

One Spine • Three Cores • Four Belts • Two Wings • Multi-node Network

From the centennial zigzag railway to a human-centered AI city

Core concept: taking the self-reliance spirit of the centennial zigzag railway, the Jing-Zhang Heritage Park is shaped into a human-centered AI public spine, forming an one-spine three-cores, four-belt two-wings, multi-node network.

Double-Signature Verification: every AI scenario must be signed by two independent parties, a developer pen (technology provider) and a user pen (affected user representative). Both signatures present: open. Either missing: closed (human baseline continues). Any veto: closed with publicly inspectable receipt.

Public bottom line: for every AI scenario, the same basic service must remain available after the intelligent layer is switched off. Human windows, paper forms, telephones and fixed wayfinding exist before the intelligent layer is allowed on.

Core Metrics

Total design area	Green ratio
11,412,825 m²	23.0 %
Public space ratio	AI R&D land
5.2 %	22.3 %
Building footprint	Spine + connectors
2,420,696 m²	19,063 m

Three Key Areas

Zhongzhiyuan AI Accelerator

192.1 ha (provisional)

Garden-type full-stack innovation: frameworks, models, data, compute, safety evaluation.

Beijing AI Origin Community

104.3 ha (provisional)

University-adjacent AI origin & talent community: incubation -conversion-talent loop.

Dazhongsi AI Industry Cluster

72 ha (provisional)

Urban smart-economy district: agents, terminals, content, data elements.

12 AI Scenario Cards • 3 Industry Test/Validation Scenarios

- S01 Open-Source Launch Hall
- S04 AI Slow-Mobility Nav
- S07 Campus Transfer Street
- S10 Agent Traffic Simulation*

- S02 Autonomous Model Eval Ground*
- S05 Int'l Roadshow Hall
- S08 Data Elements Hall
- S11 AI Governance Gallery

- S03 Edge-Compute Stops
- S06 Qinghe Eco-Innovation Corridor
- S09 AI Life Services Street
- S12 Global AI Week Route*
