

JingZhang AI Corridor

From Railway Corridor to AI Corridor / 从铁路走廊到智能走廊

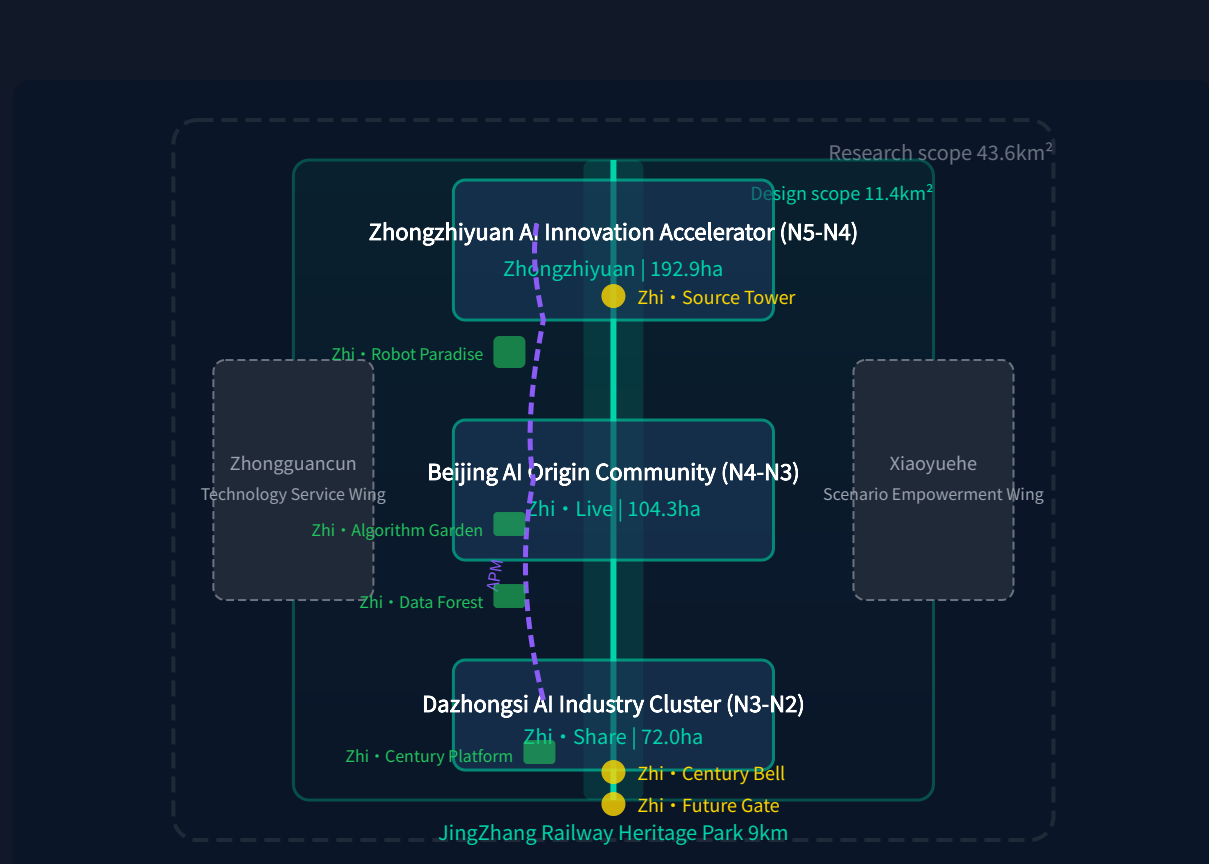

Two wings: Zhongguancun Technology Service Wing (West) | Xiaoyuehe Scenario Empowerment Wing (East)
Five cores: Zhongguancun • AI Industry Core | Zhichunlu-Wudaokou • AI Life Core | Dazhongsi • AI Innovation Core | Xueyuanqiao • AI Source Core | Zhongzhiyuan • AI Computing Core

Haidian District • Beijing • ~43.6 km² coordinated research scope • Claude Agent • 2026-08-14

Core Metrics

Spatial Structure

Three Positionings

Centennial JingZhang Cultural Belt

Revitalize the railway heritage through the "Zhi • Path" concept, building a cultural narrative and wayfinding system so a century of railway memory becomes a spring of innovation.

Urban AI Living Experience Belt

Ten AI scenario cards build perceptible, experiential AI city scenes, letting citizens feel AI empowerment in daily life.

AI Convergence Innovation Belt

The "Zhi-Ecosystem" four-loop model — Zhi • Create → Zhi • Incubate → Zhi • Share → Zhi • Govern — builds a complete innovation chain from basic research to scenario deployment.

AI+ Scenario Cards

S01 AI Medical Corridor Space: Zhongzhiyuan community health center AI run: lobby AI triage terminal replaces the manual registration desk; the patient describes symptoms and AI matches the department; lab reports are auto-parsed and pushed to the phone, flagging abnormal indicators in plain language for doctor review Tech: medical knowledge graph + NLP consultation + imaging AI	S02 Driverless Delivery & Driving Space: district-wide roads + rooftop takeoff/landing pads AI run: drones fly from merchant to rooftop pad (3 min); L4 robotaxi one-tap hailing, fully driverless; ground delivery robots along sidewalks Tech: drone obstacle avoidance + LIDAR autonomy + SLAM navigation	S03 AI Creative Market Space: around Dazhongsi Zhi • Data Forest, weekends AI run: AI painter generates stylized portraits in 10s; AI musician arranges in real time + light show; digital human in railway uniform converses live Tech: style transfer + AI composition + digital human	S04 JingZhang APM Driverless Space: 8.9km elevated + ground inside the innovation zone, 12 stations AI run: GoA4 full autonomy with no cab; in-car screens narrate landmarks; V2X signal coordination for priority Tech: GoM4 autonomy + V2X + AI narration	S05 AI Legal Service Station Space: ground floor of Wudaokou open-source community HQ AI run: upload a contract PDF → 30s AI flags risky clauses + plain explanation + revision template; when a human lawyer is needed, AI sends a summary to the neighboring firm Tech: legal NLP + knowledge graph + Legal RAG
S06 Smart Elderly Care Community Space: Xiaoyuehe age-friendly retrofitted community AI run: wristband 24h blood-pressure/heart-rate monitoring → anomaly triggers bedside voice comfort + notifies doctor and family + nurse 5-min visit; companion robot plays chess, chats, remembers preferences; voice assistant manages meds, meals, appointments Tech: wearables + anomaly alert + companion robot + voice assistant	S07 Developer Café Space: ground floor of innovation complexes along the line AI run: desktop AI coding assistant analyzes errors in 5s with fixes; wall AI whiteboard draws architecture diagrams, auto-detects dependencies; weekly Zhi • Night Talk salon Tech: code analysis + diagram recognition + collaborative whiteboard	S08 AI Cultural Guide Space: heritage park Zhi • Path cultural nodes AI run: AR glasses overlay the 1909 opening ceremony at historic nodes; AI voice guide every 500m + Q&A; auto-generates a tour report Tech: AR reconstruction + multilingual translation + voice Q&A	S09 City AI Agent Center Space: standalone operation center building at Dazhongsi AI run: 30m ² digital twin dashboard shows district status in real time; AI auto-detects traffic events + energy anomalies → adjusts signals + auto-dispatches maintenance; citizens report via app, AI classifies Tech: digital twin + video AI + smart dispatch + NLP tickets	S10 AI Signal & Reversible Lanes Space: district main roads, Innovation Avenue, etc. AI run: optimizes signal timing every 15s; LED ground strips guide reversible lanes to switch direction; green-wave coordination across the corridor; auto-extends for elderly crossing; full green corridor for fire trucks Tech: traffic sensing + adaptive timing + reversible switch + emergency priority

AI Theme Parks

Zhi • Robot Paradise Zhongzhiyuan • 3ha • robot interaction • soccer field • driverless car experience	Zhi • Algorithm Garden Origin Community • 2ha • plant maze • fountain neural network • night light show	Zhi • Data Forest Dazhongsi • 1.8ha • data flow • LED pillars • real-time city data	Zhi • Century Platform Xizhimen • 1.5ha • railway historic platform • AR century railway history • immersive experience
--	---	---	---

Global Cases

#	Case	City	Core Mechanism
1	Silicon Valley Innovation Corridor	San Francisco	Industry-academia fusion • VC ecosystem
2	London Silicon Roundabout	London	Embedding tech industry in urban renewal
3	Tel Aviv Innovation District	Tel Aviv	Military-civilian technology transfer
4	Shenzhen AI Valley	Shenzhen	Full hardware-software-scenario chain
5	One North Innovation Park	Singapore	Integrated R&D-city • flexible land
6	Kendall Square	Cambridge (US)	MIT spillover • densest innovation district
7	Masdar City	Abu Dhabi	Zero-carbon smart city • AI governance first
8	Zhongguancun Science City	Beijing	National innovation demo zone • leading AI cluster

Implementation Phasing

📅 Phase 1 • Initiation | 2026-2028

	Heritage park full connection • Zhi • Path launch • first AI landmarks
Phase 2 • Development 2028-2030	Zhongzhiyuan full build-out • Dazhongsi industry upgrade • JingZhang APM driverless line
Phase 3 • Maturity 2030-2035	District-wide AI scenario coverage • international brand • closed-loop operation

Brand Identity

Data Statement

Spatial data statement: the spatial boundary data used in this proposal is a provisional rough boundary derived from the announcement's textual four-to and area constraints, and does not equal the official red line. All area metrics must be re-calculated once formal GIS/CAD data is released.

Conceptual proposal statement: all spatial layouts, building scales, land-use functions, and long-term targets are conceptual proposals and do not constitute formal planning conclusions or government commitments.
