

JINGZHANG COEVOLUTION

INTERDEPENDENCE × CARBON-SILICON COEVOLUTION × CONTINUUM

LIFE HAS GROUND. CIVIC AI PASSES BOTH GATES. COEVOLUTION
BECOMES POSSIBLE.

L7 + D6 / INDEPENDENT / NON-COMPENSATORY

ANY UNKNOWN / FAIL => HOLD

v0.9 LOCAL CANDIDATE

WORLDVIEW

JINGZHANG COEVOLUTION

01 / WORLDVIEW

JINGZHANG COEVOLUTION

INTERDEPENDENCE OF ALL EXISTENCE × CARBON-SILICON COEVOLUTION × CIVILISATIONAL CONTINUUM

THREE SPATIAL SYSTEMS

- 01 **LIVING GROUND**
CONTINUOUS PHYSICAL CONDITIONS FOR LIFE
- 02 **CIVIC AI DUAL-GATE PROTOCOL**
INDEPENDENT L7 + D6 GATES
- 03 **MUTUAL-BECOMING INTERFACE**
MEASURE / STOP / RESTORE IN SPACE

L7 + D6 PASS + PASS → RELEASE

ANY UNKNOWN / FAIL => HOLD

THE GATES ARE INDEPENDENT AND NON-COMPENSATORY. ECOLOGICAL PERFORMANCE CANNOT OFFSET MISSING ACCOUNTABILITY.

DESIGN BASIS AND THREE SCALES

THREE SCALES

Coordinated research is about 73.6 km²; overall design is 11.413 km² from provisional rough geometry; three key areas hold 12 contact scenarios.

EVIDENCE BOUNDARY

Official exact boundaries, ownership, controls, existing buildings, transport, utilities, seasonal ecology and operators are unavailable.

LOCKED CONCEPT

Coevolution does not make nature speak for AI or reduce life to sensor data. AI is not a life species.

SPATIAL CONTRACT

LIVING GROUND remains physically continuous; the CIVIC AI DUAL-GATE PROTOCOL judges L7 and D6 separately; MUTUAL-BECOMING INTERFACES locate measurement, stopping, human takeover and restoration.

SITE STRUCTURE

JINGZHANG COEVOLUTION

03 / SITE OVERVIEW

SITE STRUCTURE AND THREE SCALES

LIVING GROUND REMAINS CONTINUOUS. EACH CIVIC AI SCENARIO MUST PASS L7 AND D6 INDEPENDENTLY.

LAND USE AND RENEWAL

JINGZHANG COEVOLUTION

06 / LAND USE

CONCEPT LAND USE AND RENEWAL

22 CONCEPT ZONES AND 180 CONCEPT BUILDINGS SUPPORT SPATIAL DISCUSSION. THEY ARE NOT STATUTORY LAND USE OR VERIFIED EXISTING BUILDINGS.

CONCEPT COMPOSITION

- 22 CONCEPT LAND-USE ZONES
- 180 CONCEPT BUILDING MASSES
- 7 LIVING GROUND ELEMENTS
- 15 PUBLIC SPACES AND CONTACTS
- NOT DETERMINED HERE
FAR, HEIGHT LIMITS, OWNERSHIP, STATUTORY LAND USE, DEMOLITION, ROAD REDLINES

MOBILITY AND BLUE-GREEN NETWORK

JINGZHANG COEVOLUTION

07 / MOBILITY + BLUE-GREEN

MOBILITY × BLUE-GREEN PUBLIC REALM

ORDINARY CITY ROUTES, ECOLOGICAL CONTINUITY AND AI-OFF TASK PATHS FORM AN EXIT-CAPABLE EVERYDAY INFRASTRUCTURE.

THREE CONTINUOUS NETWORKS

01 ORDINARY CITY ROUTES
DAILY TASKS REMAIN POSSIBLE WITHOUT A PHONE OR AI

02 LIVING GROUND NETWORK
WATER, SOIL, ROOTS, SHADE, DARKNESS AND HABITAT

03 MUTUAL-BECOMING INTERFACES
IDENTIFIABLE, STOPPABLE, HUMAN-OPERABLE AND RESTORABLE

TO BE MEASURED
TRAFFIC, SECTIONS, ACCESSIBLE CLEAR WIDTH, STORMWATER, ROOTS, SEASONAL ECOLOGY, NIGHT LUX AND NOISE.

KEY AREAS

THREE KEY AREAS / THREE DISTINCT PROTOTYPES

FROM TEST GROUND TO CIVIC COMMONS TO EVERYDAY DISTRICT. EACH AREA CARRIES A DISTINCT QUESTION, PROCESS AND LANDMARK.

RELEASE

L7 ≠ D6

NON-COMPENSATORY

AI-OFF + HUMAN ROUTE

CIVIC AI DUAL-GATE PROTOCOL

L7 LIFE GATE

Air, water, soil, shade and heat, darkness, quiet, and biodiversity. Any UNKNOWN or FAIL prevents the life gate from passing.

D6 DUTY GATE

Identify, responsibility, human route, stop, repair and exit. Missing named accountability means HOLD.

NON-COMPENSATORY

This is not a 42-cell composite score. Ecology cannot offset missing duties, and complete duties cannot offset harm to life conditions.

MUTUAL-BECOMING INTERFACE

Each contact point names measurement, threshold, stop action, human route, repair duty, and exit restoration in spatial section.

IMPLEMENTATION AND PHASING

G0 EVIDENCE BASELINE

JZ-01 Living Ground continuity baseline. Seasonal ecology, soil, darkness, quiet and transport require measurement first.

G1 REVERSIBLE MOCK-UP

JZ-02 dual-gate prototype; JZ-03 Error Square; JZ-04 Low-Interference Everyday test. Status is CONCEPT_READY only.

G2 CONTROLLED PILOT

JZ-05 darkness-friendly lighting; JZ-06 retirement and restoration drill. HOLD without field authorisation, professional review and restoration funds.

G3 LONG-TERM ADOPTION

JZ-07 Coevolution Threshold public review. Release is discussed only after L7 PASS + D6 PASS; failure and return to the ordinary city are valid outcomes.

METRICS AND EVIDENCE

JINGZHANG COEVOLUTION

08 / METRICS + EVIDENCE

CORE METRICS AND EVIDENCE STATE

SEPARATE GEOMETRY-DERIVED VALUES, DESIGN-CONTRACT COVERAGE AND FIELD RESULTS. UNKNOWN IS NOT ZERO OR PERFORMANCE.

EVIDENCE CHAIN

FIELD METRICS REMAINING UNKNOWN

● SCREEN BURDEN / ATTENTION TAX

● LIFE / DARKNESS / SOIL CONTINUITY

● REVERSIBILITY / BIOLOGICAL EXTERNALITY

● DUAL-GATE RELEASE / HUMAN ROUTE / AI-OFF COMPLETION

READY?

NO

NO FIELD AUTHORISATION, PROFESSIONAL SIGN-OFF, MEASURED BASELINE OR OPERATING ENTITY. NOT READY FOR FIELD OPERATION.

NOT_READY_FOR_FIELD_OPERATION

REVIEW BOUNDARY AND NEXT STEP

CURRENT STATUS

NOT_READY_FOR_FIELD_OPERATION. No field verification, professional sign-off, statutory controls, operating entity or implementation authorisation.

VERIFIABLE CONTENT

Local proposal, GeoJSON, formulae, scenario contracts, assumptions, sources and figures can be reviewed; all geometry-dependent outputs require recalculation after official data arrives.

NOT CLAIMED

No claim of official boundaries, observed conditions, partnerships, field performance, approval, constructability or public release.

NEXT GATE

Obtain authorised GIS/CAD, surveys, controls, ownership, transport, utilities, heritage and seasonal ecology data; review through named professional and public roles.
