

Centennial Jing-Zhang · AI-Native Innovation Belt

Human-AI Symbiotic Urban Design along the Jing-Zhang Rail Heritage · A3 Booklet · v4.22

Core Claims

1. The corridor boundary is the sole area basis; all values are provisional; no synthetic padding.
2. Three key areas: Zhongzhiyuan AI Acceleration Area, Beijing AI Origin Community, Dazhongsi AI Industry Cluster.
3. Green ratio 24.20%, public-space ratio 6.15%, full zone coverage (coverage = 1.0); all provisional.
4. Governance: every gate and audit assertion is fully logged, traceable and recomputable (counts in metrics-evidence figure).

Spatial Structure

Origin Force Belt + 3 key areas + 5 transit gates:

Z1 Zhongzhiyuan AI Acceleration Area

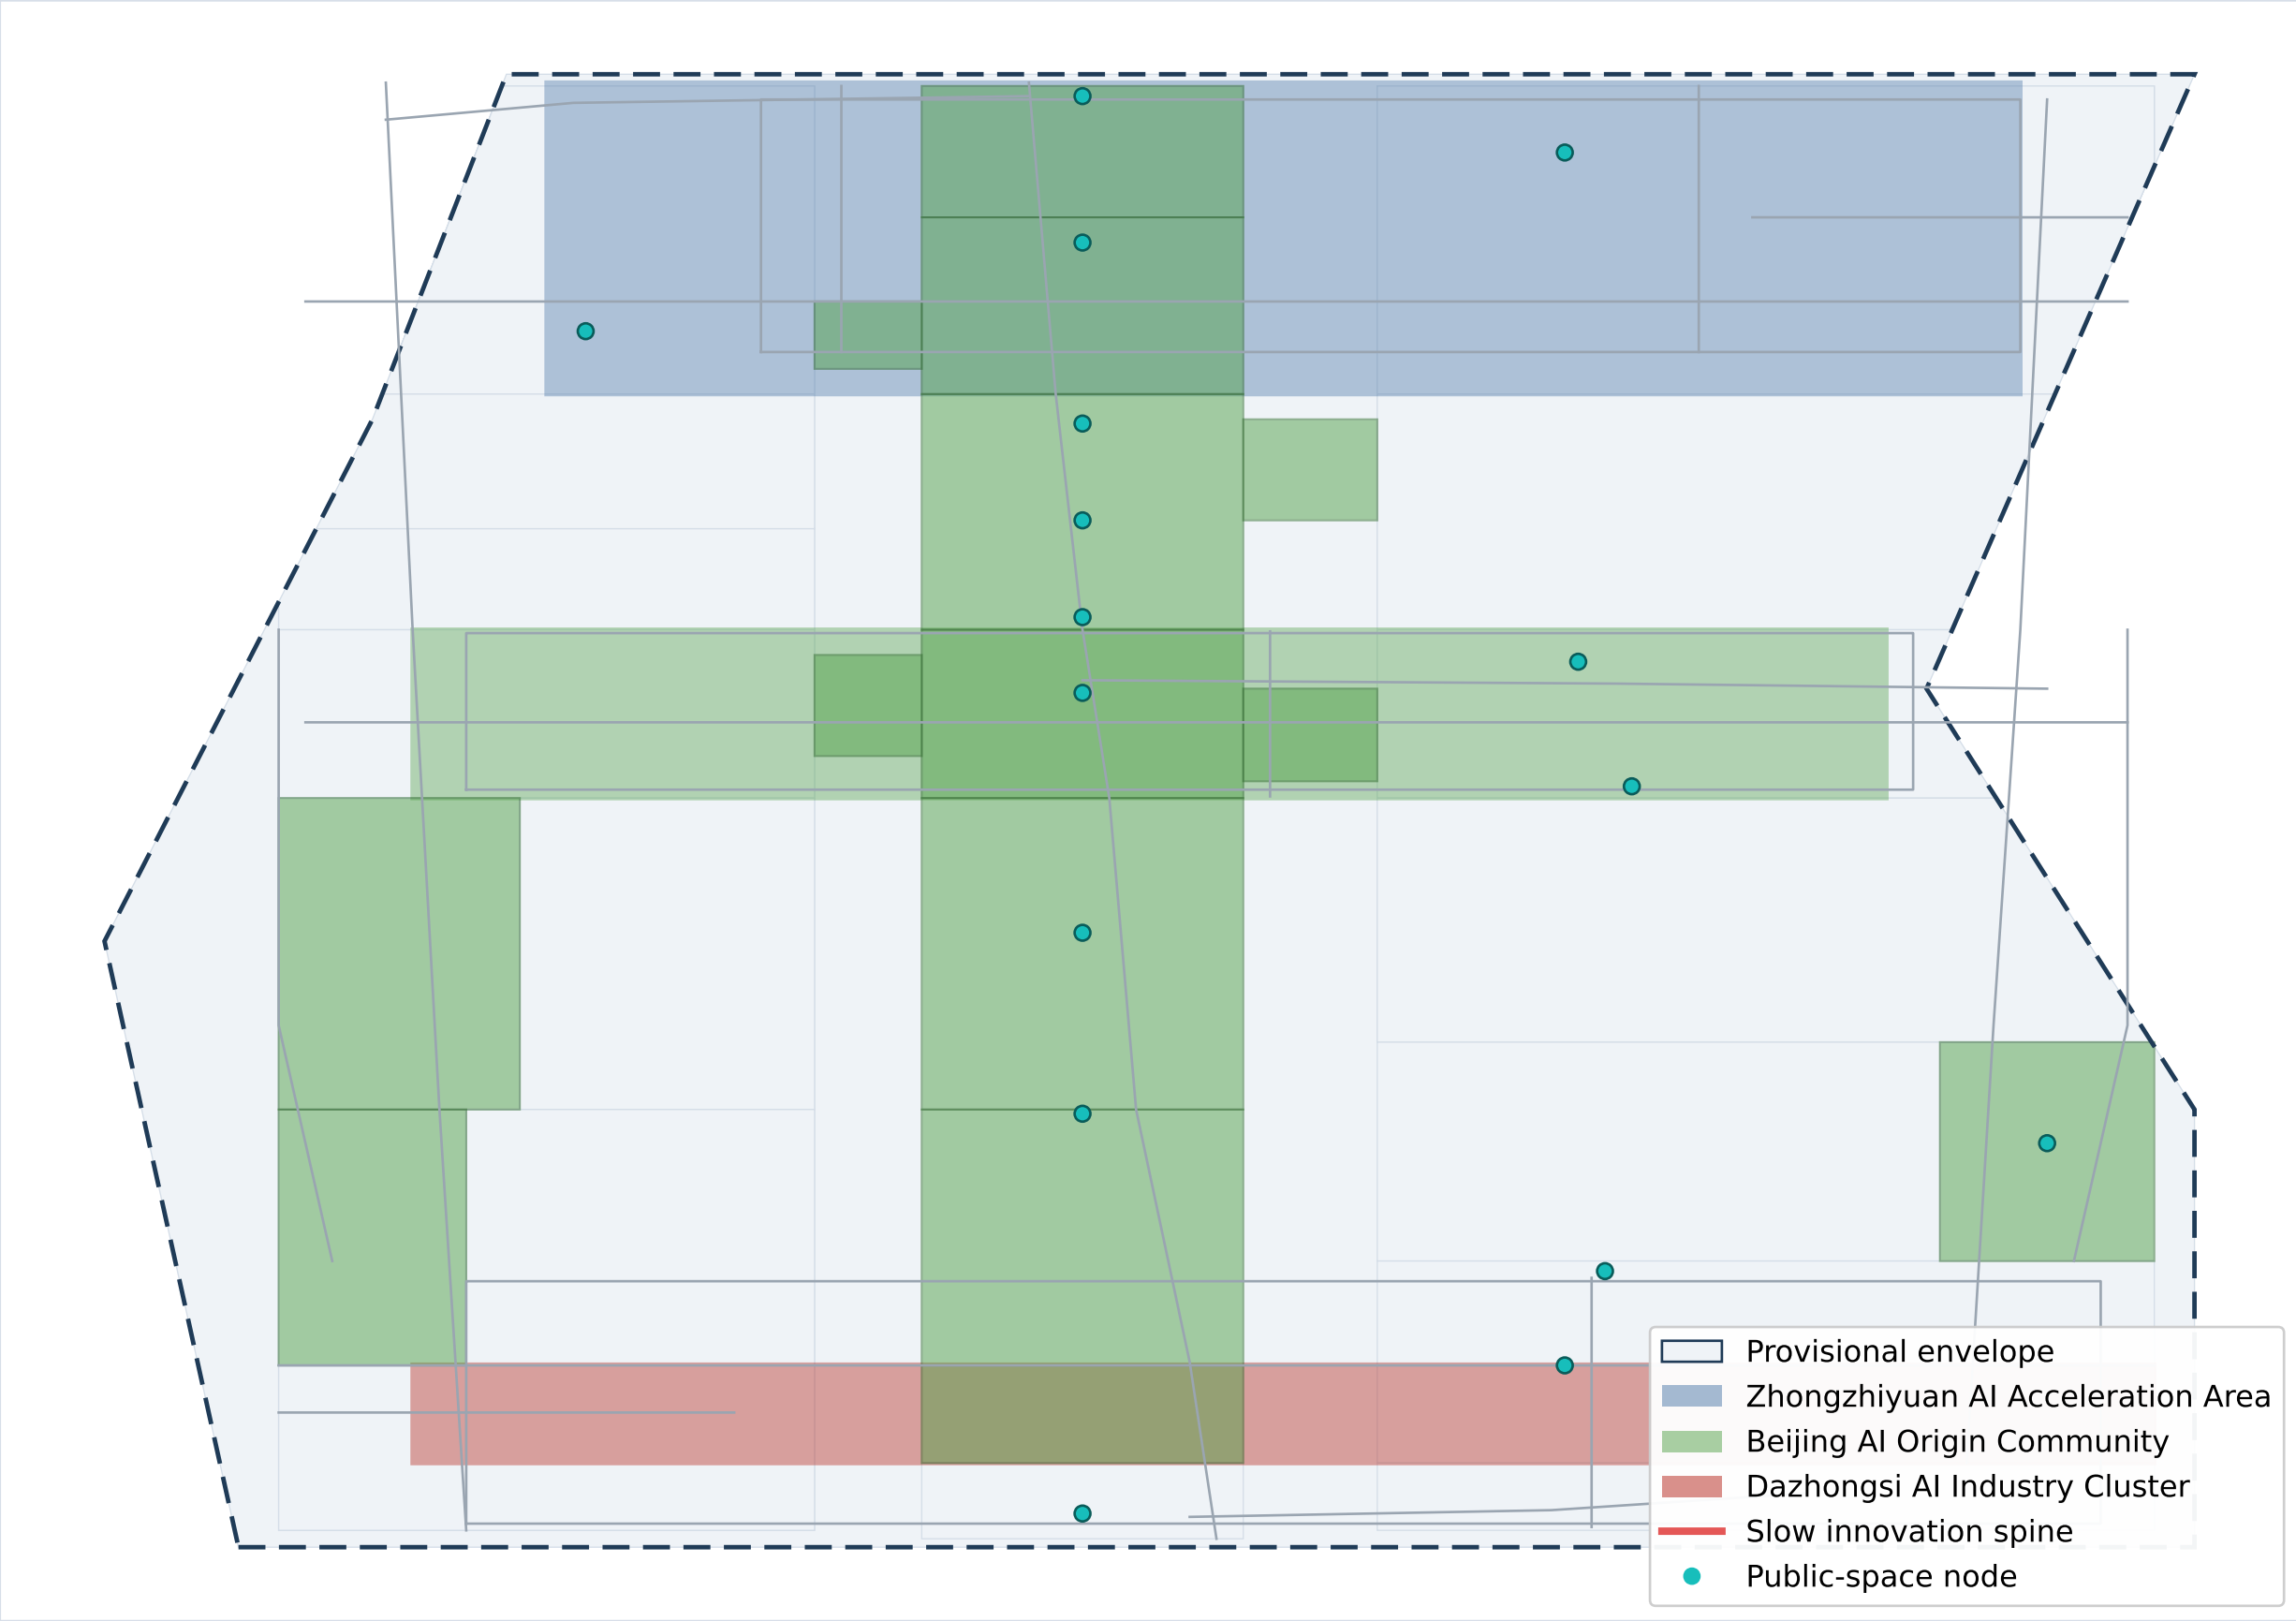

Z2 Beijing AI Origin Community

Z3 Dazhongsi AI Industry Cluster

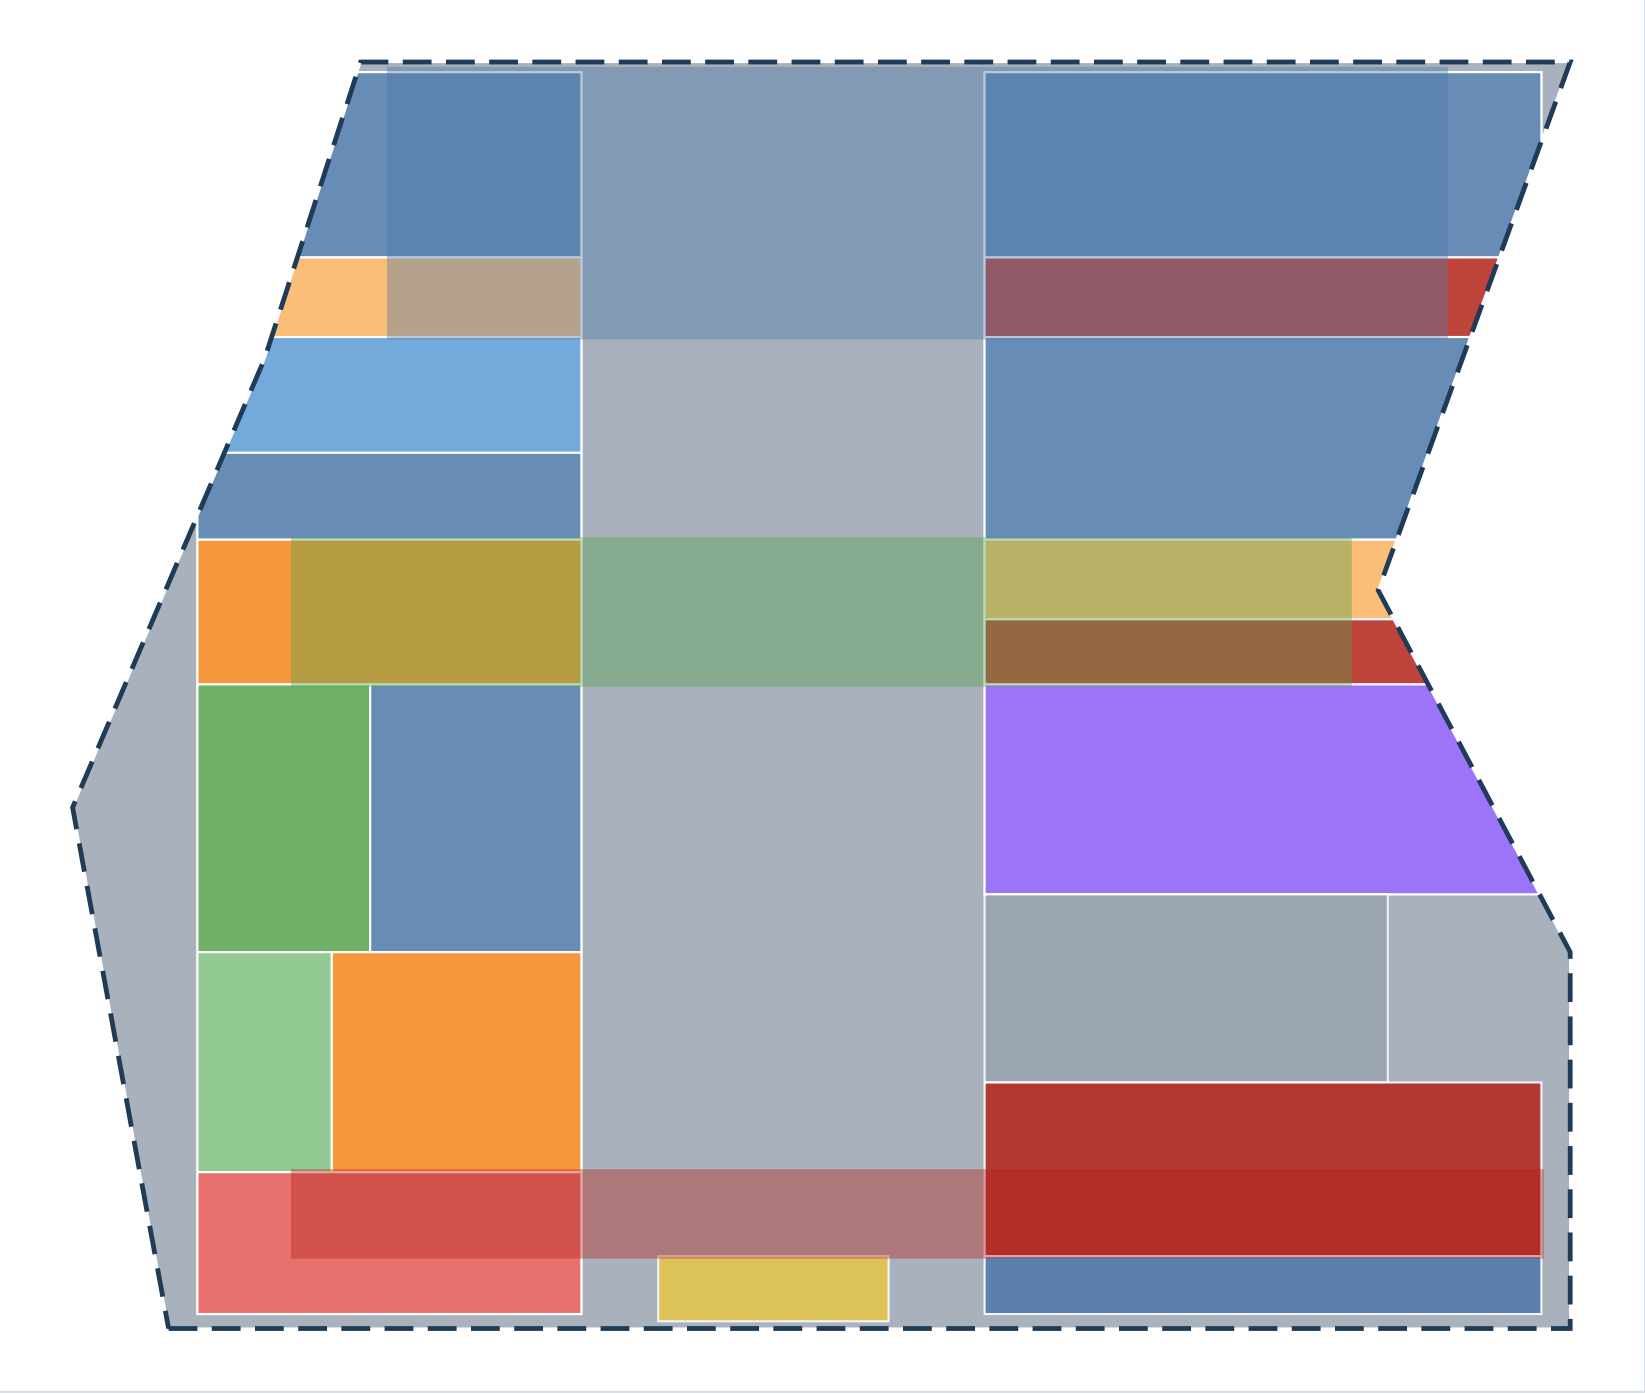

Five transit gates (G1-G5) link the three positions and five functions

All geometry is provisional, not an official redline; a full recalculation is triggered once official polygons are released.

Site Overview

Land-Use Structure

Core Metrics

Site area	1134.5 ha
Green ratio	24.20%
Public-space ratio	6.15%
Zone coverage	1.0
Key areas	3
Transit gates	5

Note: provisional equirectangular estimates; full recalculation under EPSG:4548 once c

Phasing

1. Near-term: connect the spine
2. Mid-term: facade & function renewal
3. Long-term: dense touchpoints & services

Boundary & Evidence Statement

- All boundaries are provisional, not official redlines; valid for this round's content review, with a full recalculation triggered once official geometry is released.
- Metrics, figures, text and HTML are generated from one data source (metrics.json + GeoJSON).
- FAR, height, population and parking values without official basis stay null/unknown.
