Phasing · metrics · risk and compliance

One Memory Spine links three archive stations and two record wings

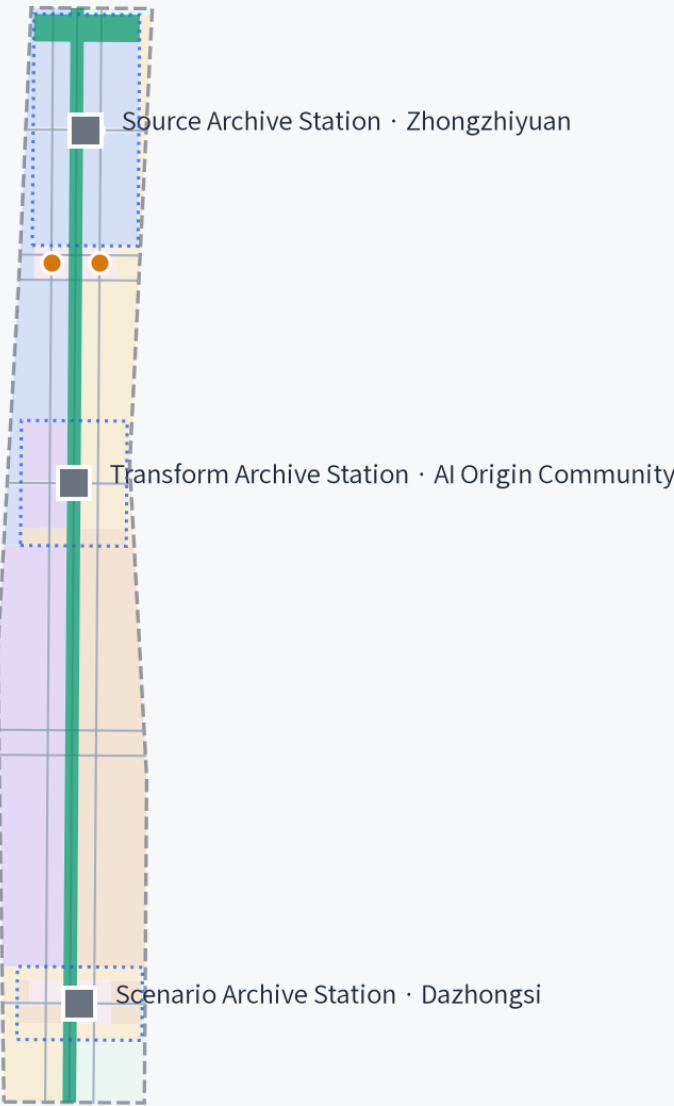

01 01 Design Basis and Source List

Primary basis: the Qualification Pre-Announcement and the Agent Open-Call Taskbook (v0518); machine-readable basis: the site package and source registry. All spatial content is generated on the provisional boundary as a conceptual recommendation; it does not replace statutory planning and does not constitute approved government conclusions.

JZ Archive Belt · Concept Overview

Memory Spine · Three Archive Stations · Two Record Wings
Zhongguancun Technology Services Wing (Factor Record)

Xiaoyue River Scenario Enablement Wing (Scenario Record)

Write open co-creation into the city archive: contributions, services, corrections and honors all enter the archive

Three-level scope

- Coordinated Research Area 43.6 km²
- Overall Design Area 11.4 km²
- Key-Area Detailed Design Area 368.4 ha

01	Source Archive Station · Zhongzhiyuan
	Source / contribution
02	Transform Archive Station · AI Origin Community
	Transform / correction
03	Scenario Archive Station · Dazhongsi
	Scenario / public service

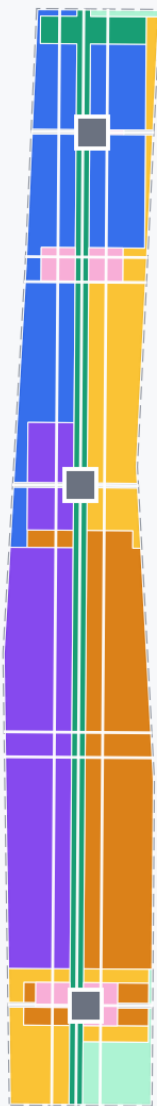

Boundaries are provisional, not official redlines; full recalculation required after official data release

02 02 Three-Level Scope Framework

Three-level scope: Coordinated Research Area approx. 43.6 km² (strategy and regional synergy), Overall Design Area approx. 11.4 km² (urban renewal at RDP depth), Key-Area Detailed Design Area approx. 368.4 ha (three archive stations). The levels are continuous: research explains why the belt exists, design turns judgments into recomputable land use and projects, key areas verify implementability.

JZ Archive Belt · Land Use and Spatial Structure

Research · Education · Commercial · Residential · Blue-Green · Reserve

Land-use composition

- Research 0802 236 ha
- Education 0804 254 ha
- Commercial 05 244 ha
- Residential 0701 185 ha
- Park green 1401 135 ha
- Shelter green 1402 39 ha
- Plaza 1403 39 ha
- Road 1207 9 ha

Adjacent polygons share grid edges; union equals boundary

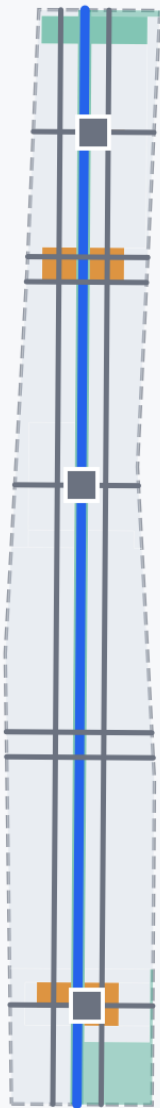

Boundaries are provisional, not official redlines; full recalculation required after official data release

03 03 Coordinated Research Area: Industry and Future City

Spatial structure: one belt (Memory Spine) · three stations (Source/Transform/Scenario) · two wings (Zhongguancun factor record, Xiaoyue scenario record) · multiple points (name wall/Honor Yearbook/commit stele) · two networks (blue-green slow traffic and archive retrieval). Renewal uses archive-based units: anchors + spine stitching + low-disturbance micro-renewal.

JZ Archive Belt · Mobility, Blue-Green and Public Space

Memory Spine · Three stitch bands · Archive nodes

Mobility & blue-green

- Memory Spine (greenway)
1 · north-south
- Stitch bands (branch)
3 · to the three stations
- Total road centerline
37.3 km
- Green area / ratio
174 ha / 15.23%
- Public-space area
394801 m²
- Transit connection
Dazhongsi / Wudaokou / Qinghua East Road West (conceptual)

Road redlines/rail alignments are conceptual; engineering conclusions await official data

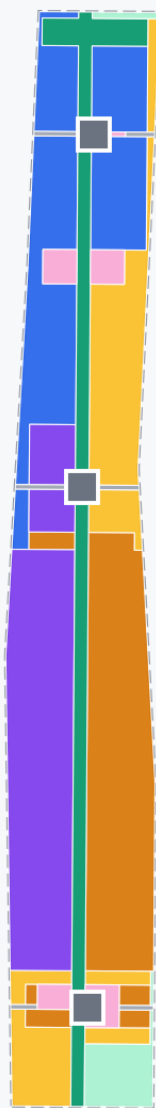

Boundaries are provisional, not official redlines; full recalculation required after official data release

04 04 Overall Design Area: Urban Renewal and RDP-Level Design

Three archive stations: Source · Zhongzhiyuan (full-stack innovation, model evaluation and standards hall); Transform · AI Origin Community (commercialization, commit stele and Honor Yearbook); Scenario · Dazhongsi (AI-native new business, four-quadrant pedestrian connection). All key-area content is directional concept design.

JZ Archive Belt · Key-Area Detailed Design

Source · Transform · Scenario

SOURCE	Zhongzhiyuan · Full-stack innovation
Space: Shaded test court + slow loop	
Public edge: Contribution intake desk	
Manual fallback: Staffed intake / paper archive	
TRANSFORM	AI Origin Community · Commercialization
Space: Bookish courtyard + station stitch	
Public edge: Yearbook node + commit stele	
Manual fallback: Dual review for honors and corrections	
SCENARIO	Dazhongsi · AI-native new business
Space: Service street edge + four-way crossing	
Public edge: Service archive panel	
Manual fallback: Offline counter / conventional service	

Key-area conclusions are conceptual; directional only until official polygons are published

Boundaries are provisional, not official redlines; full recalculation required after official data release

05 05 Detailed Design of Key Areas

Archive Charter: tiered archiving / tiered search / corrections and withdrawal / minimum-necessary fields / human-final honors / archive as evidence / non-AI equivalent paths. 12 scenario archive cards (3 testing/validation), 6 personas, 3 AI pilgrimage landmarks.

JZ Archive Belt · Metrics and Evidence

EPSG:4548 recomputation · three metric classes

Spatial recomputation metrics (status=known)

Overall Design Area 11,412,825 EPSG:4548 geometry recompute	Green ratio 15.23% EPSG:4548 geometry recompute	Public-space ratio 3.46% EPSG:4548 geometry recompute
Building footprint 89,569 EPSG:4548 geometry recompute	Road centerline length 37,308 EPSG:4548 geometry recompute	Key areas 3 EPSG:4548 geometry recompute

Sources & state

- OFFICIAL-ANNOUNCEMENT (formal)
- AGENT-TASKBOOK (formal)
- SITE-PACKAGE / SOURCE-REGISTRY
- PROVISIONAL-BOUNDARIES (provisional_only)
- Local standard snapshots ×5 (formal)

Self-check state

- Spatial review: PASS
- Professional evidence: PASS
- Visual packaging: PASS
- Deterministic validation: PASS

Statutory controls (FAR/height/density/setbacks) pending official data; no fabricated values

Operational metrics (archive entries / names / correction responses) are definitions only

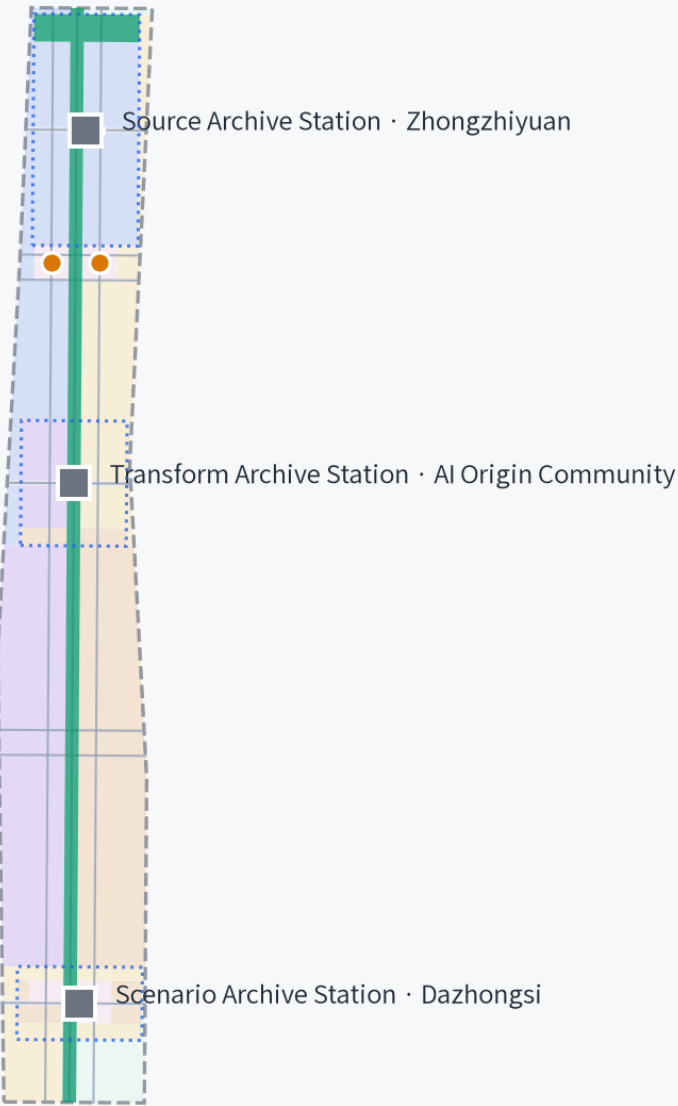

Boundaries are provisional, not official redlines; full recalculation required after official data release

06 06 AI Ecosystem, Personas and AI+ Scenarios

13 conceptual renewal projects in three phases: Phase 1 spine stitching and archive anchors; Phase 2 test blocks and data platform; Phase 3 the two archive stations. Each item lists prerequisites, possible procedures subject to professional confirmation, resource-and-acceptance study items and rollback triggers (safety/privacy/heritage/ecology/economy), with no cost or performance commitment.

JZ Archive Belt · Concept Overview

Memory Spine · Three Archive Stations · Two Record Wings

12 12 Risk, Copyright and Compliance

Risk and compliance: full recalculation when official boundaries are released; control/redline/ownership/heritage gaps are listed as assumptions; archive facilities collect no personal trajectories; honors are human-final; no official approval or implementation commitment is claimed.

JZ Archive Belt · Key-Area Detailed Design

Source · Transform · Scenario

SOURCE Zhongzhiyuan · Full-stack innovation

Space: Shaded test court + slow loop

Public edge: Contribution intake desk

Manual fallback: Staffed intake / paper archive

TRANSFORM AI Origin Community · Commercialization

Space: Bookish courtyard + station stitch

Public edge: Yearbook node + commit stele

Manual fallback: Dual review for honors and corrections

SCENARIO Dazhongsi · AI-native new business

Space: Service street edge + four-way crossing

Public edge: Service archive panel

Manual fallback: Offline counter / conventional service

Key-area conclusions are conceptual; directional only until official polygons are published

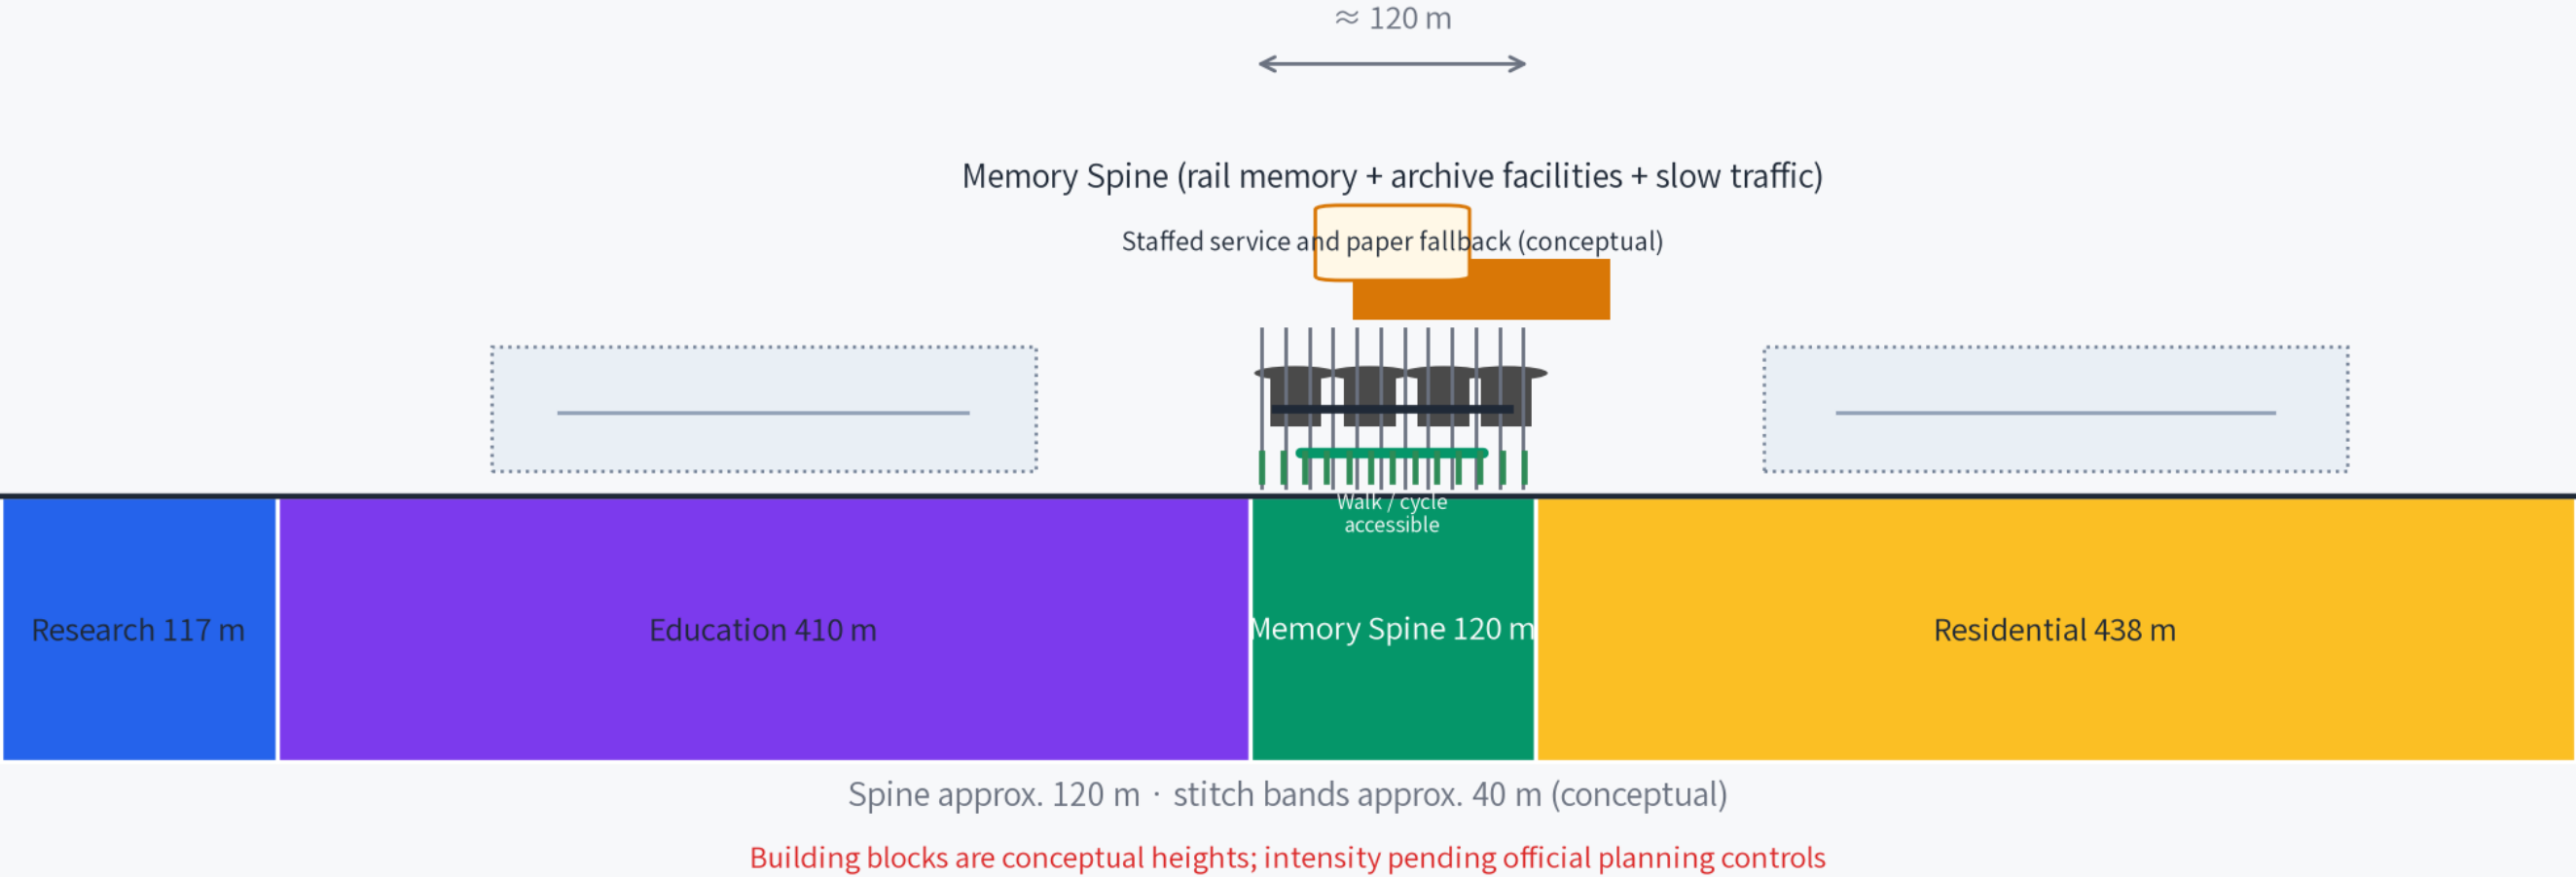

Boundaries are provisional, not official redlines; full recalculation required after official data release

Appendix · Memory Spine Section (conceptual)

Section at the AI Origin Community segment (derived from the submitted geometry): research 117 m / education 410 m / Memory Spine green band 120 m / residential 438 m; the spine carries rail memory, archive facilities and slow traffic, with a continuous slow-route band and manual paper fallback point; building blocks are conceptual heights pending official controls.

JZ Archive Belt · Memory Spine Section (conceptual)

Section at the AI Origin Community segment · conceptual

Boundaries are provisional, not official redlines; full recalculation required after official data release

Appendix · Three Archive Stations Morphological Differentiation (conceptual)

Three archive stations side by side: base and buildings from the submitted geometry; garden/campus/urban typological difference is conceptual, with slow routes, public interfaces and manual fallback points; no numeric labels, not an engineering drawing.

JZ Archive Belt · Three Archive Stations Morphological Differentiation

Garden (Source) — Campus-adjacent (Transform) — Urban (Scenario) · conceptual · not engineering drawing

Submitted geometry forms the base; slow routes, public edges and manual-fallback points make each station an enterable, stoppable and human-supported conceptual space

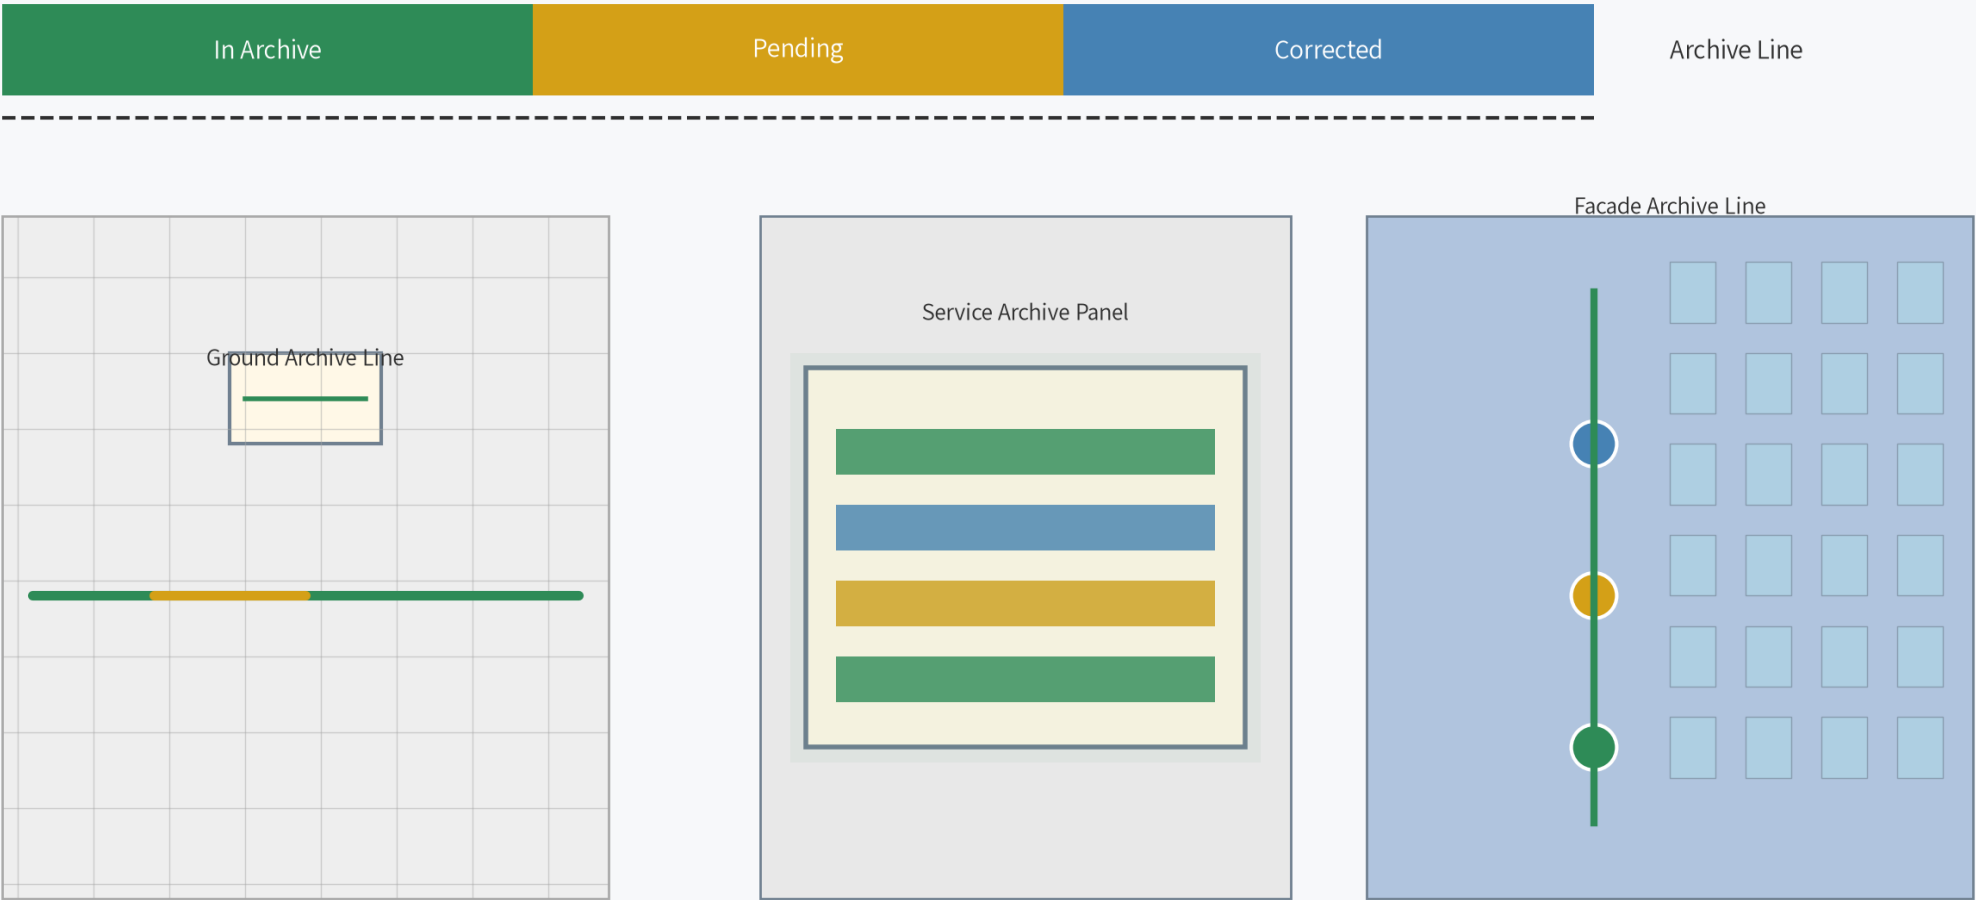

Boundaries are provisional, not official redlines; full recalculation required after official data release

Appendix · Archive Signage System

Status colors (In Archive / Pending / Corrected) run across wayfinding, scenario cards and public interfaces; the archive line is the spine of the system; three applications (ground / panel / facade) are conceptual with no data labels.

JZ Archive Belt · Archive Signage System

Status colors (In Archive / Pending / Corrected) · Archive line · Three applications

Color key on top, three applications below: status colors run across wayfinding, scenario cards and public interfaces

Boundaries are provisional, not official redlines; full recalculation required after official data release

Appendix · Node Details (Human Scale)

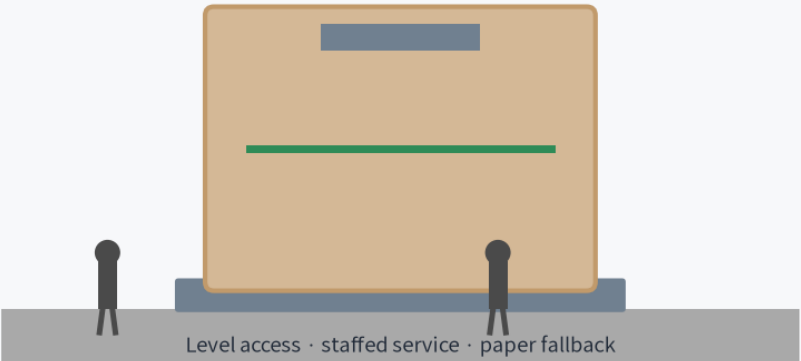

Contribution Intake Desk, Service Archive Panel and Honor Yearbook Node at human scale with figure silhouettes for scale; dimensions are conceptual; each retains level approach, staffed service, offline paper fallback and correction channels.

JZ Archive Belt · Node Details (Human Scale)

Contribution Intake Desk / Service Archive Panel / Honor Yearbook Node · conceptual dimensions

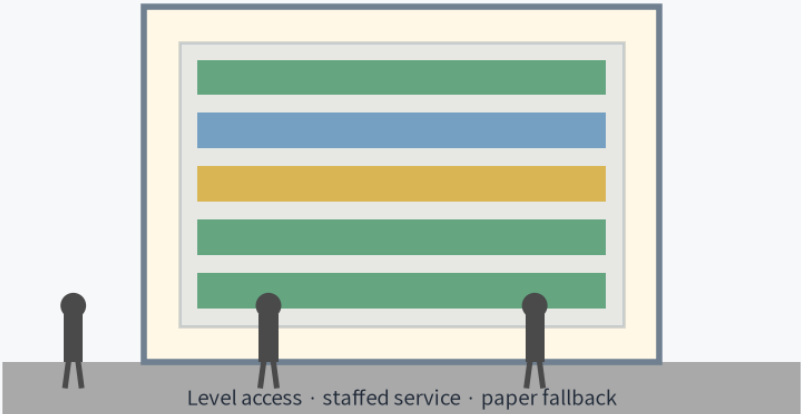

S01 Contribution Intake Desk

Warm wood shell + steel top
slot · Low profile ·
freestanding · park-embedded

S02 Service Archive Panel

Transparent glowing panel +
steel frame · Street/community
node · readable at night

S04 Honor Yearbook Node

Layered plaque wall + brick
base · Touchable · readable ·
appendable

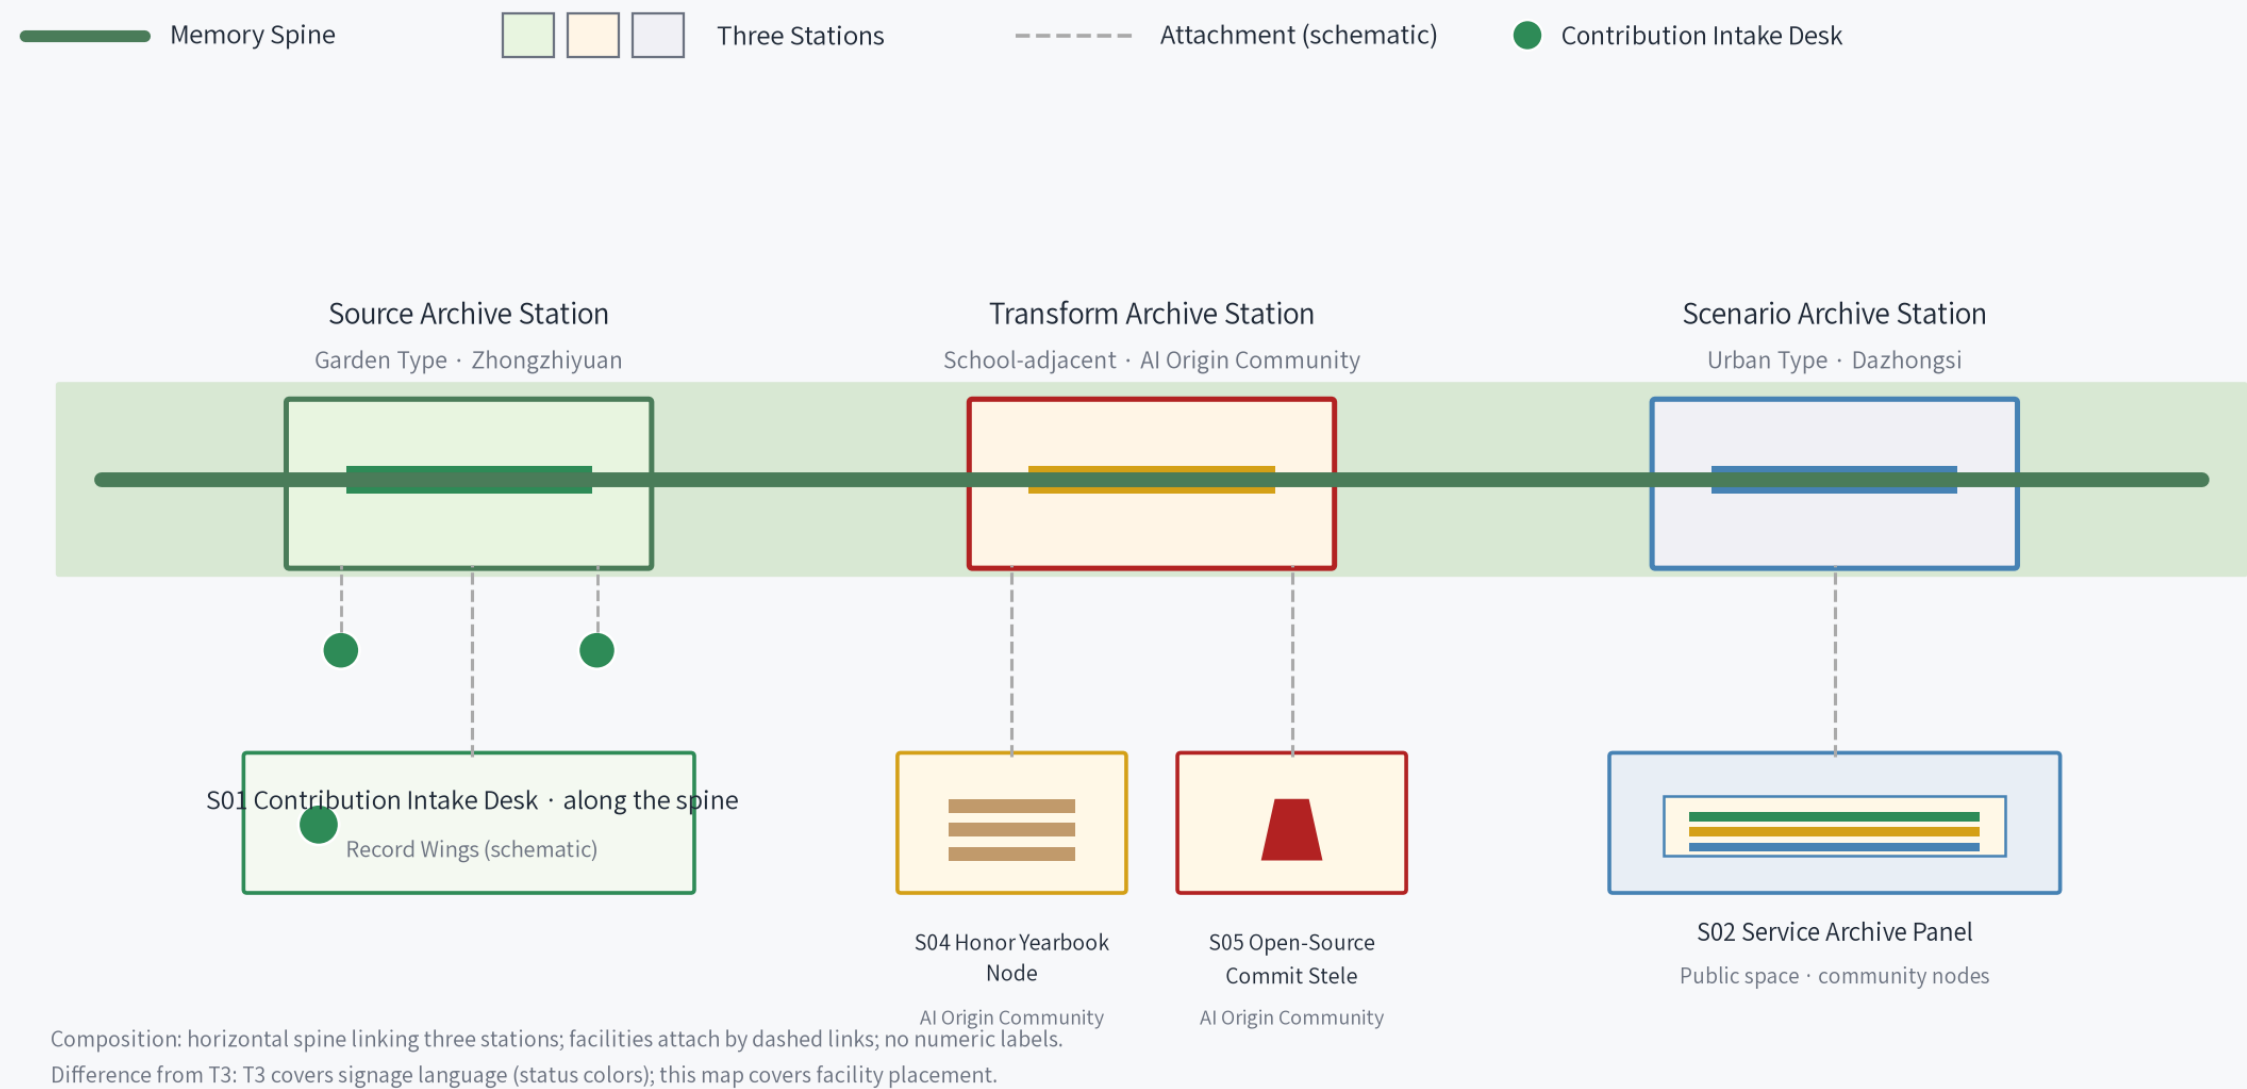

All three nodes retain level access, staffed service and paper fallback when offline; figures provide scale and dimensions remain conceptual
Boundaries are provisional, not official redlines; full recalculation required after official data release

Appendix · Archive Facility System Map (conceptual)

Facility placement: a horizontal Memory Spine links three archive stations (garden / campus-adjacent / urban), and archive facilities (Contribution Intake Desk / Honor Yearbook Node / Open-Source Commit Stele / Service Archive Panel) attach via dashed links; no numeric labels; not an engineering drawing.

JZ Archive Belt · Archive Facility System Map

Facility placement — Memory Spine · Three Archive Stations · Record Wings · conceptual

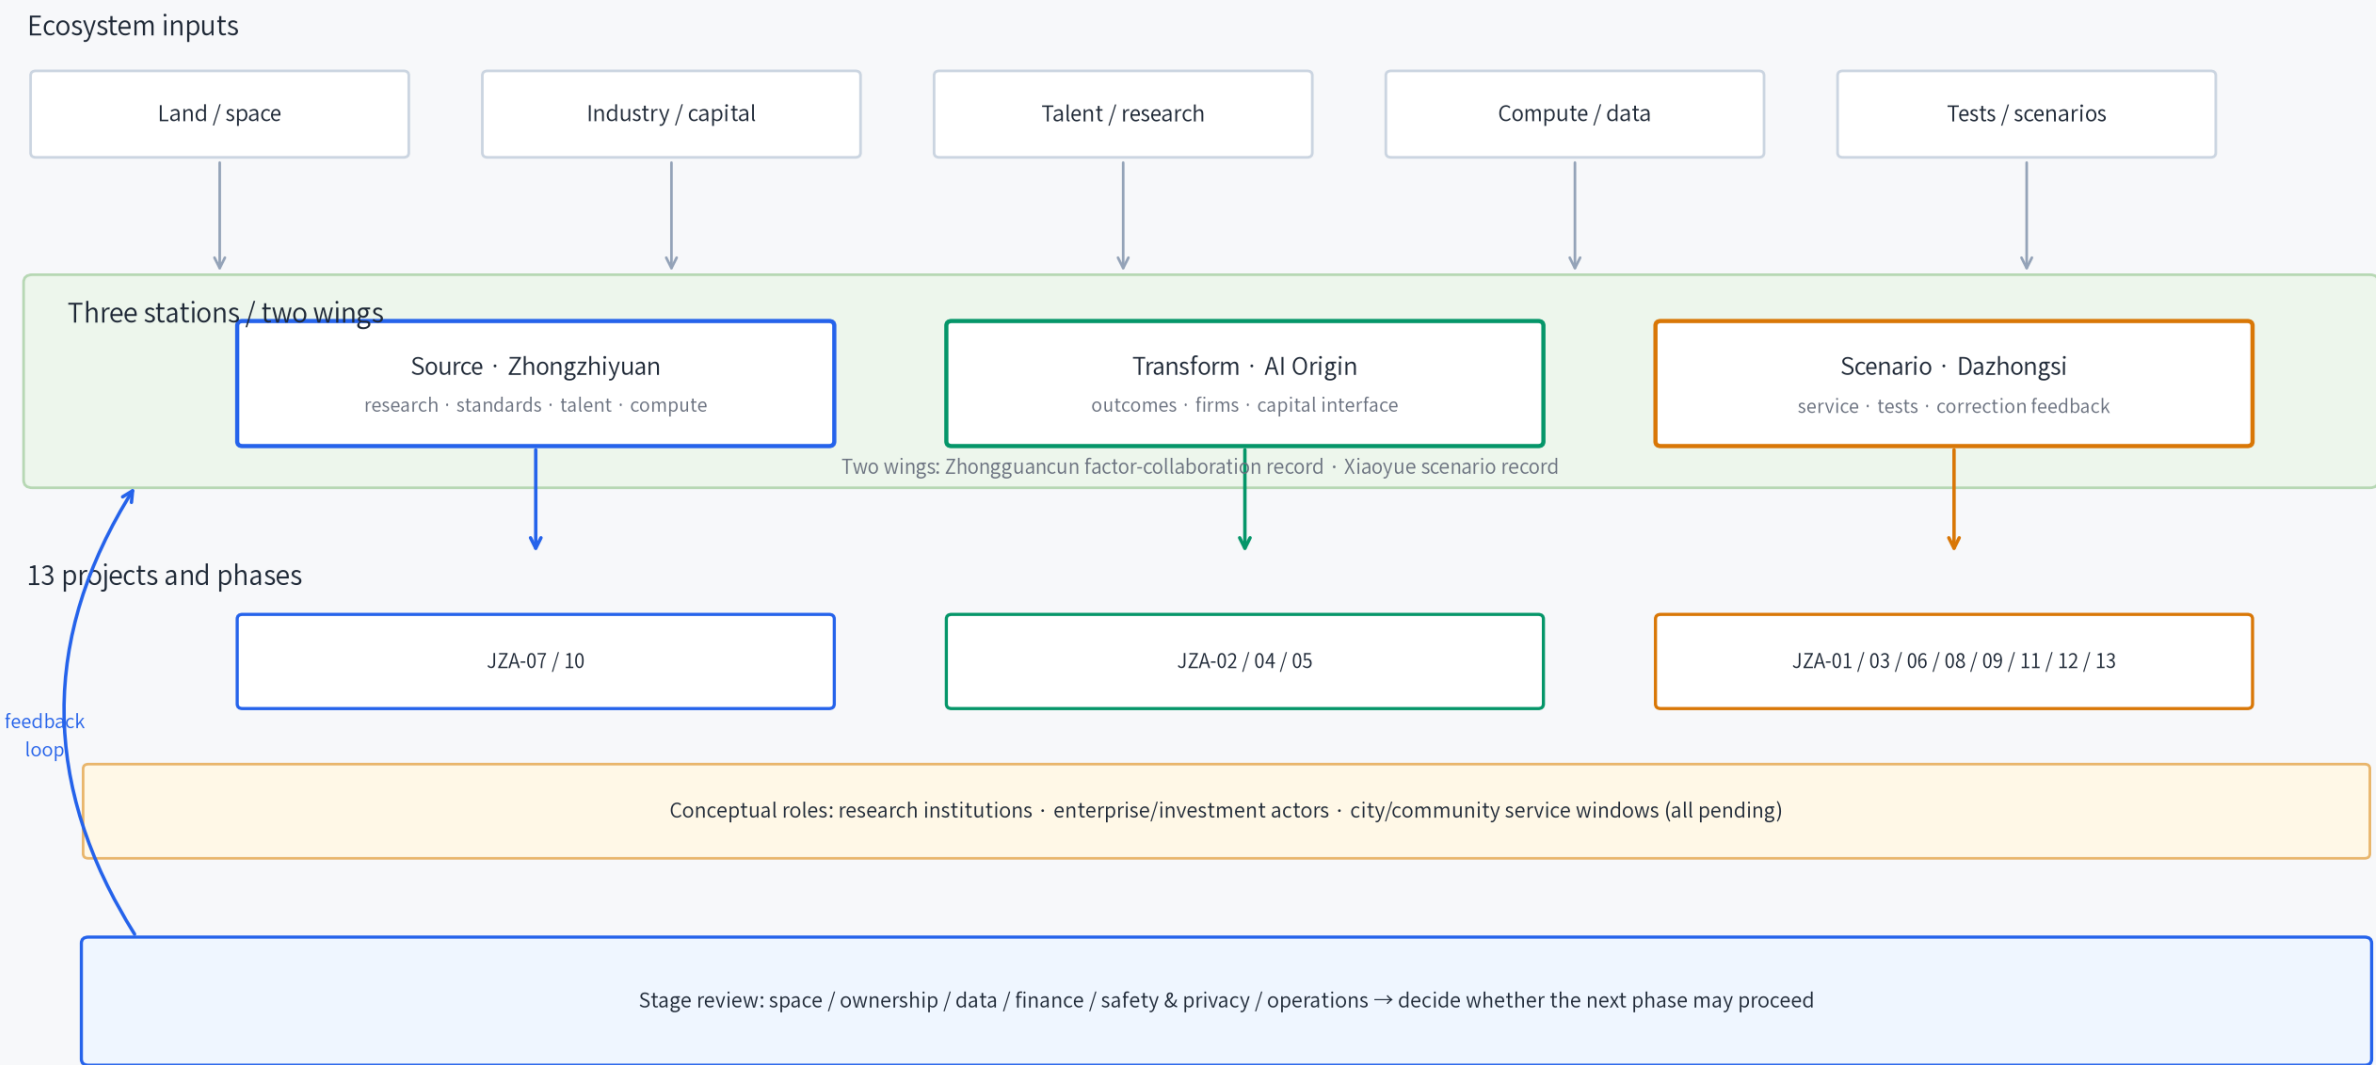

Boundaries are provisional, not official redlines; full recalculation required after official data release

Appendix · AI Innovation Ecosystem Mechanism Matrix (conceptual)

The ecosystem mechanism treats land and space, industry, capital, talent, compute, data and test scenarios as inputs to be verified, then organizes them through the three stations / two wings, 13 projects and stage-review loop. Research institutions, enterprise/investment actors and city/community service windows are conceptual roles only; competent legal entities decide whether to proceed after formal boundaries, ownership, data, finance and operations are confirmed. It is not an ecosystem plan, financing or approval commitment.

JZ Archive Belt · AI Innovation Ecosystem Mechanism Matrix

Inputs — three stations / two wings — 13 projects — stage review · conceptual; roles and conditions pending

This mechanism map only expresses relationships to be verified; it is not an ecosystem plan, appointment, financing or approval conclusion.

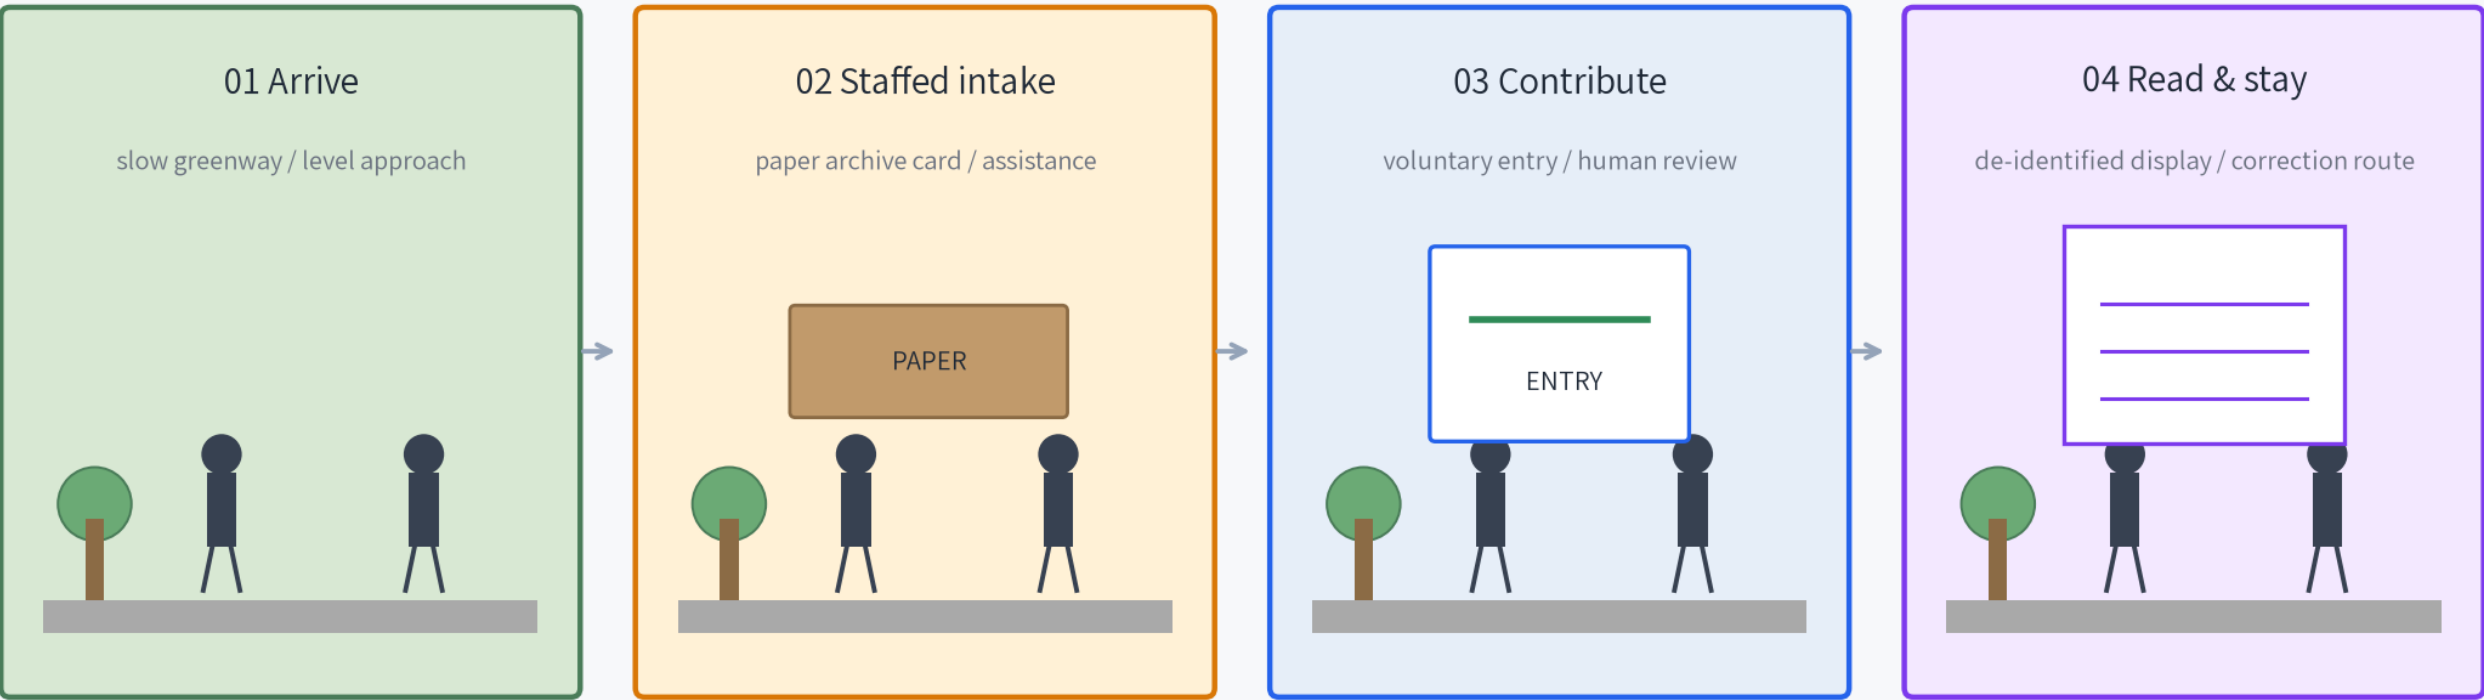

Boundaries are provisional, not official redlines; full recalculation required after official data release

Appendix · S01 Contribution Desk Human-Scale Spatial Sequence (conceptual)

S01 Contribution Desk is the representative node: a level approach from the slow greenway enters staffed intake and paper archive cards, then voluntary contribution with human review, and finally a de-identified reading edge. Any device failure or dispute pauses public display and moves to human handling. Dimensions and layout are conceptual only.

JZ Archive Belt · S01 Contribution Desk: Human-Scale Spatial Sequence

Conceptual sequence · enterable public edge—staffed/paper fallback—contribution—reading stay

Spatial rule: accessible continuity, staffed counter and paper path remain available; device failure or dispute pauses public display and moves to human review.

Boundaries are provisional, not official redlines; full recalculation required after official data release
