

JZ-01 Site Evidence and Life-Problem Overlay

JZ-01

EVIDENCE OVERLAY

SITE EVIDENCE + LIFE-PROBLEM OVERLAY

Map what is known, provisional, hypothesised and unknown before assigning programmes.

EVIDENCE LEDGER

Every spatial claim carries a status.

KNOWN

Published names and areas; public task and source records.

PROVISIONAL

Research, design and focus-area outlines are reproducible, not statutory redlines.

HYPOTHESIS

Breaks, cross-rail gaps and service deficits require field verification.

UNKNOWN

Flows, housing burden, care pressure, microclimate and operators lack baselines.

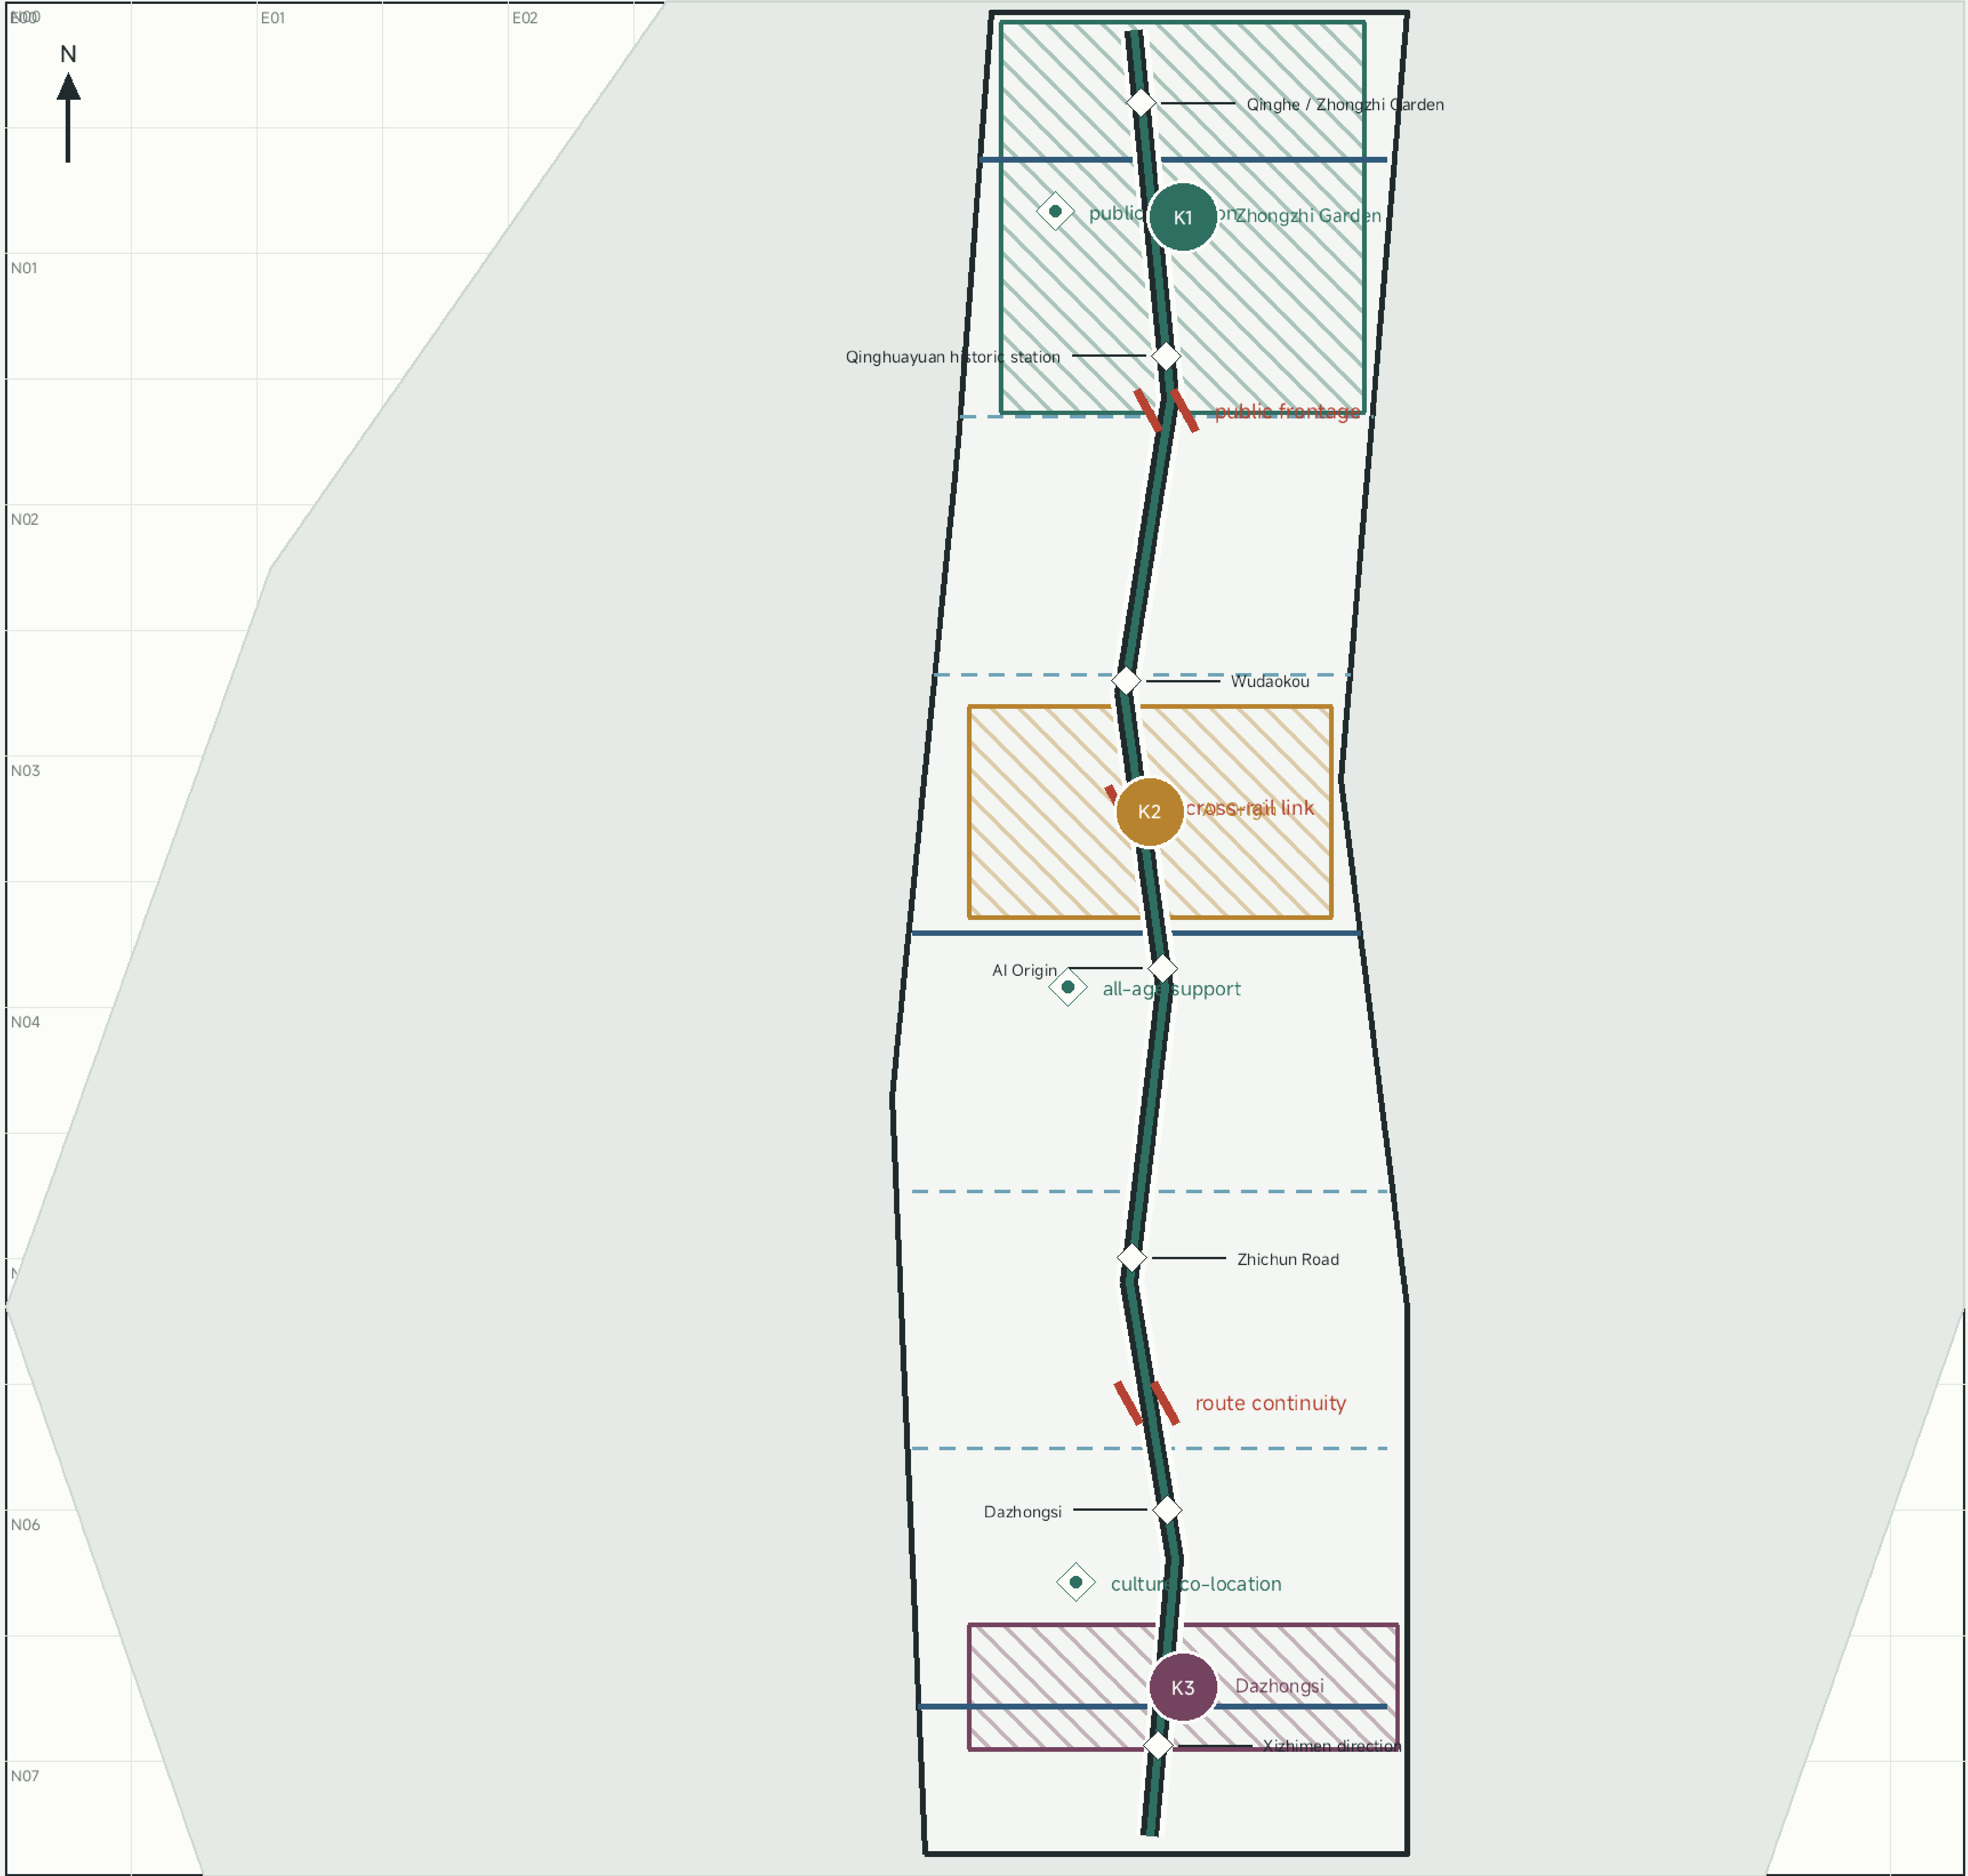

THIS DRAWING ASKS

WHAT MUST BE VERIFIED

It does not pretend

the answer is known.

Formalisation requires field surveys, professional review and resident validation.

LIFE-PROBLEM OVERLAY

Priority is a design proposition, not a measured condition.

01 COMMUTE + TIME

Care and family transitions compress time that the city does not return.

02 HOUSING + STAYING

Life changes lack a stable, affordable and adaptable local housing path.

03 CARE + RELEARNING

Childcare, care, health and reskilling are fragmented across the city.

04 AI CHOICE

Public services must remain explainable, optional and available through people.

05 CULTURE + BELONGING

Chinese culture and railway memory must enter daily life, not decoration.

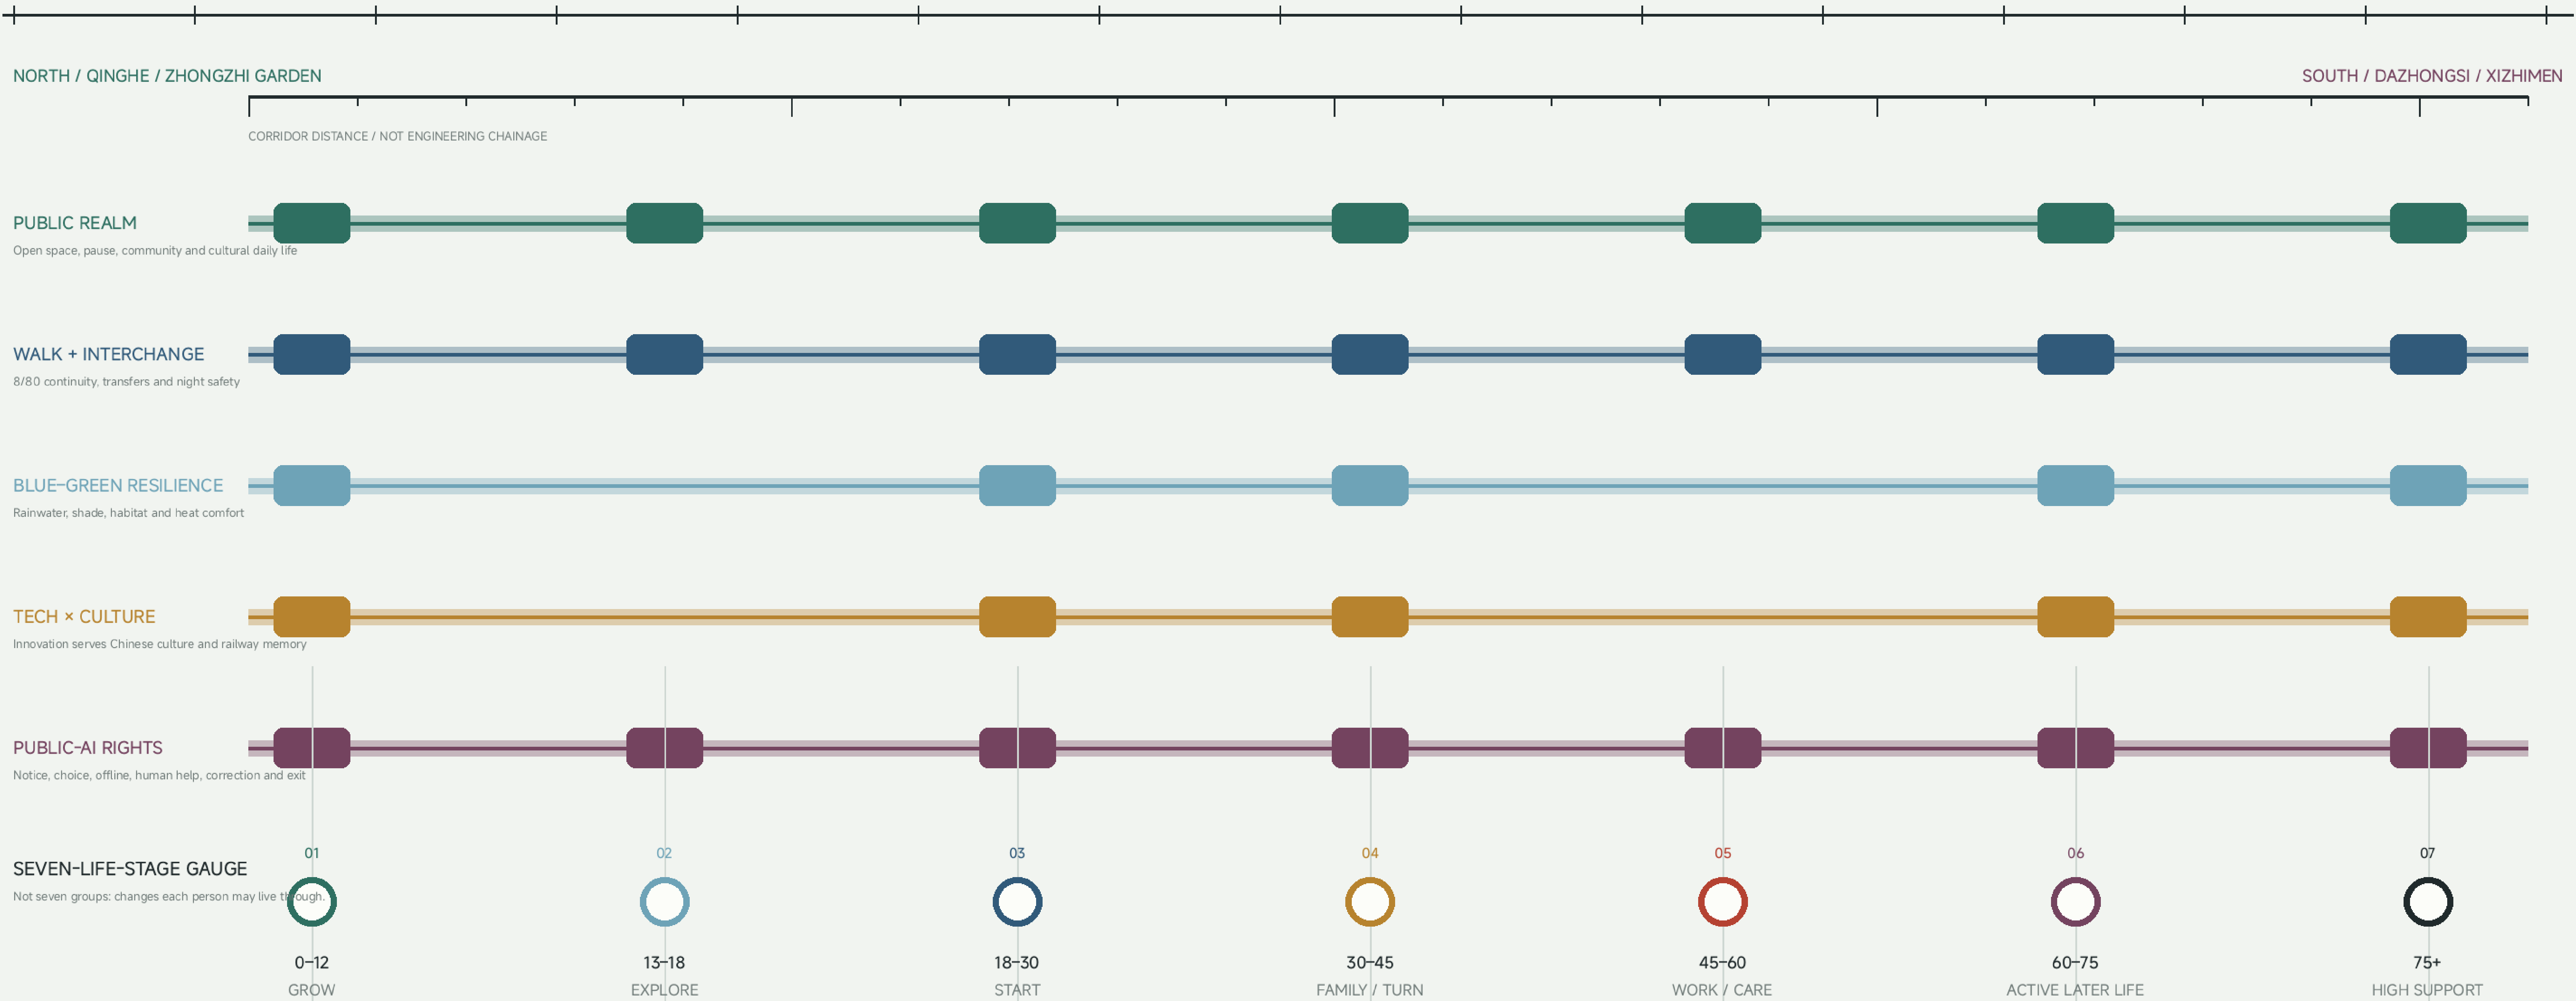

DESIGN THESIS

Turn a collection of projects into civic infrastructure that supports a whole life.

JZ-02
TIME-SPACE WEAVE

JING-ZHANG TIME-SPACE WEAVE

Unfold space by corridor kilometre and test every service against a changing life.

K1 ZHONGZHI · VALIDATION YARD

Connect prototypes, failure and public oversight; no accountable owner or stop control means no site entry.

15-MINUTE SUPPORT CELL

HOME LEARN WORK CARE HEALTH PLAY CULTURE

K2 AI ORIGIN · LIFE INTERCHANGE

Combine housing, learning, care, health and transfers into a 15-minute support cell.

15-MINUTE SUPPORT CELL

HOME LEARN WORK CARE HEALTH PLAY CULTURE

K3 DAZHONGSI · CIVILISATION CONTENT

Make technology serve Chinese culture, railway memory and independent public expression.

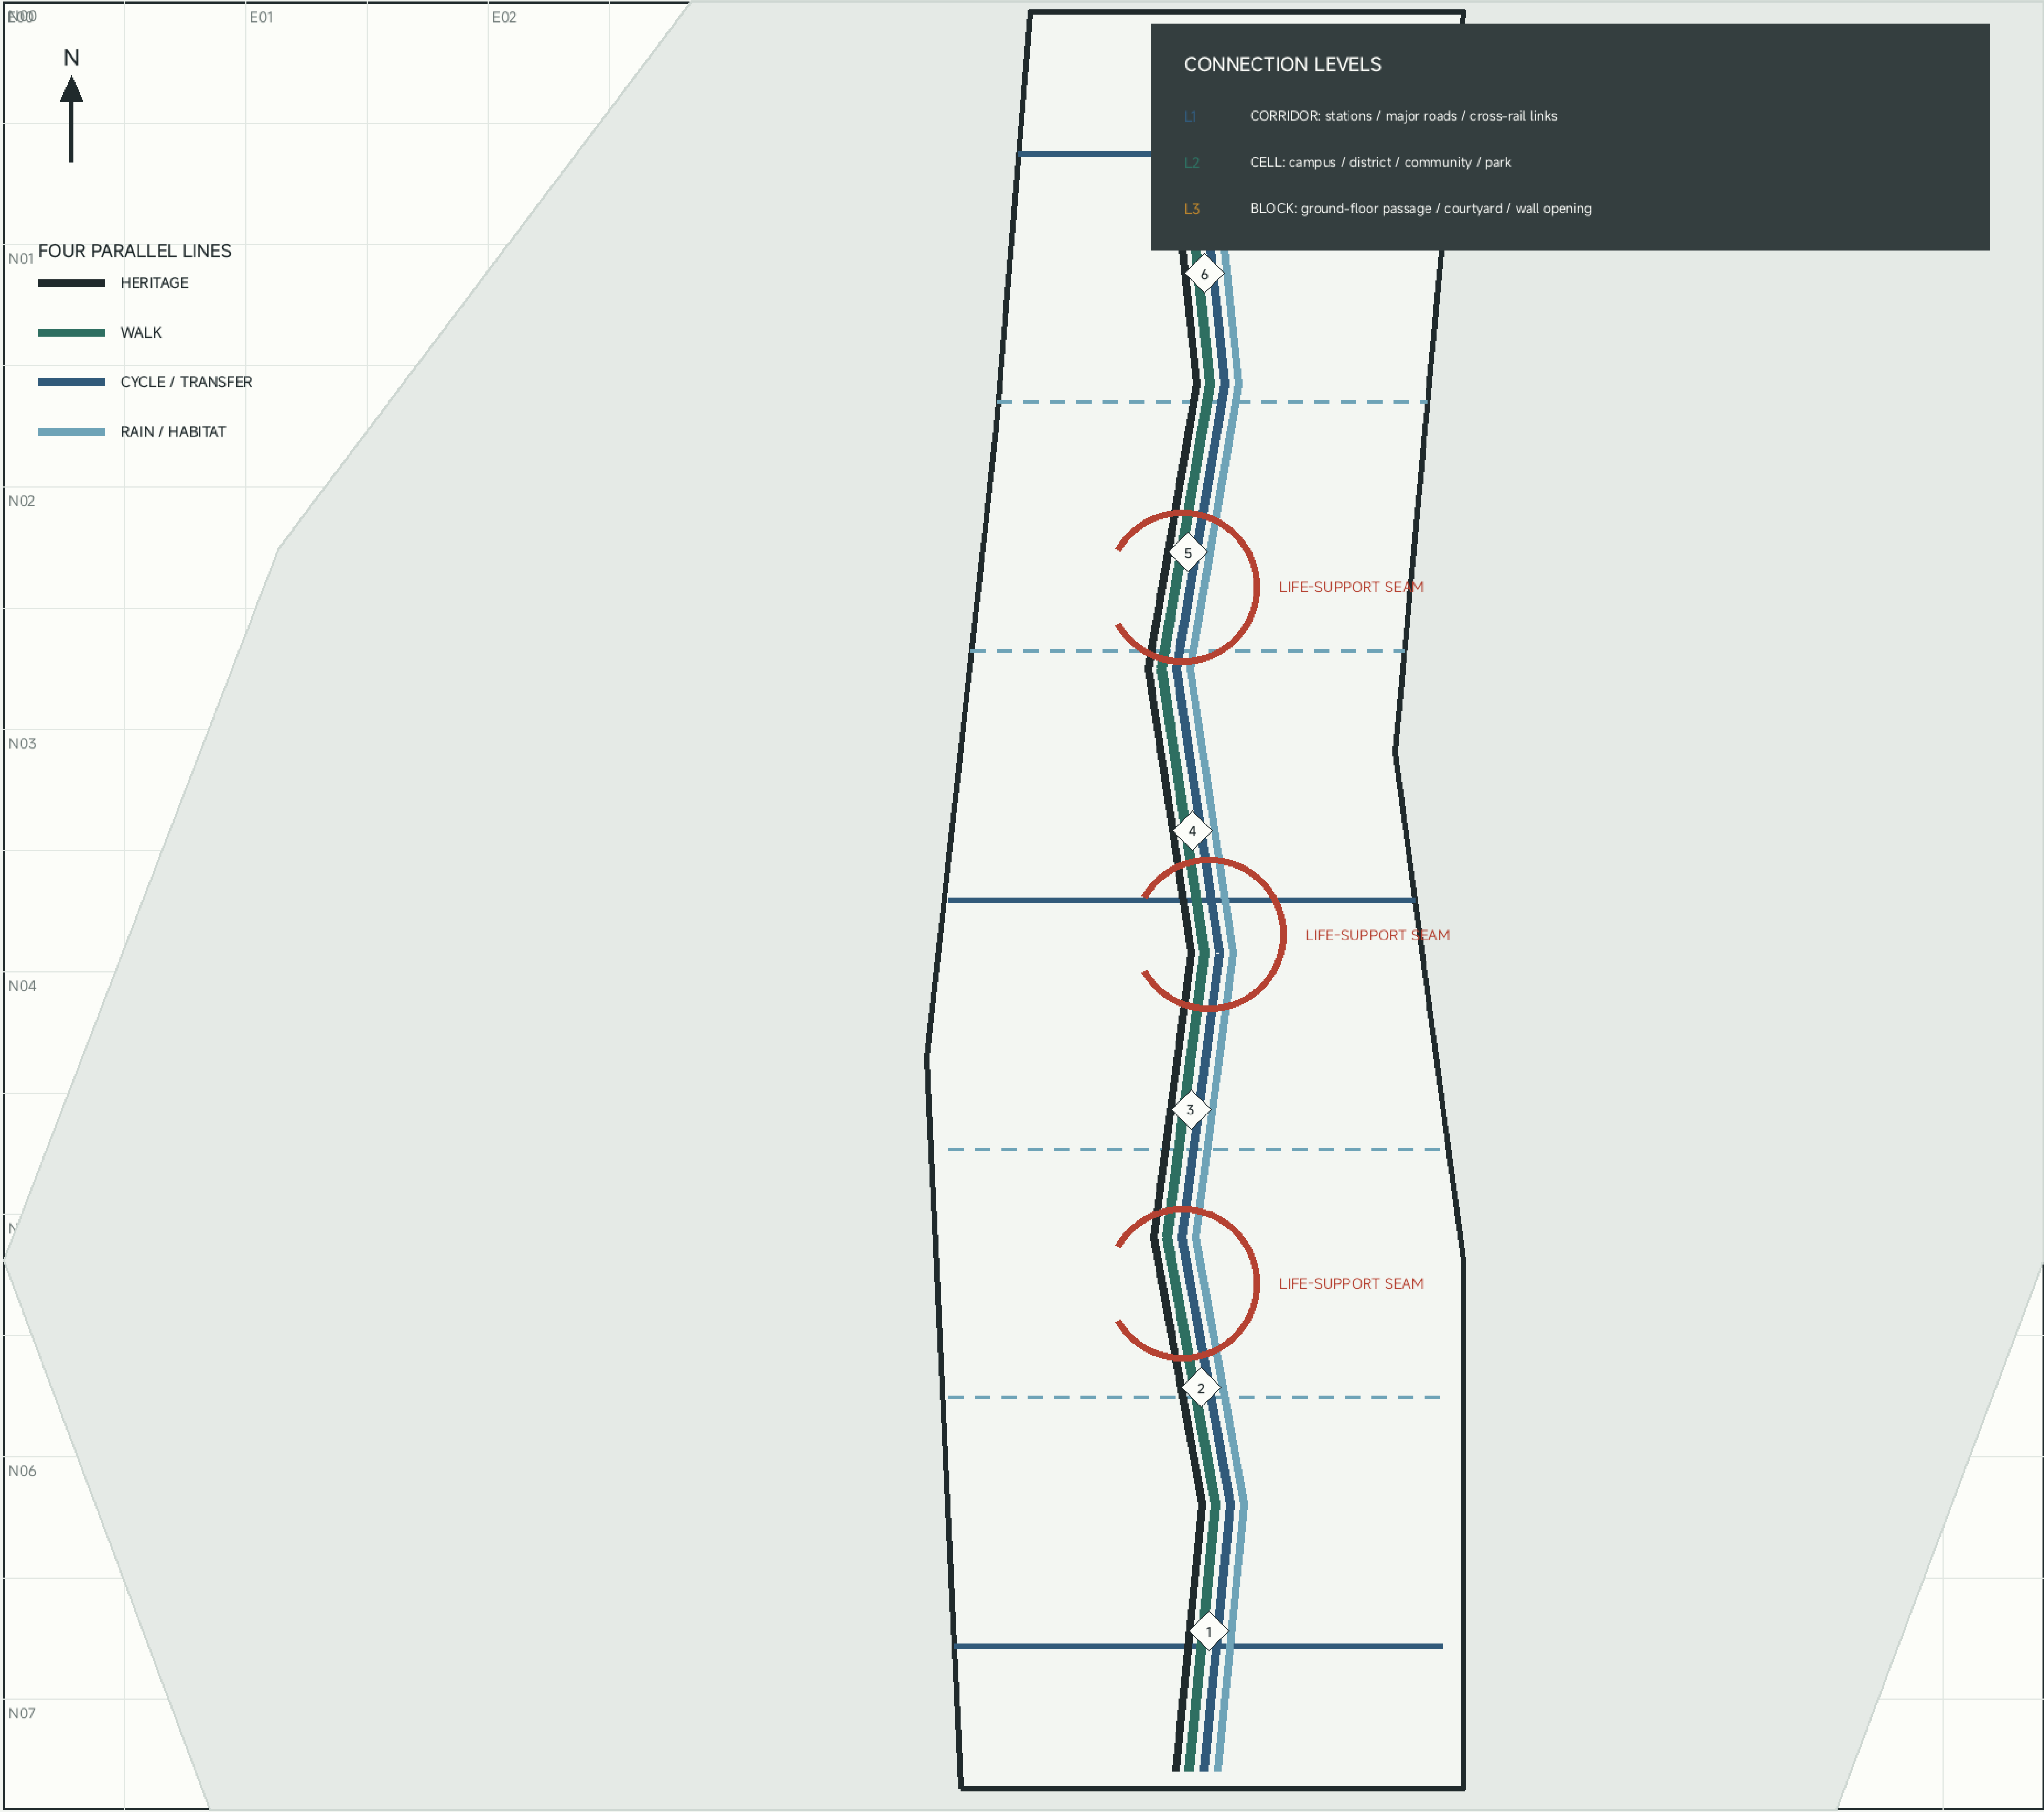

15-MINUTE SUPPORT CELL

HOME LEARN WORK CARE HEALTH PLAY CULTURE

JZ-03
MOBILITY WEAVE

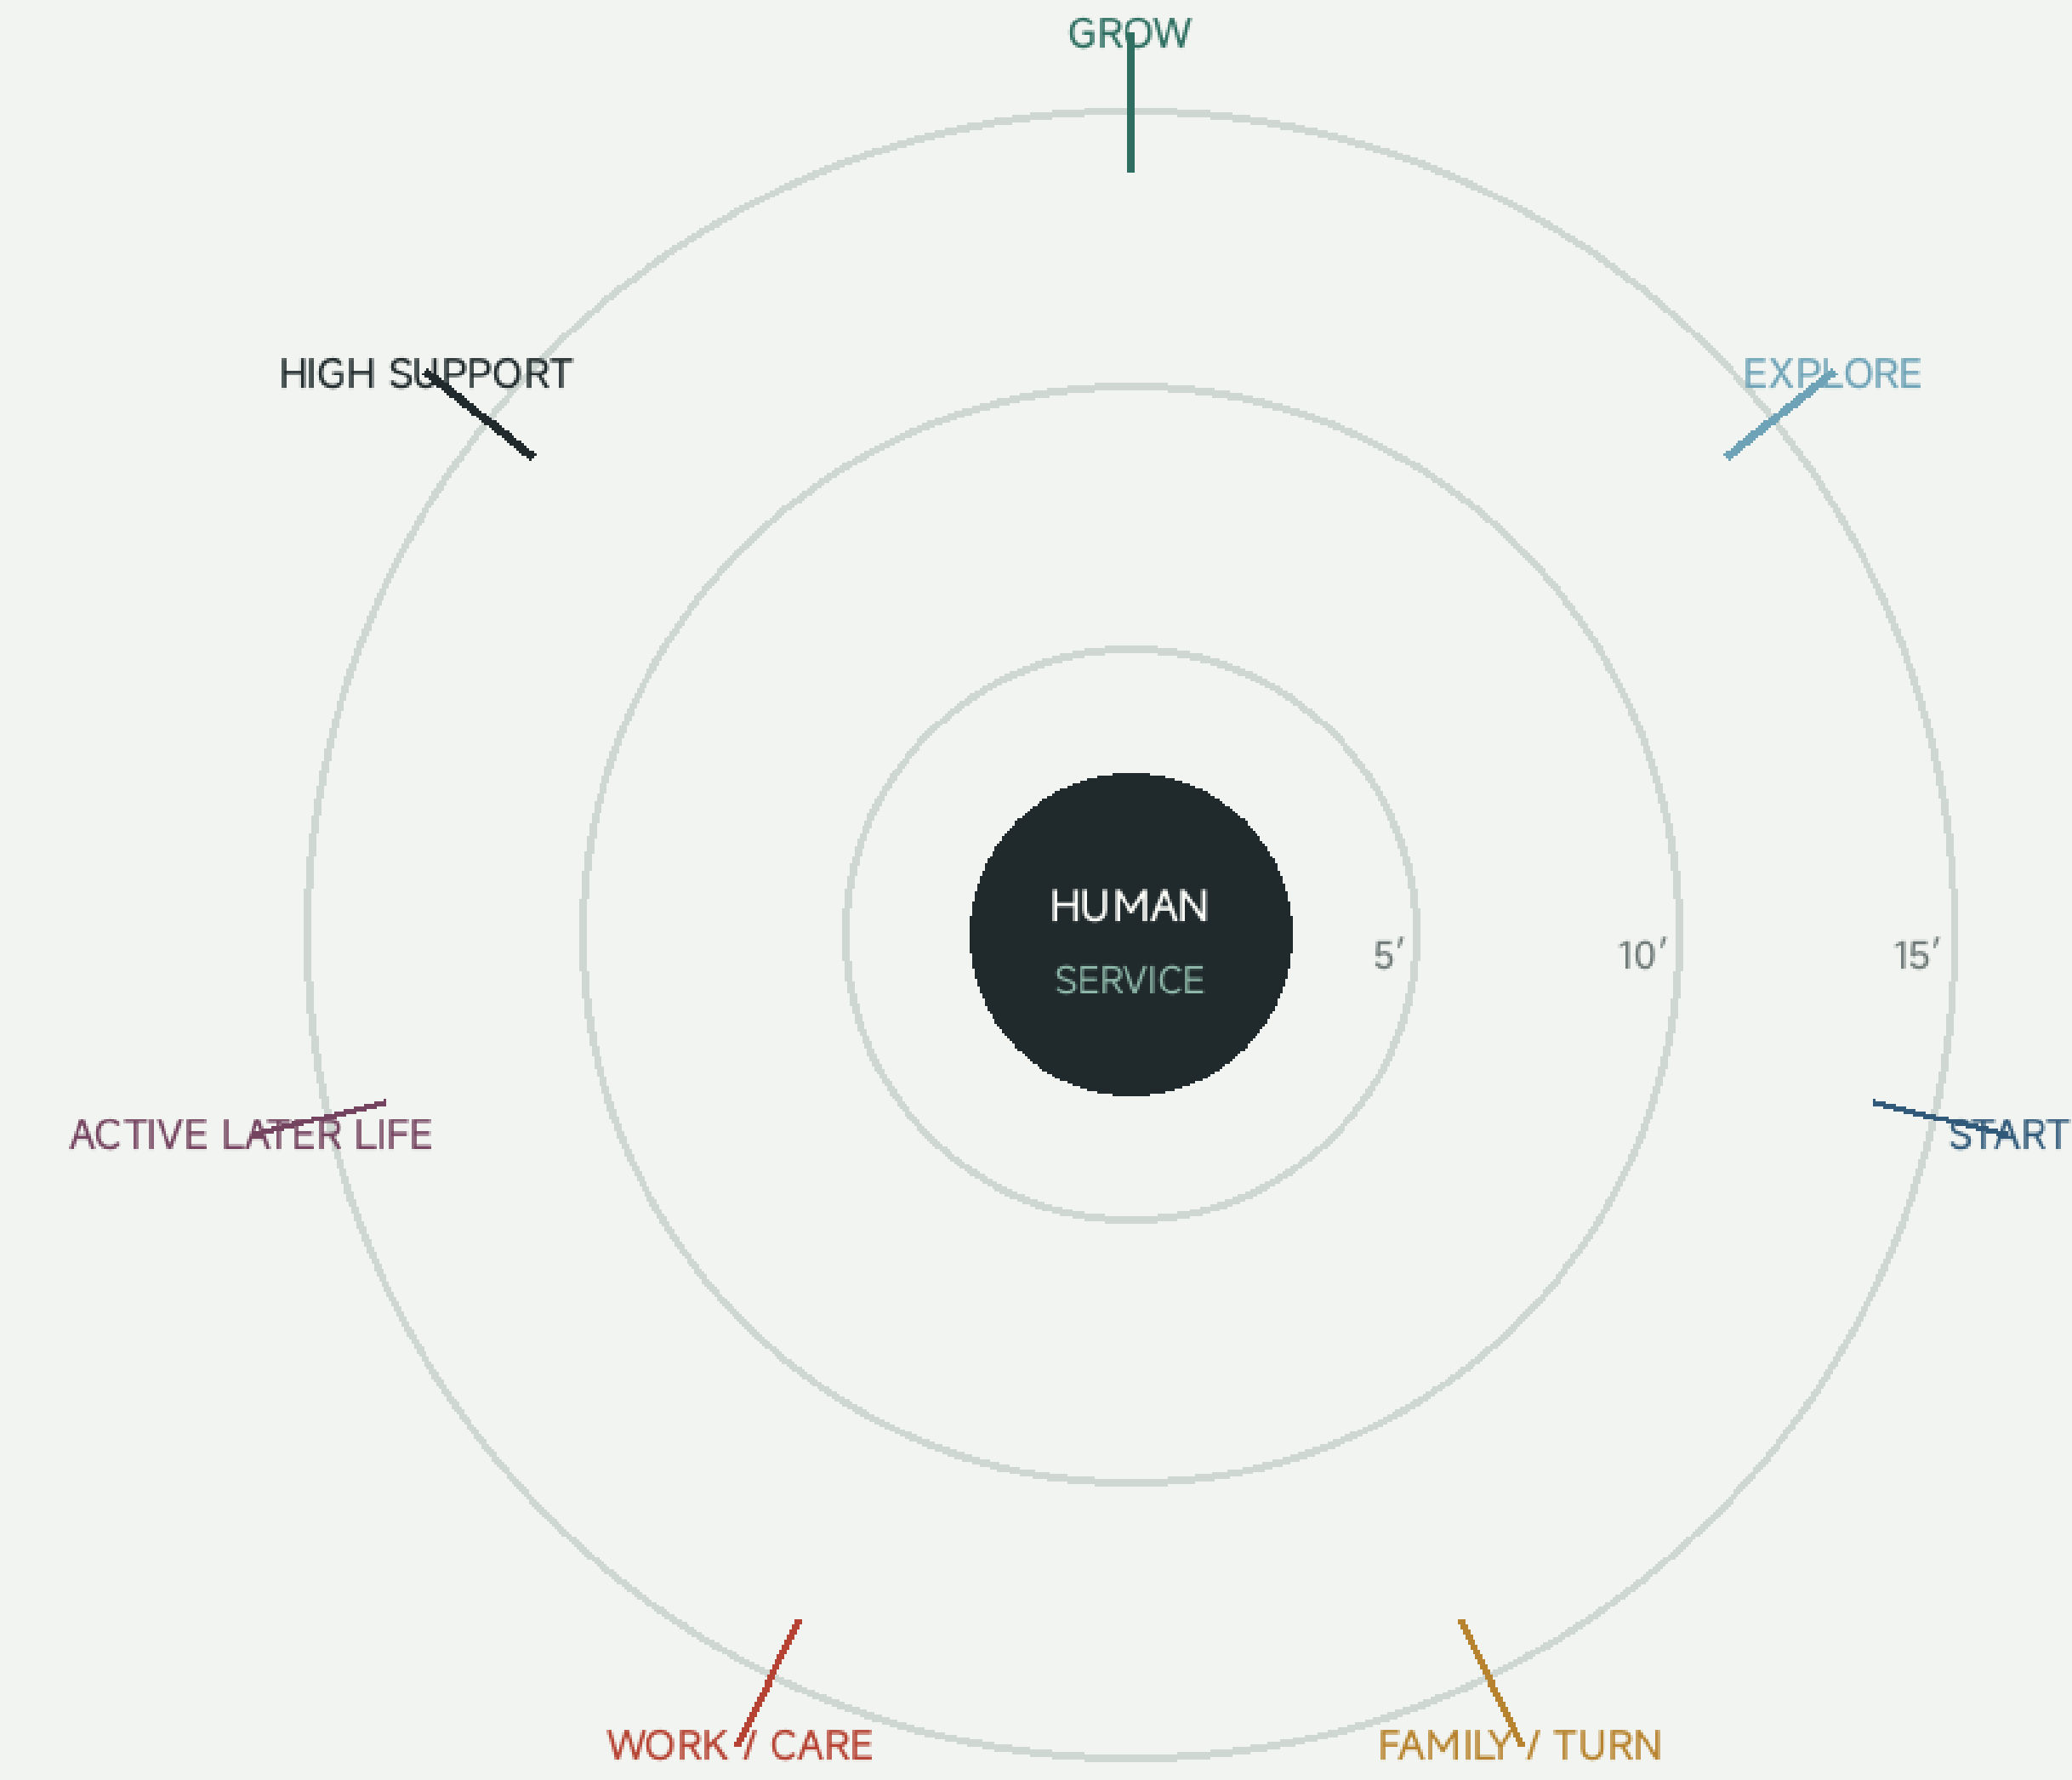

WALKING, INTERCHANGE + BLUE-GREEN WEAVE

Co-locate mobility, rainwater, culture and public service in one maintainable civic corridor.

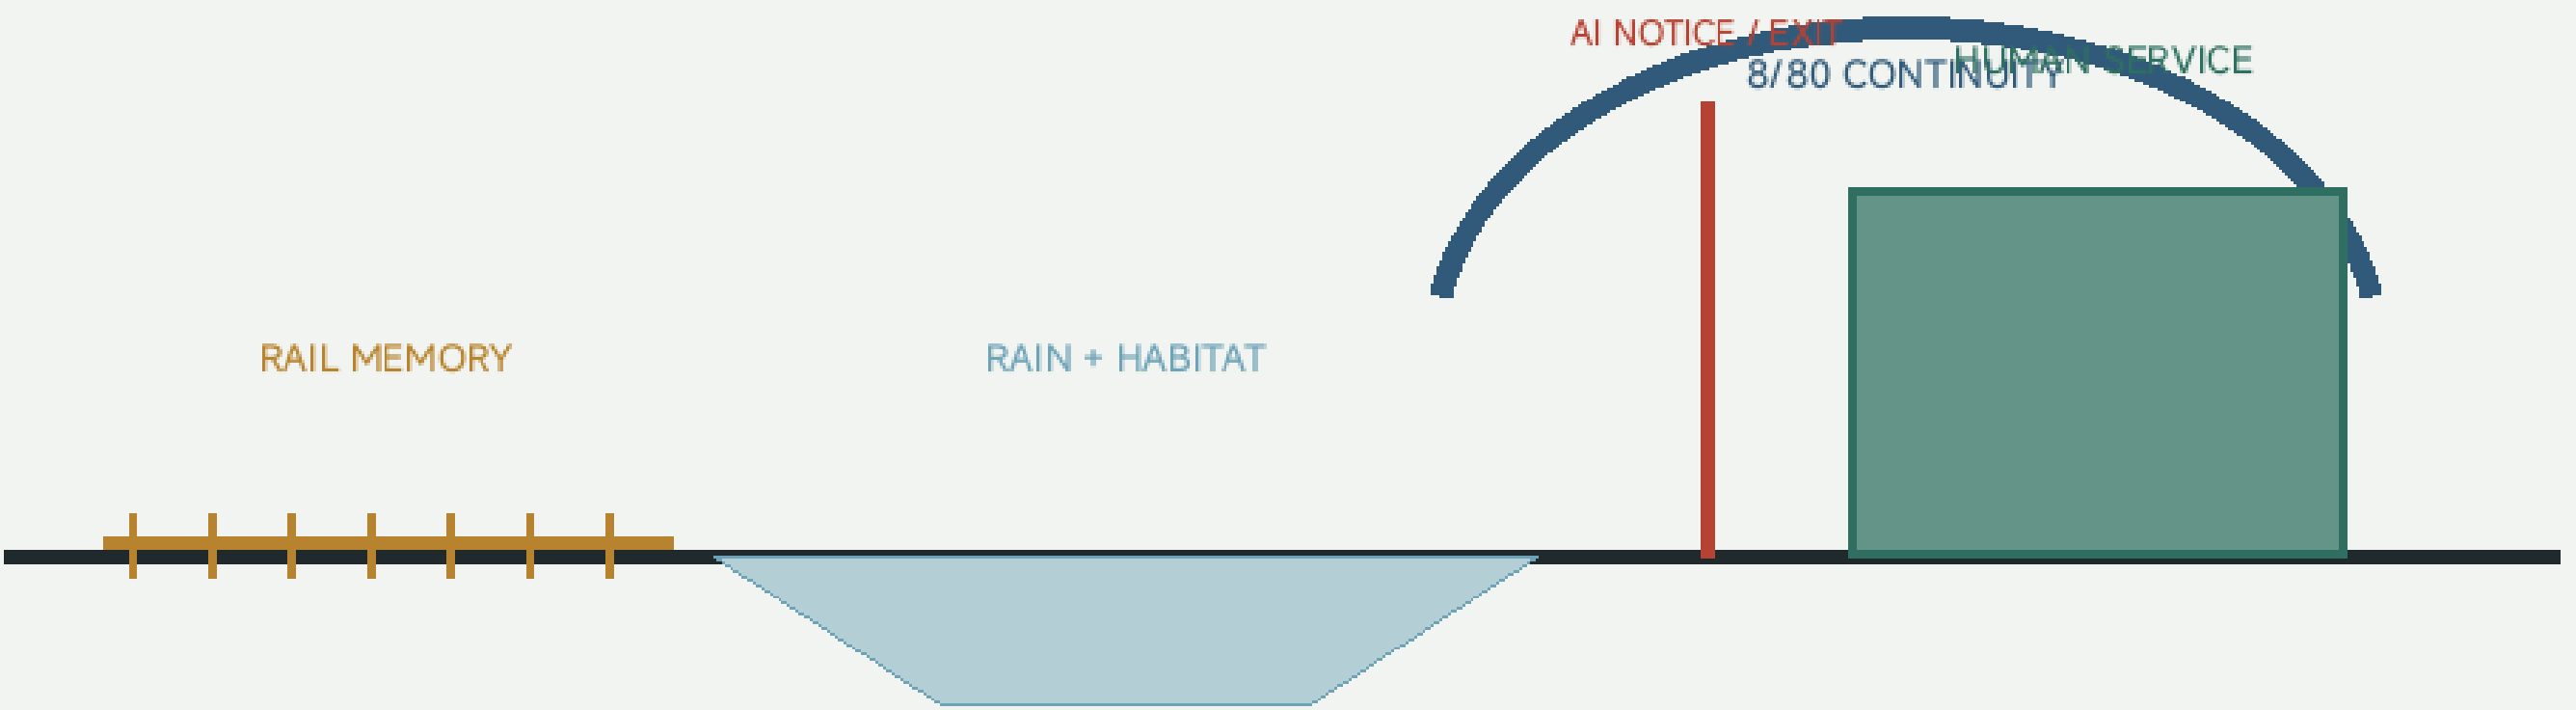

15-MINUTE LIFE-SUPPORT CELL

Service commitment, not a measured isochrone; recalculate on a walking network.

EVERY SEAM DELIVERS: CONTINUITY + RAIN + PAUSE + HUMAN SERVICE + CULTURAL INTERPRETATION

ONE CORRIDOR · FOUR CO-LOCATED INFRASTRUCTURES

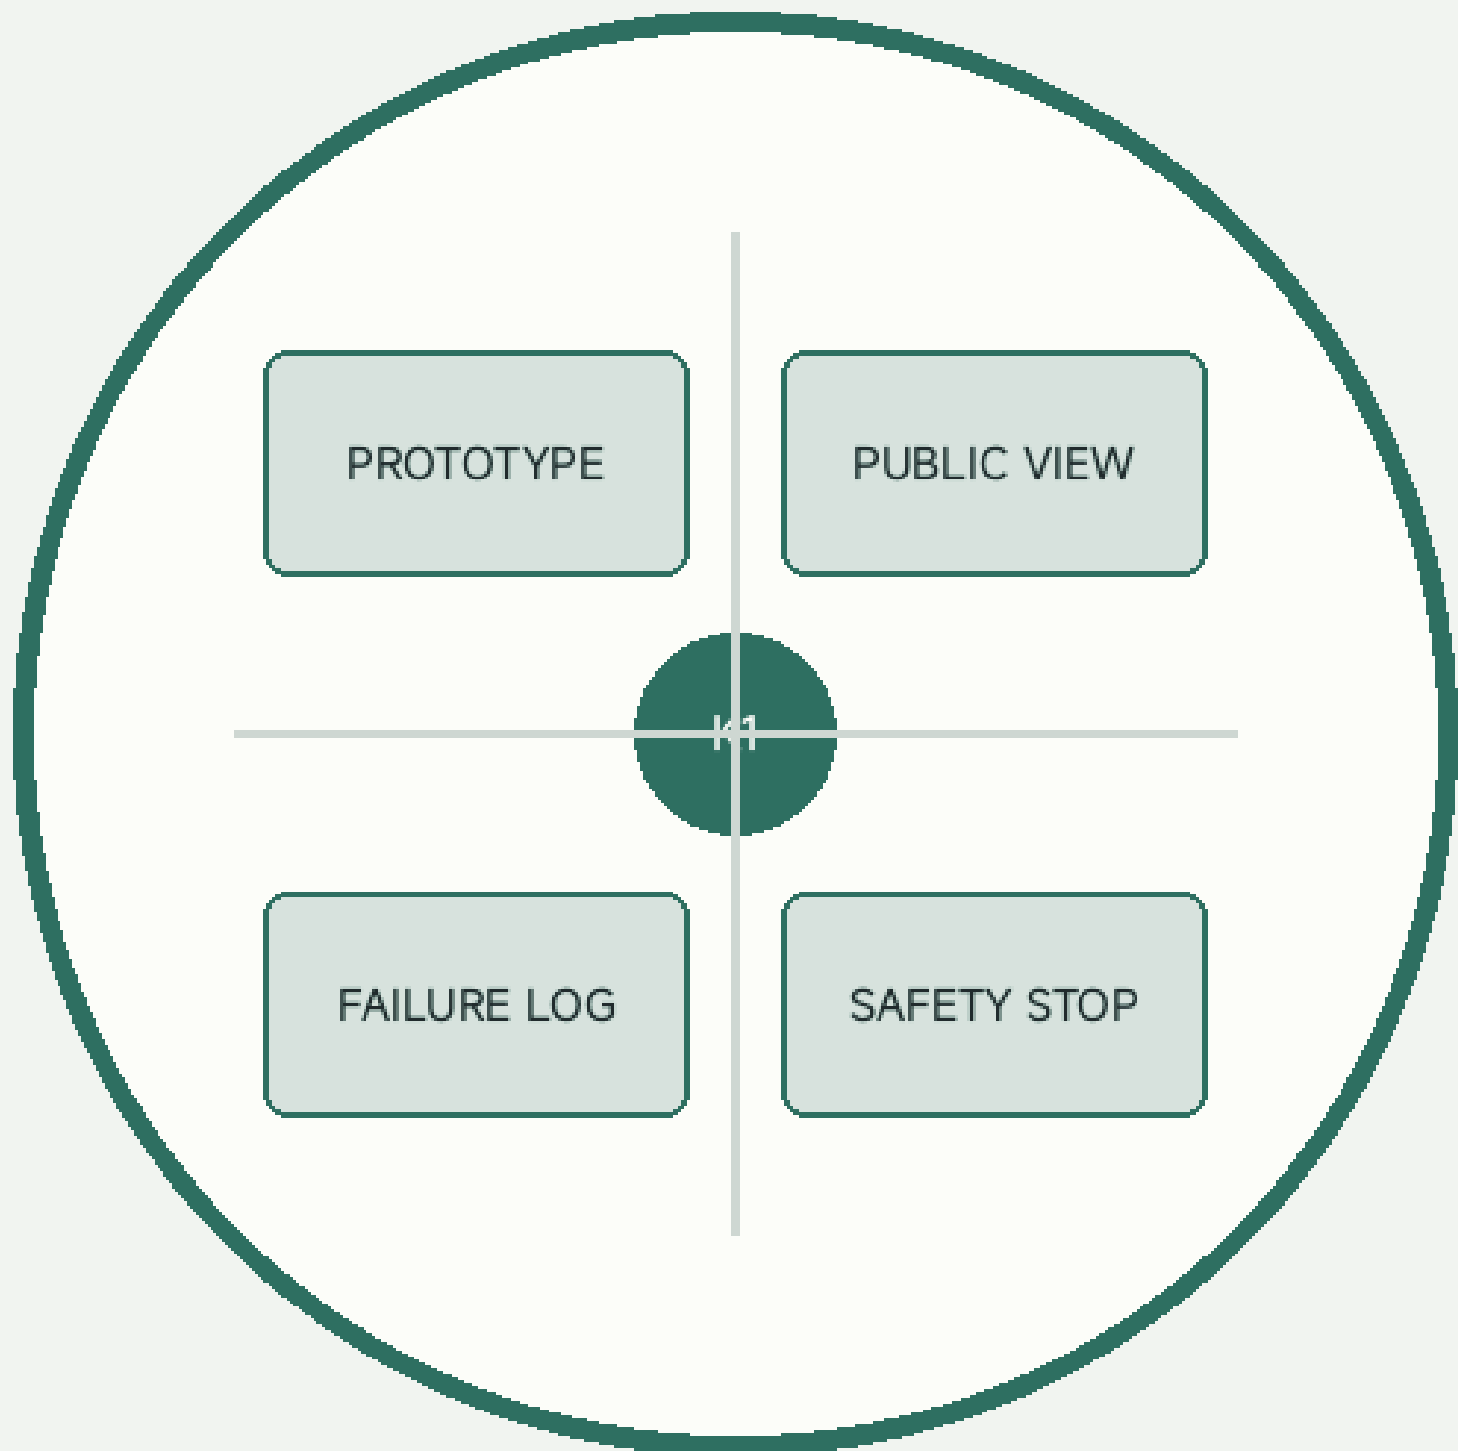

JZ-04
PUBLIC SWITCHYARDS

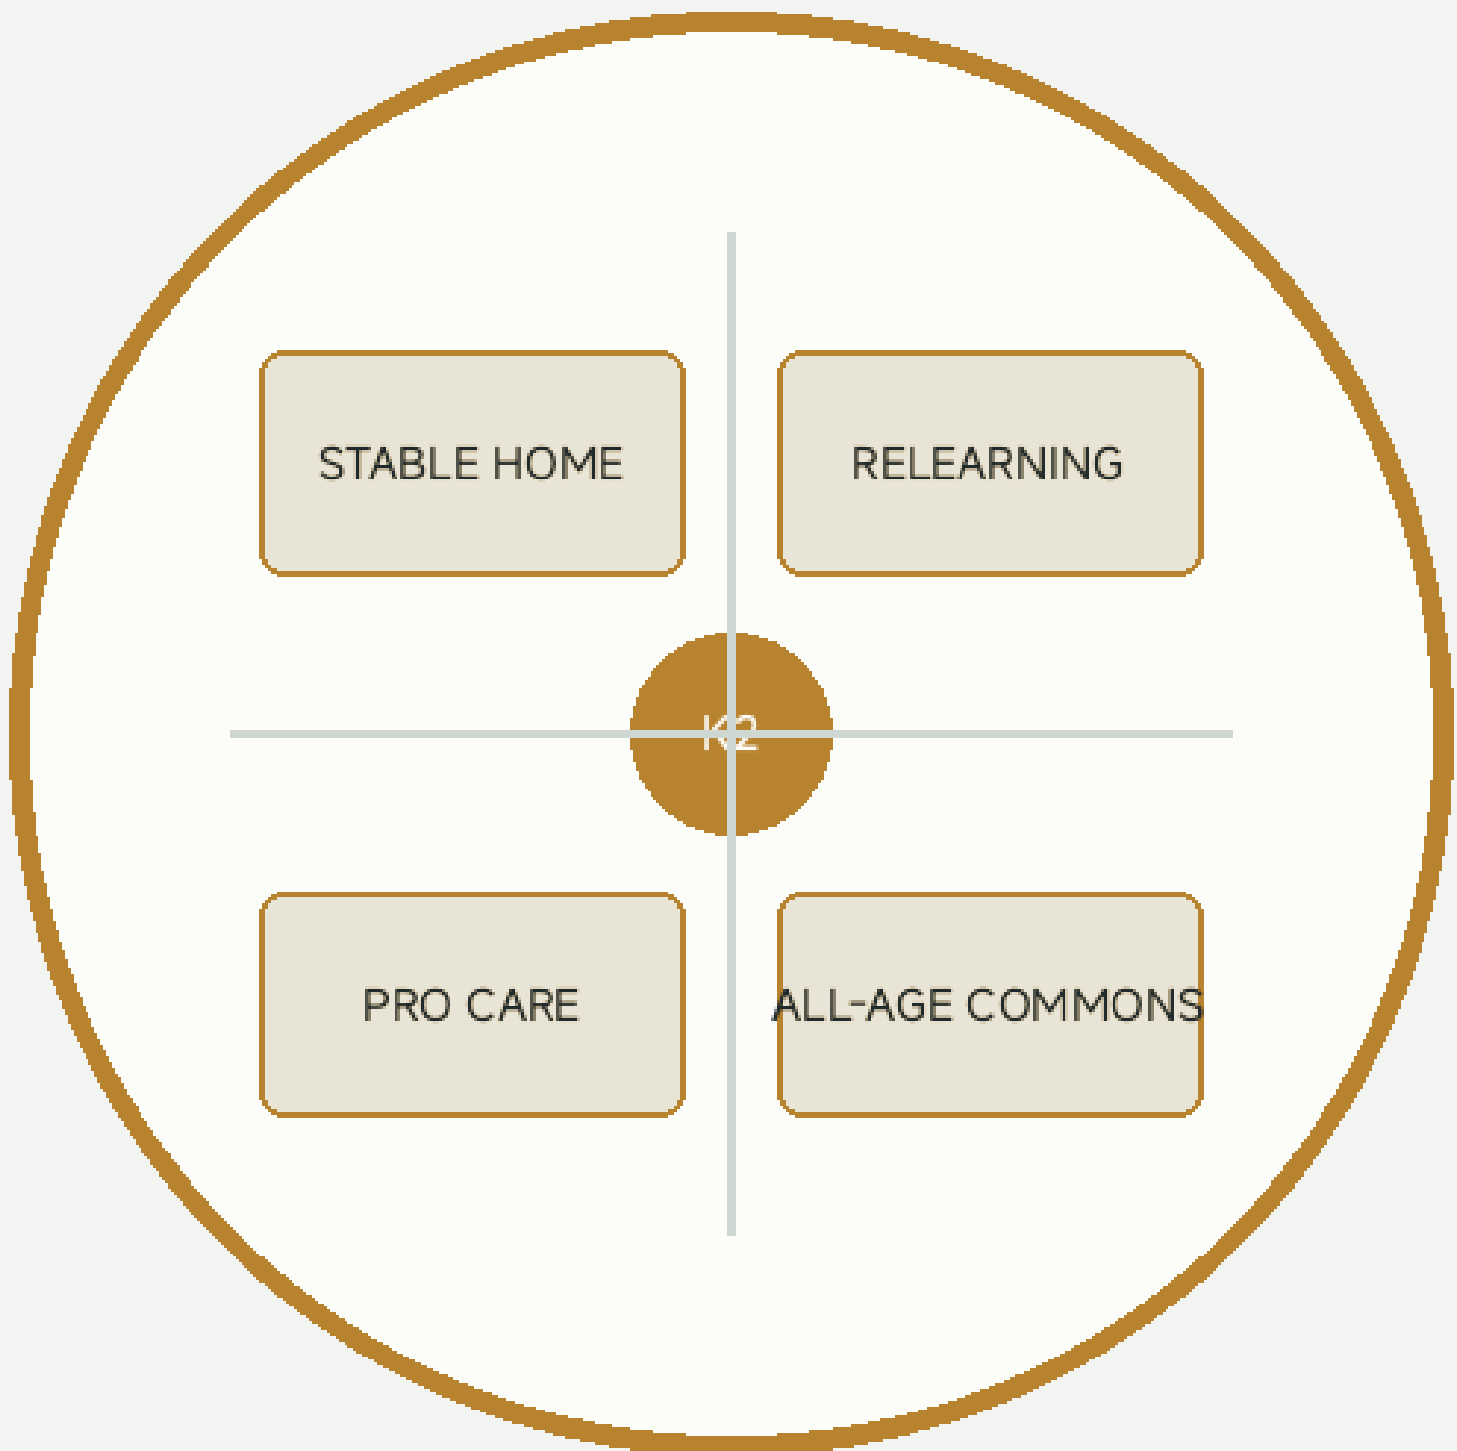

THREE PUBLIC-MISSION SWITCHYARDS

Three different capabilities reconnect to one civic main line through mission, operation and exit contracts.

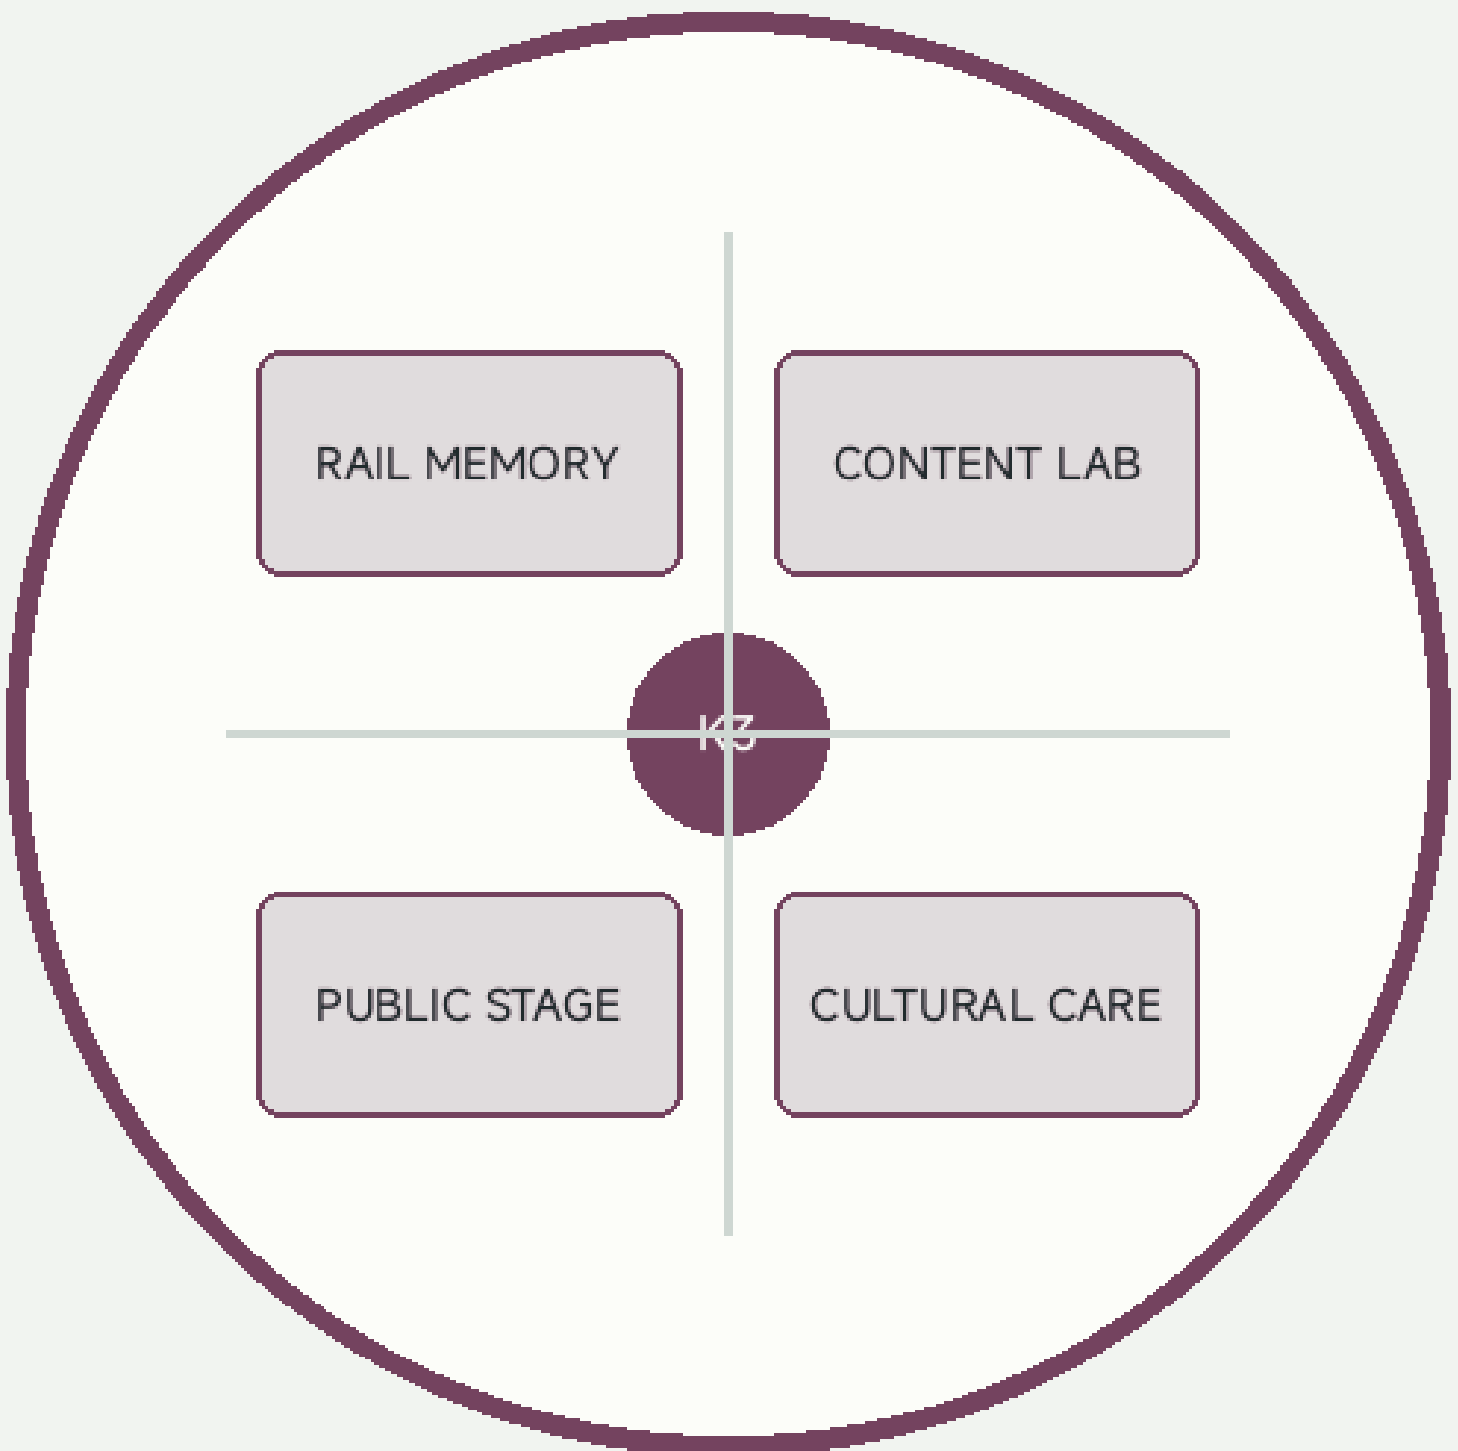

ZHONGZHI · PUBLIC VALIDATION YARD

AI ORIGIN · LIFE INTERCHANGE YARD

DAZHONGSI · CIVILISATION CONTENT YARD

JING-ZHANG CIVIC MAIN LINE: LIFE FLOOR / RIGHTS / OPERATION / EVIDENCE

PUBLIC MISSION	Test AI prototypes within bounded conditions under public observation and failure disclosure.
HARD GATE	Accountable owner + bounded place/time/people + on-site stop
OPERATOR	District operator + safety/ethics team + public oversight
STOP / EXIT	No owner, no stop control or scope breach means closure and restoration

Signals, incidents and exit actions enter the annual public review.

PUBLIC MISSION	Combine housing, learning, care, health and transfers into a 15-minute support cell.
HARD GATE	Housing stability + professional care + anti-displacement
OPERATOR	All-age service partnership + professional bodies + resident council
STOP / EXIT	Correct or exit when sharing substitutes care or creates displacement

Signals, incidents and exit actions enter the annual public review.

PUBLIC MISSION	Make technology serve Chinese culture, railway memory and independent public expression.
HARD GATE	Independent public narrative + clear rights + ten-year maintenance
OPERATOR	Public cultural body + independent content governance + maintenance unit
STOP / EXIT	Remove when commerce controls narrative, rights are unclear or maintenance has no owner

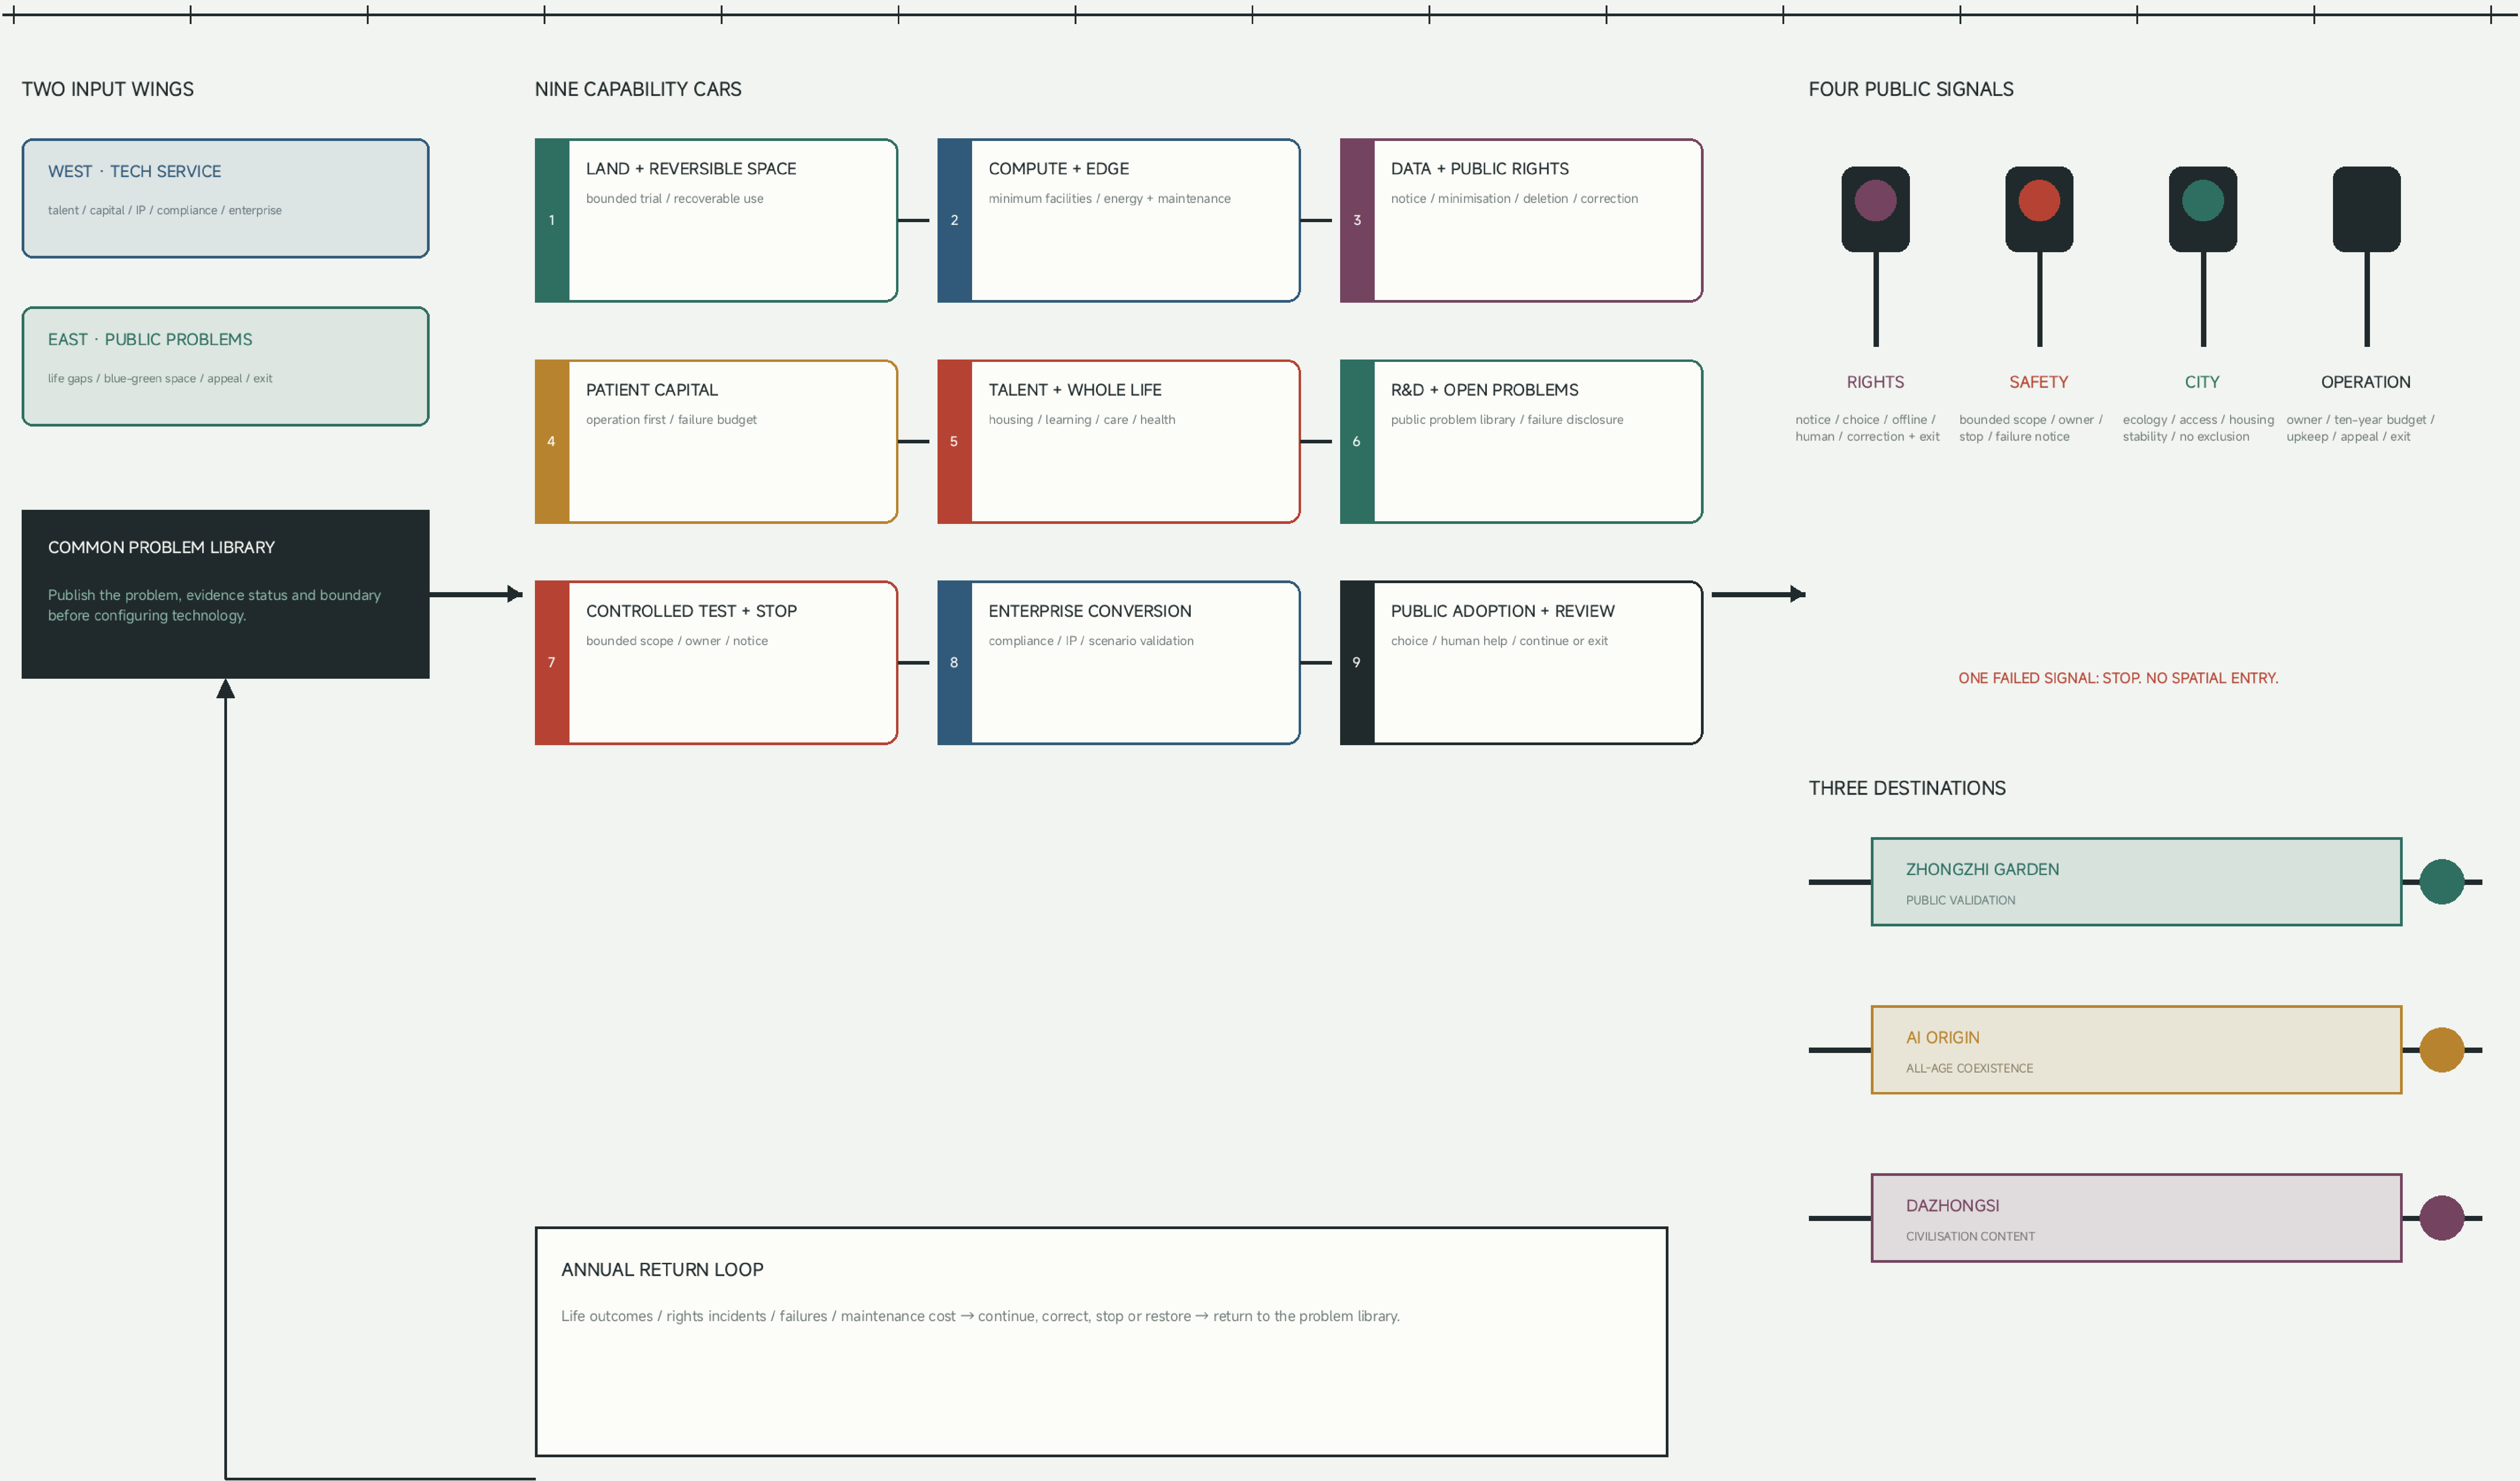

Signals, incidents and exit actions enter the annual public review.

EVERY YARD MUST RECONNECT TO THE CIVIC MAIN LINE. NO OPERATING CONTRACT, NO LANDMARK.

JZ-05
PUBLIC-VALUE SIGNALLING

AI CAPABILITY TRAIN + PUBLIC-VALUE SIGNALS

Nine capability cars must pass four non-bypassable public signals before entering three spatial destinations.

JZ-06

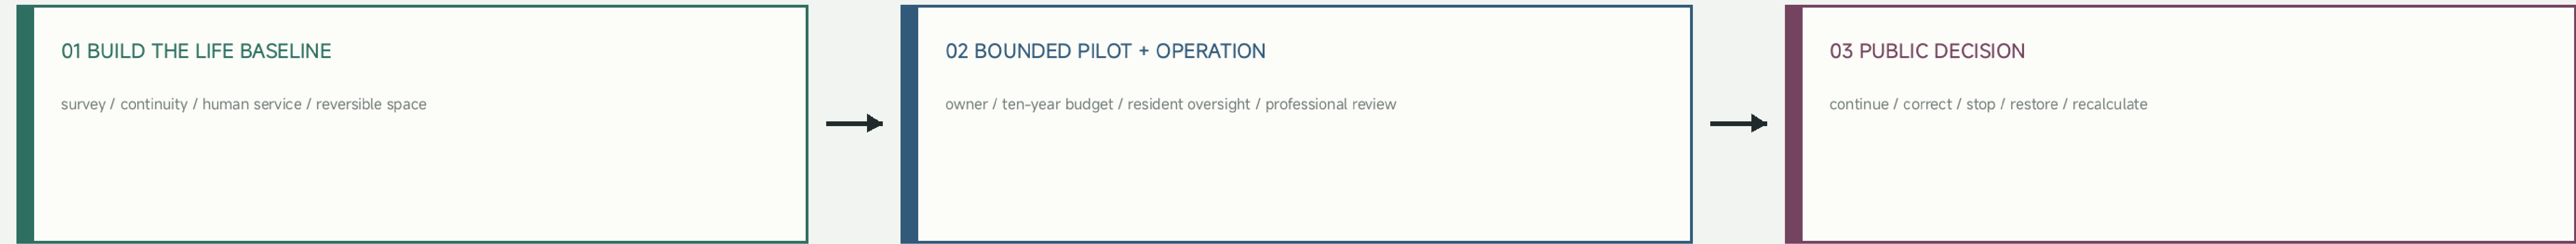

FALSIFIABLE DISPATCH

FALSIFIABLE DELIVERY DISPATCH

Each phase is released by prerequisites, accountable ownership, public metrics and stop/restore actions.

THREE-PHASE DISPATCH TRACK

FOUR PRIORITY PILOT DISPATCH SHEETS

P1	8/80 CONTINUOUS ROUTE			
METRIC		OWNER		STOP SIGNAL
independent arrival / break count		transport + accessibility review / residents		discontinuity, night risk or no maintenance owner

P2	FAMILY CHANGE + HOUSING STABILITY			
METRIC		OWNER		STOP SIGNAL
displacement / housing burden		housing operator / resident council / independent evaluator		exclusion, worsening burden or no local equivalent

P3	CAREGIVER RESPITE			
METRIC		OWNER		STOP SIGNAL
usable hours / self-reported stress		professional care / community / family representatives		shared space substitutes professional care or risk rises

P4	OFFLINE HUMAN SERVICE			
METRIC		OWNER		STOP SIGNAL
resolution / appeal time		public-service operator / rights oversight / staff		essential service becomes QR-only or correction is unavailable
