Design Basis Register

Item-by-item explanation of document name, issuing body, formal use and usage boundary

No.	Document Name	Issuing Body	Formal Use	Usage Boundary
1	Prequalification Announcement for the Urban Design Research & Proposal Solicitation for the Centennial Jing-Zhang AI Innovation Belt	Haidian Branch, Beijing Municipal Commission of Planning and Natural Resources	Confirm the project title, three-layer study scope, overall positioning, design tasks, area-calculation standard and deliverable depth.	Must not replace explicitly published official boundaries, surveyed red lines, statutory controls, or implementation interfaces defined in land-transfer/public notices.
2	Task Brief Excerpts from the Open Solicitation for a Global Agent-Based Urban Design Initiative	Publicly released solicitation materials	Clarify the co-creation principles for intelligent agents, six task packages, scenario cards, branding, operations, governance and boundary clauses.	Must not be used as official red lines, statutory planning controls, engineering feasibility conclusions or policy approval commitments.
3	Urban Design Management Measures	Ministry of Housing and Urban-Rural Development of the People's Republic of China	Support regulations related to the purpose of urban design, city character, public space, renewal layout and management.	Must not be interpreted as approved height, massing, color or other special controls for this specific project.
4	Measures for the Preparation and Approval of Regulatory Detailed Plans for Cities and Towns	Ministry of Housing and Urban-Rural Development of the People's Republic of China	Provide supplementary rules regarding the depth of regulatory planning, planning permission, implementation management and known control requirements.	Must not claim that this project already has approved FAR, height limits, setback/red-line requirements, property rights status, or municipal / fire-safety conclusions.
5	Classification Guide for Territorial Spatial Survey, Planning and Land-Use Control for Land and Sea	Ministry of Natural Resources of the People's Republic of China	Unify land-use terminology, land-use codes, structured base maps and mapping standards.	Must not replace statutory land approval, existing ownership status or formal development/revenue conditions for this project.
6	Interim Measures for the Administration of Generative Artificial Intelligence Services	Cyberspace Administration of China and six other departments	Define the boundary and responsibility of public-facing AI services and provide a compliance reference for content-generation workflows.	Must not be generalized as the sole obligation for all AI applications, nor replace legal judgment for specific services.
7	Law of the People's Republic of China on the Building of Accessible Environments	Standing Committee of the National People's Congress	Provide the public baseline for accessible environments, on-site wayfinding/signage, and necessary human services in public-service scenarios.	Cannot be used to infer that all facilities are already compliant, nor to exclude the need for specific human services or safety-related service space.
8	Implementation Plan for Effectively Solving Difficulties Faced by Older Adults in Using Smart Technologies	General Office of the State Council	Serve as policy background for parallel provision of cross-domain services and intelligent services, especially in age-friendly and high-frequency service scenarios.	Background reference only; does not support local demand confirmation, spatial control, or project-specific compliance determination.
9	Temporary Rough Boundaries of the Three-Layer Scope and the Three Key Areas	Reference inferred from public information	Used for concept generation, presentation, scheme self-checking, and rough-boundary study for design discussion.	Not an official boundary; must not be used for approval, land acquisition, ownership determination, road red lines, precise area calculation or engineering implementation.

Material Classification & Verification Rules

A. Formal Basis

Can directly support tasks, scope definition, professional calculation and public-service principles; when cited, retain the issuing body, the original purpose and prohibited uses.

B. Background Reference

Used to explain policy direction and inclusive-service orientation; does not support spatial control, existing-condition judgment, precise indicators or compliance certification.

C. Temporary Materials

Their temporary status must be clearly indicated; once official boundaries are released, all related layers and indicators must be replaced and recalculated as a whole.

D. Project Baseline

Overall structure, nodes, scenarios, indicators and operating mechanisms are scheme-based materials and do not represent government-approved conclusions or implementation commitments.

E. Drawings & Generated Content

Analytical diagrams, concept master plans, node axonometrics, scene renderings and infographics are conceptual expressions compiled or generated by the scheme team. They must not be used as proof of current conditions, implementation basis, engineering approval, or investment-attraction approval. Public-release scope, reference materials, generation methods, fonts and software tools should be disclosed in the source list and copyright statement.

F. Prohibited Use

Non-public planning drawings | Internal meeting materials | Unapproved control indicators | Personal private information | Non-public corporate data

Complete Responsibility Chain for Bringing Materials into Design

At every step, keep record of the source, intended use, boundary, verification and replacement conditions

1 | Public Registration

Confirm the issuing body, publication date, public status, permissions and local explanatory notes.

2 | Use Classification

Distinguish between formally usable materials, background references, temporary materials and project-management content.

3 | Design Translation

Translate tasks and standards into spatial structure, scenarios, indicators and drawings.

4 | Professional Verification

Use surveying, regulatory plans, engineering, investment and specialized evaluation to calibrate design judgments.

5 | Replacement & Update

Once formal materials are issued, synchronously update layers, indicators, texts, drawings and presentation outputs.

Conclusion | This page explains the design basis and source materials, and does not constitute a statutory plan or approval document. Any conclusions involving planning, engineering, investment, permits or implementation sequencing shall be subject to formal documents, field survey, professional verification and the review opinions of the competent authorities.

The status of materials should remain consistent with submission records, retained samples, indicators and the documentation of how the basis was established.

Jing-Zhang Co-Intelligence Loop | Overall Concept & Spatial Structure

An integrated spatial system linking urban issues, youth creativity, AI R&D review, real-world validation, commercialization and public return.

Civic AI Loop | Spatial Structure, Conceptual Land Use and Urban Renewal

Overall Design Area 11.4 km² | four conceptual function mixes | research-oriented renewal relationships

This figure shows where functions sit, how they mix, and which renewal actions support the space.

Conceptual Land-Use Structure

Public Space Framework

Research Urban Renewal

No Regulatory/DRR Conclusion

FIG-02 / HORIZONTAL / EN / V2

LAND USE × URBAN RENEWAL

Four Conceptual Functions

Function blends may mix and permeate; not statutory land-use boundaries

AI Research and R&D Validation

R&D, sandboxes, ongoing review and technical services

Blue-Green Parks and Urban Validation

Public life, ecological maintenance and parallel validation fields

Commercial Services and Value Conversion

Display experience, first orders, consultation, scale tracking and return

Youth Community and Public Innovation

Daily stay, learning, solo creation and public services

Four Renewal Actions

Retention and Activation

Maintain Jing-Zhong heritage scale, public space and visible evidence

Adaptive Reuse

Existing spaces host R&D, services and public display

Public Interface Repair

Open entries, ground floors, walking-cycling and non-consumption stay

Flexible Module Insertion

Reversible, replaceable small-scale facilities and scenario components

Three-Core Function Mix

01 Zhongzhiyuan

R&D review-led | public interpretation interface | controlled equipment backstage

02 Beijing AI Origin Community

Youth community-led | innovation services mix | controlled micro-prototypes

03 Dazhongsi

Public display and commercial conversion-led | dual-ledger return visible

Conceptual land use and research-oriented renewal | not RDR adjustment, DRR or approval conclusion

Civic AI Loop | Walking-Cycling, Blue-Green and Heritage Spatial Base

Coordinated Research Area 43.6 km² | Overall Design Area 11.4 km² | existing road spine × walking-cycling connectors × east-west links

Base layer: align three public-space systems before adding testing scenarios and operations.

Walking-Cycling Routes | High Contrast Blue-Green Space | Blocks Heritage-Related Space | Blocks

FIG-04 / HORIZONTAL / EN / V7

Scope: provisional GIS/SON | Blue-green, road and heritage park features: © OpenStreetMap contributors, ODbL | Route selection: road-aligned design proposal

Four Renewal Actions | Existing Terrain Location

Roads · water · green space · existing buildings | independent map | no master-map change

Retention objects are read from existing features; reuse, interface repair and modules are candidate screening, not engineering siting

LOCATION INDEX

Four Spatial Objects | Map Index

All marks sit on real roads, waterways, green space and building basemaps

01 Retention + Activation

Jing-Zhang Railway Heritage Park and existing park greens
Xiaoyue River system and continuous public space
solid/hatched marks show existing spatial base

02 Adaptive Reuse

existing building footprints in the three key areas
current first screening: 452 building objects
structure, fire safety, rights and operation require building-by-building checks

03 Public Interface Repair

actual interfaces where primary/secondary roads cross key-area boundaries
current marks: 26 candidate entry/crossing points
focus checks: entries, ground floors, crossings and accessible links

04 Flexible Module Insertion

M1-M3: open nodes in the three key areas
M4: Xiaoyue River | M5: Jing-Zhang Railway Heritage Park
points are site-level suggestions, not fixed facility locations

Drawing Boundary

Basemap real; renewal judgments need site and special checks
No direct demolitions, approval, investment or construction conclusions

Four Renewal Actions | Full Description & Spatial Intent

From protecting existing assets to activating value | Four intervention modes that promote integrated renewal of edges and systems.

RENEWAL STRATEGY MAP / V2

Based on existing systems, site conditions and strategic objectives, these four actions respond to different renewal logics and spatial capacities.

01 Preservation & Activation

Core Value

Preserve the memory of the existing industrial-cultural context, reactivate underused spaces and green participation systems, and reopen the site to daily public use and collective recognition.

Main Strategy

- Strengthen industrial remains, craft traces and the recoverable relationship between history and space.
- Reopen routes, views and public access; improve walkability and everyday usability.
- Add greenery, seating and interpretation to reinforce local identity and shared memory.

Key Actions

- Conserve representative walls, structures and traces, and transform them into public anchors and exhibition clues.
- Retain trees, paths and open areas; optimize crossings, rest points and micro-public spaces.
- Insert paving, signage and lighting to improve continuity between old and new uses.

Resulting Space

Heritage courtyards, open lawns, public seating, community gathering space, and everyday public places that continue the site memory.

Impact

Without heavy reconstruction, the site preserves traces of place while regaining public vitality and legibility.

Forward Outlook

Extend site life, strengthen public memory, and let historical remains gradually re-enter contemporary everyday life.

02 Adaptive Reuse

Core Value

Respect the original spatial framework and use low-intervention methods to convert retained buildings into flexible places for new programs and shared use.

Main Strategy

- Introduce education, culture, co-working, services and community-oriented uses.
- Upgrade circulation, interfaces and utilities while keeping the host structure legible.
- Use reversible insertions so future change remains possible.

Key Actions

- Reorganize interior functions and improve accessibility and environmental performance.
- Add lighting, partitions, furniture and service support under light-touch principles.
- Clarify public/shared/private zones while preserving the identity of the original building.

Resulting Space

Open studios, shared offices, exhibition rooms, community classrooms and renewed service-support spaces.

Impact

The renewed buildings gain new uses and social value while maintaining continuity with the existing site fabric.

Forward Outlook

Promote sustainable renewal, strengthen coexistence between old and new, and reserve interfaces for future growth and program change.

03 Public Interface Repair

Core Value

Repair the openness of the site and restore the relationship between the field edge and the surrounding community, creating clearer and friendlier public interfaces.

Main Strategy

- Use repair rather than replacement so more public entry points can be reopened.
- Improve interfaces, edge conditions and pedestrian comfort to upgrade the quality of public space.
- Reconnect guidance, access, seating and micro-activity spaces with community life.

Key Actions

- Open previously blocked edge entrances and clarify the paths people can use.
- Repair corners, walls, trees and frontage elements to strengthen recognizability and safety.
- Add signage, seating, lighting and resting facilities to support daily stay and movement.

Resulting Space

Open interfaces, walkable passages, corner lounges, public seats, small plazas and neighborhood-oriented gateways.

Impact

Without altering the site core structure, the repaired interfaces create a more connected, inclusive and active public edge.

Forward Outlook

Create entrances, corners, lounges and edge spaces that improve public quality and energize the connection between neighborhoods and the site.

04 Flexible Modular Insertion

Core Value

Use modular and reversible systems to increase spatial capacity and support diversified scenarios with lower cost and stronger adaptability.

Main Strategy

- Modularize the possibility of temporary, seasonal and multi-functional uses.
- Enable reversible, visible and low-risk additions that can be opened progressively.
- Reserve interfaces for future demand changes and site growth.

Key Actions

- Insert detachable units, lightweight structures and diverse functional carriers.
- Set up temporary classrooms, markets, service stations and small event facilities.
- Use water, power and plug-in interfaces to support low-cost operation and iteration.

Resulting Space

Pop-up workshops, mobile classrooms, public activity nodes, game points, temporary squares and event-support units.

Impact

The site can respond quickly to changing needs, support diverse public activities, and maintain flexibility for phased renewal.

Forward Outlook

Create components that are detachable, combinable, replaceable and scalable, lowering renewal cost while sustaining long-term vitality.

Zhongzhiyuan-Xiaoyuehe | Four Renewal Actions

From existing R&D carriers to a waterfront public-experience route | a district renewal chain of retention, reuse, repair and insertion

Conceptual placement on public domain; for object screening only, not a demonstration road or engineering alignment

ACTION PACKAGE / 01 - PROV-KEY-001

Retention + Activation

Targets:
Xiaoyue River, park green, existing courtyards and public memory

Space: continuous waterfront walk, open courtyards and community activity grounds

Retention is not freezing, ecology, safety and value require professional review

Adaptive Reuse

Targets:
existing R&D and industry carriers such as 768 ME Institute and Huizhi

Space: open workshops, shared labs and public exhibition corridors

Deepen after building by building checks of structure, fire safety, rights and operation

Public Interface Repair

Targets:
park entries, Xuejing Road edges, waterfront crossings and under-bridge interfaces

Space: open ground floors, continuous walking-cycling and accessible public interfaces

Orange dashed lines and 15-16 mark interface screening, not road engineering alignments

Flexible Module Insertion

Targets:
M1 workshop, M2 test, M3 clinic and M4 waterfront experience

Space: combinable, bookable and removable validation nodes

Modules must define building, staffing, maintenance, removal and site recovery duties

AI Origin Community | Four Renewal Actions

From campus research islands to an open civic-intelligence community | a knowledge-sharing chain of retention, reuse, repair and insertion

Conceptual placement on public domain; for object screening only, not a demolition/reconstruction or engineering siting conclusion

ACTION PACKAGE / 02 - PROV-KEY-002

Retention + Activation

Targets:

campus gardens, woodland paths, existing courtyards and learning memory

Space:

shared gardens, open courtyards and everyday learning lounges

Retention is not freezing, open hours and campus safety require coordinated review

Adaptive Reuse

Targets:

research, teaching and training carriers of CUGB, USTB and institutes

Space:

open learning halls, shared labs and project-support spaces

Deepen after building by building checks of structure, fire safety, authority and operation

Public Interface Repair

Targets:

Xueyuan Road edges, campus entries, N. 4th Ring gateway and cross-campus interfaces

Space:

open ground floors, continuous walking-cycling and cross-campus public interfaces

Orange dashed lines and T1-M4 mark interface screening, not road engineering alignments

Flexible Module Insertion

Targets:

M1 clinic, M2 idea set, M3 micro-prototype and M4 small-step release

Space:

accessible, bookable and controlled civic-intelligence nodes

Modules must define authority, privacy, staffing, removal and night-time contraction rules

Dazhongsi District | Four Renewal Actions

From rail and urban edges to a public-facing AI industry interface | a value-return chain of retention, reuse, repair and insertion

PROV-KEY-003 is an official provisional area, not a district. Dazhongsi parcel, all actions are references, not demolitions/intention, need on engineering consultation

ACTION PACKAGE / 03 - PROV-KEY-003

01 Retention + Activation

Targets:
Jing-Zhang railway cues, Beijing North Station, signal tower and Zhuanhe

Space: railway narrative walk, observation corridor and urban-memory interface

Rail safety, conservation value and open edges require authority review.

02 Adaptive Reuse

Targets:
station-area buildings, street-front commerce and reusable existing spaces

Space: AI growth gallery, open project windows and professional service tables

Deepen after building by building checks of structure, fire safety, rights and operation.

03 Public Interface Repair

Targets:
Station entries, Xizhimen North Ave, Lianhui Road and Zhuanhe interfaces

Space: open ground floors, continuous walking-cycling and readable industry interfaces

Orange dashed lines and 15-16 mark interface screening, not road engineering alignments.

04 Flexible Module Insertion

Targets:
M1 gallery, M2 clinic, M3 first order and M4 public return

Space: combinable, bookable and retractable value-validation nodes

Modules must define authority, staffing, maintenance, removal and risk-downgrade rules.

AI ORIGIN COMMUNITY CIVIC ORIGIN

An open co-creation point where youth, community issues and early AI ideas can enter the first public interface.

ZHONGZHIYUAN VALIDATION Lighthouse

A public-facing validation network for AI R&D, review, evidence generation and accountable urban testing.

DAZHONGSI RETURN COMMONS

A civic exhibition and return field where AI outcomes, public feedback and value-sharing mechanisms become visible.

Design Implementation Scale and Economic Assessment

From spatial renewal to operating assets | Standard implementation with light-start and full-rollout bounds

Geometry-derived | Design estimate | Economic estimate

PROVISIONAL / INTERNAL

04 Phasing & Scenario Selection

Options with a light start; scale through the base case; expand only when conditions are met

Three AI Pilgrimage Landmarks | Public Promises

Roles + Honors v1

Let ideas be seen · let evidence be trusted · let value be shared

Pilgrimage Source → Participatory public act → verifiable long-term record → repeatable operating ritual → restrained spatial identity →

01

AI Origin

Civic Origin

Ideas Become Visible

A person can start from a vague idea.

Public Front	Open table · idea wall · free seats
Making Zone	Solo desks · co-creation · AI demos
Service Handoff	Navigator · booking · semi-open talks
Private Backstage	Private ideas · sensitive interviews · access log

Honor Record →

Real problems · first prototypes · community knowledge · fact fixes
Not ranked by funding, degree, institution or influence

Not → Registration hall · members club · star-team wall

Spatial Image | a growing public worktable

02

Zhongzhiyuan

Validation Lighthouse

Evidence Becomes Trustworthy

People can see why it continues, pauses or exits.

Public Interface	Project status · accountable roles · stop notice
Method Display	Test protocol · replication · anonymous failures
Controlled Edge	Readable R&D edge; no direct public entry
Backstage	R&D · logistics · robot service · emergency

Honor Record →

Trusted method · human takeover · active stop · useful failure
Quantity and no-incident counts alone are not honors

Not → Transparent lab show · control room · approval hall

Spatial Image | readable section + restrained status marks

03

Dazhongsi

Return Commons

Value Becomes Shared

Show both earning and public return.

Public Gallery	Growth · revision/stop · return summary
Feedback Front	Prototype trial · market feedback · youth submissions
Clinic Zone	Capability-value profile · dual accounts · pathways
Backstage	Contracts · finance · investment · business secrets

Honor Record →

Public return · cost coverage · open reuse · long-term care
Amounts must state scope, period, cost and destination

Not → Product market · roadshow hub · success gallery

Spatial Image | AI growth gallery + public-return ledger

Distributed Honor System → Initiation and co-creation → validation and responsibility → conversion and return → update/downgrade/withdraw/correct →

Ideas/Problems → Civic Origin → Validation Lighthouse → Return Commons → public AI resources and knowledge → next challenge →

Conceptual recommendation | working names adjustable | not a substitute for professional review

Dual-Gate Spatial Deepening | Zoning, Flows & Gate Control

Translate the operating mechanism into spatial order: public participation in open zones, project growth in controlled zones, professional services by staged access, and independent backend operations.

No Proportional Drawings
Not for Design Approval / Construction Use

— Public Observation Flow — Project Growth Flow — — — Professional Service Flow Operations / Backend

□ Open Zone □ Controlled Zone □ Backstage / Backend G Gate Node

PORTAL A • ORIGIN COMMUNITY

AI Origin Community | Where Ideas Can Happen Safely

Principle: fully open entry; ideas become projects only after tools, data, and public-release controls are introduced.

PORTAL B • DAZHONGSI GROWTH FIELD

Dazhongsi | Make Growth Public and Visible

Principle: public-facing project display, professional consultation, business negotiation, and independent backend support for scaled growth.

GATE SYSTEM • EACH GATE HAS PASS / CONDITIONAL PASS / RETURN / STOP

This graphic defines spatial logic only, not the construction drawing level, and is not for design approval or construction use.

Zhongzhi Park | “Verification Lighthouse” Non-Proportional Functional Plan

Public understanding boundary → risk grading → full-open / sandbox → test protocol → dual-site interface → evidence return and review.

Function Hierarchy & Risk Level v1

COMPLETE PROJECT EVIDENCE CHAIN

Project Passport → Risk Grade → R&D / Sandbox → Test Protocol → Dual-Field / Conditional Test → Evidence Review → Continue / Modify / Stop / Dazhongsi

Xiaoyue River + Jing-Zhang Railway Heritage Park | Parallel Basic Validation

Same level, same gate, equal public rights, equal human-intervention rights, same stop/recovery mechanism; matched by task and environment, with no preferred site.

Non-proportional prototype
Not a test permit

PEOPLE | Inclusive Human-Machine Service

Accessible • explainable • human option is non-replaceable
Any eligible user may enter either field

THINGS | Self-Owned & Shared Resources

Human first • limited operation • inspection • maintenance & recovery
Any eligible project may enter either field

EVENTS | Multi-Party Coordination

High-value • change • on-site responsibility • information & logistics resilience
Any eligible task may enter either field

ENVIRONMENT | Long-Term Maintenance

Seasonal • ecology • facilities • professional maintenance with low disturbance
Any eligible project may enter either field

Community Protocol + Project Passport

Site Matching + Risk Assessment

Single / Dual-Site / Triggered Test

XIAOYUE RIVER BASIC VALIDATION FIELD = PARALLEL / NON-PREFERRED

ENVIRONMENT ADAPTER → Waterfront continuity / daily exercise / community life / ecological maintenance

Environmental conditions may be matched; no fixed route, robot or ecological test is predetermined.

① Public-Space Baseline

Access / stay / circulation / ecology / maintenance
Do not cancel basic public use

② Briefing & Consent Options

Test body / timing / impacts / data refuse / withdraw / complain / stop

③ Limited Test Zone

Reversible boundary / duration / queue observer / participant / equipment separated

④ Human Help • Handover • Stop

Human support always available L2/L3 trigger review

⑤ Observation • Feedback • Evidence

Tasks / errors / complaints / public disturbance / recovery public summary is generated

⑥ Equipment • Operations • Recovery Backend

Inspection / charging / maintenance / emergency / exit
No evidence = no continued operation

Independent Equipment / Staff Entrance

JING-ZHANG RAILWAY HERITAGE PARK = PARALLEL / NON-PREFERRED

ENVIRONMENT ADAPTER → Heritage narrative / public events / walking / stop-and-stay experience

Environmental conditions may be matched; no fixed cultural guide, event or ecological test is predetermined.

① Public-Space Baseline

Access / stay / circulation / ecology / maintenance
Do not cancel basic public use

② Briefing & Consent Options

Test body / timing / impacts / data refuse / withdraw / complain / stop

③ Limited Test Zone

Reversible boundary / duration / queue observer / participant / equipment separated

④ Human Help • Handover • Stop

Human support always available L2/L3 trigger review

⑤ Observation • Feedback • Evidence

Tasks / errors / complaints / public disturbance / recovery public summary is generated

⑥ Equipment • Operations • Recovery Backend

Inspection / charging / maintenance / emergency / exit
No evidence = no continued operation

Independent Equipment / Staff Entrance

COMMON GATES

Same gate • same rights • same stop

L0 / L1 → Low Impact & Light Interaction

Automatic isolation / light registration
sampling; complaints or anomalies trigger human review

L2 → Real Services or Limited Control

Booking / limits / fallback path / credit
professional review required before key actions

L3 → High Impact or Autonomous Equipment

Independent path / fence / takeover / human emergency at least two independent human reviewers

Stop & Recovery

Risk / over-limit / failure / complaint → human takeover → pause → remove → restore public space

Marine Conditional Test

If sites do not match → use alternative validation; insufficient evidence → add a site / comparison

Public Rights

Know / refuse / pause / human explanation / correction
All must not remove basic mobility or public service

ONE PROJECT ARCHIVE: differentiated by site change / user limitations / human operations / cost & recovery → continue validation / attach conditions / return for modification / switch site / stop

Public Participation Project Evidence Equipment Operations Evidence Return

Design language: modern, concise, low disturbance, reversible; arrows placed behind text and all symbols remain conceptual.

Dazhongsi | Public Return Plaza · Non-Proportional Functional Plan

Transform validated AI into an urban plaza that is understandable, testable, billable, traceable in growth, and able to return value to the public.

Concept Only · Non-Proportional

L0 Fully Open
L1 Registered
L2 Reserved
L3 Controlled
L4 Independent Backend
Public Participation Flow
Project Transformation Flow
Value Return Flow

Spatial switching: Daily = process corridor + first visit + adaptive experience; Weekly = youth viewing + failure review; Monthly = demonstrations + consultations; Quarterly = transformation + public return + scale review; Night = public area closes while tracking, review and safety backend continue.

Design language: modern, concise and restrained; replaceable modules, low-touch interface, clear permissions. Jing-Zhang historical texture serves as a scale-and-detail reference only, not surface imitation.

Arrows remain behind text: public flow, project rights, review rights, data and capital are never merged into a single ambiguous flow.

Twelve Scenarios | From Youth Ideas to Public Return

Not twelve isolated AI products, but one operating system: entry environments, real-world testbeds and governance mechanisms across a shared project journey.

NEXT STEP · EFFECT-IMAGE SELECTION GATE

Effect-image selection | A strong image must prove five things at once

01 Distinct spatial identity

02 Human action reads at a glance

03 AI participation feels real and restrained

04 Clear Jing-Zhang specificity

05 Governance evidence is visible in the frame

SIX CIVIC-AI PERSONAS

URBAN PROFILES GROUNDED IN REAL-WORLD TASKS

Six communities remain distinct but may overlap; youth is the creative force running through the entire journey—not a seventh group.

CORE PRINCIPLE

Personas are not marketing labels—they guide spatial design and governance.

01 COMMUNITY RESIDENT

"I want everyday problems genuinely solved."

REAL TASK Commute · errands · exercise · learning · services

BARRIER Fragmented services; AI hard to understand or refuse

CORE RIGHTS Notice · refusal · human option · data withdrawal

02 COMMUTER & VISITOR

"Let me move smoothly—and discover possibilities."

REAL TASK Transfers · wayfinding · short stays · light participation

BARRIER Broken information; fear of default tracking

CORE RIGHTS Basic services without mandatory registration

03 YOUNG INNOVATOR

"We have the tech. Where can we test it for real?"

REAL TASK Find problems · partners · test sites · feedback · adoption

BARRIER No real context; unclear liability and cost

CORE RIGHTS Keep core IP · transparent test rules

04 CULTURAL CO-CREATOR

"Technology may tell history, but not rewrite it."

REAL TASK Verify sources · co-create content · share culture

BARRIER Fragmented records; complex rights and fact boundaries

CORE RIGHTS Attribution · fact-checking · right to revise

05 INDUSTRY PARTNER

"Pilots should lead to adoption, not exposure."

REAL TASK Credible needs · validation · clients · investment review

BARRIER Complex access; unclear metrics and O&M costs

CORE RIGHTS Trade-secret protection · transparent rules

06 FRONTLINE OPERATOR

"Can it be maintained—and who takes over?"

REAL TASK Duty · maintenance · human takeover · cost control

BARRIER Hidden workload; no operator after R&D leaves

CORE RIGHTS Report issues · take over · pause or exit

SHARED SERVICE JOURNEY

FROM REAL-WORLD NEEDS TO URBAN VALIDATION AND PUBLIC RETURN

REAL-WORLD NEEDS

CORE EXPERIENCE · 核心体验 SCN-001

City Problem Clinic

城市问题诊所

NODE / 节点

Beijing AI Origin Community

北京 AI 原点社区

LOCATION / 位置

Youth Portal · Civic Intake Desk

青年门户 · 城市问题接诊台

PHASE 01 · YOUTH ENTRY / 阶段 01 · 青年进入

Problem Intake + Triage / 问题接诊与分流

01 REAL PROBLEM INTAKE

真实城市问题接诊

02 AI-ASSISTED DIAGNOSIS

AI 辅助归因与问题聚类

03 HUMAN TRIAGE + PATHWAY

人工分流并进入服务或原型路径

SCENE LOGIC · 场景逻辑

CITY ISSUE → INTAKE + EVIDENCE → AI CLUSTERING → HUMAN TRIAGE → CIVIC SERVICE / PROTOTYPE TEST

城市问题 → 接诊与证据登记 → AI 聚类 → 人工研判分流 → 公共服务或原型测试路径

CONCEPTUAL / SYNTHETIC VISUALIZATION · 概念性 / 合成效果图 · 不代表已建成或已批准

NEXT / 下一步: SCN-002 YOUTH COLLABORATION COMMONS / 青年共创第三空间

CORE EXPERIENCE · 核心体验 SCN-002

Youth Collaboration Commons

青年共创第三空间匹配

NODE / 节点

Beijing AI Origin Community

北京 AI 原点社区

PHASE 01 · YOUTH ENTRY / 阶段 01 · 青年进入

LOCATION / 位置

Youth Portal · Open Commons

青年门户 · 开放共创厅

Visible Workshop / 可见工坊

01 SOLO ENTRY
独立进入与独立创作

02 OPTIONAL COLLABORATION
自愿协作与共创长桌

03 VISIBLE PROTOTYPING
可见原型制作与受控工坊

SCENE LOGIC · 场景逻辑

PROBLEM OR PERSONAL IDEA → SOLO CREATION / OPTIONAL TEAMING → TESTABLE PROTOTYPE → SERVICE + STAGED REVIEW

城市问题或个人想法 → 独立创作 / 自愿组队 → 可体验原型 → 专业服务与分级审查

CONCEPTUAL / SYNTHETIC VISUALIZATION · 概念性 / 合成效果图 · 不代表已建成或已批准

NEXT / 下一步: SCN-010 OPEN TEST WEEK / 开放测试周

CITY VALIDATION · 城市验证 SCN-003

Accessible Slow Mobility + Transfer Assistant

无障碍慢行与换乘助手

NODE / 节点

Xiaoyue River + Transfer Edge

小月河 + 轨道接驳边界

LOCATION / 位置

Heritage Park Entrance · Help Point

遗址公园入口 · 慢行帮助点

PHASE 03 · CITY VALIDATION / 阶段 03 · 城市验证

Accessible Route + Human Help / 无障碍路径与人工兜底

01 ACCESSIBLE ROUTE REQUEST

无障碍路线需求提出

02 AI ROUTE EXPLANATION

AI 辅助路径解释

03 HUMAN HELP + WAYFINDING

人工问询与静态导视兜底

SCENE LOGIC · 场景逻辑

ACCESS NEED → EXPLAINABLE ROUTE → STATIC WAYFINDING + HUMAN HELP → COMPLETION FEEDBACK

无障碍需求 → 可解释路径 → 静态导视与人工帮助 → 到达反馈与路径修正

CONCEPTUAL / SYNTHETIC VISUALIZATION · 概念性 / 合成效果图 · 不代表已建成或已批准

NEXT / 下一步: SCN-006 LOW-SPEED ROBOT SHARED-PATH TEST / 低速机器人共路测试

CORE EXPERIENCE · 核心体验 SCN-004

Jing-Zhang Co-created Interpretation

京张文化共创导览

NODE / 节点

Jing-Zhang Railway Heritage Park
京张铁路遗址公园

PHASE 01 · ENTRY + IDEAS / 阶段 01 · 进入与创想

LOCATION / 位置

Heritage Interpretation Path
遗产导览路径 · 共创点

Co-creation Point / 共创导览节点

01 HERITAGE SOURCES
历史资料与可追溯来源

02 AI CO-CREATION + REVIEW
AI 共创与事实版权复核

03 IN-SITU INTERPRETATION
现场导览与公众共同体验

04 ACCESSIBLE ROUTE
无障碍遗产路径与日常通行

SCENE LOGIC · 场景逻辑
HISTORICAL SOURCES → AI CO-CREATION → FACT + RIGHTS REVIEW → IN-SITU INTERPRETATION → PUBLIC FEEDBACK
历史资料 → AI 共创 → 事实与版权复核 → 现场导览体验 → 公众反馈与版本更新

CONCEPTUAL / SYNTHETIC VISUALIZATION · 概念性 / 合成效果图 · 不代表已建成或已批准

NEXT / 下一步: SCN-010 OPEN TEST WEEK / 开放测试周

CORE EXPERIENCE · 核心体验 SCN-005

AI Service Navigation + Human Handoff

AI 创新服务导航与人工接力

NODE / 节点

Dual Youth Portals + Service Wing

双青年门户 + 中关村科技服务翼

LOCATION / 位置

Youth Portal · Service Handoff Desk

青年门户 · 专业服务接力台

PHASE 02 · SERVICE + PROTOTYPE / 阶段 02 · 服务与原型

AI Routing + Expert Review / AI 导航与专家复核

01 NEED EXPRESSION

青年提出服务需求

02 AI SERVICE ROUTING

AI 导航与服务分拣

03 EXPERT HANDOFF

知识产权 / 法律 / 数据 / 商业人工接力

SCENE LOGIC · 场景逻辑

YOUTH NEED → AI SERVICE ROUTING → HUMAN PROFESSIONAL REVIEW → SUPPORT PACKAGE → PROTOTYPE / BUSINESS PATH

青年需求 → AI 服务导航 → 真人专业复核 → 支持包形成 → 原型或商业路径接洽

CONCEPTUAL / SYNTHETIC VISUALIZATION · 概念性 / 合成效果图 · 不代表已建成或已批准

NEXT / 下一步: SCN-009 NIGHT LEARNING + PUBLIC EVENTS / 夜间学习与公共活动

CITY VALIDATION · 城市验证 SCN-006

Low-speed Robot Shared-path Test

低速机器人共路测试

NODE / 节点

Xiaoyue River + Heritage Park
小月河 + 京张铁路遗址公园

LOCATION / 位置

Shared Slow Path · Test Segment
慢行共路 · 受控测试段

PHASE 03 · CITY VALIDATION / 阶段 03 · 城市验证

Public Bypass + Human Stop / 公众旁路与人工停止

01 CONTROLLED TEST SLOT
预约限时测试

02 SHARED PATH + BYPASS
共路慢行与公众旁路

03 HUMAN TAKEOVER
人工接管与停止

SCENE LOGIC · 场景逻辑
APPROVED PROTOTYPE → BOUNDED PATH TEST → BYPASS PROTECTION → HUMAN STOP → REVIEW DATA
已审原型 → 限域共路测试 → 公众旁路保护 → 人工停止 → 数据复盘

CONCEPTUAL / SYNTHETIC VISUALIZATION · 概念性 / 合成效果图 · 不代表已建成或已批准

NEXT / 下一步: SCN-007 EVENT-DAY MOBILITY COORDINATION / 活动日慢行接驳协同

CITY VALIDATION · 城市验证 SCN-007

Event-day Slow Mobility + Shuttle Coordination

活动日慢行与接驳协同

NODE / 节点

Xiaoyue River + Heritage Event Node

小月河 + 遗址公园活动节点

LOCATION / 位置

Event Mobility Hub

活动日慢行接驳枢纽

PHASE 03 · CITY VALIDATION / 阶段 03 · 城市验证

Route Steward + Shuttle Edge / 路线引导与接驳边界

01 EVENT FLOW OBSERVATION

活动日人流观察

02 ROUTE + SHUTTLE COORDINATION

路线与接驳协同

03 ACCESSIBLE BYPASS

无障碍旁路与人工引导

SCENE LOGIC · 场景逻辑

EVENT PEAK → FLOW OBSERVATION → ROUTE / SHUTTLE ADJUSTMENT → ACCESSIBLE BYPASS → AFTER-ACTION REVIEW

活动高峰 → 人流观察 → 路线 / 接驳调整 → 无障碍旁路 → 活动后复盘

CONCEPTUAL / SYNTHETIC VISUALIZATION · 概念性 / 合成效果图 · 不代表已建成或已批准

NEXT / 下一步: SCN-008 PARK ECOLOGY MAINTENANCE ASSISTANT / 公园生态维护助手

CITY VALIDATION · 城市验证 SCN-008

Park Ecology Maintenance Assistant

公园生态维护助手

NODE / 节点

Xiaoyue River Blue-green Edge

小月河蓝绿公共空间边界

LOCATION / 位置

Ecology Maintenance Point

生态维护点 · 遗产路径边

PHASE 03 · CITY VALIDATION / 阶段 03 · 城市验证

Low-sensitive Sensing + Manual Inspection / 低敏感感知与人工巡检

01 LOW-SENSITIVE SENSING
低敏感环境感知

02 MANUAL INSPECTION
人工巡检与设施复核

03 MAINTENANCE ACTION
生态与设施维护行动

SCENE LOGIC · 场景逻辑

LOW-SENSITIVE ENVIRONMENT DATA → AI ANOMALY HINT → MANUAL INSPECTION → MAINTENANCE ACTION → SEASONAL REVIEW

低敏感环境数据 → AI 异常提示 → 人工巡检 → 维护行动 → 季节性复盘

CONCEPTUAL / SYNTHETIC VISUALIZATION · 概念性 / 合成效果图 · 不代表已建成或已批准

LOOP / 回路: PUBLIC VALIDATION RETURNS TO SCN-011 + SCN-012 / 验证结果反馈合读与公共阅读

CORE EXPERIENCE · 核心体验 SCN-009

Youth Night Learning + Public Events

青年夜间学习与公共活动协同

NODE / 节点

Beijing AI Origin Community
北京 AI 原点社区

PHASE 01 · YOUTH ENTRY / 阶段 01 · 青年进入

LOCATION / 位置

Night Commons · Learning Hall
夜间公场 · 共学厅

Low-cost Stay + Public Event / 低门槛停留与公共活动

01 LOW-COST STAY
低门槛夜间停留

02 PEER LEARNING
同伴学习与小组交流

03 PUBLIC EVENT COORDINATION
公共活动预约与协同组织

SCENE LOGIC · 场景逻辑

EVENING ARRIVAL → QUIET STUDY → PEER EXCHANGE → SMALL PUBLIC EVENT → CONTINUOUS YOUTH COMMUNITY

夜间抵达 → 安静学习 → 同伴交流 → 小型公共活动 → 持续青年社群

CONCEPTUAL / SYNTHETIC VISUALIZATION · 概念性 / 合成效果图，不代表已建成或已批准

NEXT / 下一步: SCN-010 OPEN TEST WEEK / 开放测试周

CORE EXPERIENCE · 核心体验 SCN-010

Open Test Week

开发者开放测试周

NODE / 节点

AI Origin Community + Zhongzhiyuan
AI 原点社区 + 众智园

PHASE 02 · PROTOTYPING / 阶段 02 · 原型形成

LOCATION / 位置

Semi-covered Testing Commons
半室外测试公场

Controlled Test Bay / 受控测试舱

01 TEAM BUILD
团队研发与小型原型

02 STAGED REVIEW
分级审查与人工研判

03 BOUNDED TEST + HUMAN STOP
限域测试与人工接管停止

04 PUBLIC FEEDBACK
公众反馈并返回修改

SCENE LOGIC · 场景逻辑

LIVE CHALLENGE → TEAM BUILD → STAGED REVIEW → BOUNDED TRIAL + HUMAN STOP → PUBLIC FEEDBACK → REVISION

真实挑战 → 团队研发 → 分级审查 → 限域测试与人工停止 → 公众反馈 → 返回修改

CONCEPTUAL / SYNTHETIC VISUALIZATION · 概念性 / 合成效果图 · 不代表已建成或已批准

NEXT / 下一步: URBAN VALIDATION SCENES / 真实城市验证

CORE EXPERIENCE · 核心体验 SCN-011

Public AI Sustainability Review

公共性 AI 可持续性会诊

NODE / 节点

Dazhongsi Return Common

大钟寺回流公场

LOCATION / 位置

Review Clinic · Dual-account Desk

会诊室 · 双账复核台

PHASE 04 · PUBLIC RETURN / 阶段 04 · 公共回流

Maintenance + Stop Rule / 维护责任与停止规则

01 FEEDBACK + COMPLAINTS

反馈与投诉复核

02 PUBLIC COST + MAINTENANCE

公共成本与维护责任核算

03 CONTINUE / REVISE / STOP

继续、修改或停止的人工决策

SCENE LOGIC · 场景逻辑

PUBLIC USE DATA → FEEDBACK + COMPLAINT REVIEW → COST / DUTY CHECK → CONTINUE / REVISE / STOP → RETURN ACCOUNT

公共使用数据 → 反馈与投诉复核 → 成本与责任核算 → 继续 / 修改 / 停止 → 公共账回流

CONCEPTUAL / SYNTHETIC VISUALIZATION · 概念性 / 合成效果图 · 不代表已建成或已批准

NEXT / 下一步: SCN-012 AI-NATIVE BUSINESS WITH PUBLIC RETURN / AI 原生商业与公共回流

CORE EXPERIENCE · 核心体验 SCN-012

AI-native Business with Public Return

AI 原生商业与公共回流试点

NODE / 节点

Dazhongsi Return Common
大钟寺回流公场

PHASE 04 · PUBLIC RETURN / 阶段 04 · 公共回流

LOCATION / 位置

Public Trial Island · First-order Table
公开试用岛 · 首单桌

Dual-account Desk / 双账台

01 PUBLIC TRIAL
公开试用与真实用户反馈

02 FIRST-ORDER REVIEW
首单研判与复购验证

03 DUAL-ACCOUNT REVIEW
商业账与公共账复核

04 CONFIDENTIAL CONTRACT
合同保密与持续审查

SCENE LOGIC · 场景逻辑 VALIDATED PROJECT → PUBLIC TRIAL → FIRST ORDER / REPEAT USE → DUAL ACCOUNTS → PUBLIC RETURN → NEXT CHALLENGE

通过验证的项目 → 公开试用 → 首单 / 复购 → 商业账与公共账 → 公共回流 → 下一轮问题

CONCEPTUAL / SYNTHETIC VISUALIZATION · 概念性 / 合成效果图、不代表已建成或已批准

LOOP / 回路: NEXT PUBLIC CHALLENGE / 下一轮公共问题
