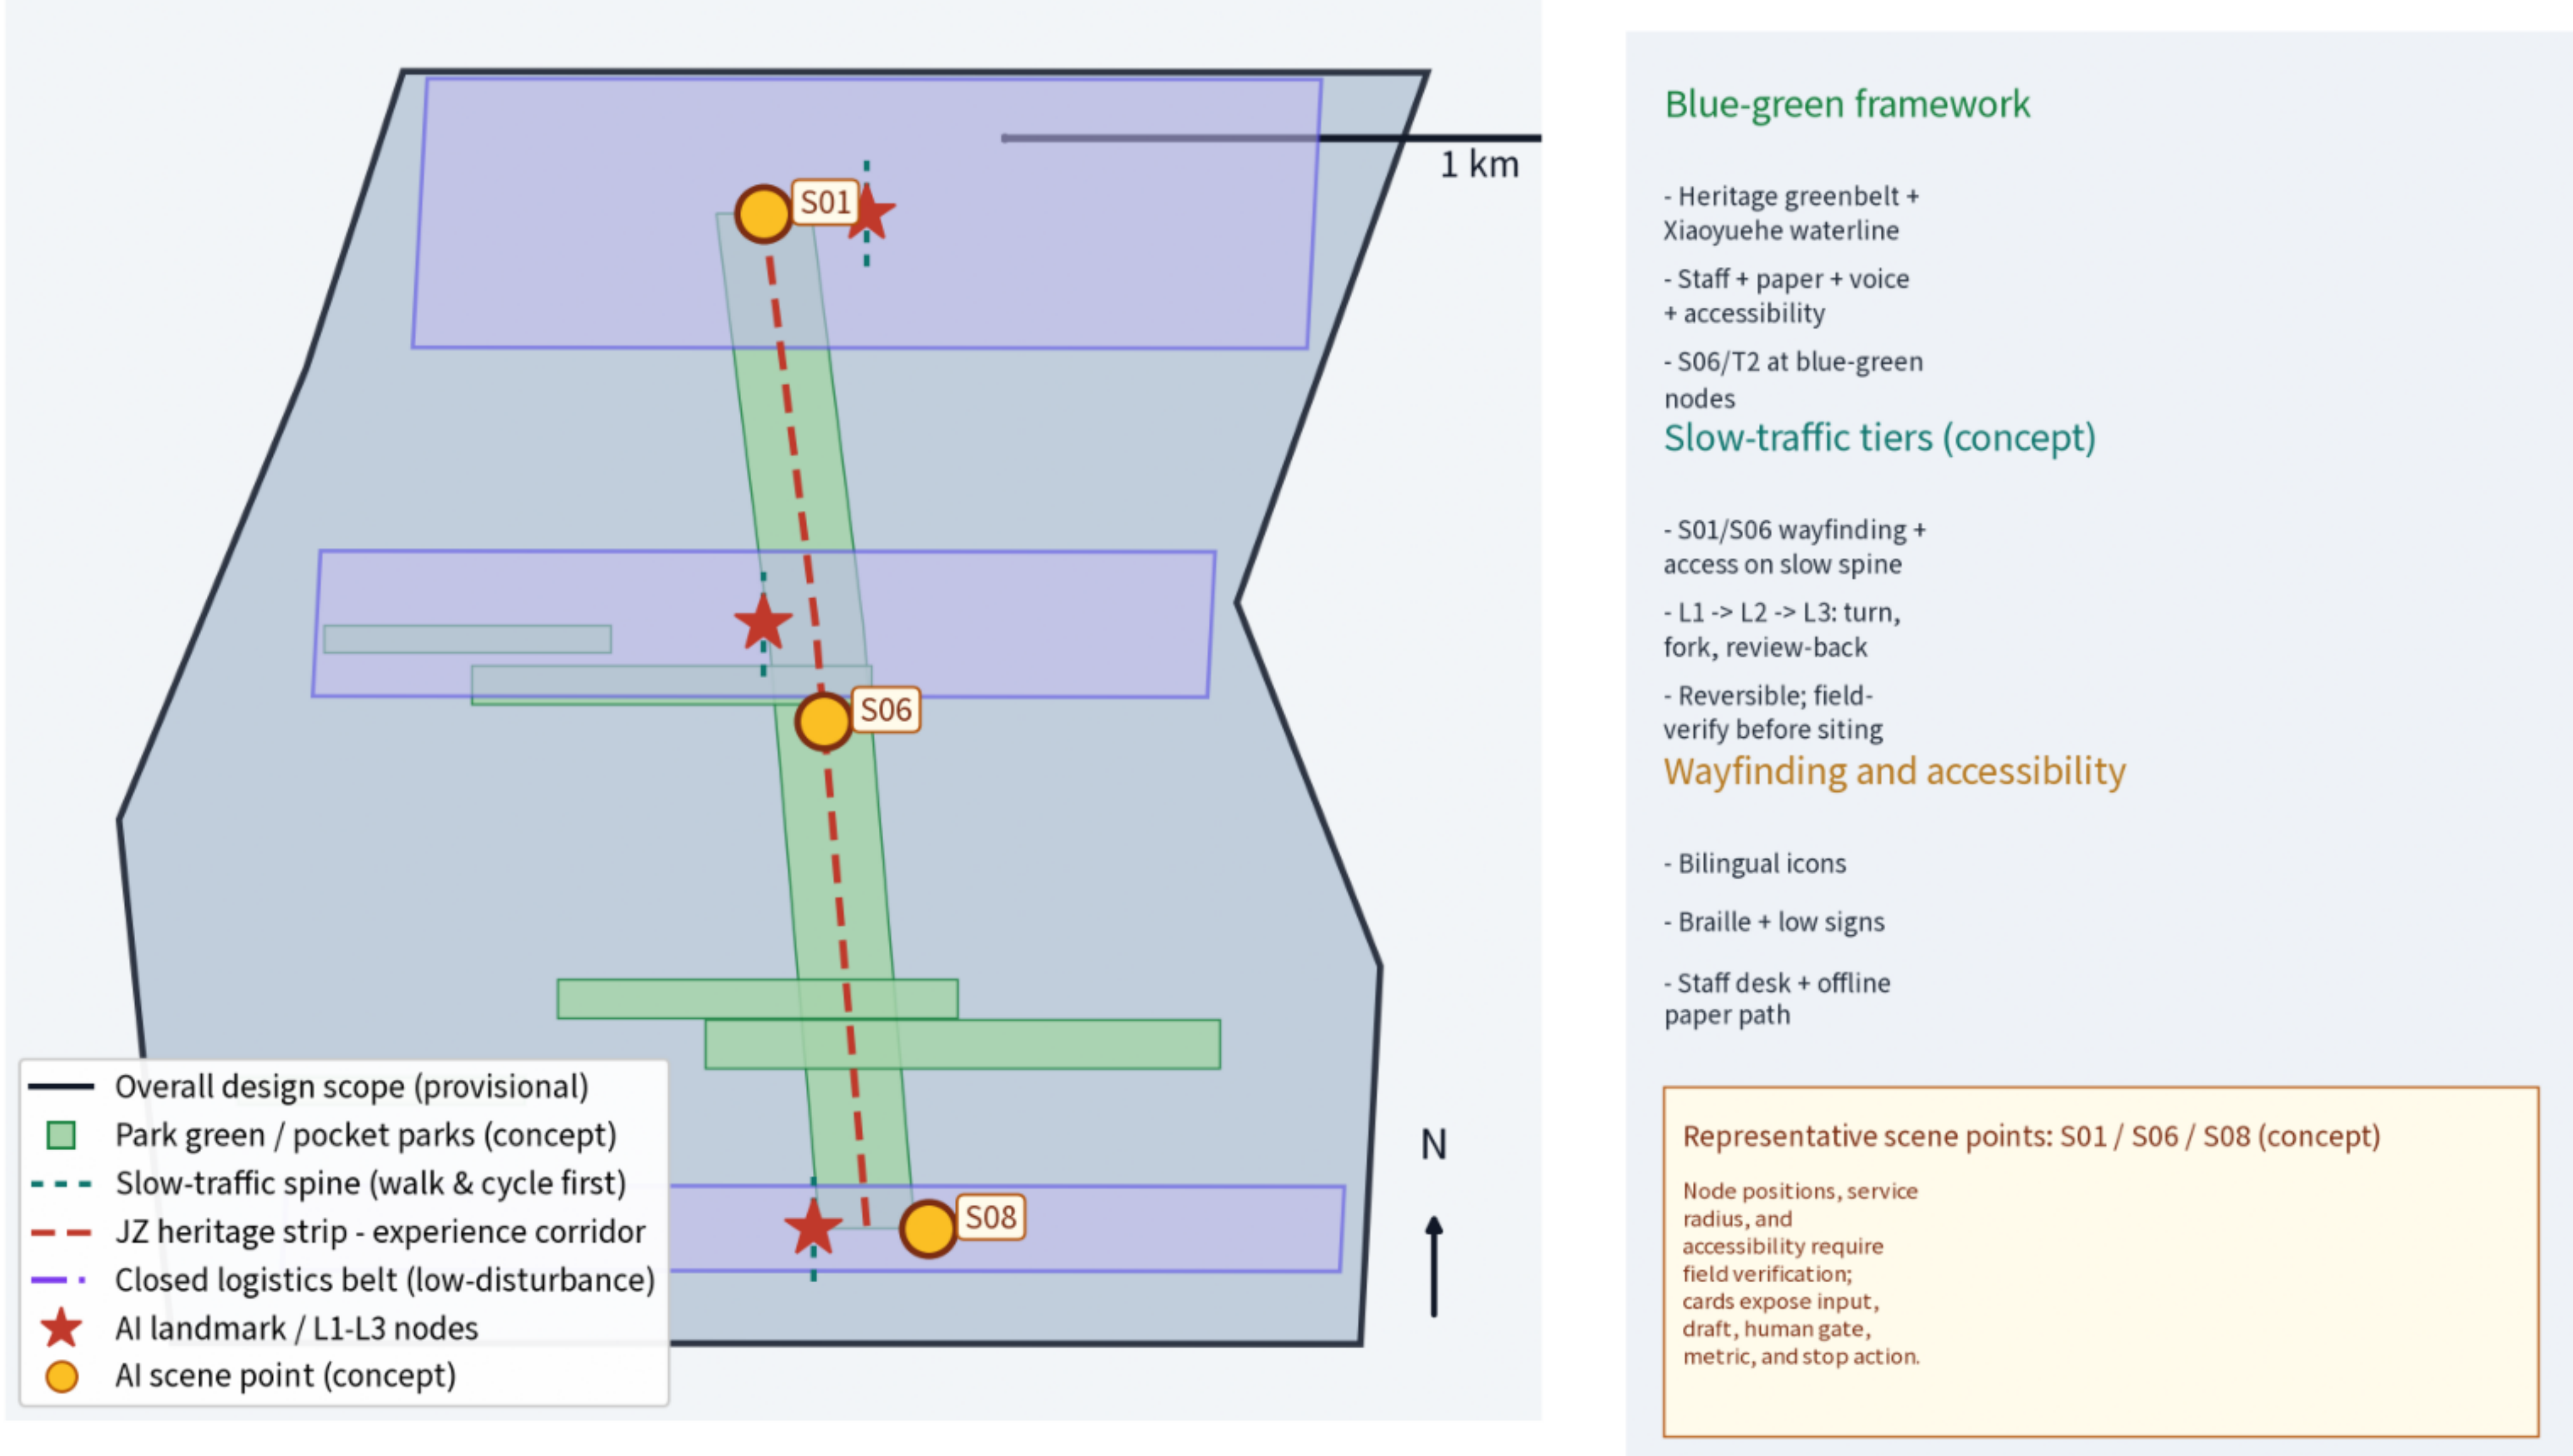

Targets are not current/statutory ratios or area recomputes from package geometry; after official data, apply area / confirmed denominator and record confidence.

Provisional concept boundary • Not an official redline • Recalculate after official data

Slow-Traffic & Blue-Green Network (concept, with AI scene links)

Provisional concept boundary • Not an official redline • Recalculate after official data

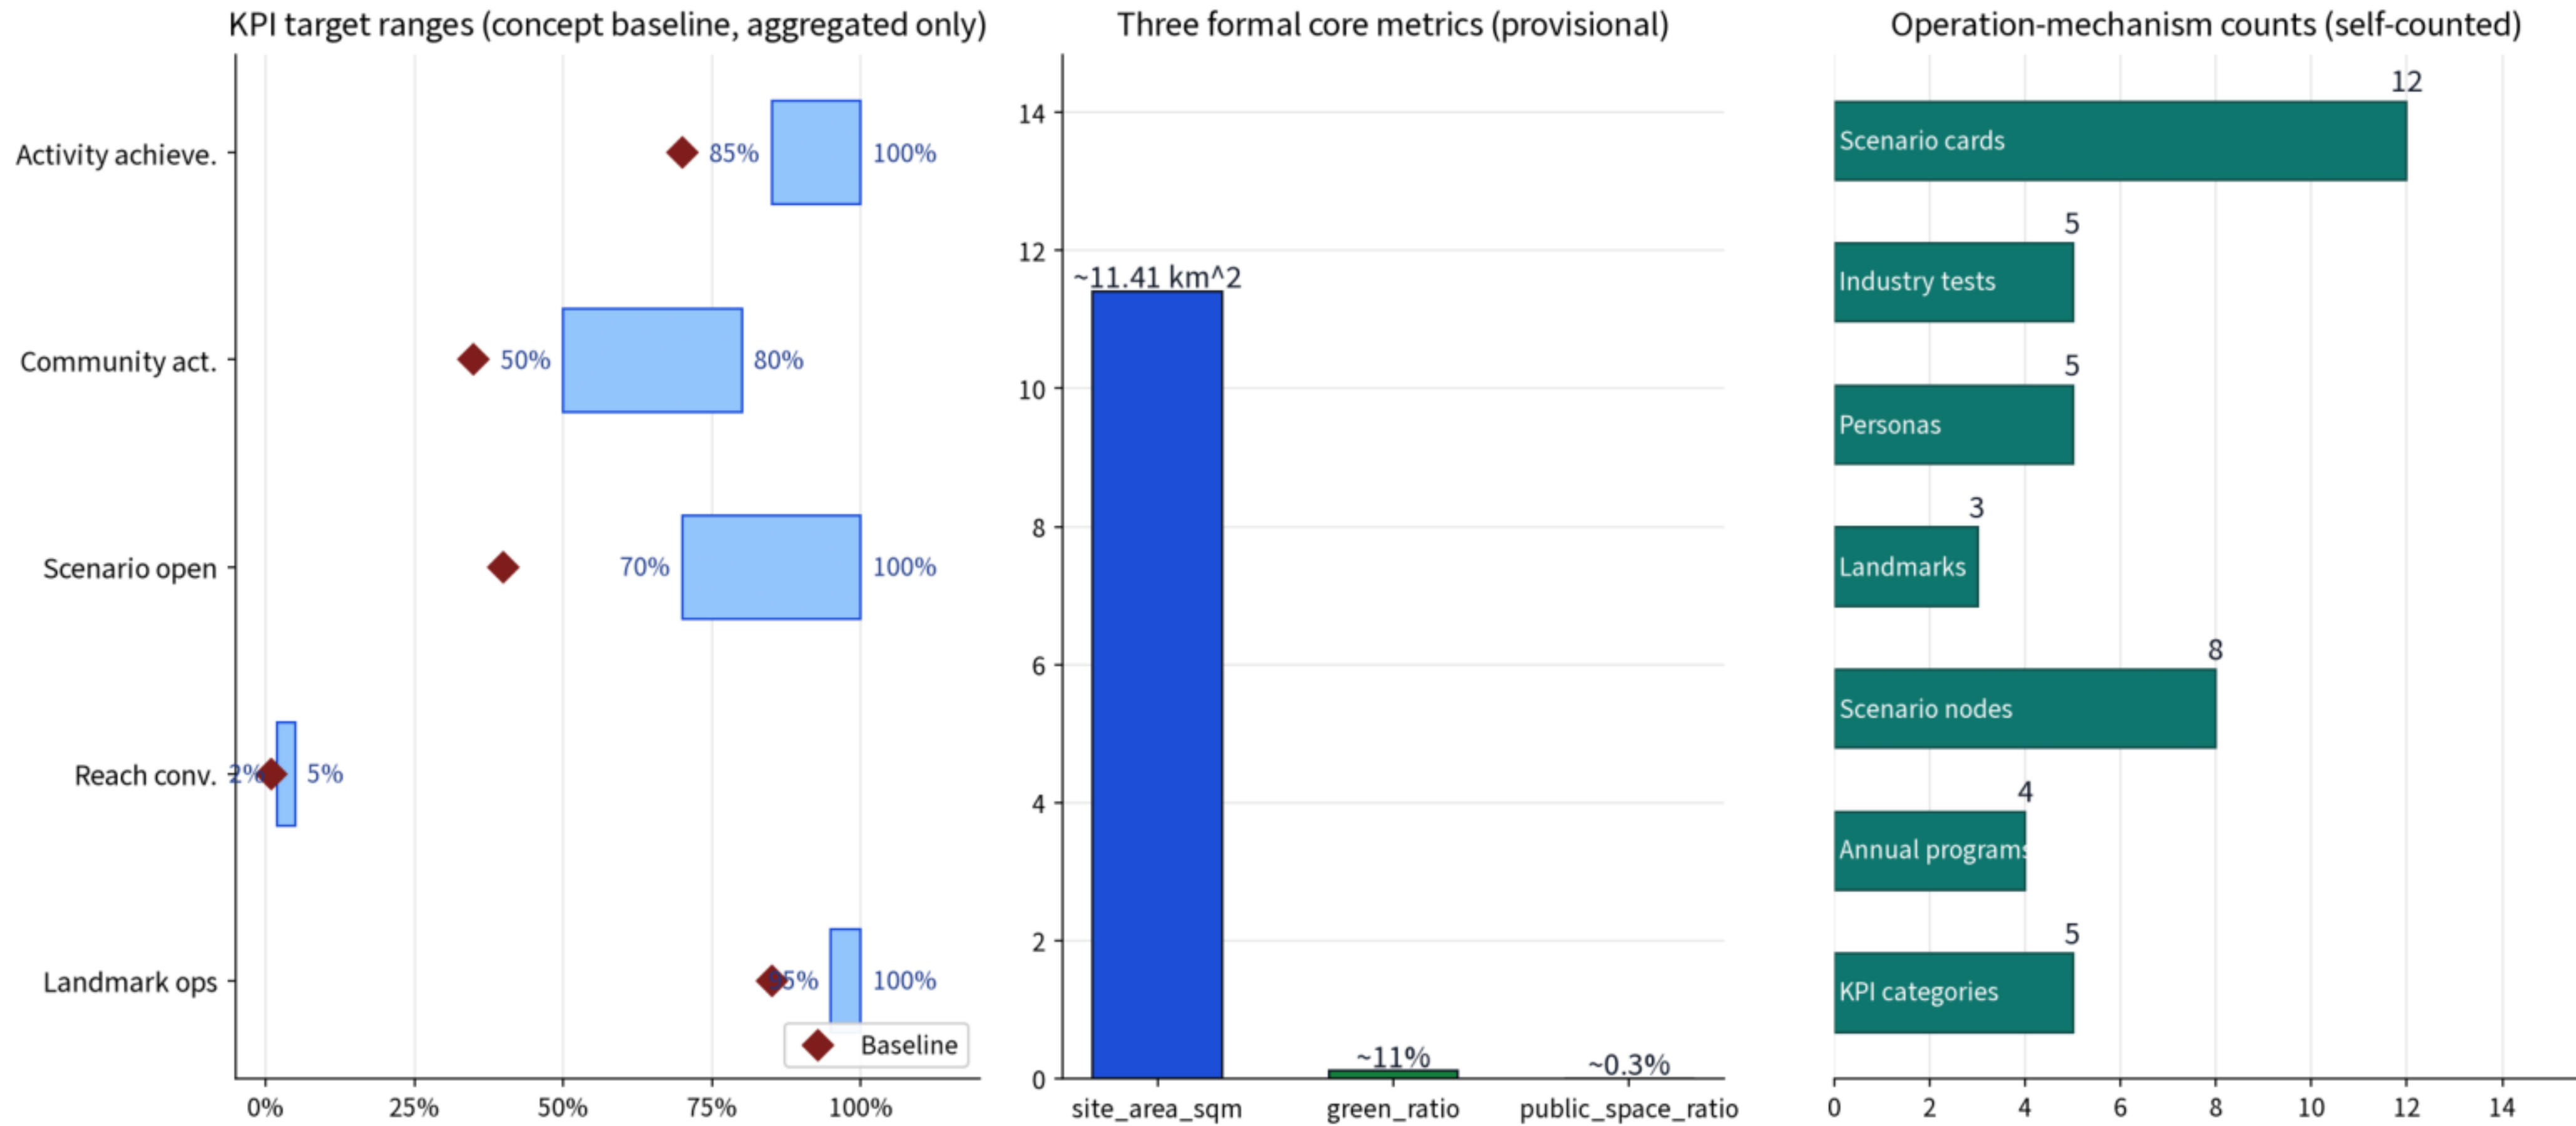

L1-L3 nodes connect through slow mobility and blue-green interfaces - scene cards enter human review

Core Metric Evidence (KPI ranges + formal metrics + counts on separate charts)

Provisional concept boundary • Not an official redline • Recalculate after official data

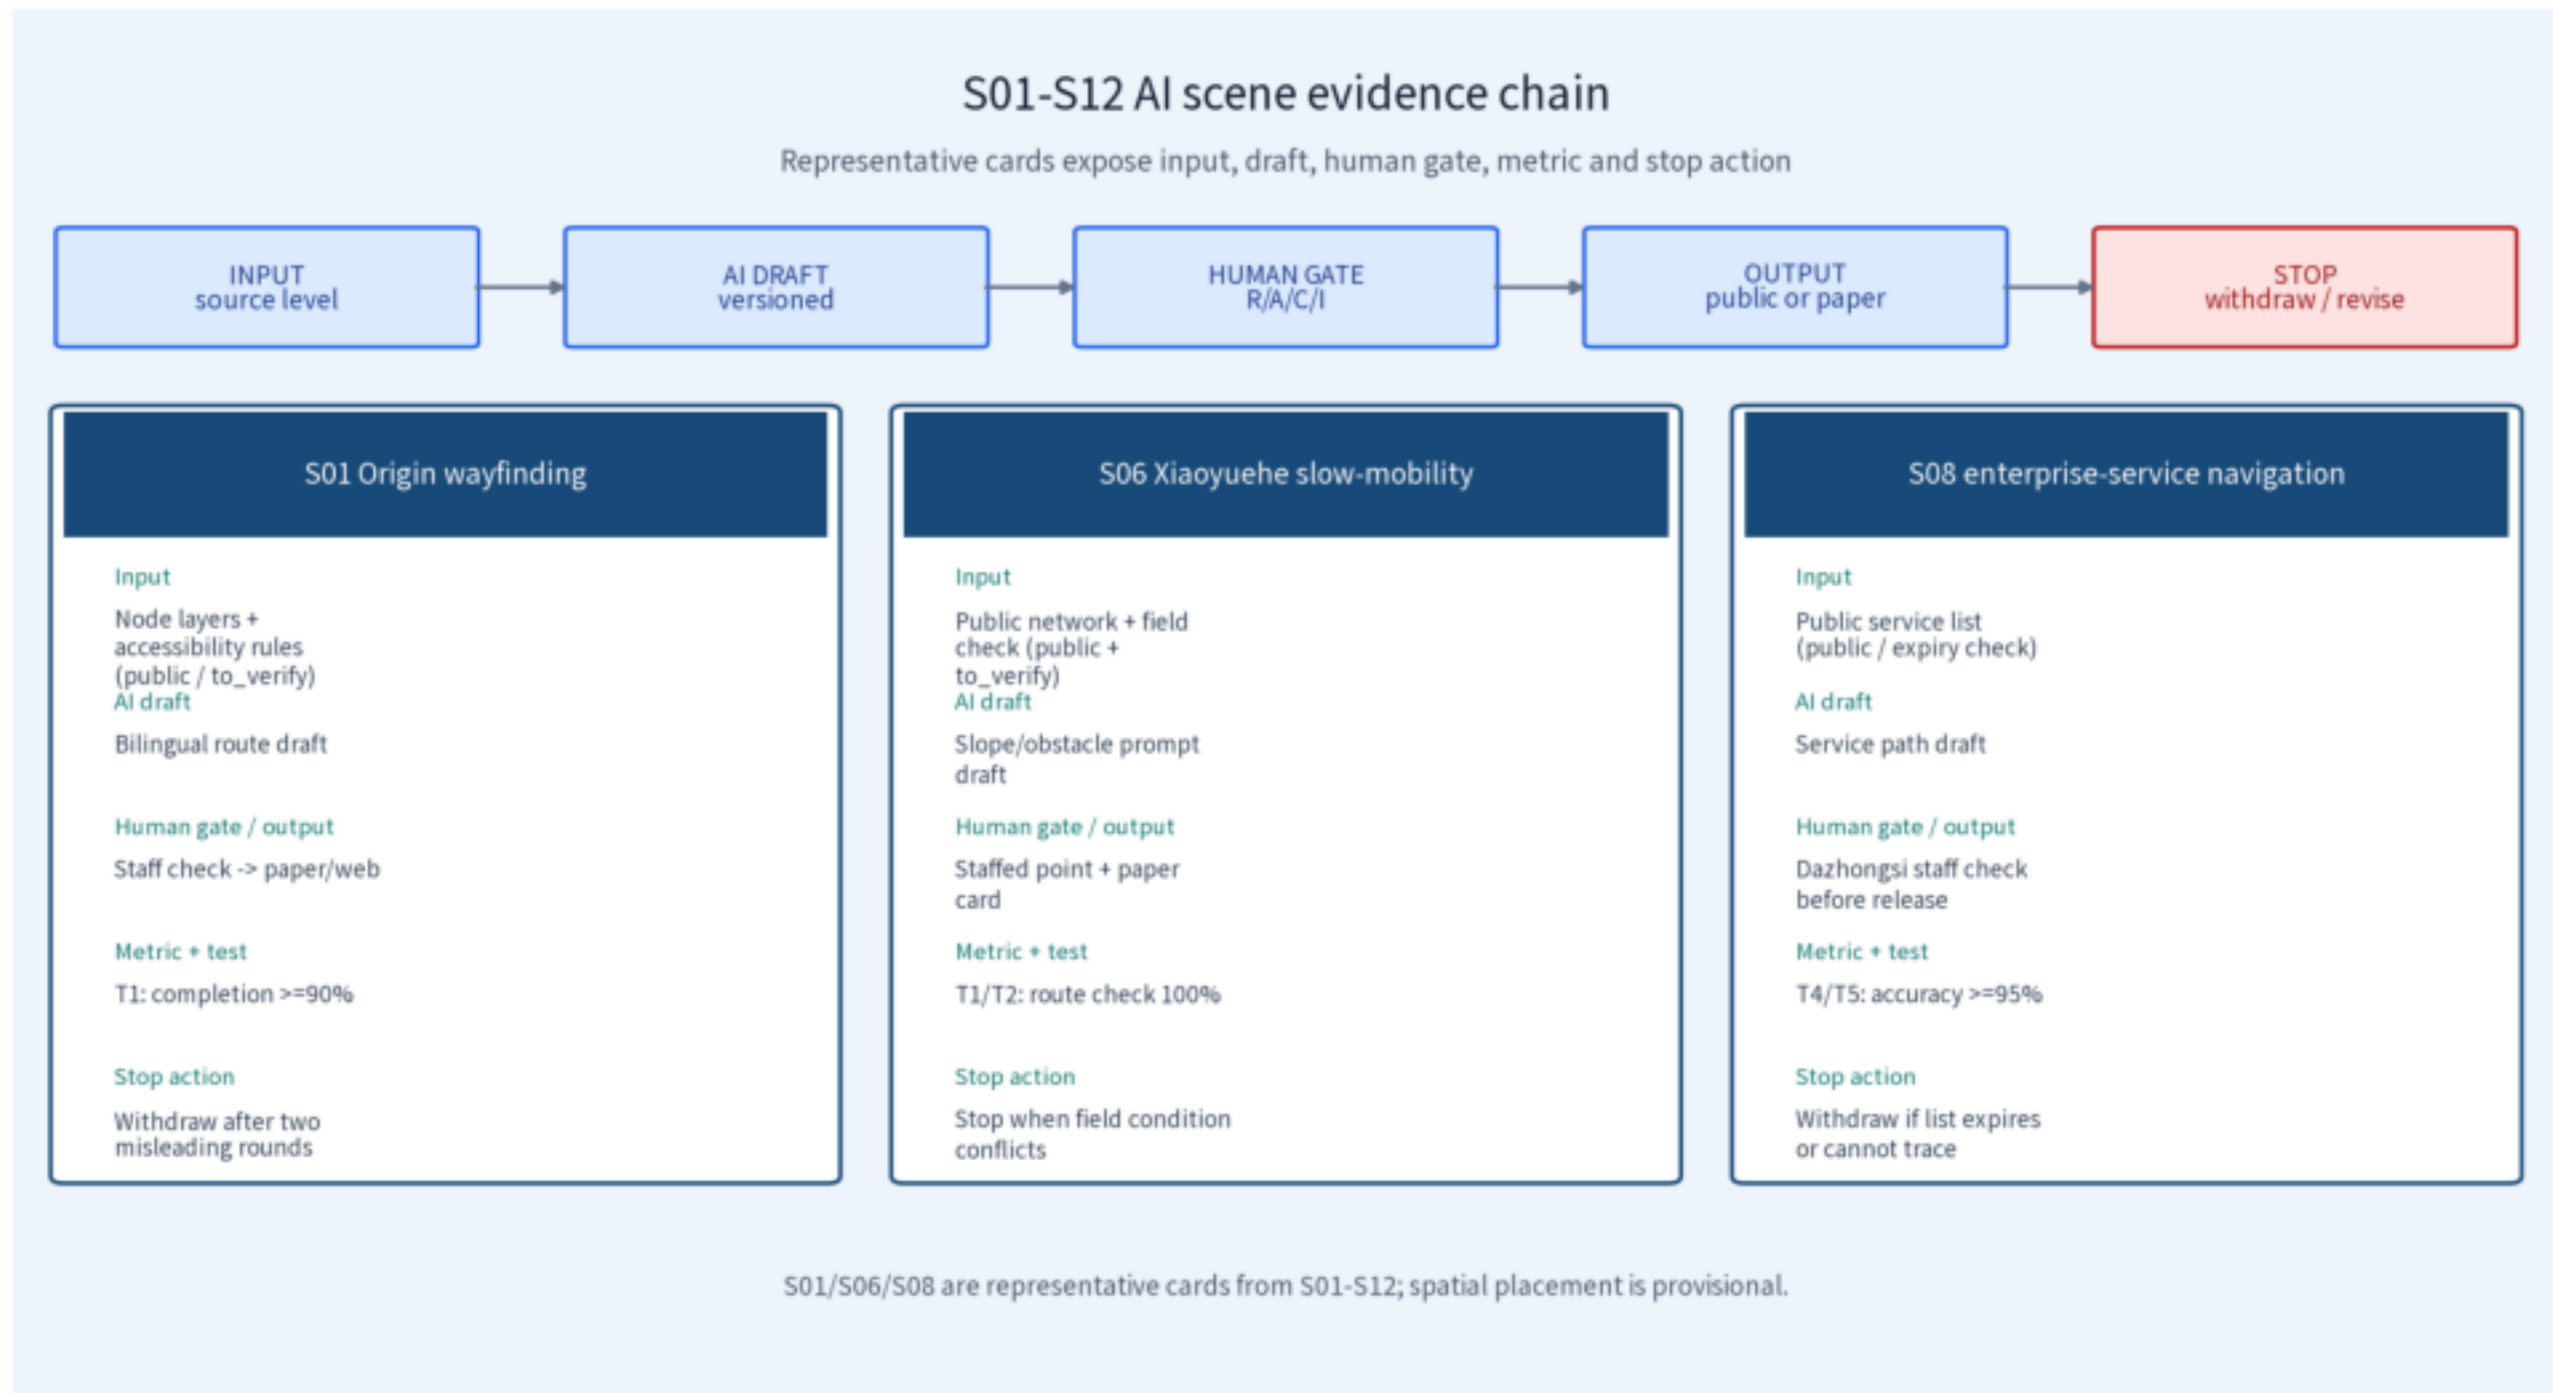

Recomputed from package geometry; concept values, recalculate after official data.

All displayed values are reduced-precision concept figures (participant temporary model data, not authoritative); ratios and counts on separate axes; not a numerical comparison.

AI Innovation Ecosystem Atlas (Elements, Flows, Open Interfaces)

Provisional concept boundary • Not an official redline • Recalculate after official data

Brand Identity Concept: VIS JZ Visual Identity Ring

Provisional concept boundary • Not an official redline • Recalculate after official data
