

GREEN.JZ
Zero-Carbon Demo Campus & Green-Energy Synergy
(provisional)

Zhongguancun Tech Service Wing + Xiaoyuehe Scenario Wing + Campus-Corridor-Station

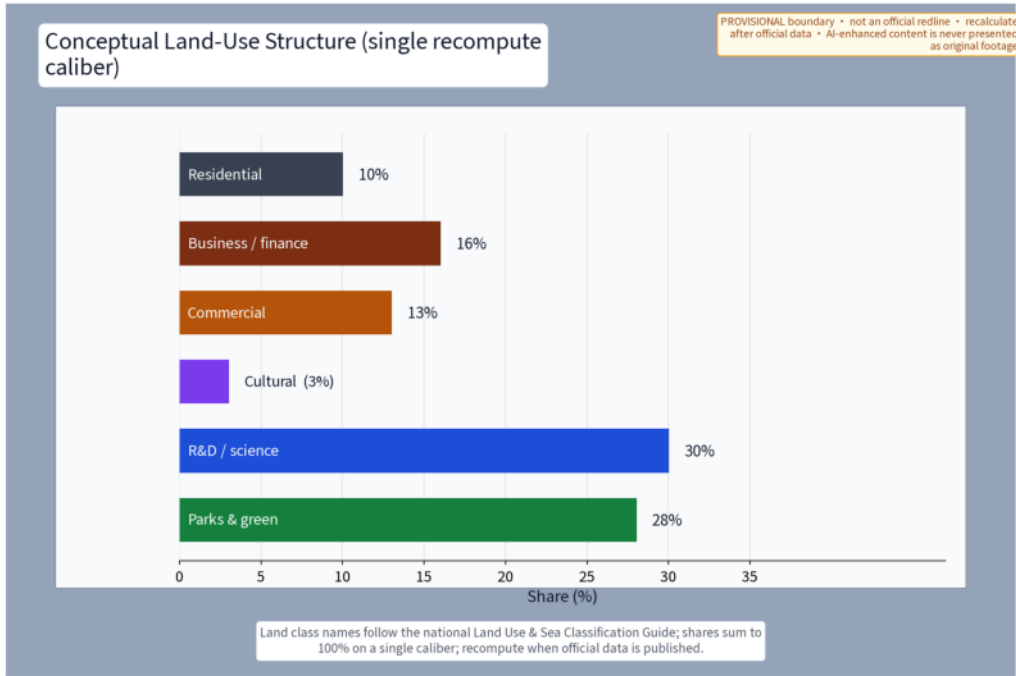

Three-Node Index with Differentiated Tasks

PROVISIONAL boundary • not an official redline • recalculate after official data • AI-enhanced content is never presented as original footage

and-Use Structure (single recompute caliber) + Core Metric Evidence (single caliber • recompute

PROVISIONAL boundary • not an official redline • recalculate after official data • AI-enhanced content is never presented as original footage

Core Metric Evidence (single caliber • recompute trigger)

PROVISIONAL boundary • not an official redline • recalculate after official data • AI-enhanced content is never presented as original footage

geometry layer -> formula recompute -> reduced-precision display (provisional)

Metric	Formula / source (conf)	Displayed value (reduced)	Recompute trigger
site_area_sqm	polygon area (provisional, EPSG:4548) conf: medium	about 11.4 km²	on official geometry
green_ratio	green_space_area / site_area conf: low	0.13 (about 13%)	on official green-line data
public_space_ratio	public_space_area / site_area conf: low	0.0035 (about 0.4%)	on official land-use data
persona_count	8 persona groups conf: high	8	on persona update
scenario_card_count	12 scenario cards conf: high	12	on scenario update
global_case_count	6 benchmark cases conf: high	6	on case update

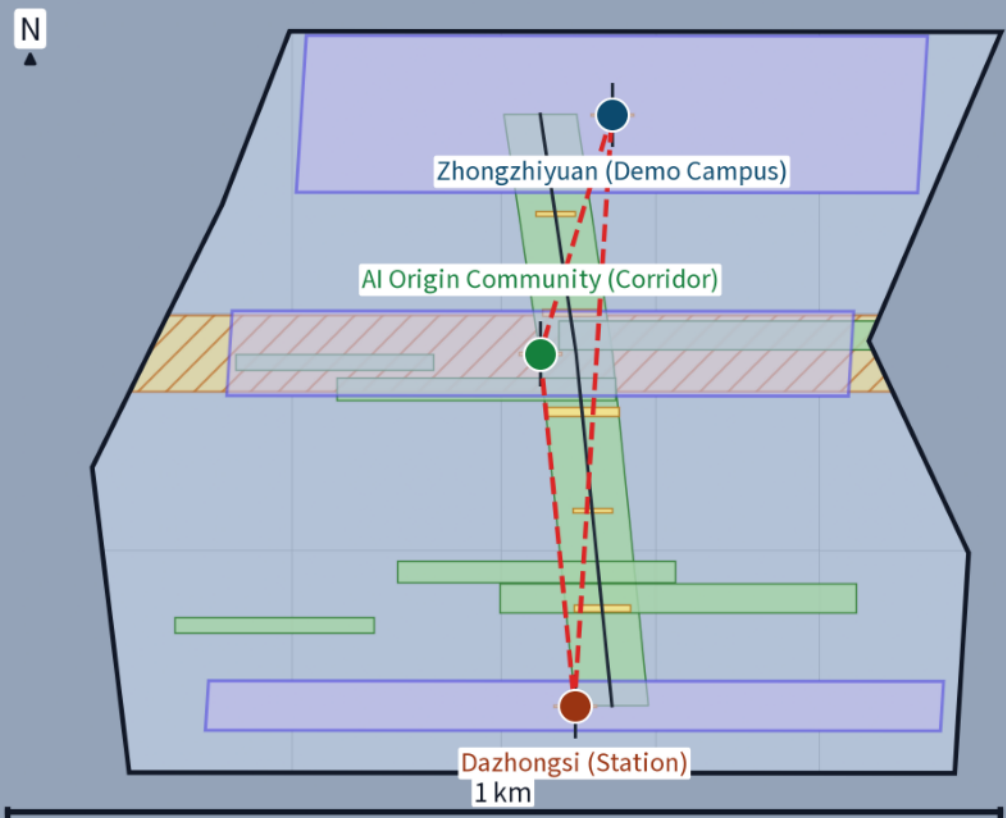

All displayed values are reduced-precision concept calibers (participant provisional model data, not authoritative); ratios and counts use separate axes; this is an evidence chain, not a value comparison.

Overall Design Overview - GREEN.JZ

PROVISIONAL boundary • not an official redline • recalculate after official data • AI-enhanced content is never presented as original footage

Overall Design Overview - GREEN.JZ

Coordinated research • 43.6 km² (announce) | Haidian main • 11.4 km² (announce) | Key areas • 368.4 ha (announce)

PROVISIONAL boundary • not an official redline • recalculate after official data • AI-enhanced content is never presented as original footage

Legend

- Overall design scope (provisional)
- Key areas (provisional)
- Conceptual green space
- Public space / plaza
- Slow + green-energy loop (concept)
- Slow green-energy loop (concept)
- Heritage zone (concept)
- Zhongguancun Tech Service Wing
- Xiaoyuehe Scenario Empowerment Wing

Geometry from the package's provisional polygons; not an official redline; recalculate when official data is published.

Slow-Mobility and Blue-Green Space Analysis + Brand Identity: GREEN.JZ (original concept)

PROVISIONAL boundary • not an official redline • recalculate after official data • AI-enhanced content is never presented as original footage
