

01 | Overall Concept

Civic spine • three anchors • testable public value

Provisional geometry • not an official redline

02 | Three Areas–Two Wings

Regional collaboration translated into spatial and operating interfaces

Joint briefs • scenario lists • test recognition • residencies • demo referral

03 | Three Key Areas

Distinct spatial actions, projects and dependencies

01 FULL-STACK GARDEN

1 corridor • 2 courts •
3 test platforms

PROJECT

JZ-02

DEPENDENCIES

River / energy / device safety

02 TRANSFER COMMUNITY

open-source room •
transfer street • life loop

PROJECT

JZ-03

DEPENDENCIES

Ownership / fire / ground floor

03 AI-NATIVE GATEWAY

4 quadrants • demo room
experience street

PROJECT

JZ-04

DEPENDENCIES

Station / intersection / utilities

All three areas use provisional polygons; professional surveys remain mandatory.

04 | Mobility + Blue-Green + AI

One continuous daily network with human fallback

LEGEND

- Civic spine
- Key-area cross-link
- 10 AI scenarios
- 3 knowledge landmarks

ACCESS ORDER

- Accessible walk
- Cycling
- Transit transfer
- Event management
- Vehicle micro-loop

Concept links only • not official road redlines or engineering alignments

05 | Metrics + Evidence

Spatial checks • operating KPIs • pending statutory controls

11.41 km²

Provisional area

10

Scenario nodes

3

Industry tests

3

Knowledge landmarks

6

Renewal projects

DISTINCT TASK EVIDENCE

agent.1

Identity + structure

agent.2

6 cases + 8 factors

agent.3

10 cards + 5 gates

agent.4

3 landmarks + kit

agent.5

3-act culture

agent.6

Annual cycle + funnel

FAR • height • density • setbacks • redlines remain pending official data

Counts describe concept deliverables, not approved construction.
