

Method before sites | How AI Agents enter urban planning

CORE METHOD

AI does not merely add images to conventional planning. It creates a traceable and correctable judgement chain across evidence, value, space and operations.

This board records planning reasoning and human correction; concept images, provisional boundaries and candidate Agents are never presented as deployed facts.

FIG-01 Three scales and One Belt–Three Areas–Two Wings

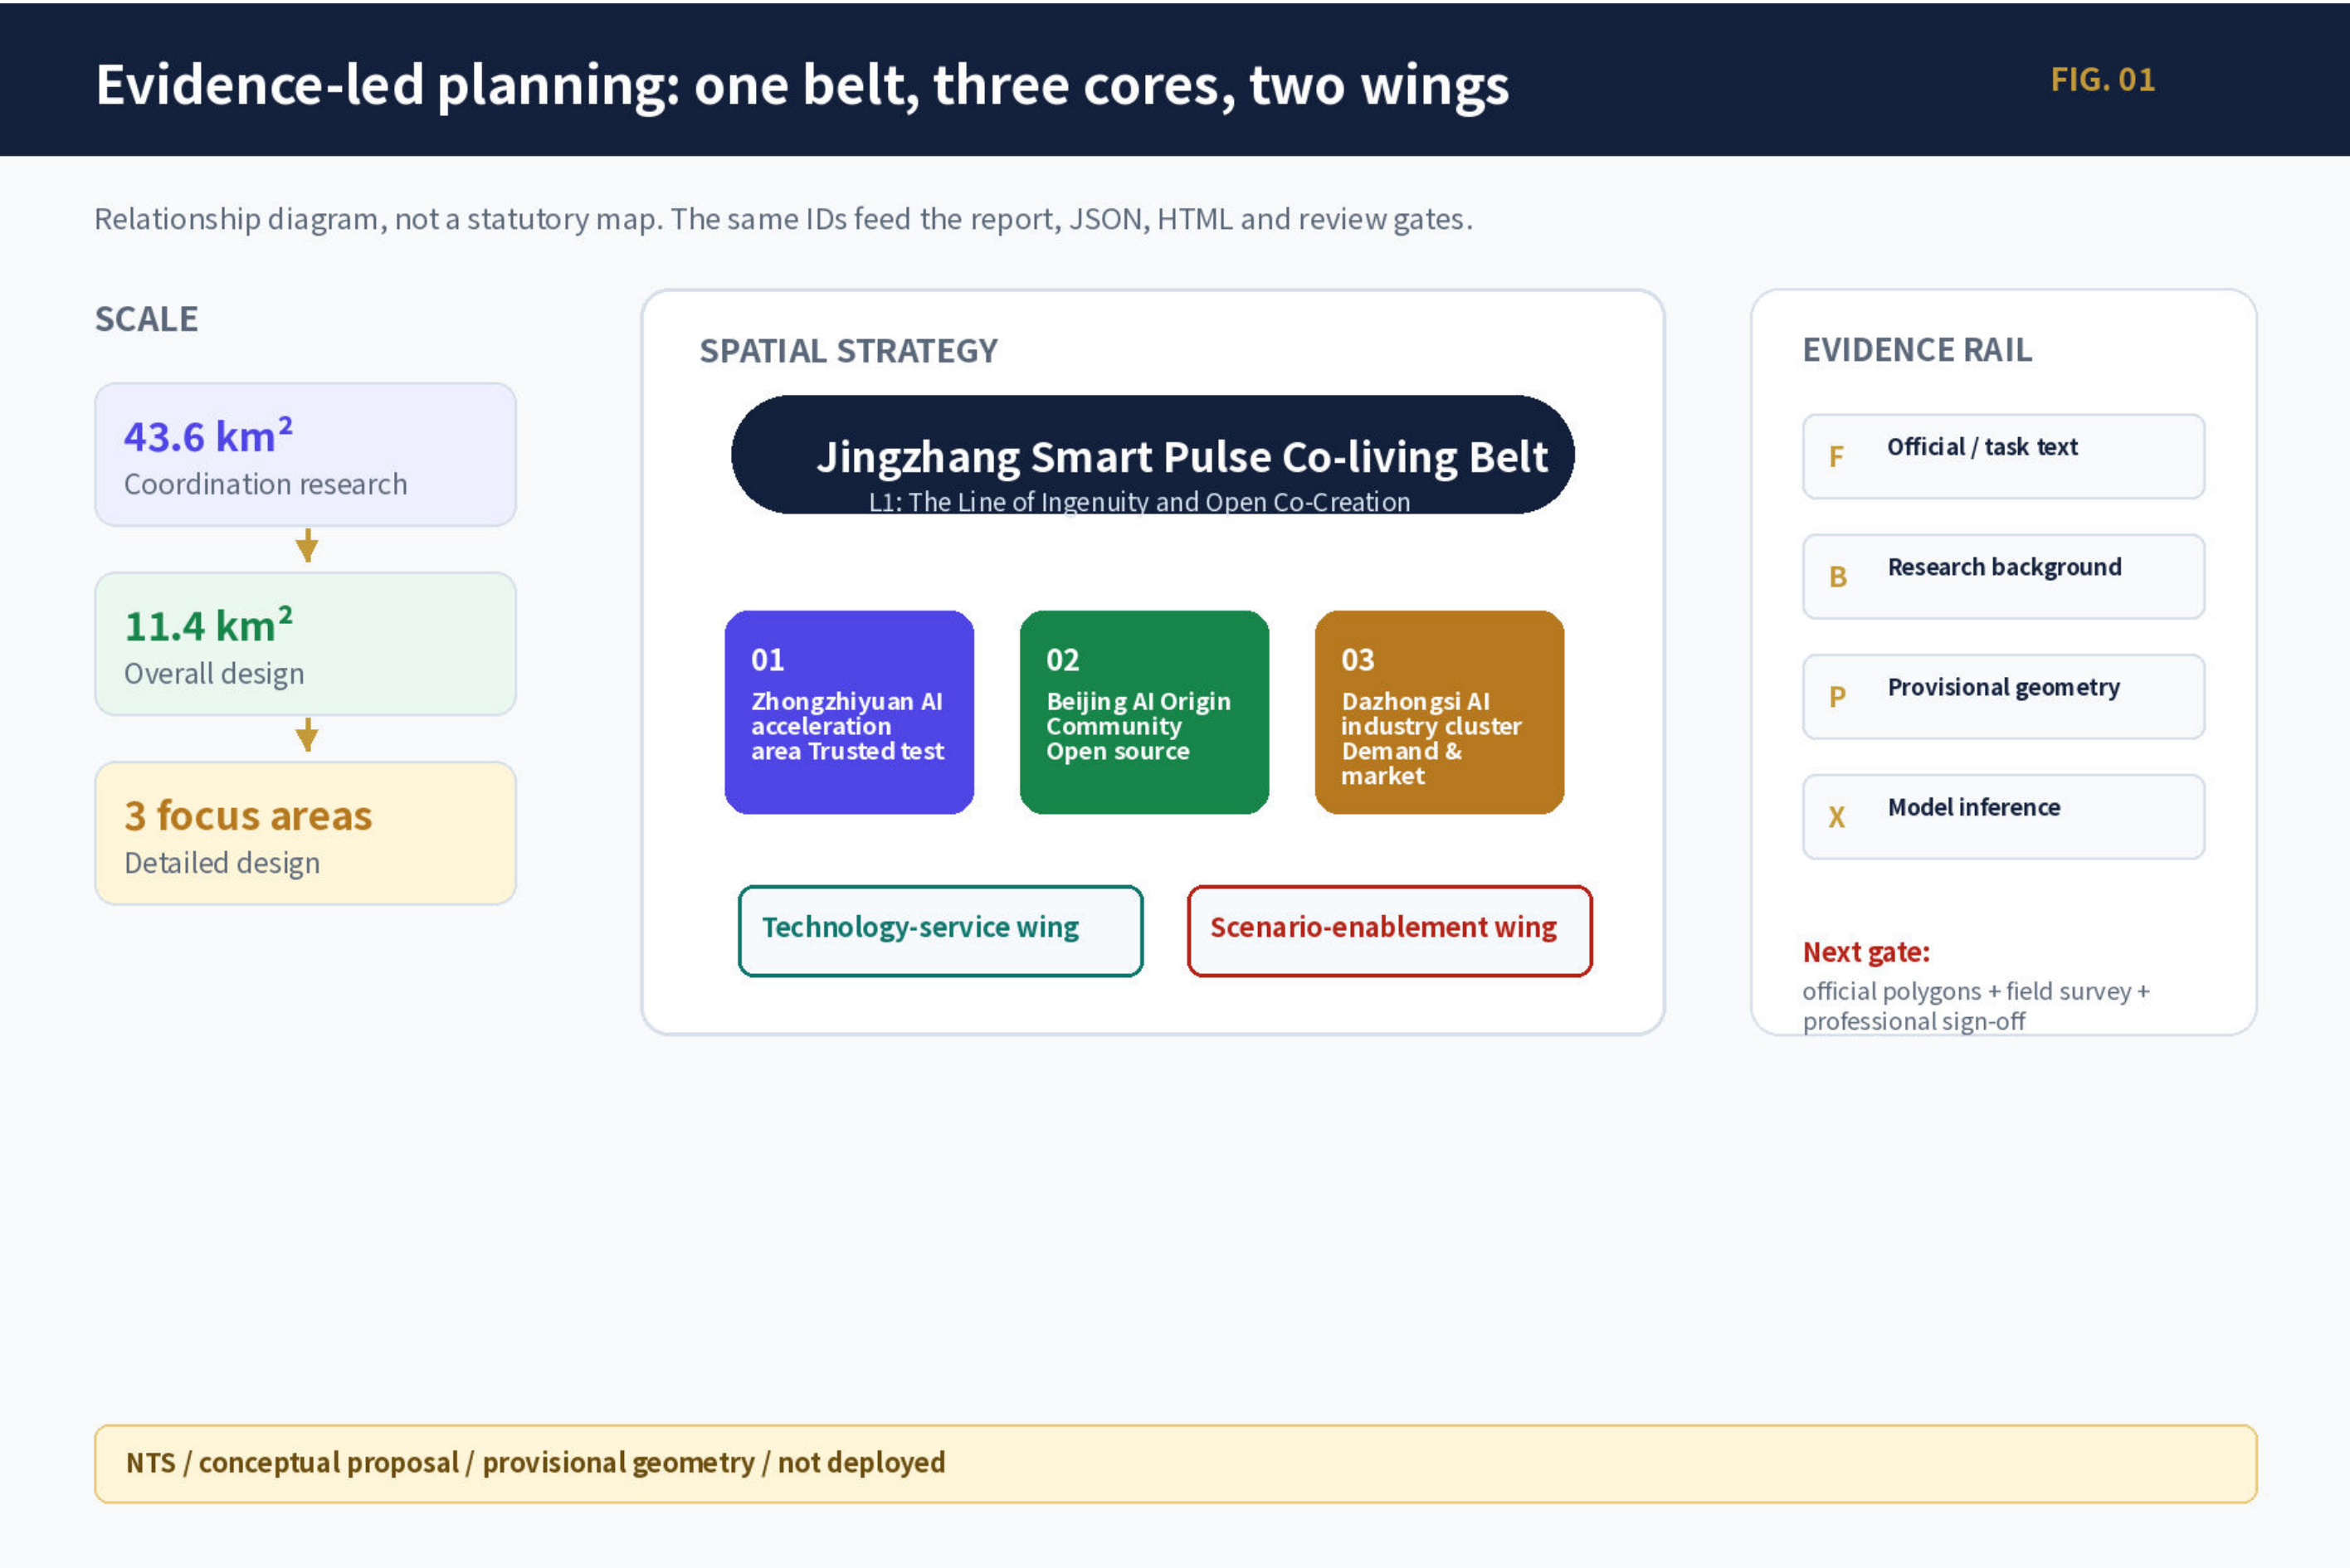

FIG-02 Stable public base, reversible scenario layer and version layer

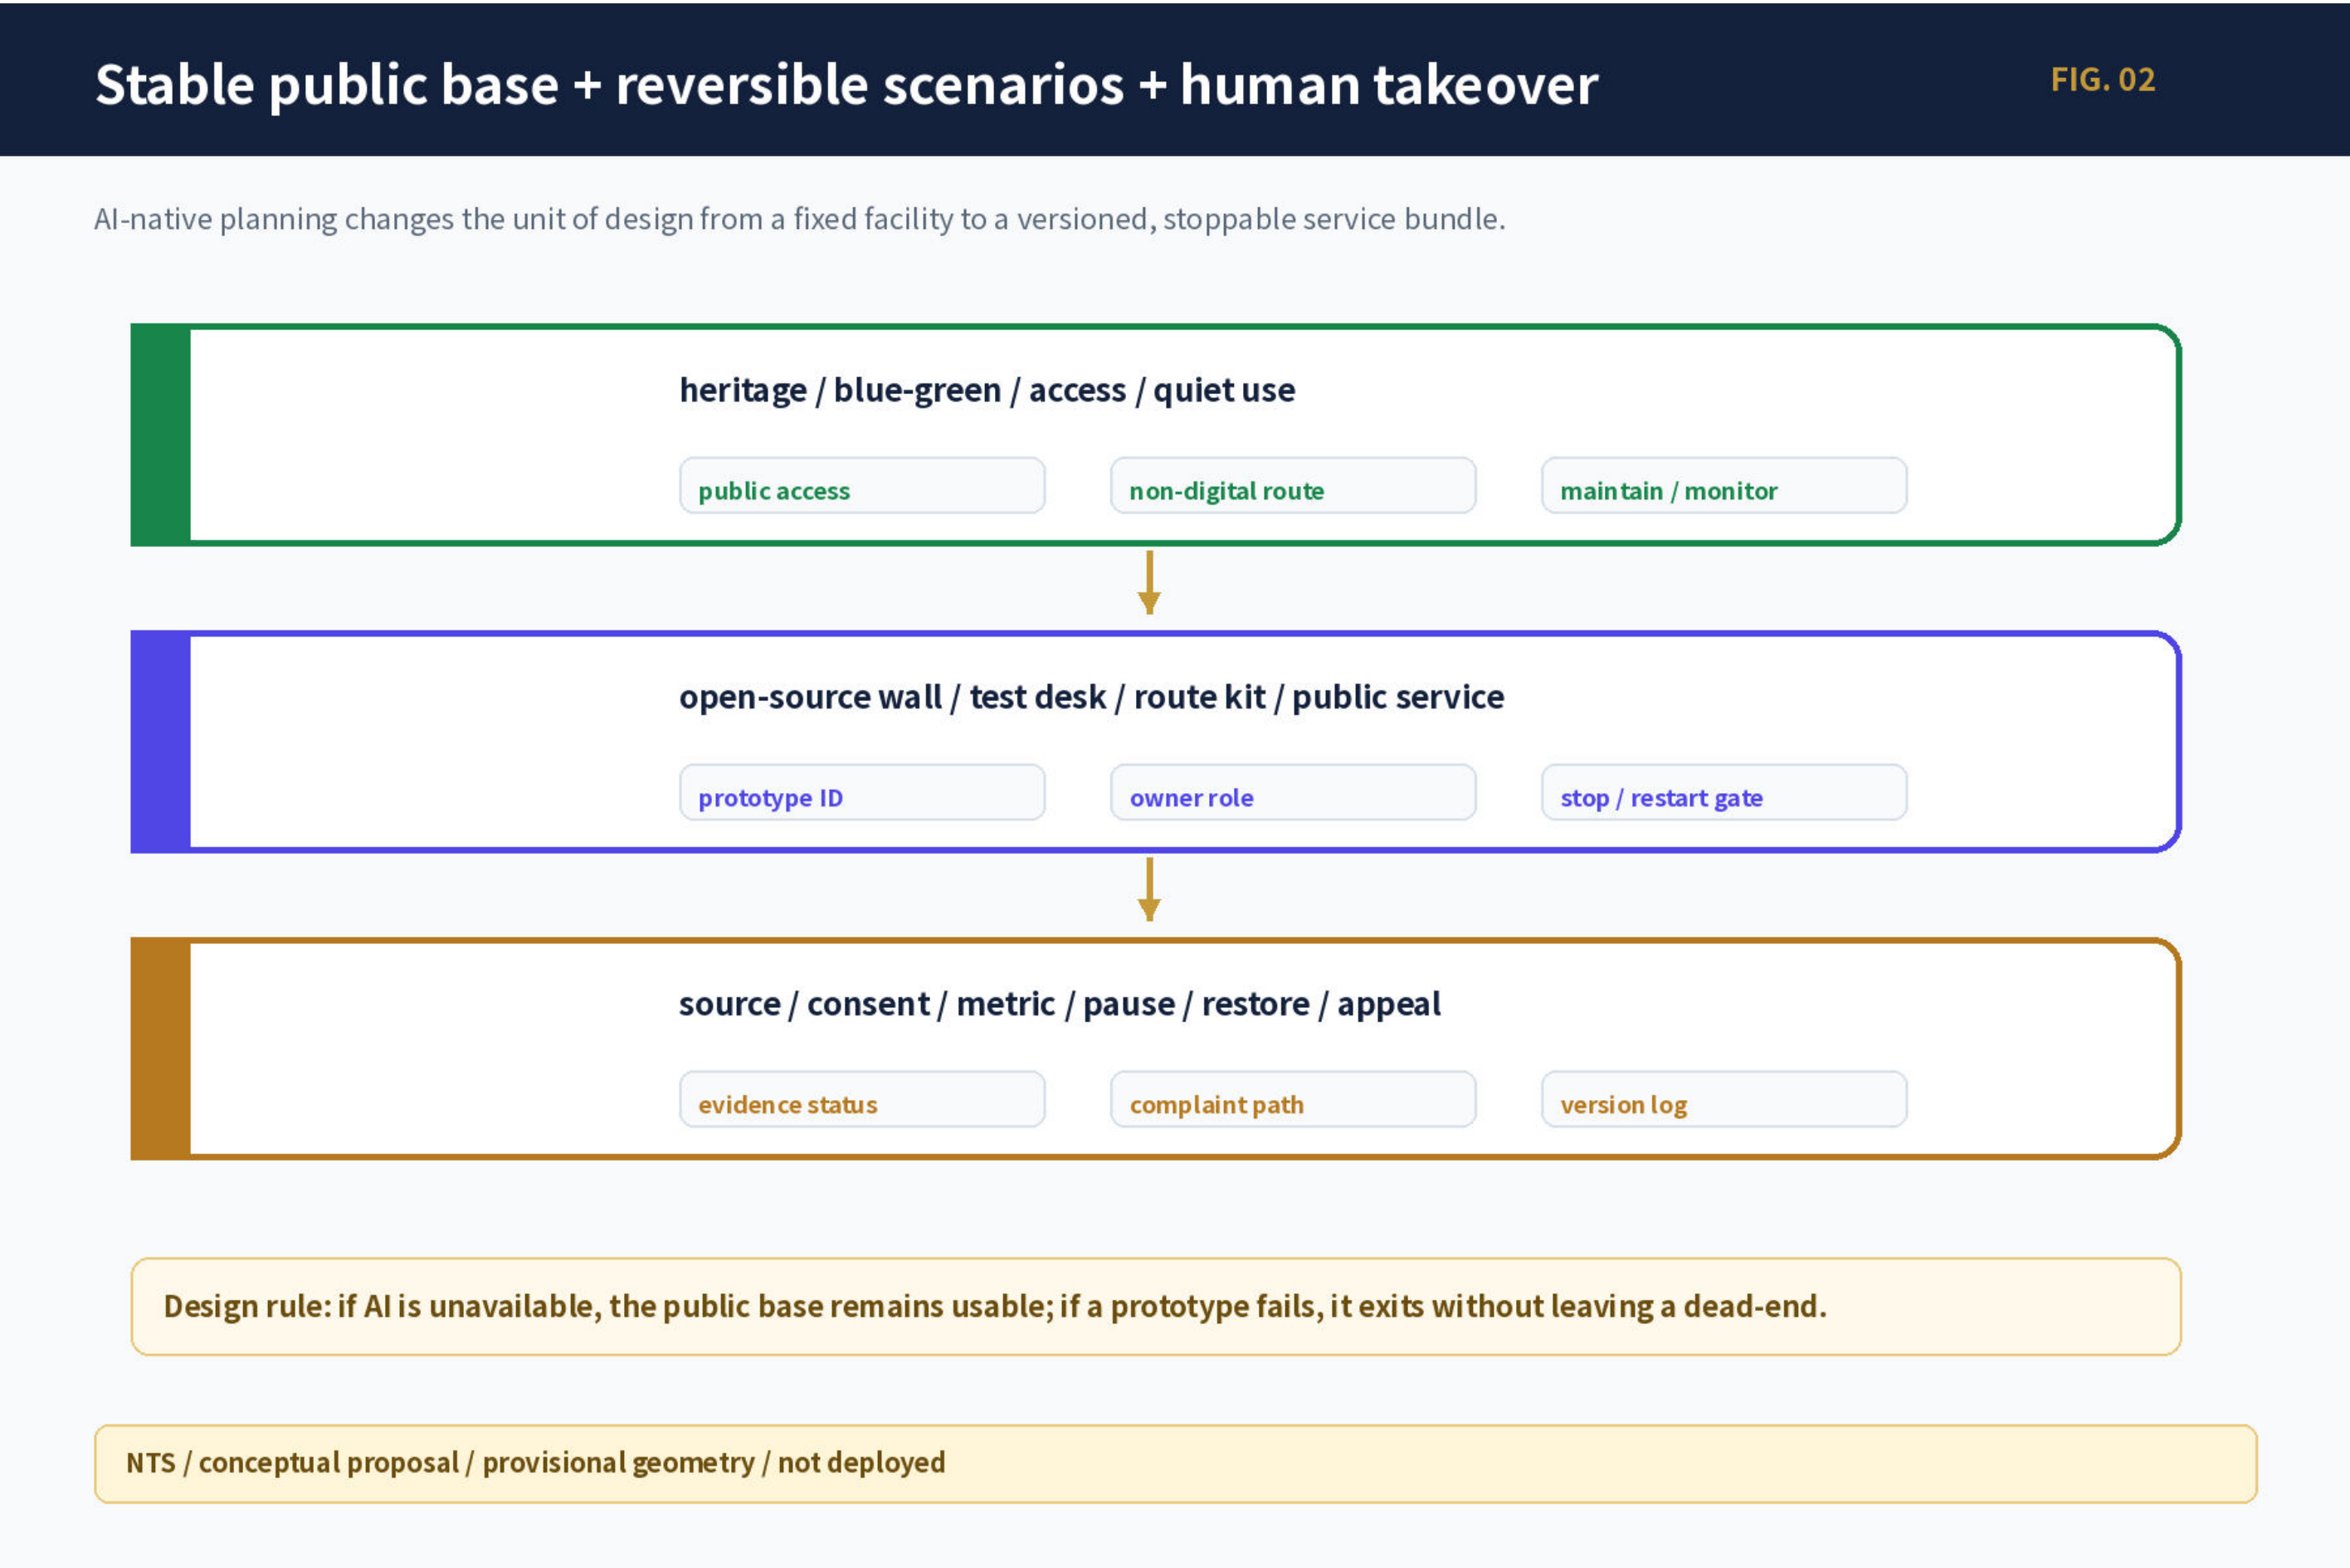

FIG-03 Three focus areas and six first moves

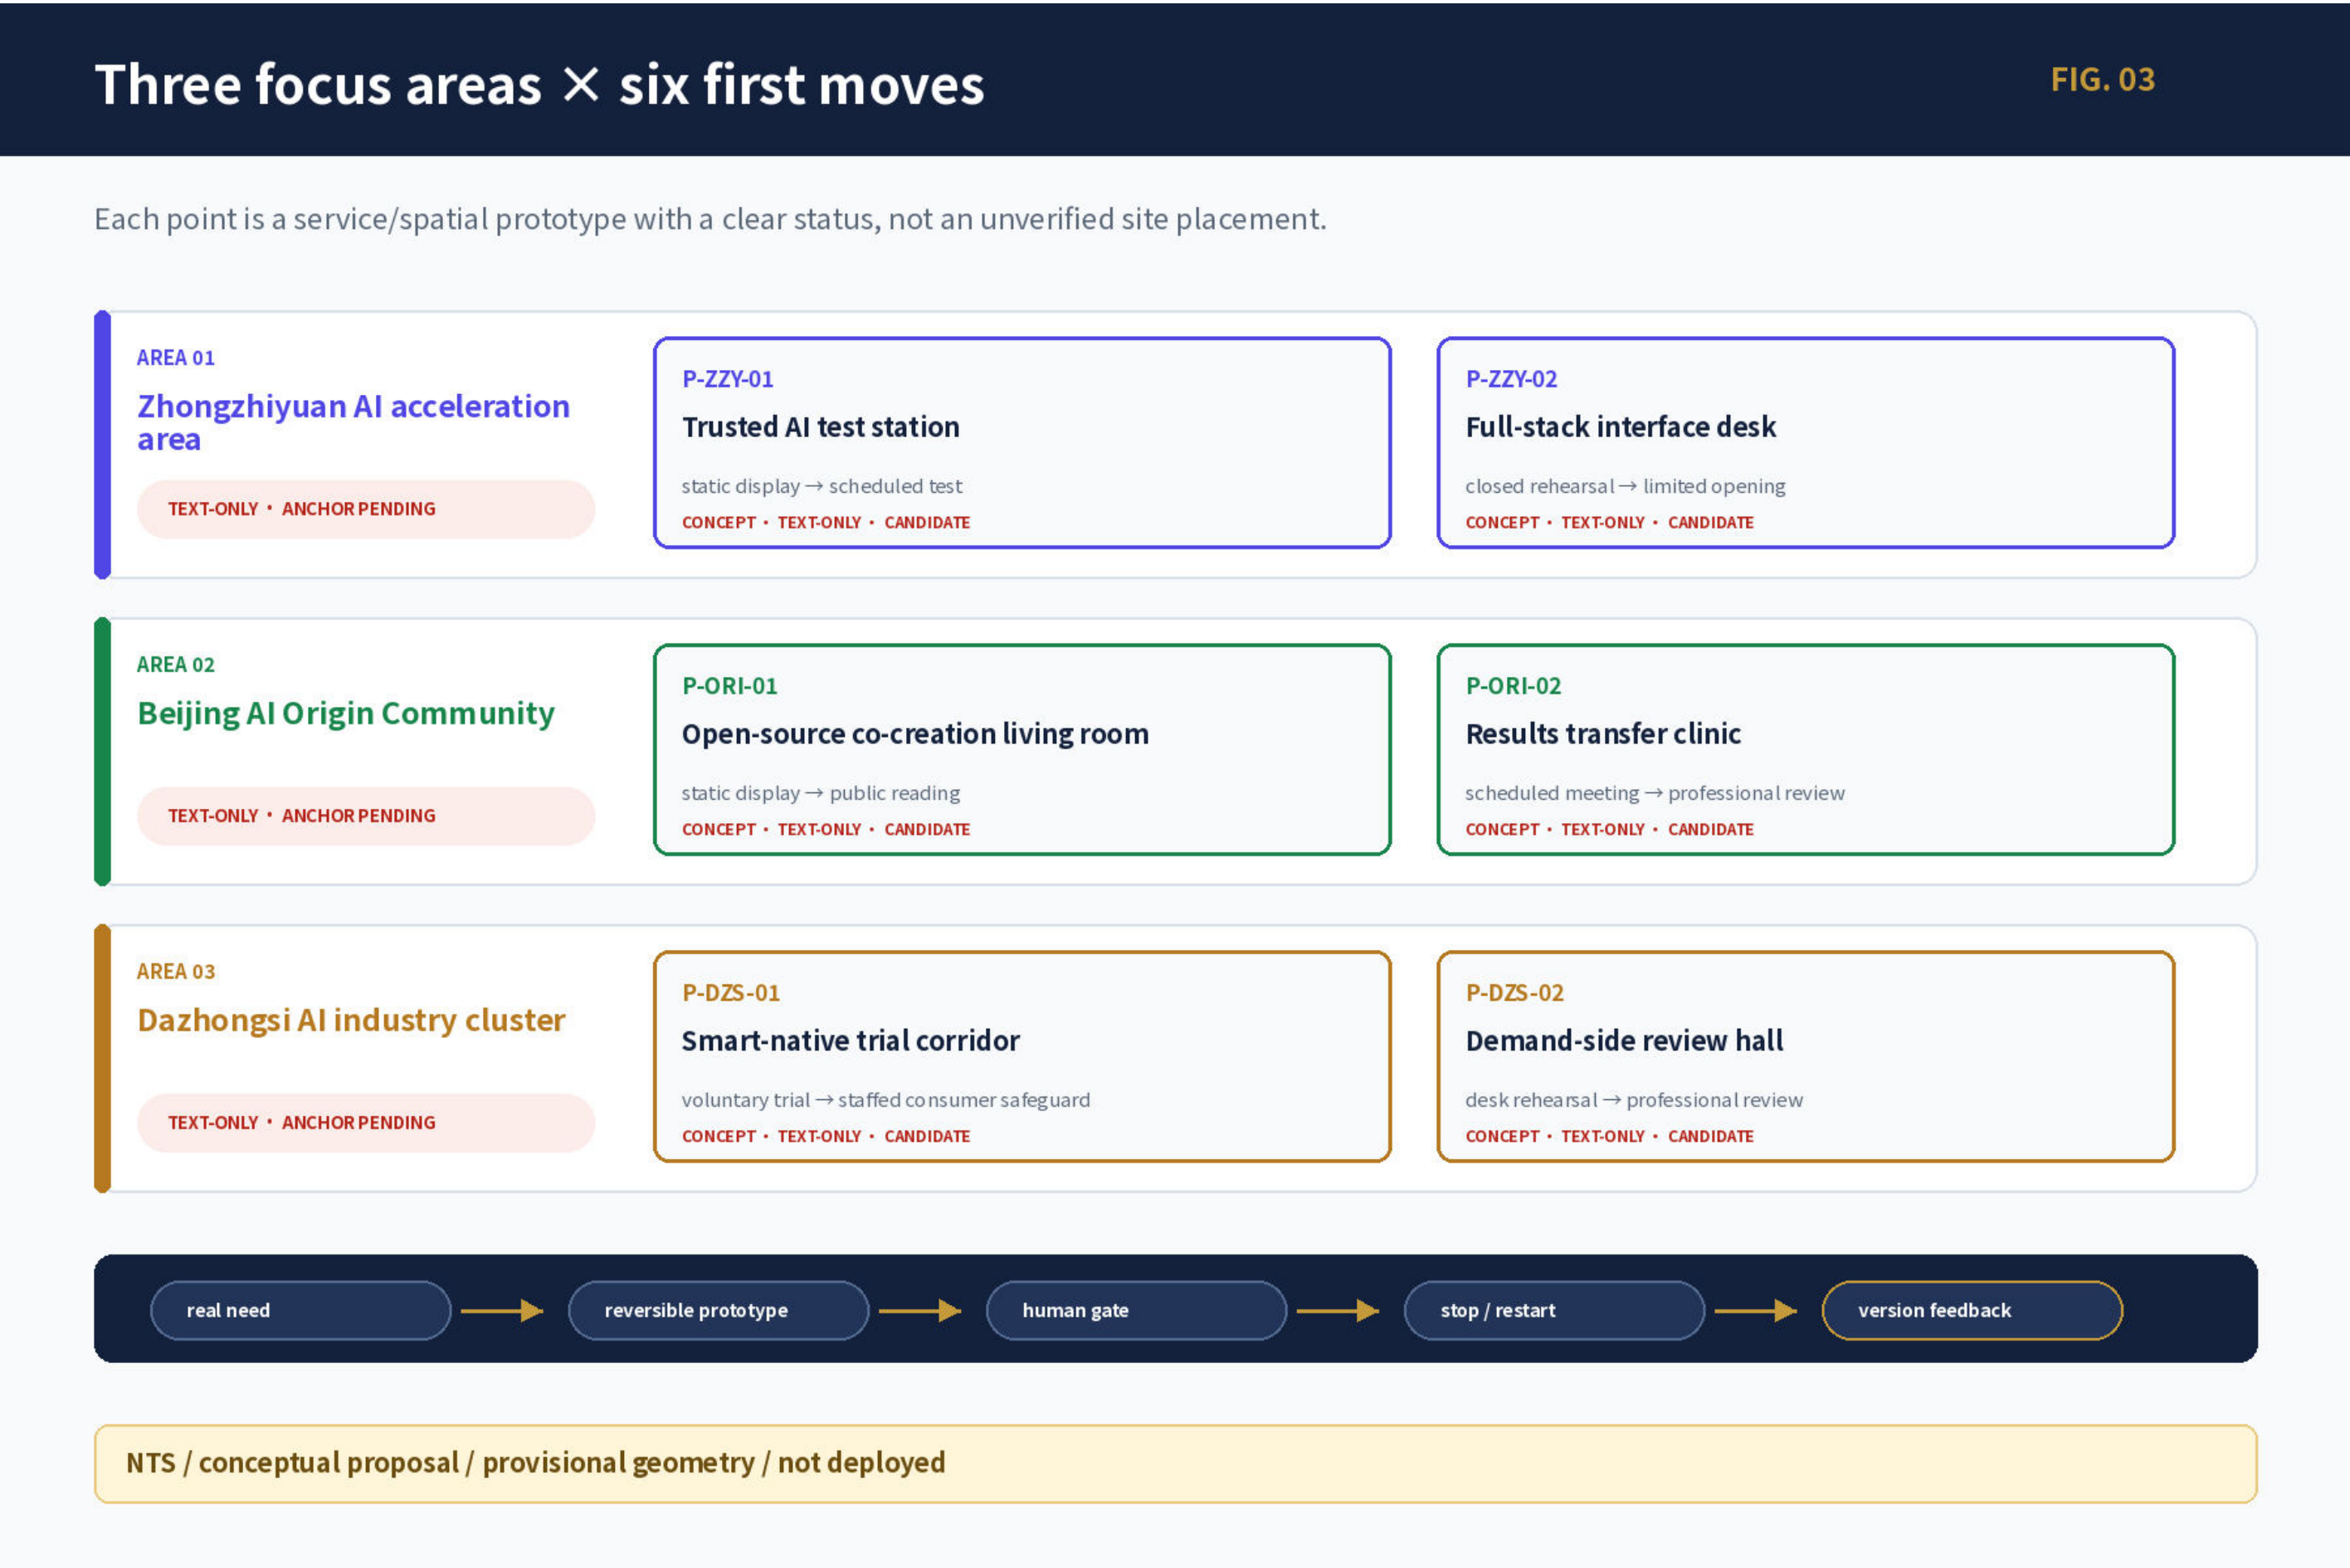

FIG-04 Mobility, blue-green and public-service continuity

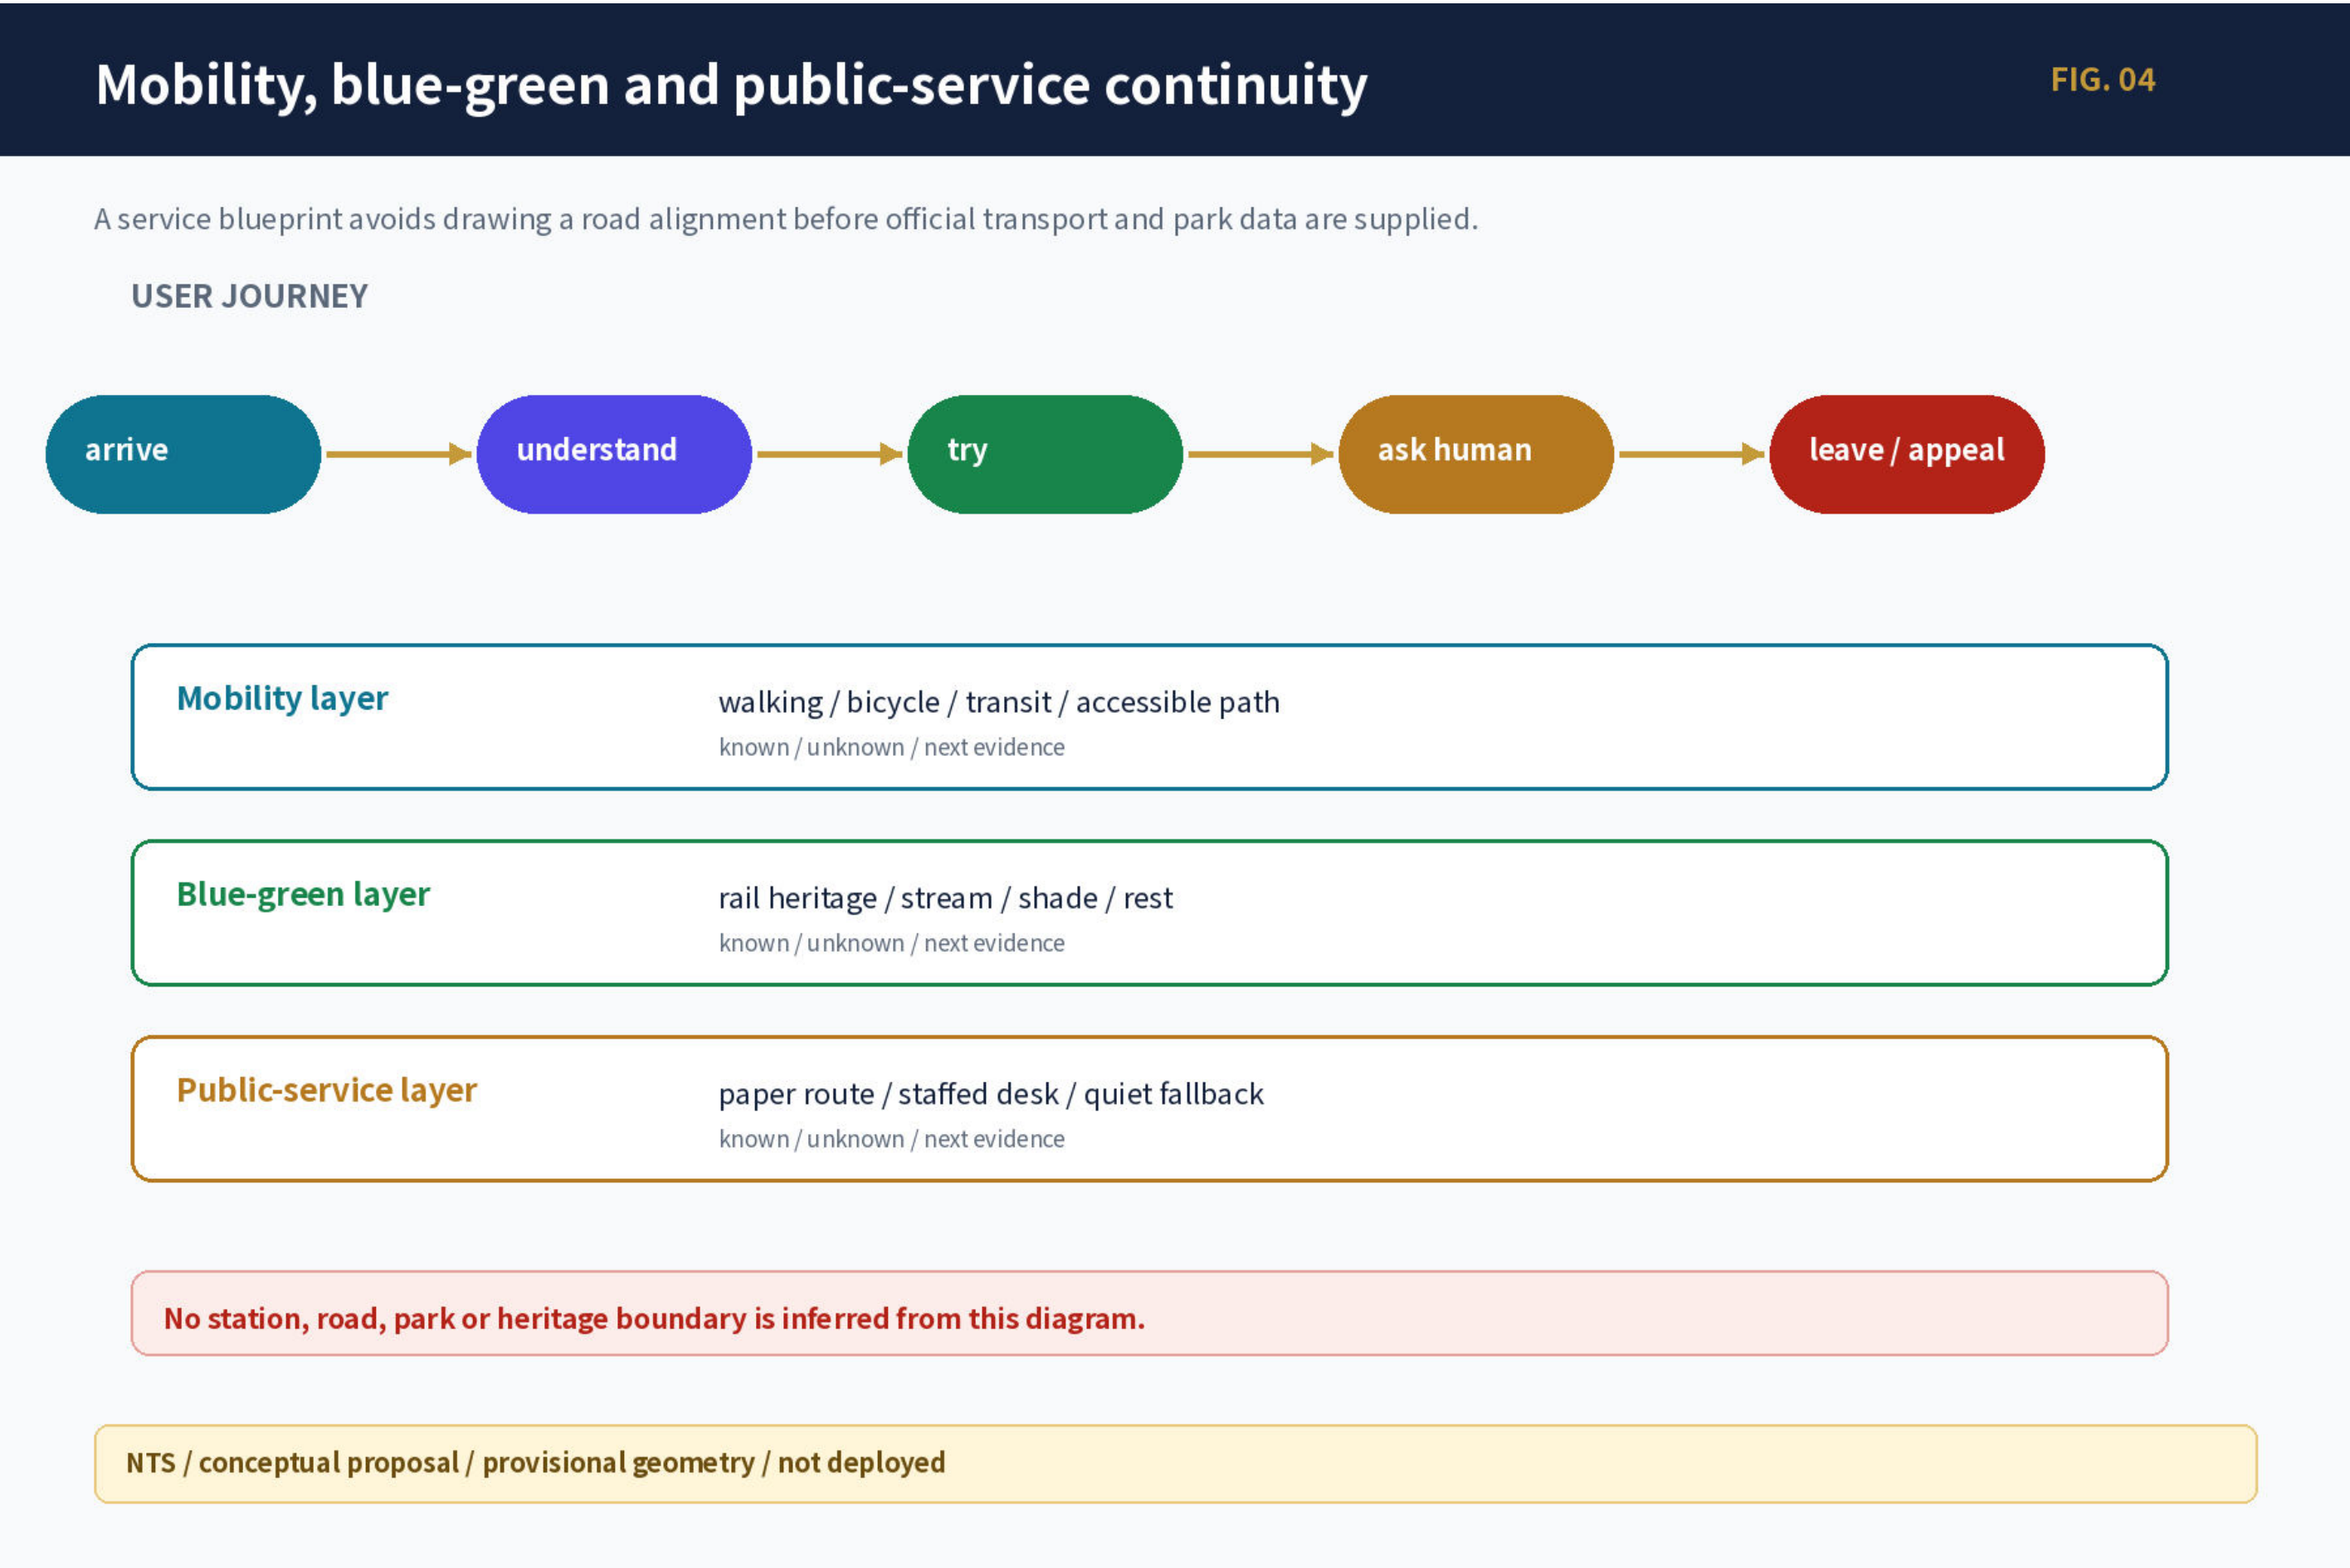

FIG-05 Metric-evidence-feedback loop

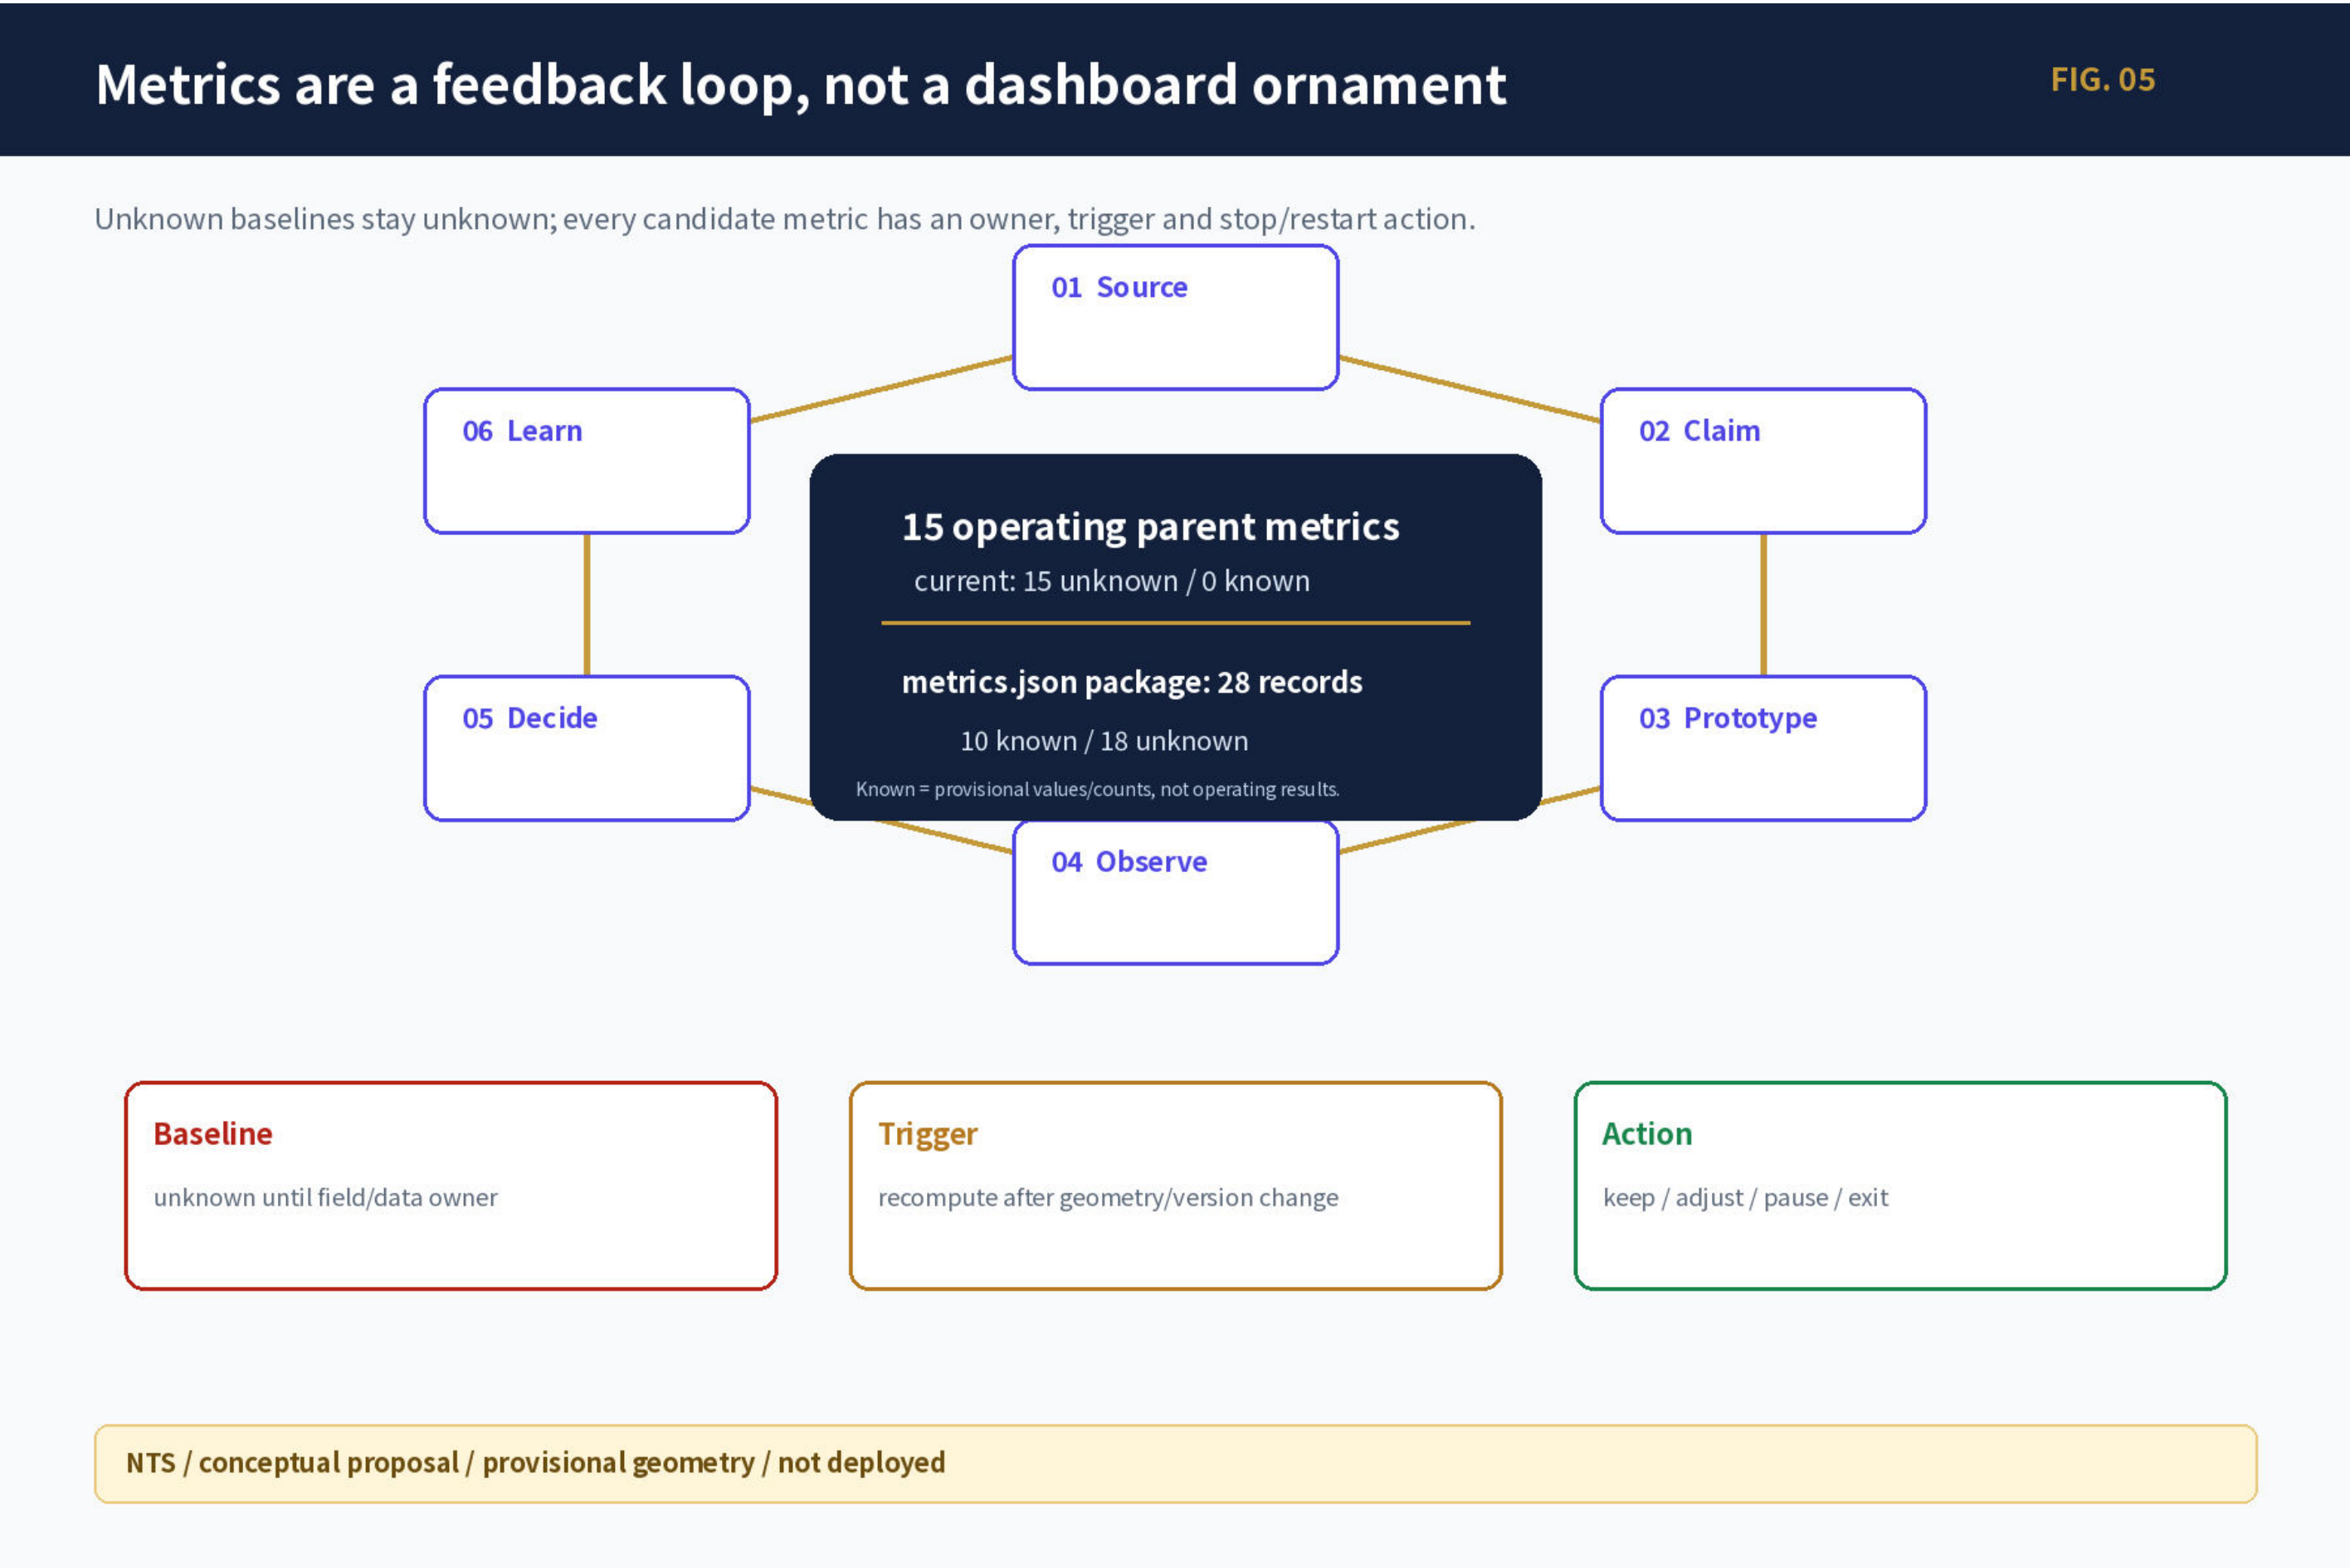

FIG-06 Seven planning-production roles and evidence gates

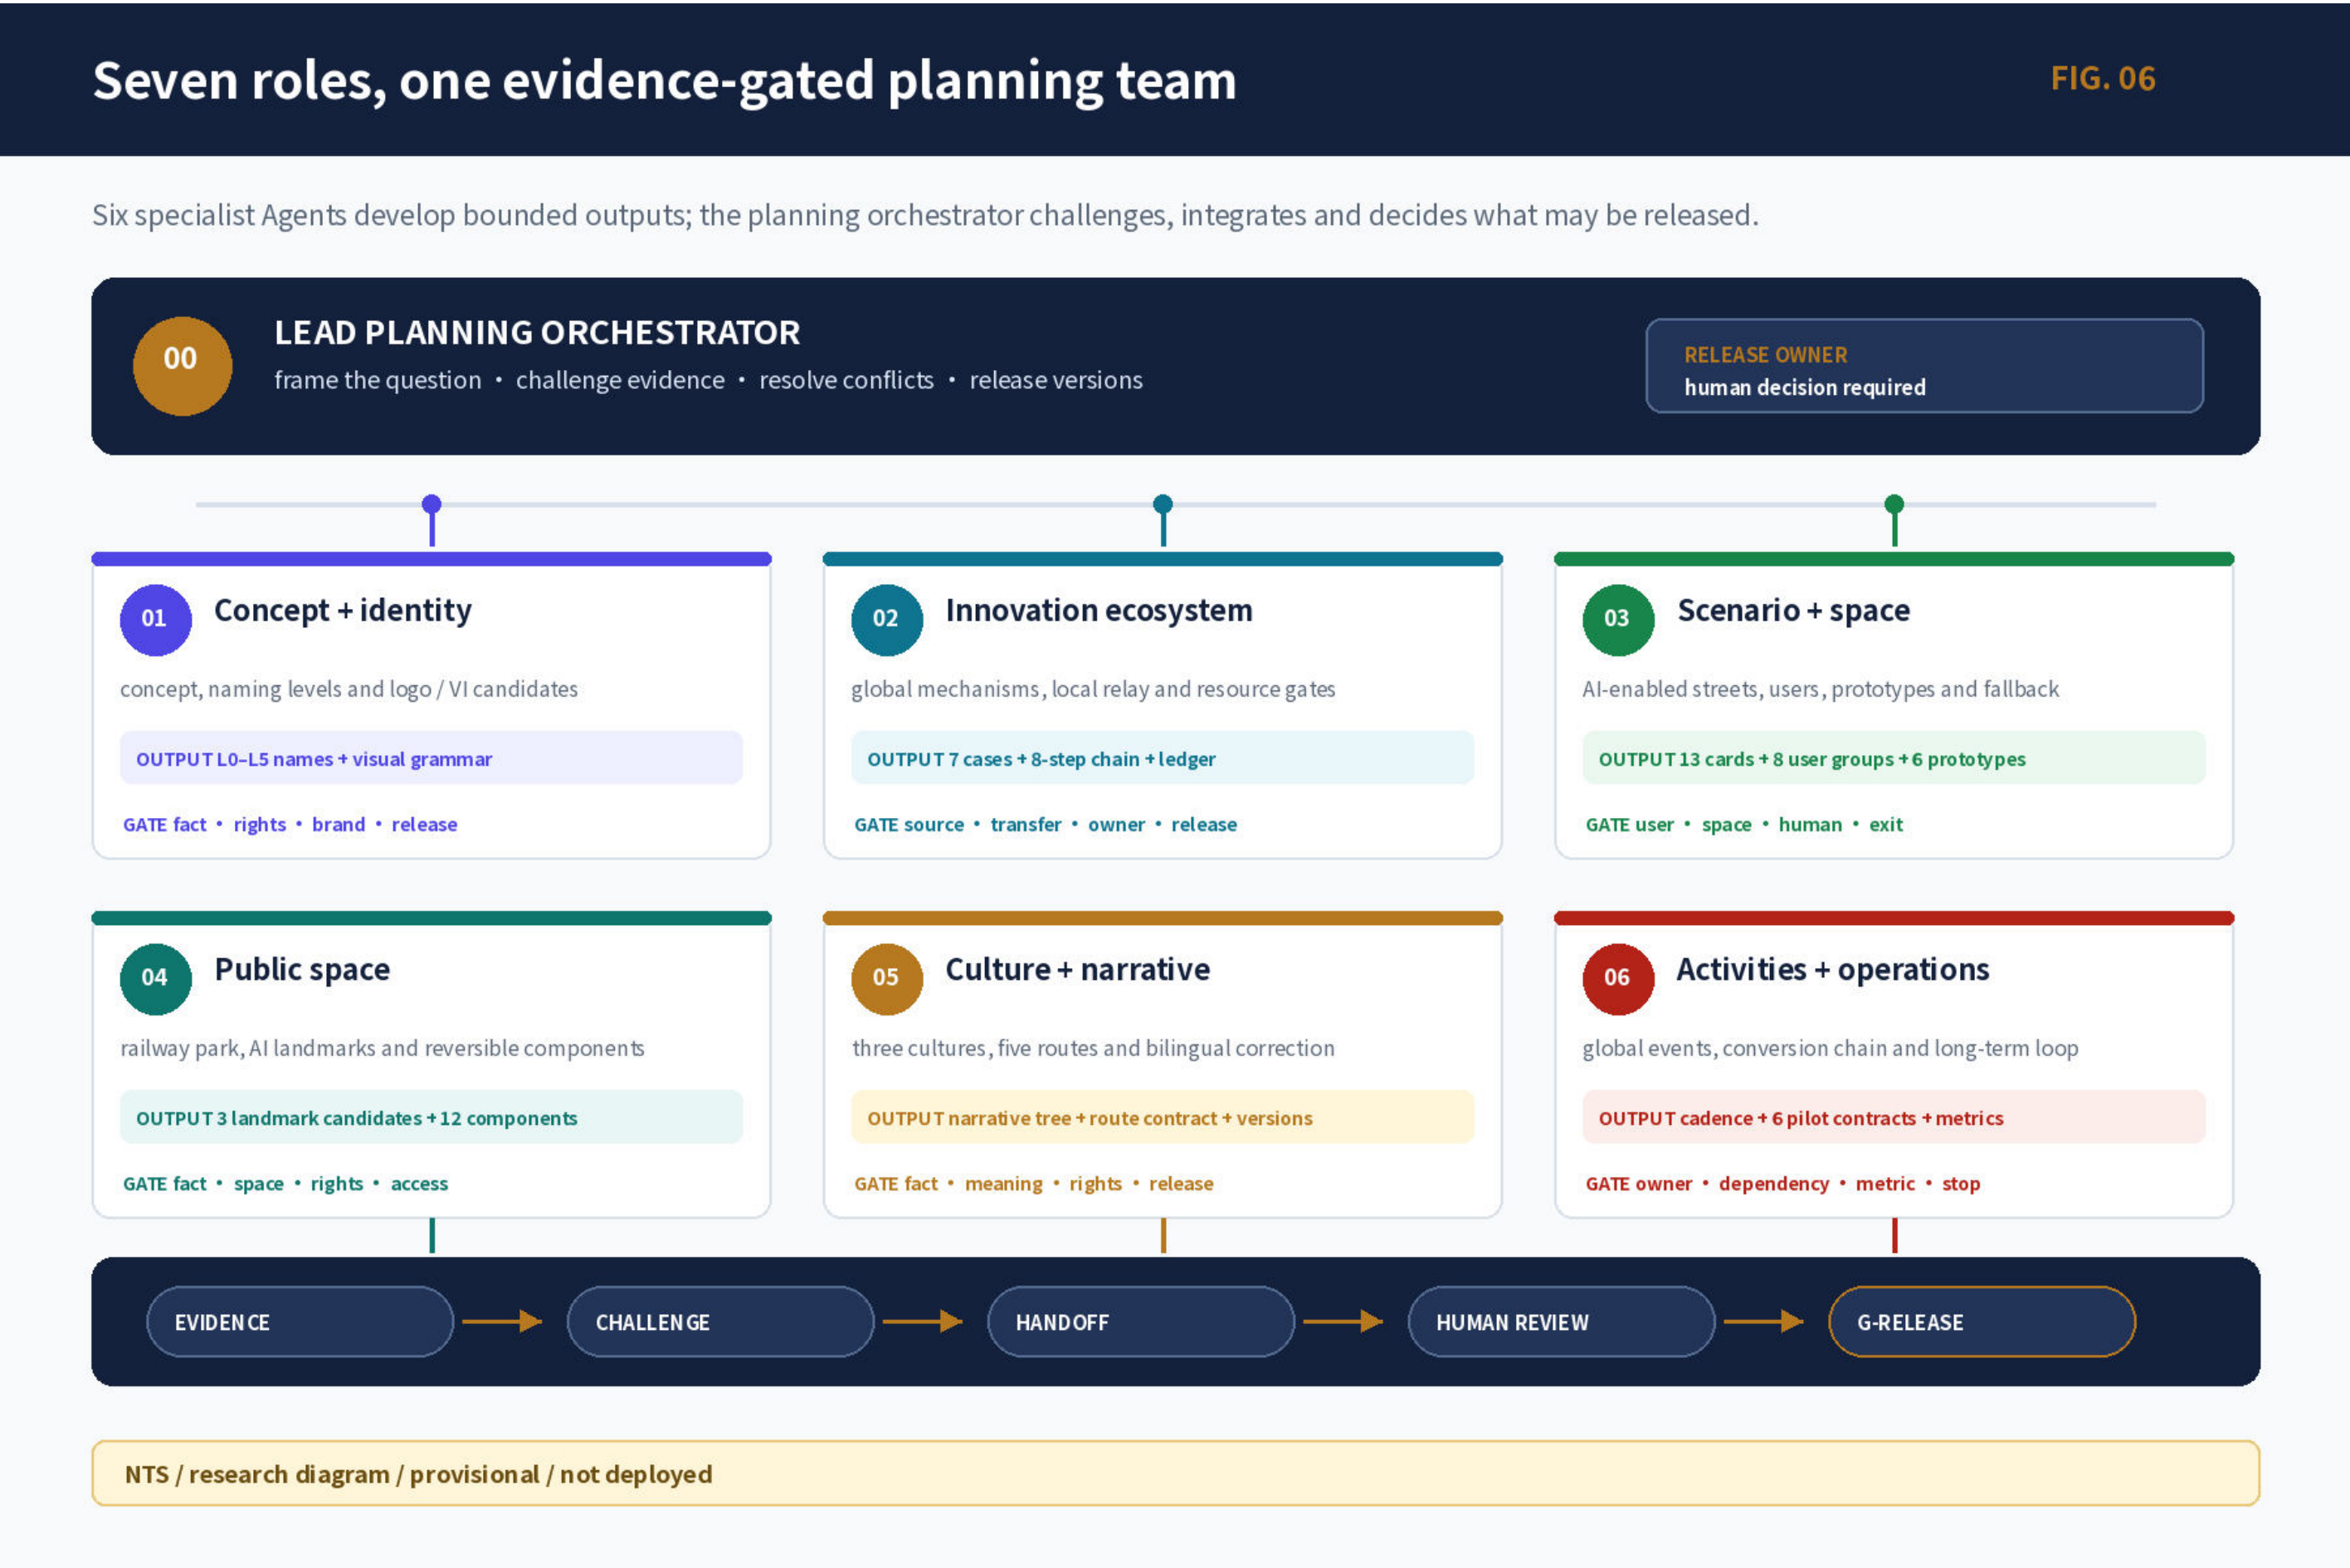

FIG-07 Global mechanisms and the Haidian innovation relay

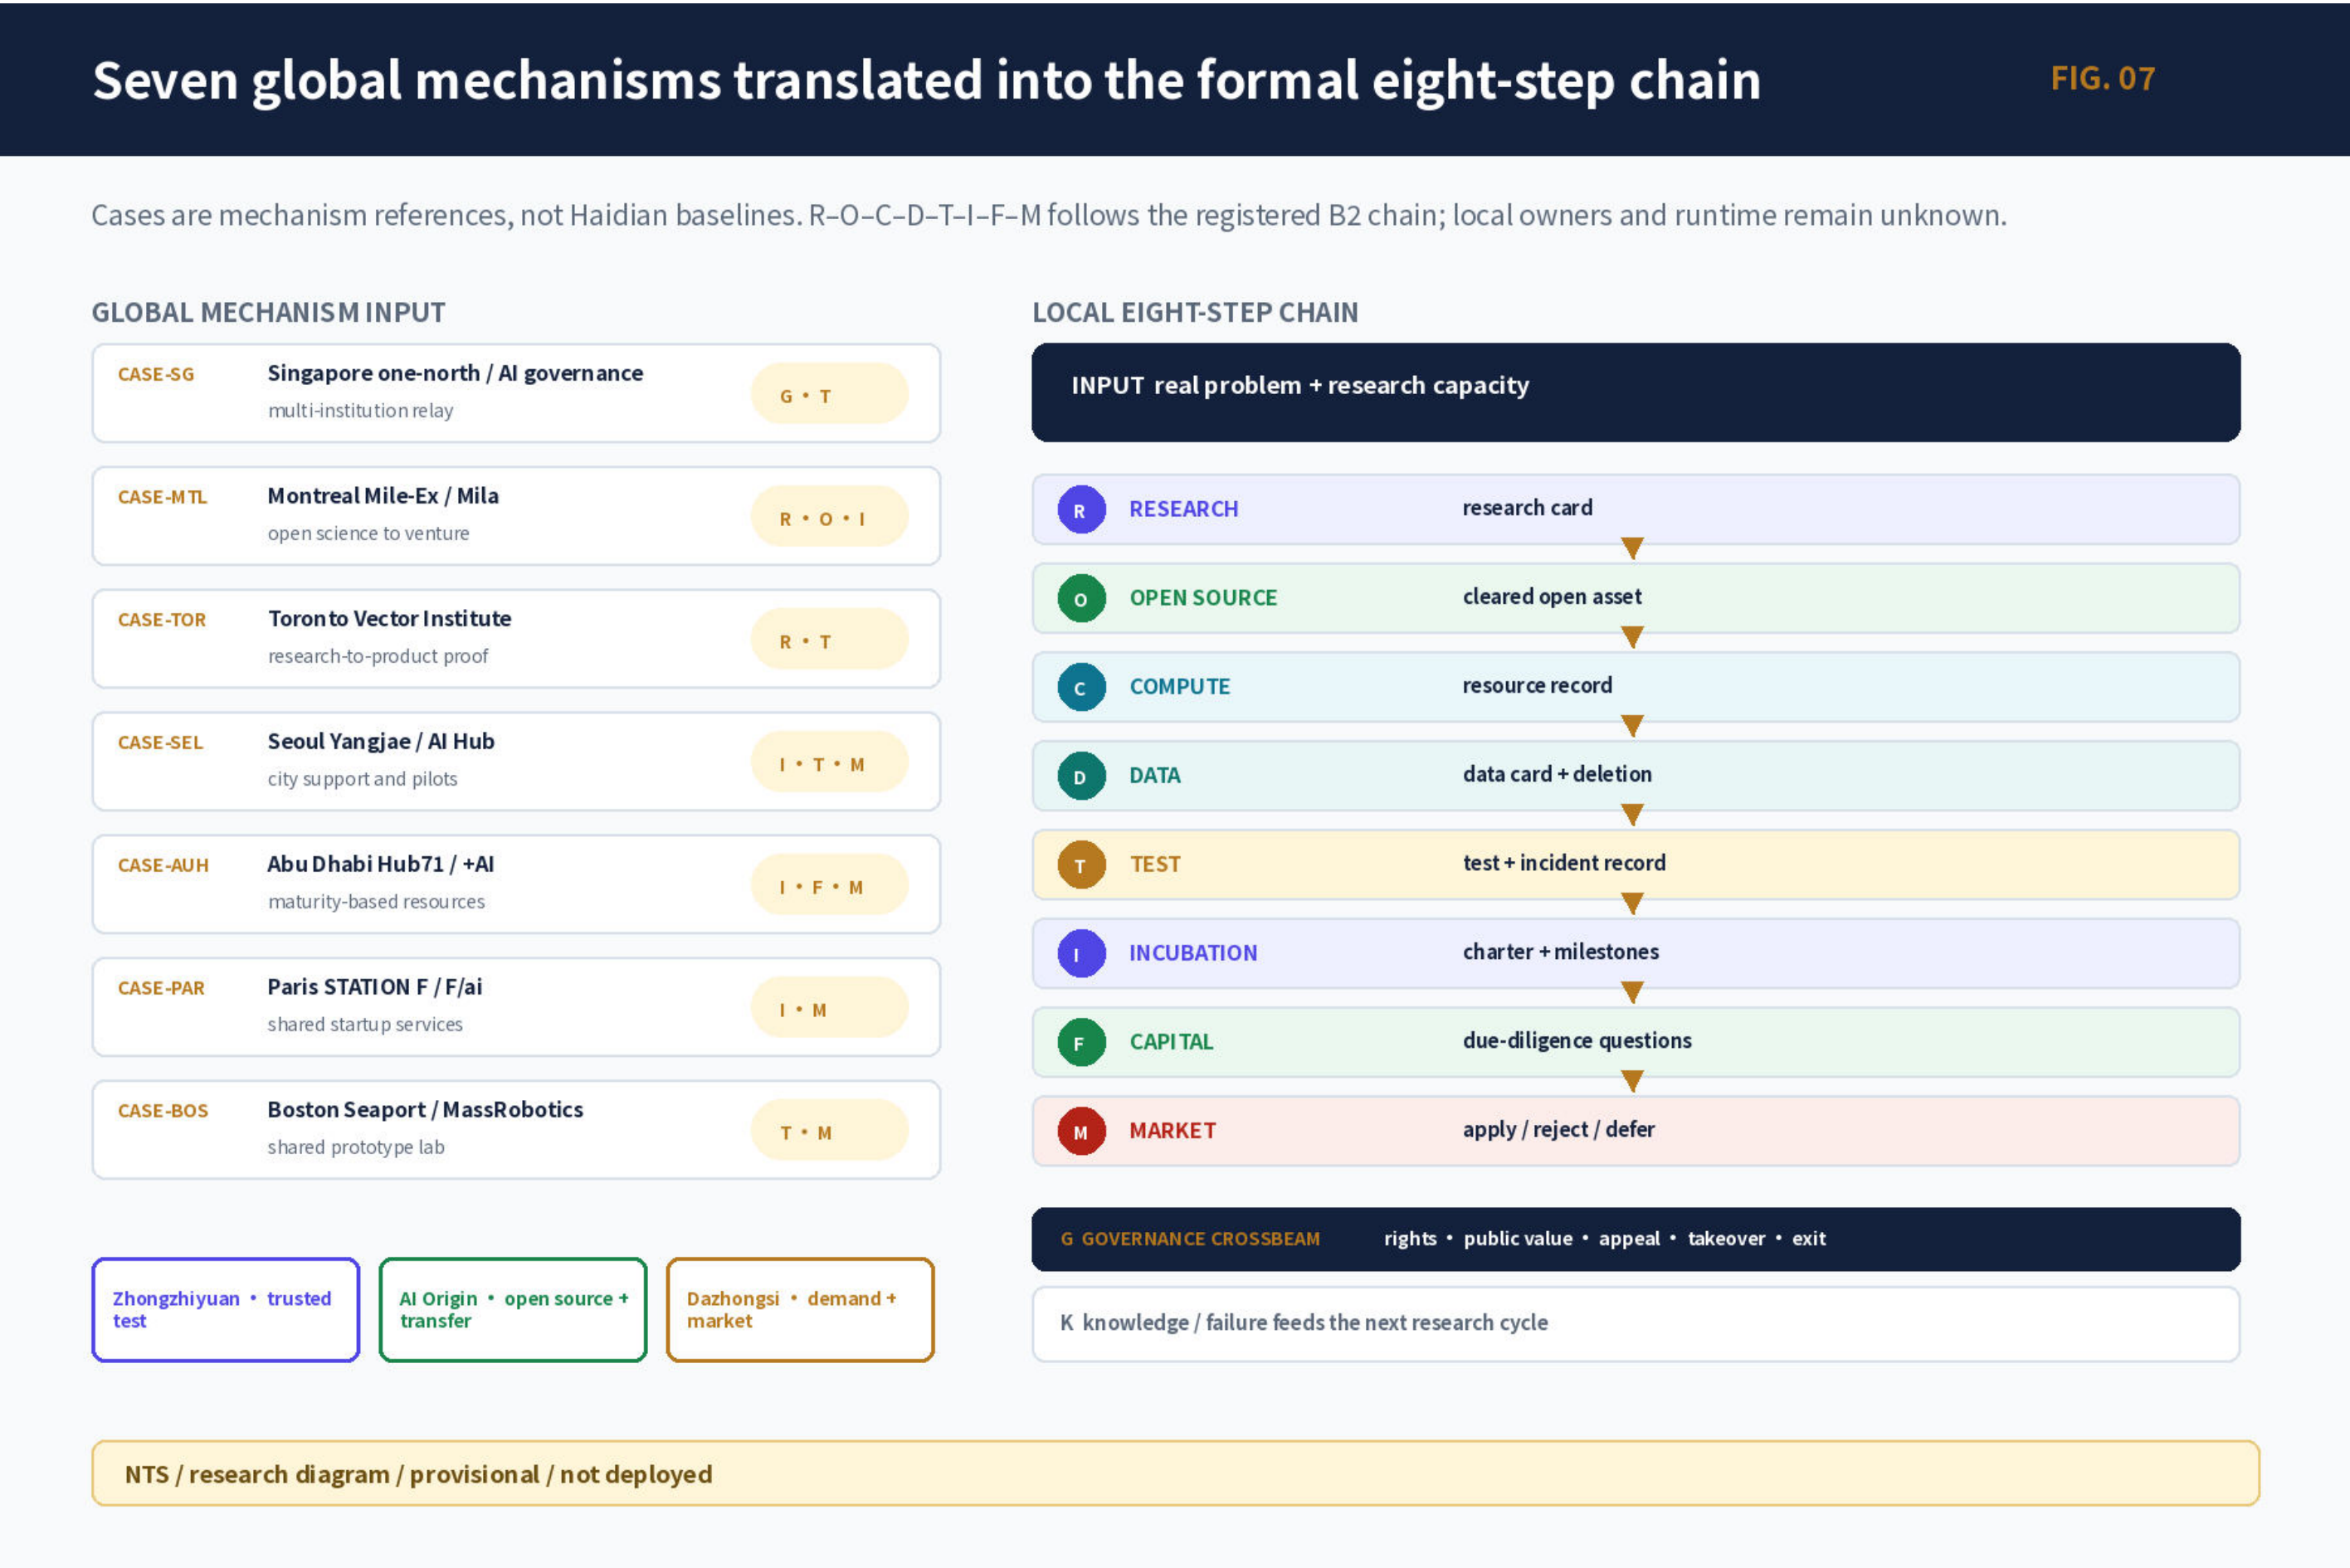

FIG-08 Thirteen AI-native scenario cards

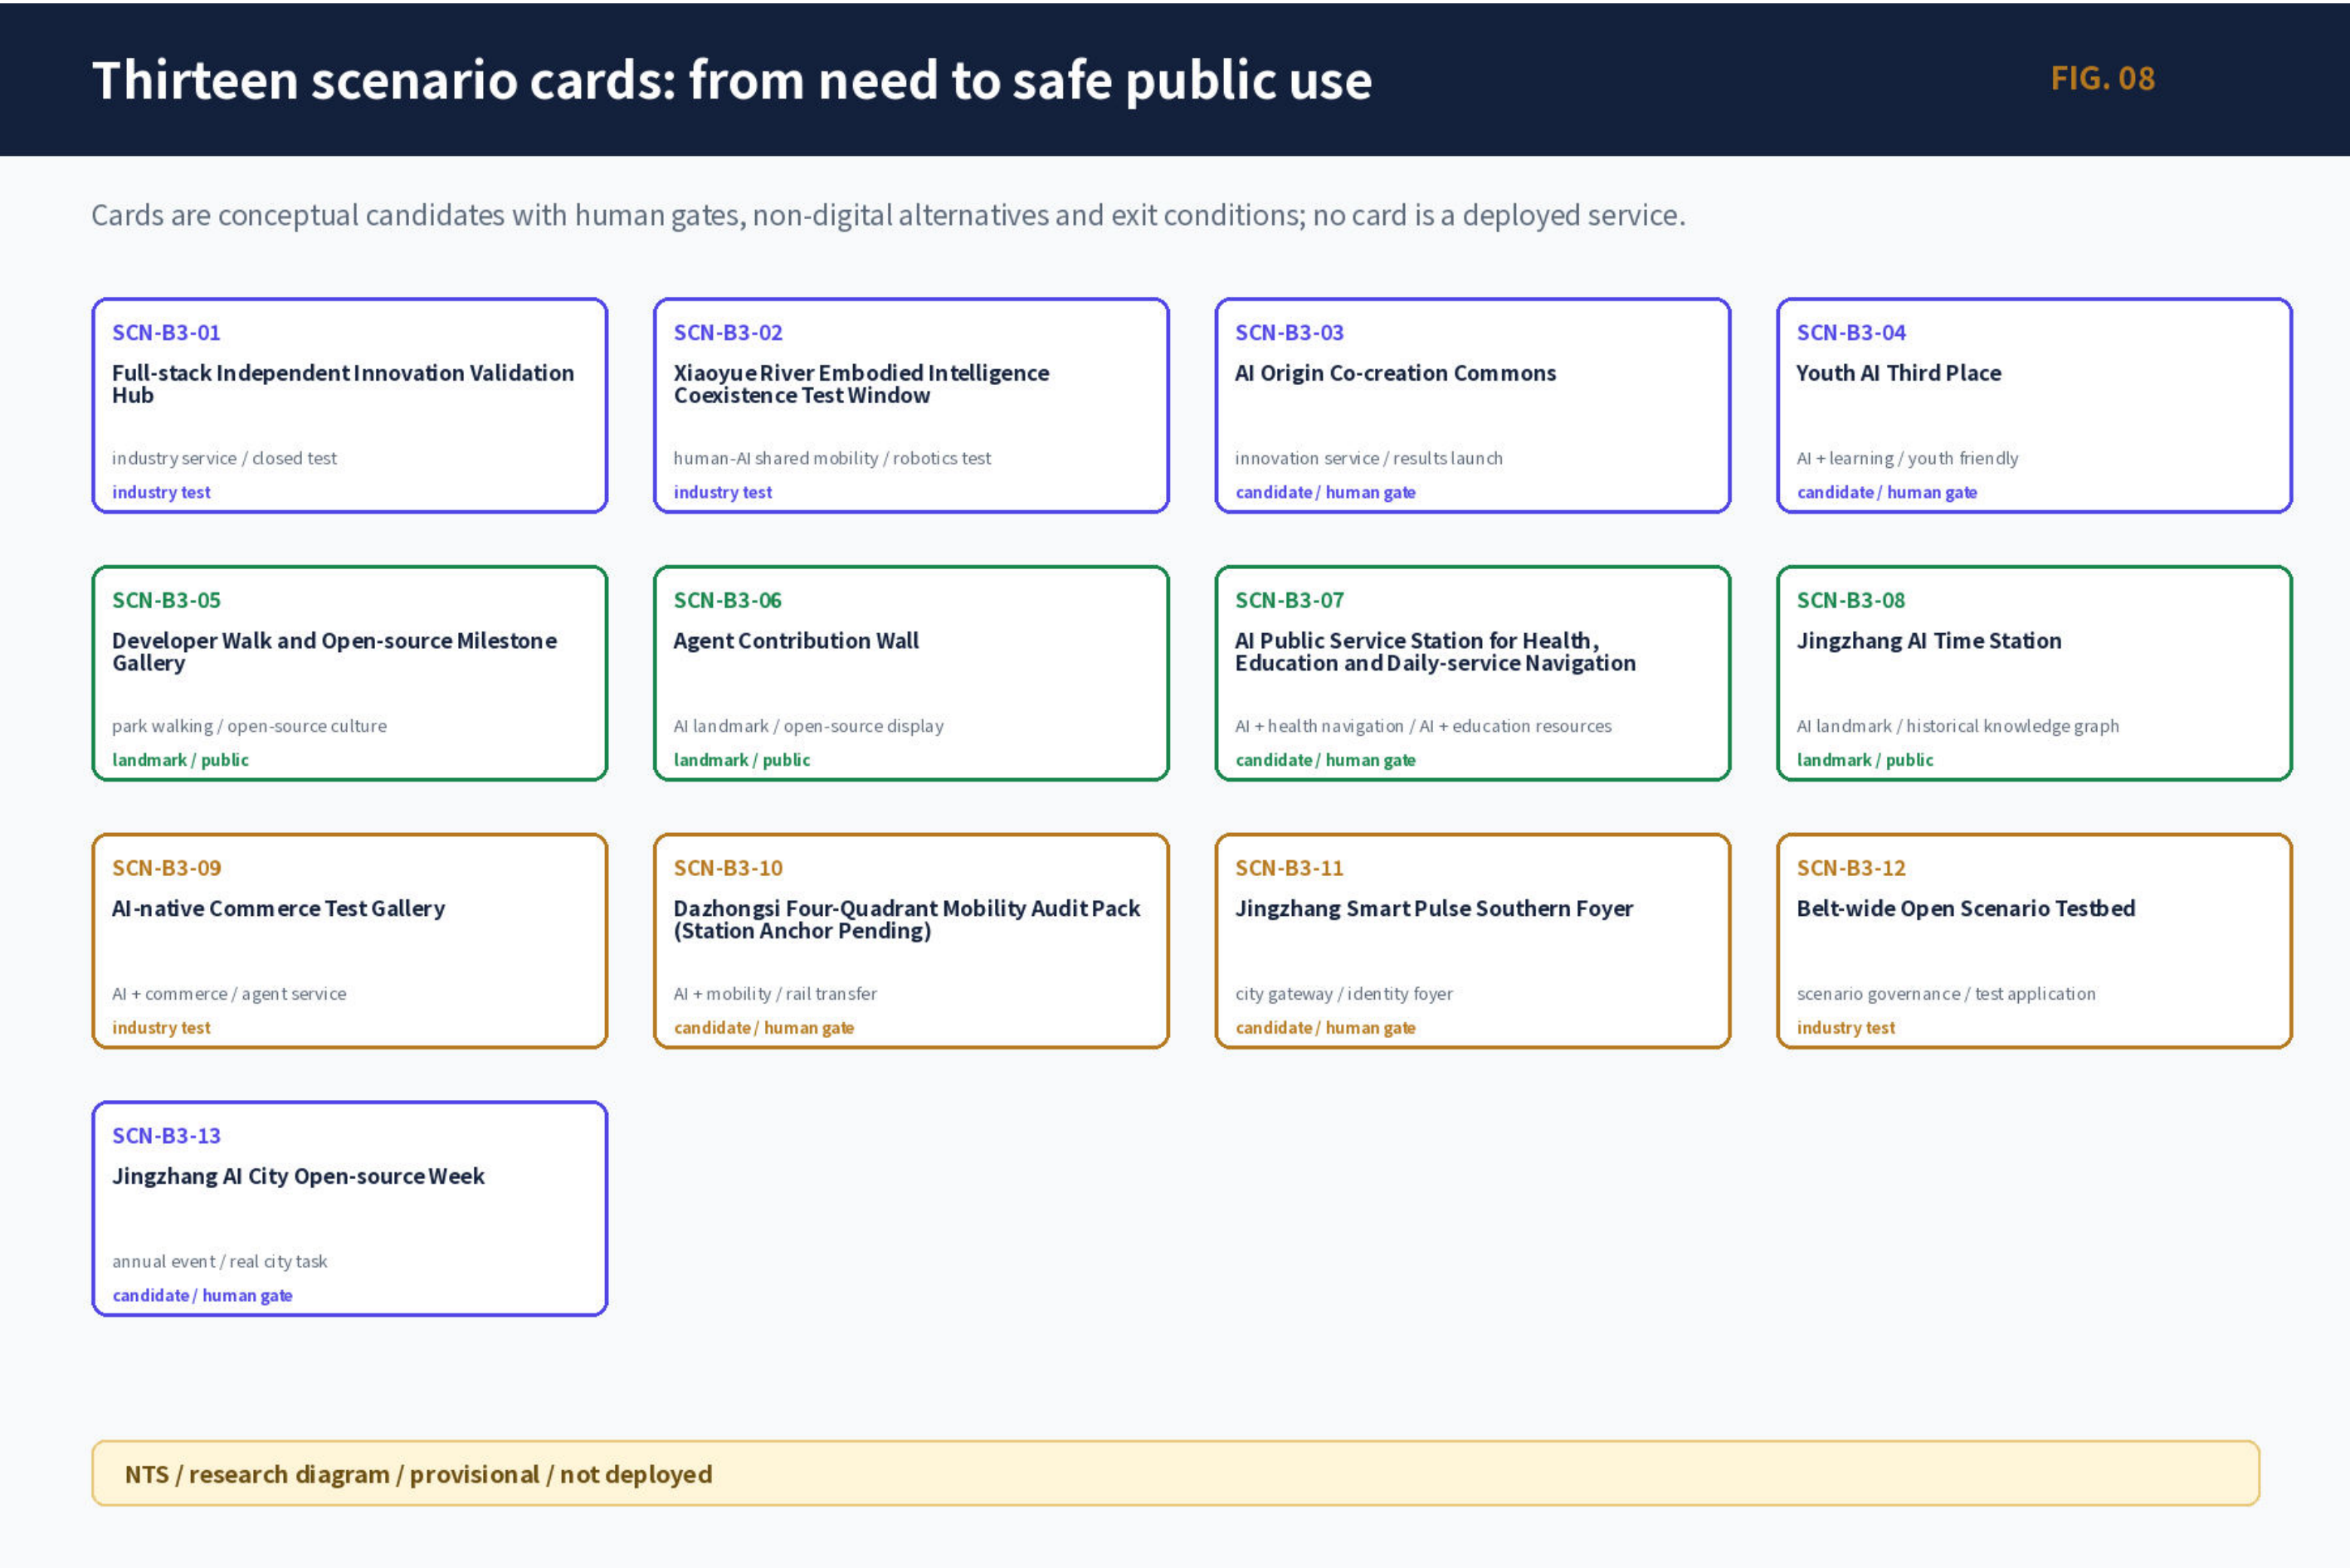

FIG-09 Daily-weekly-quarterly-annual operations

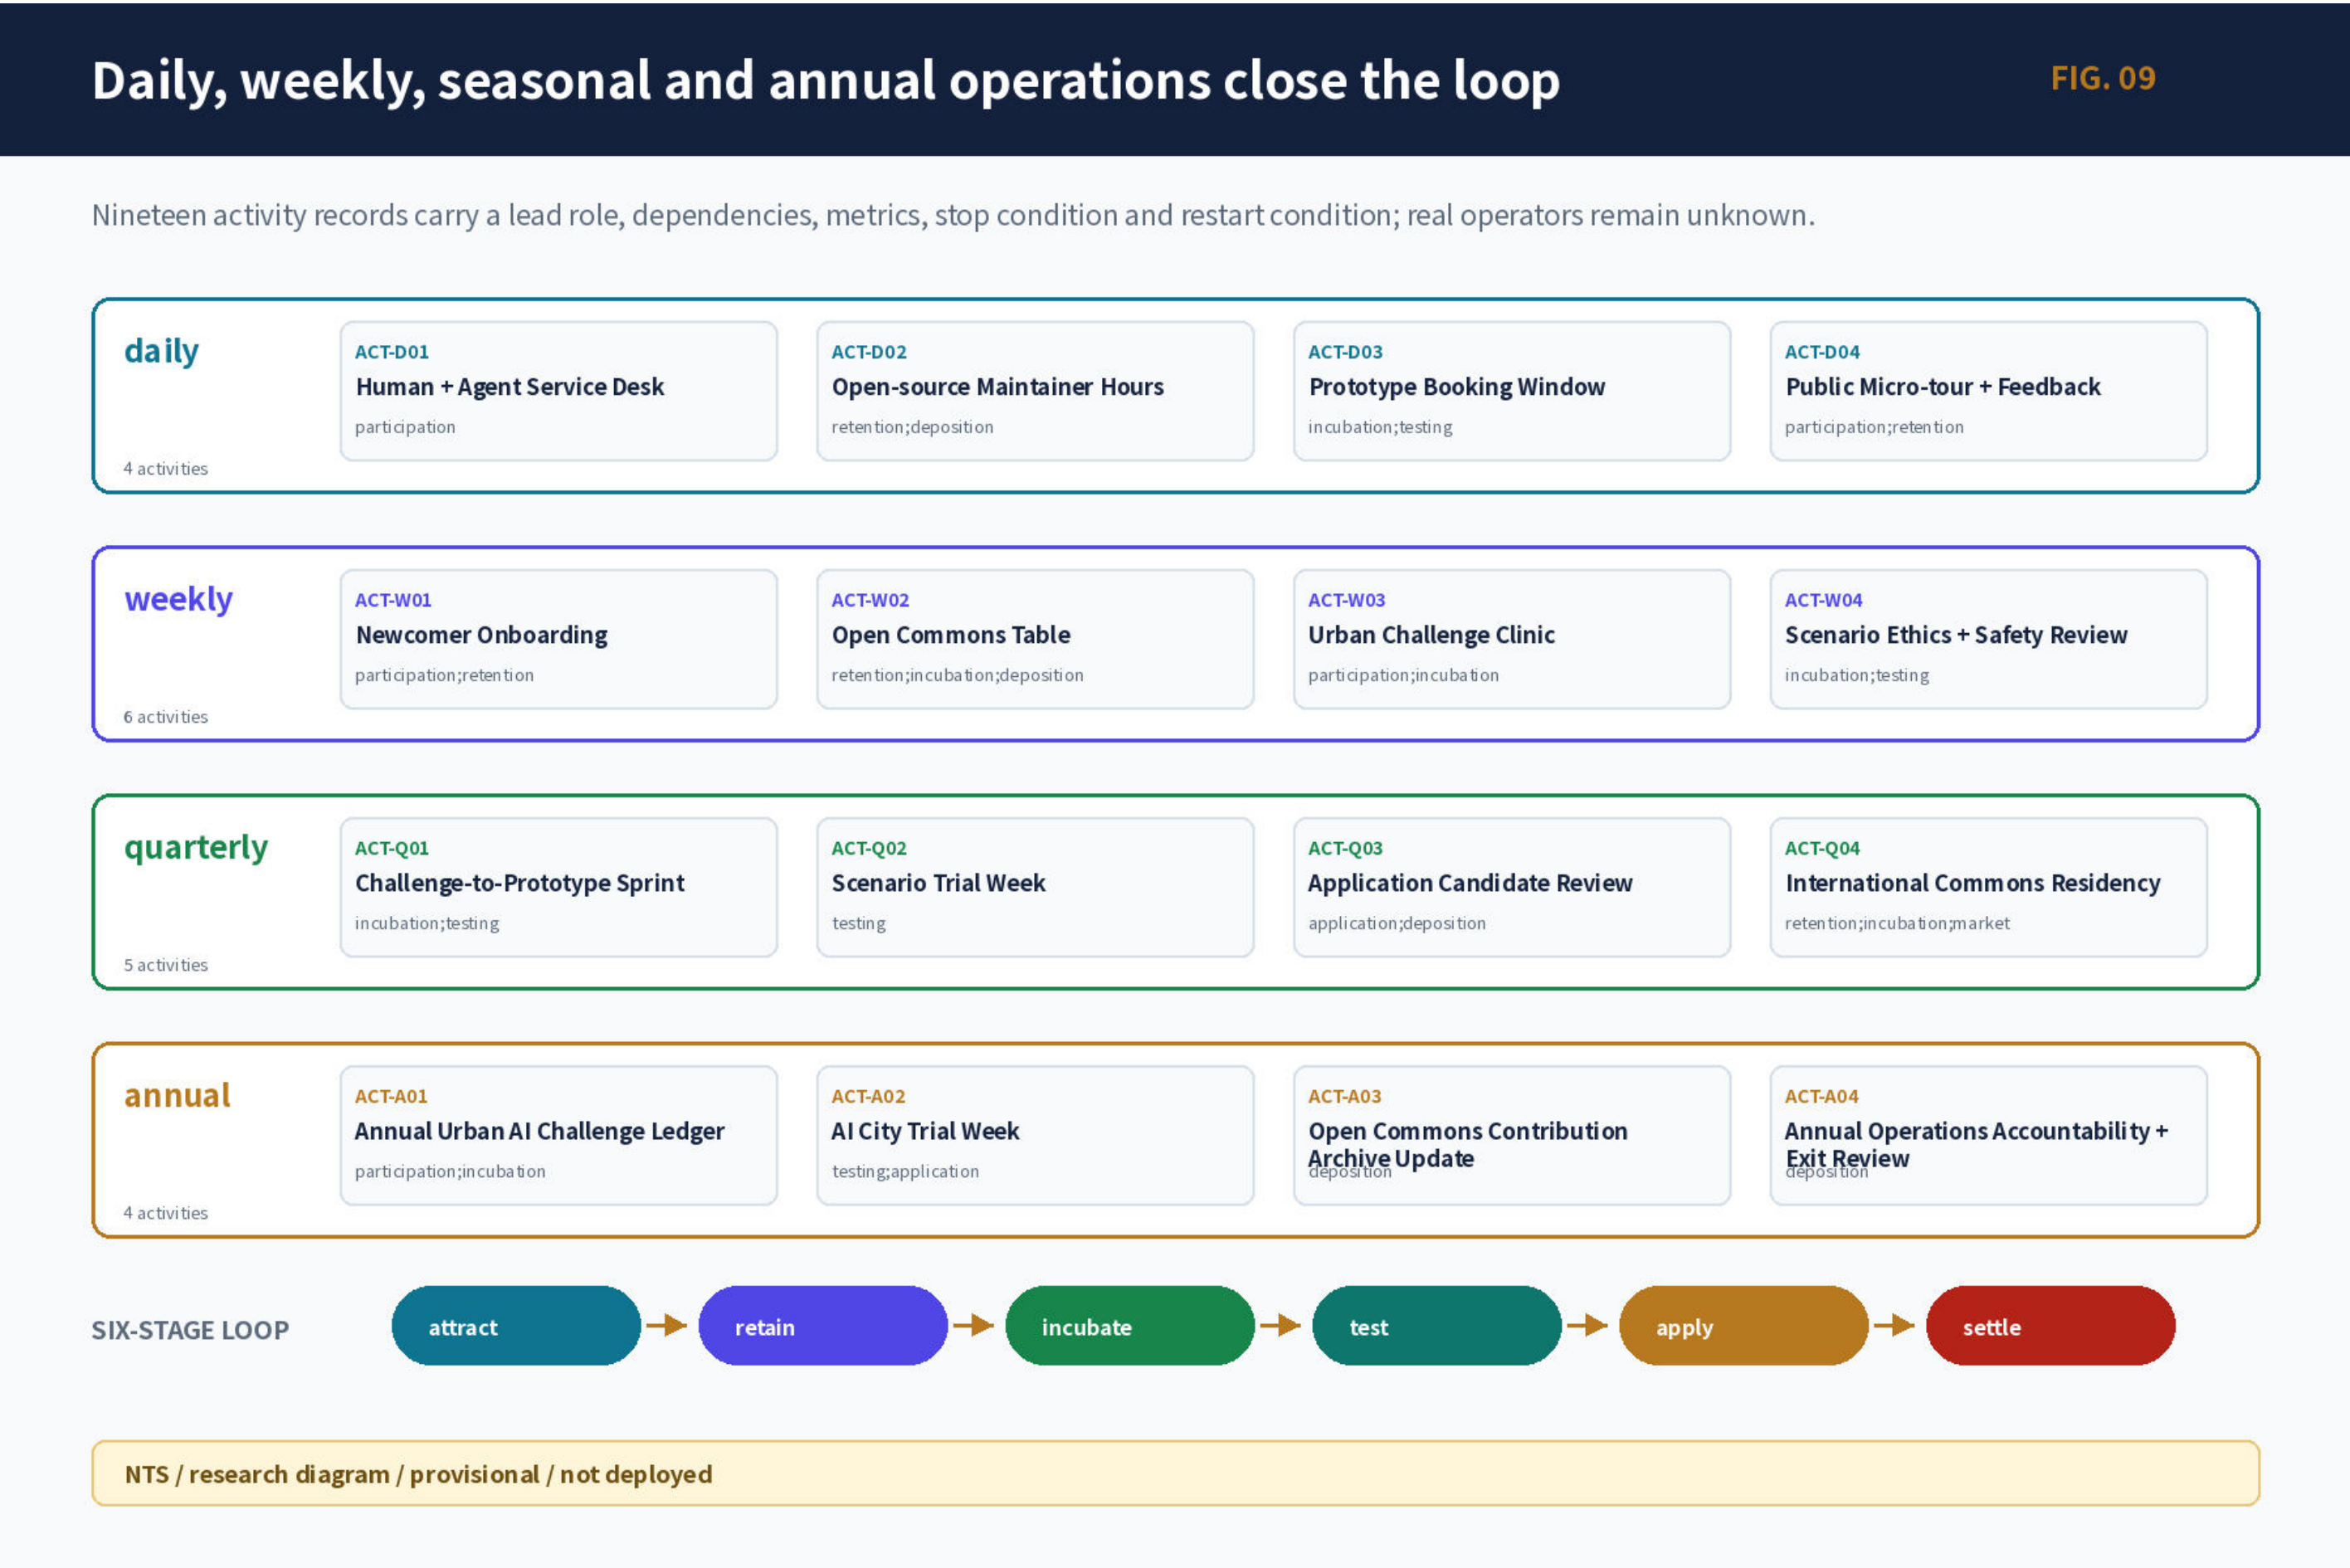

FIG-10 Eight user journeys and human fallback

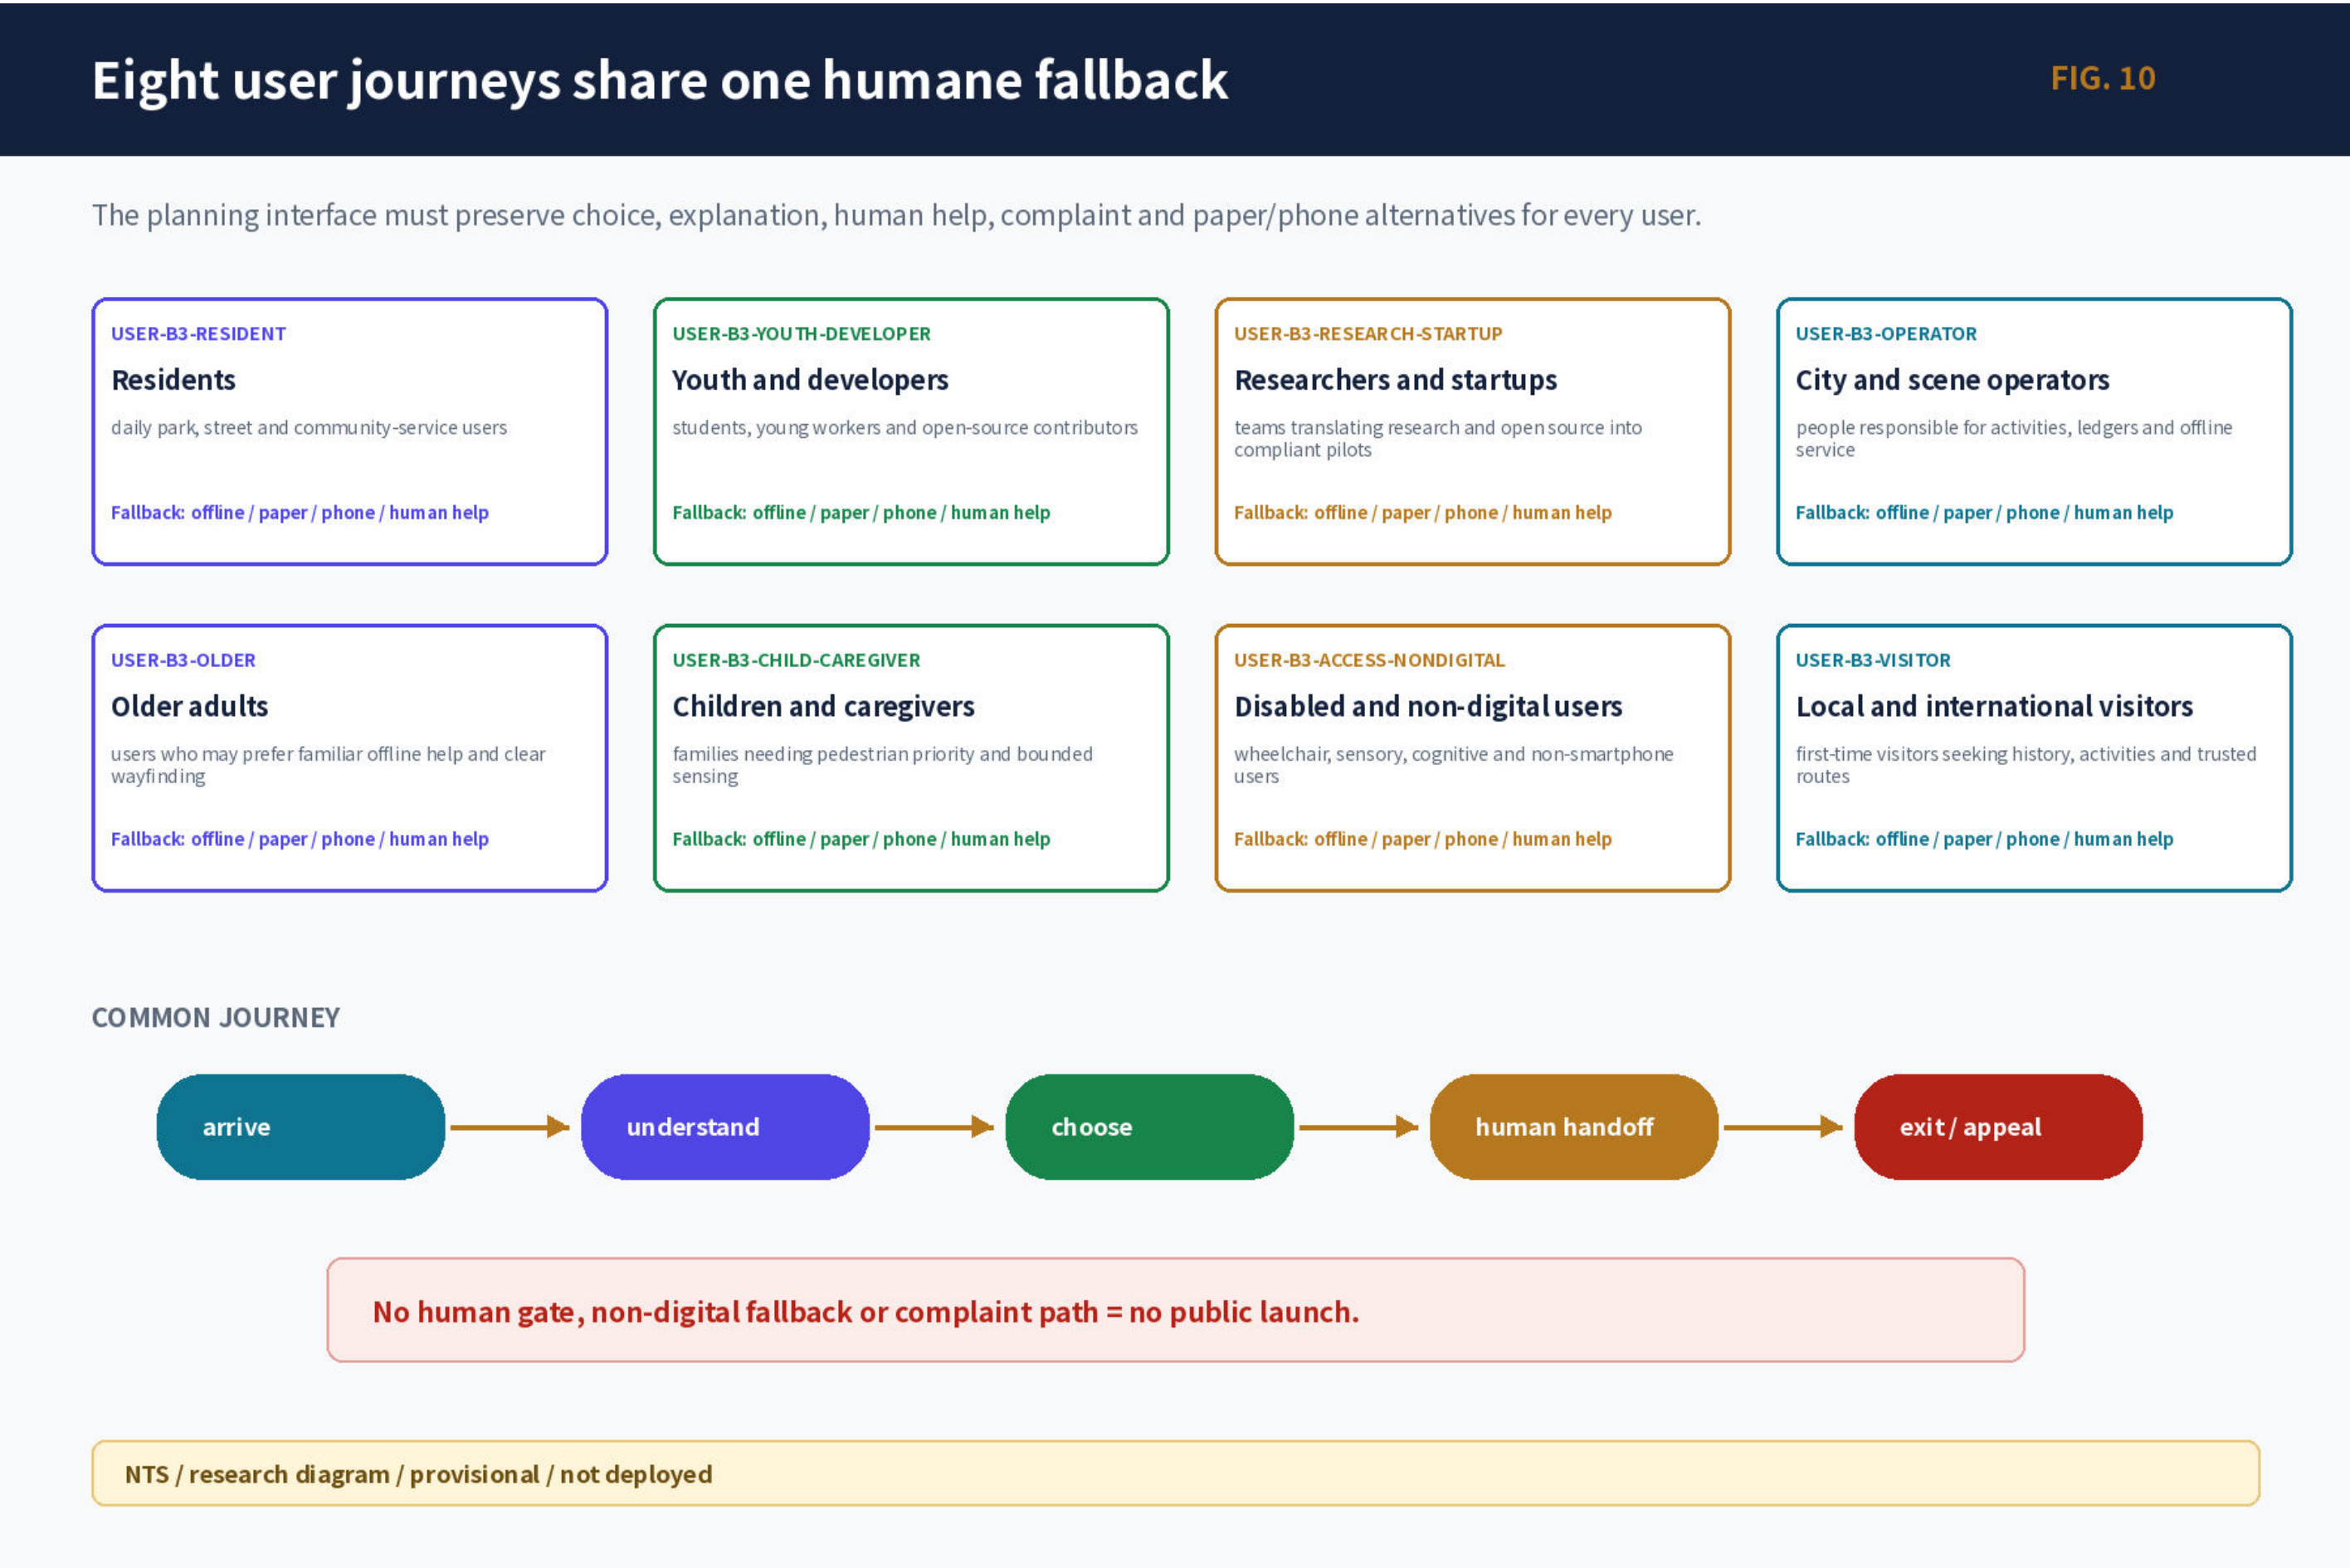

FIG-11 Three AI landmarks and twelve reversible components

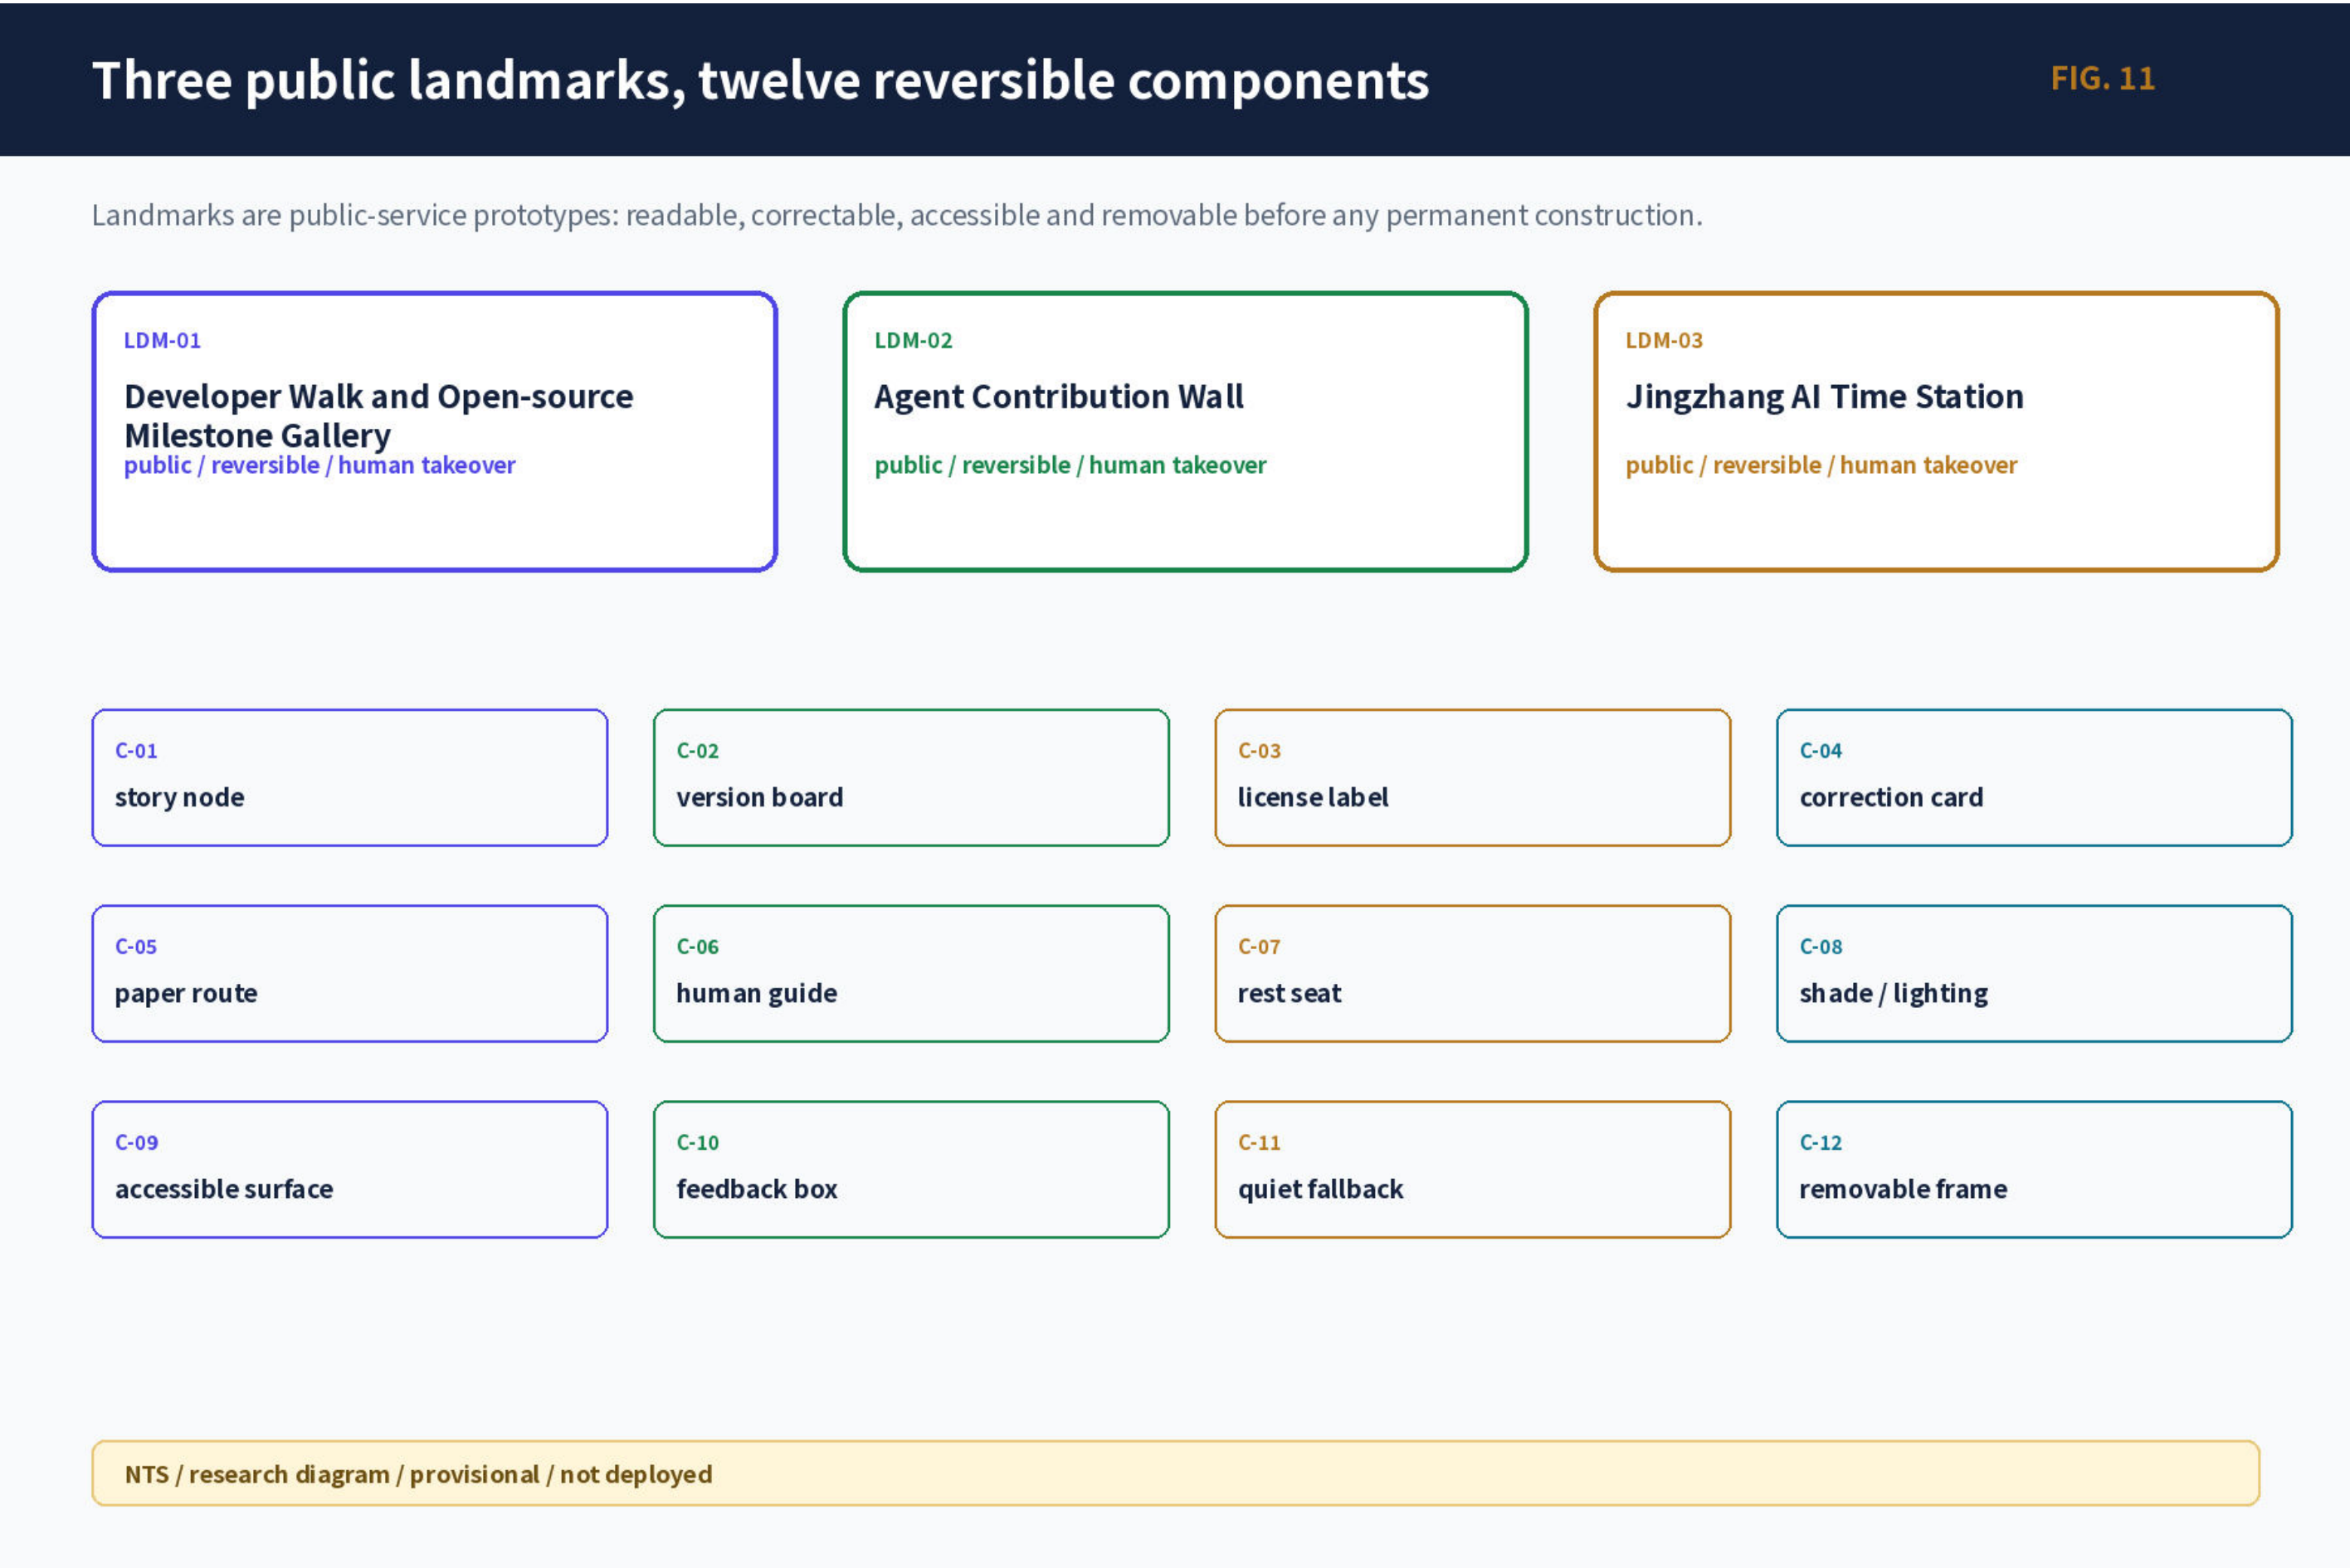

FIG-12 Naming tree, logo grammar and identity candidates

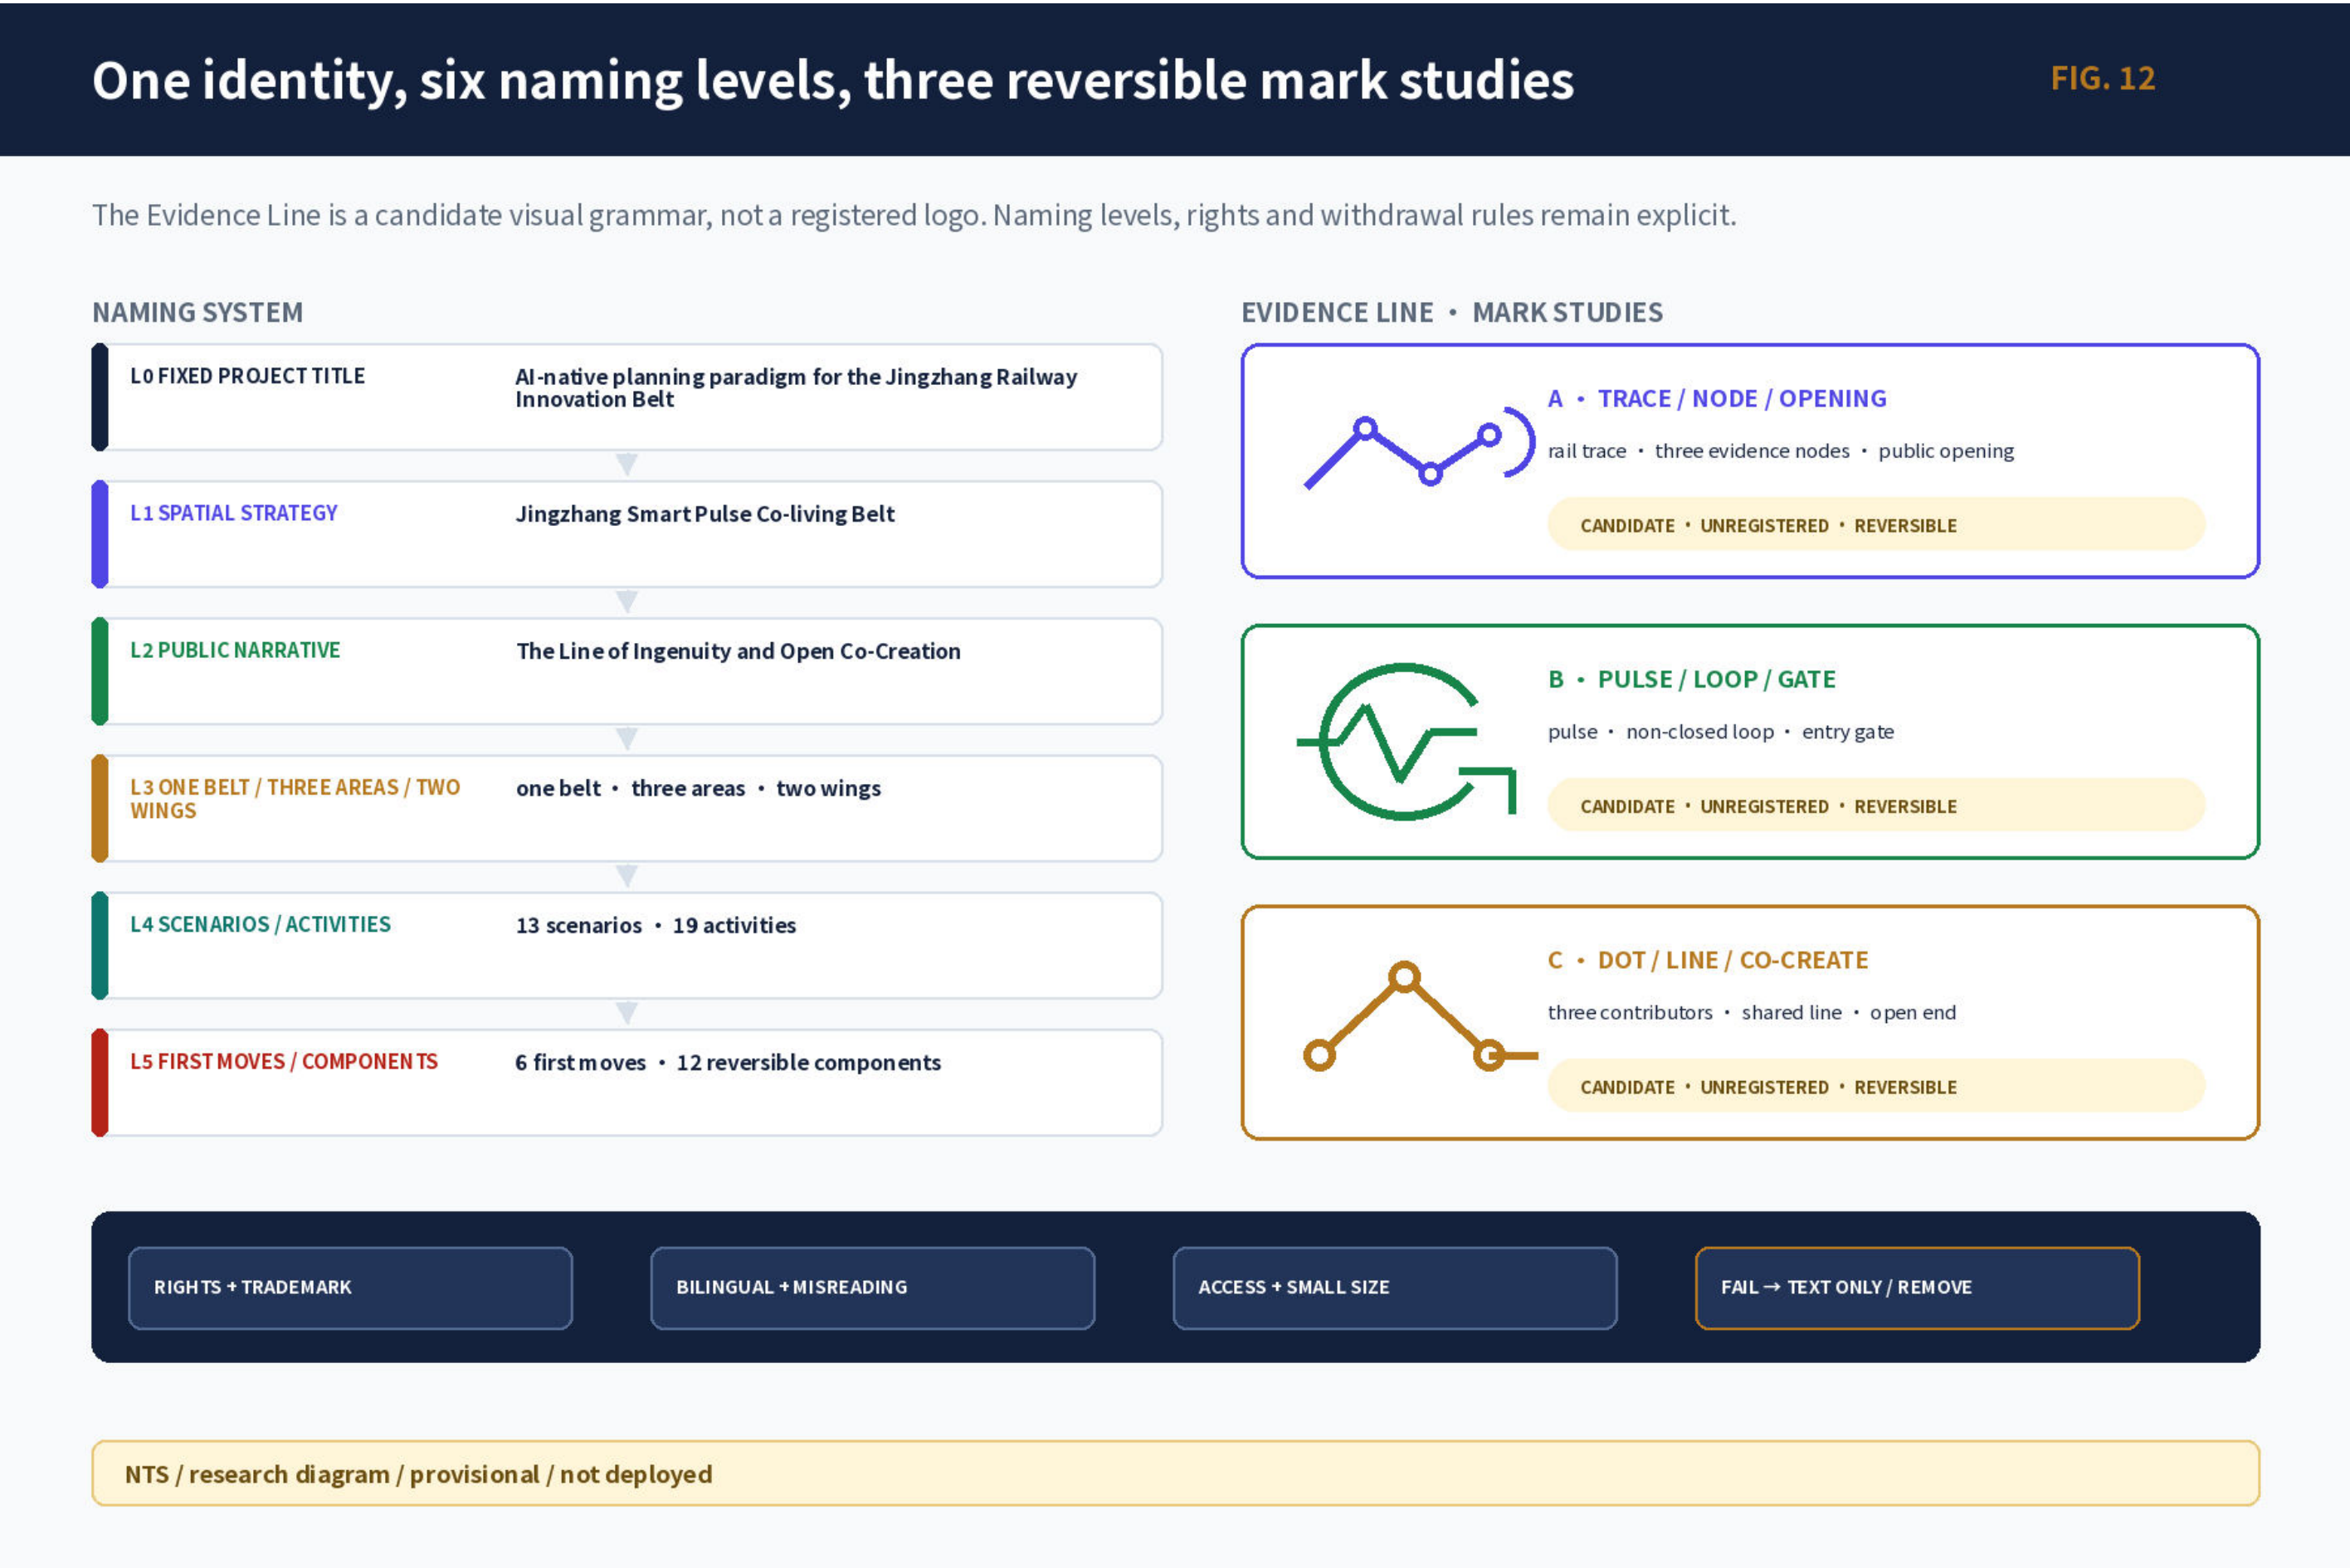

FIG-13 Four complete scenarios and the 0–4 evidence ladder

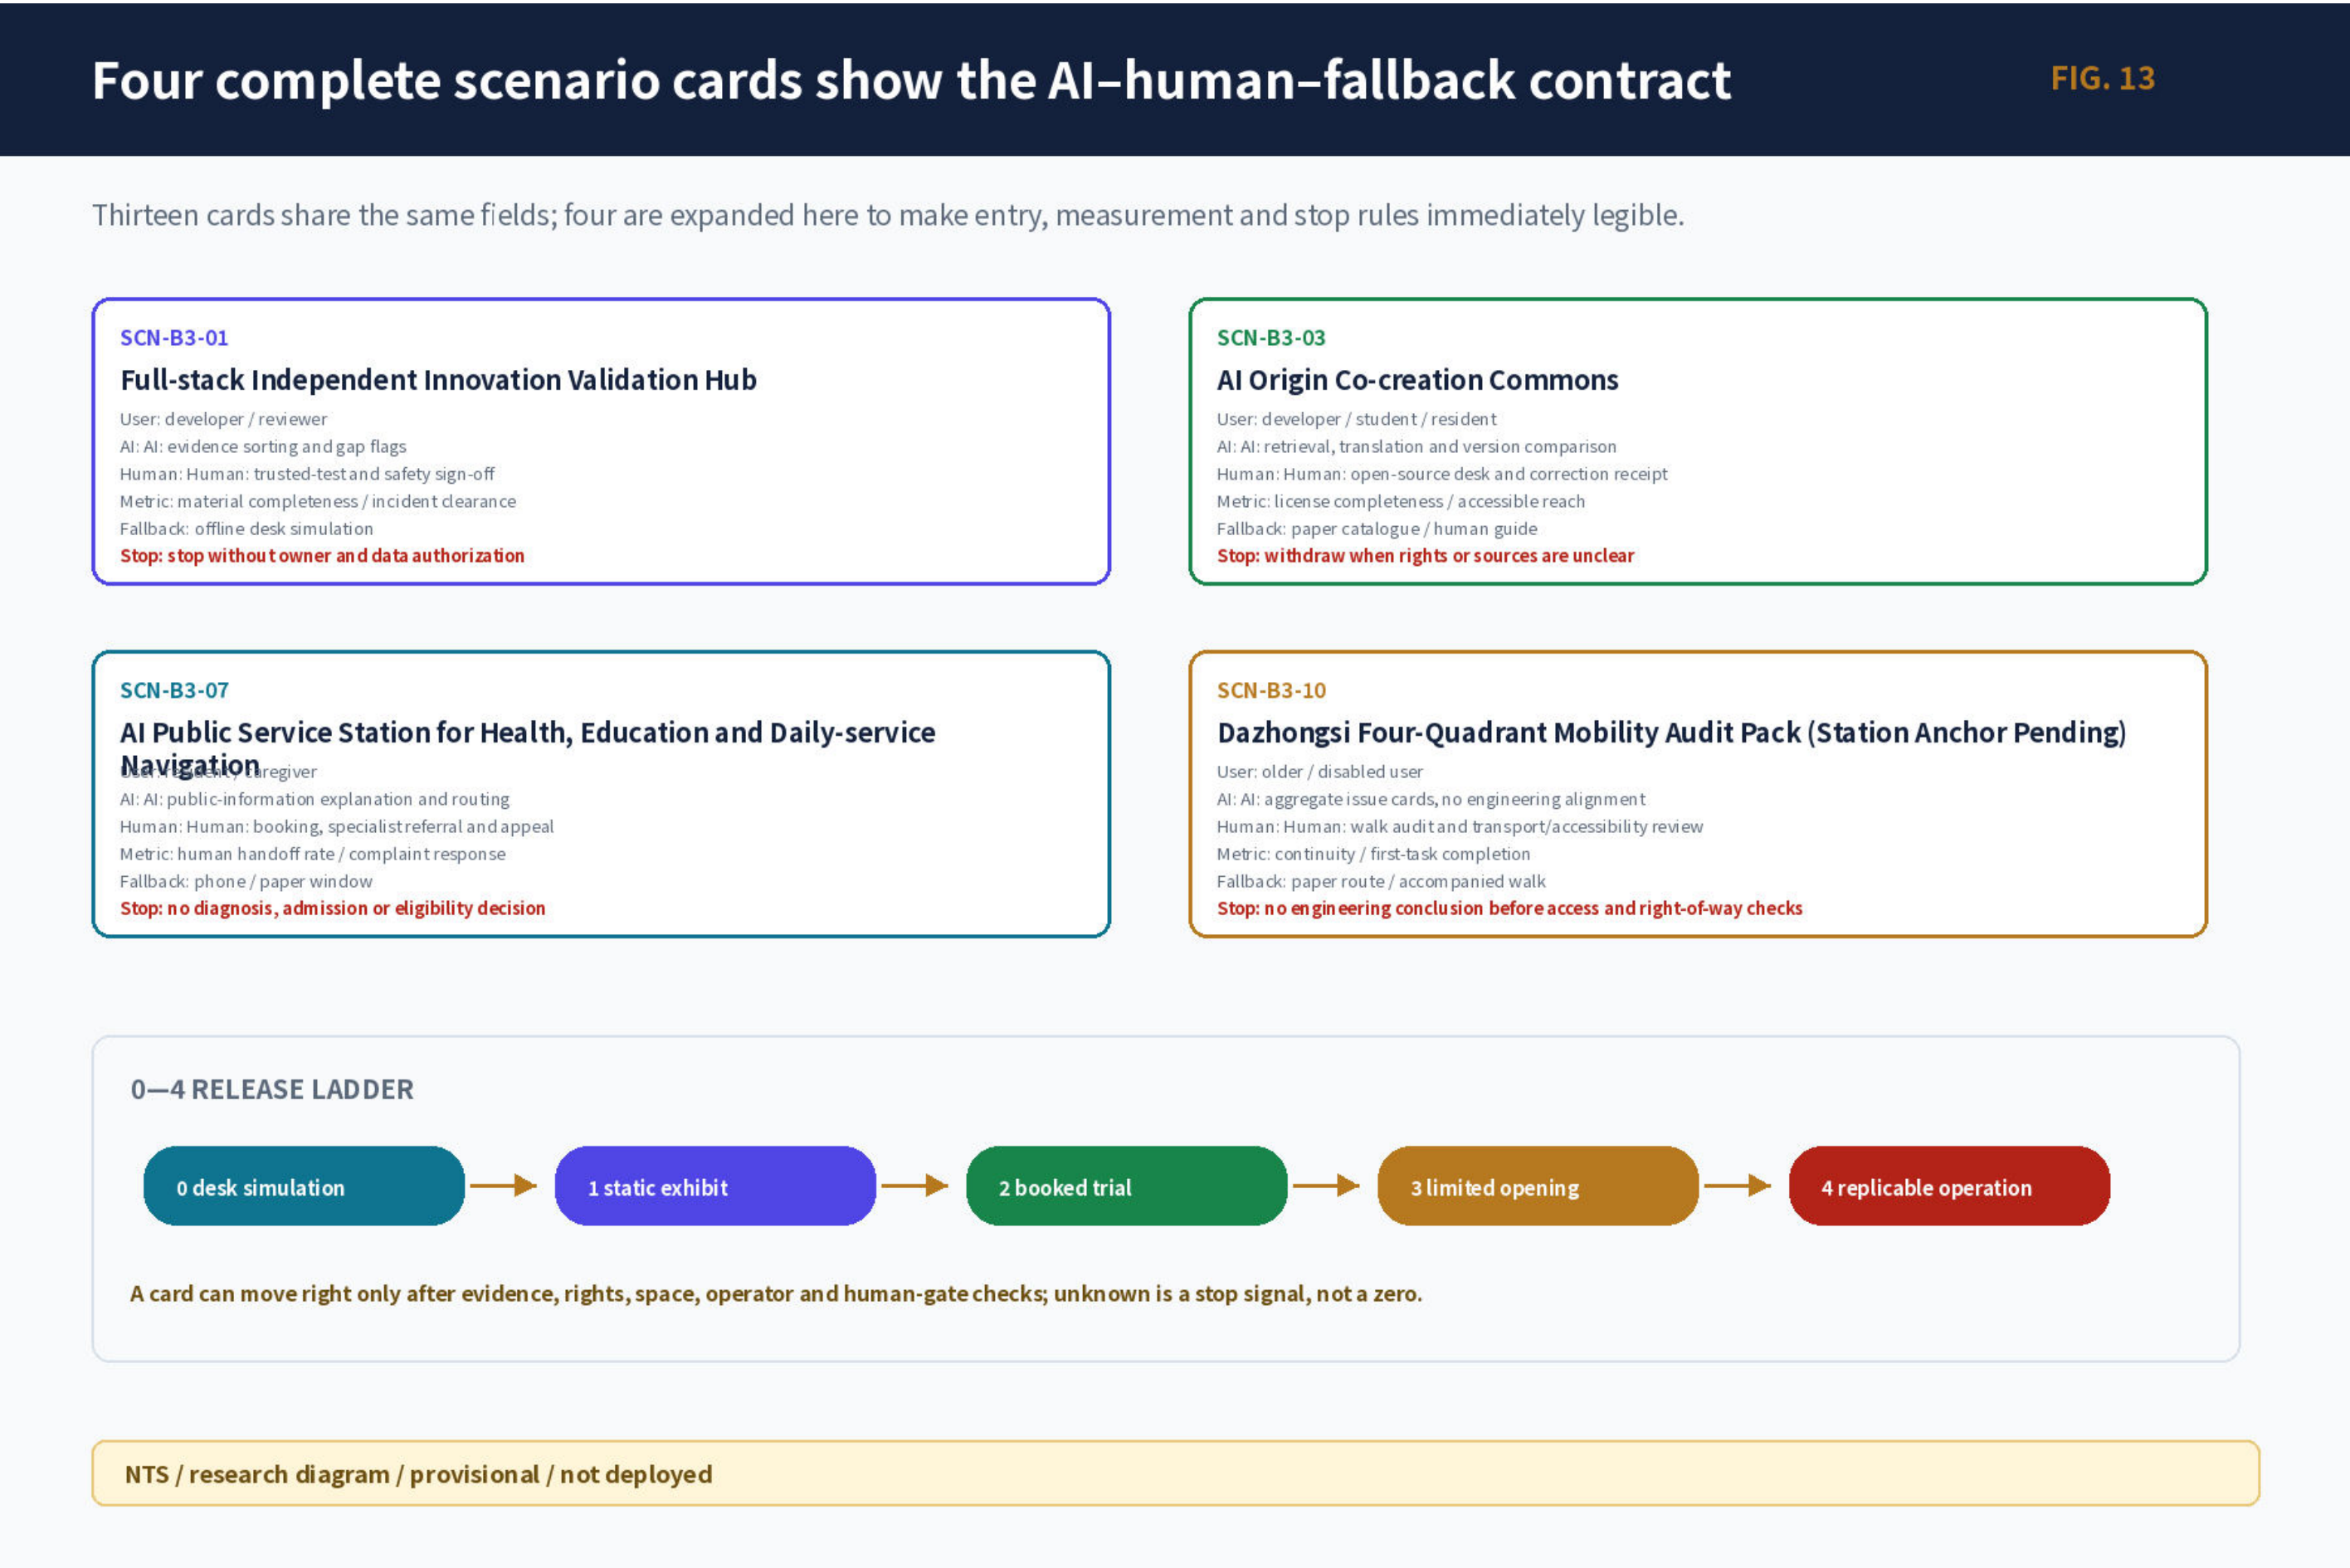

FIG-14 Three cultures, five route prototypes and correction loop

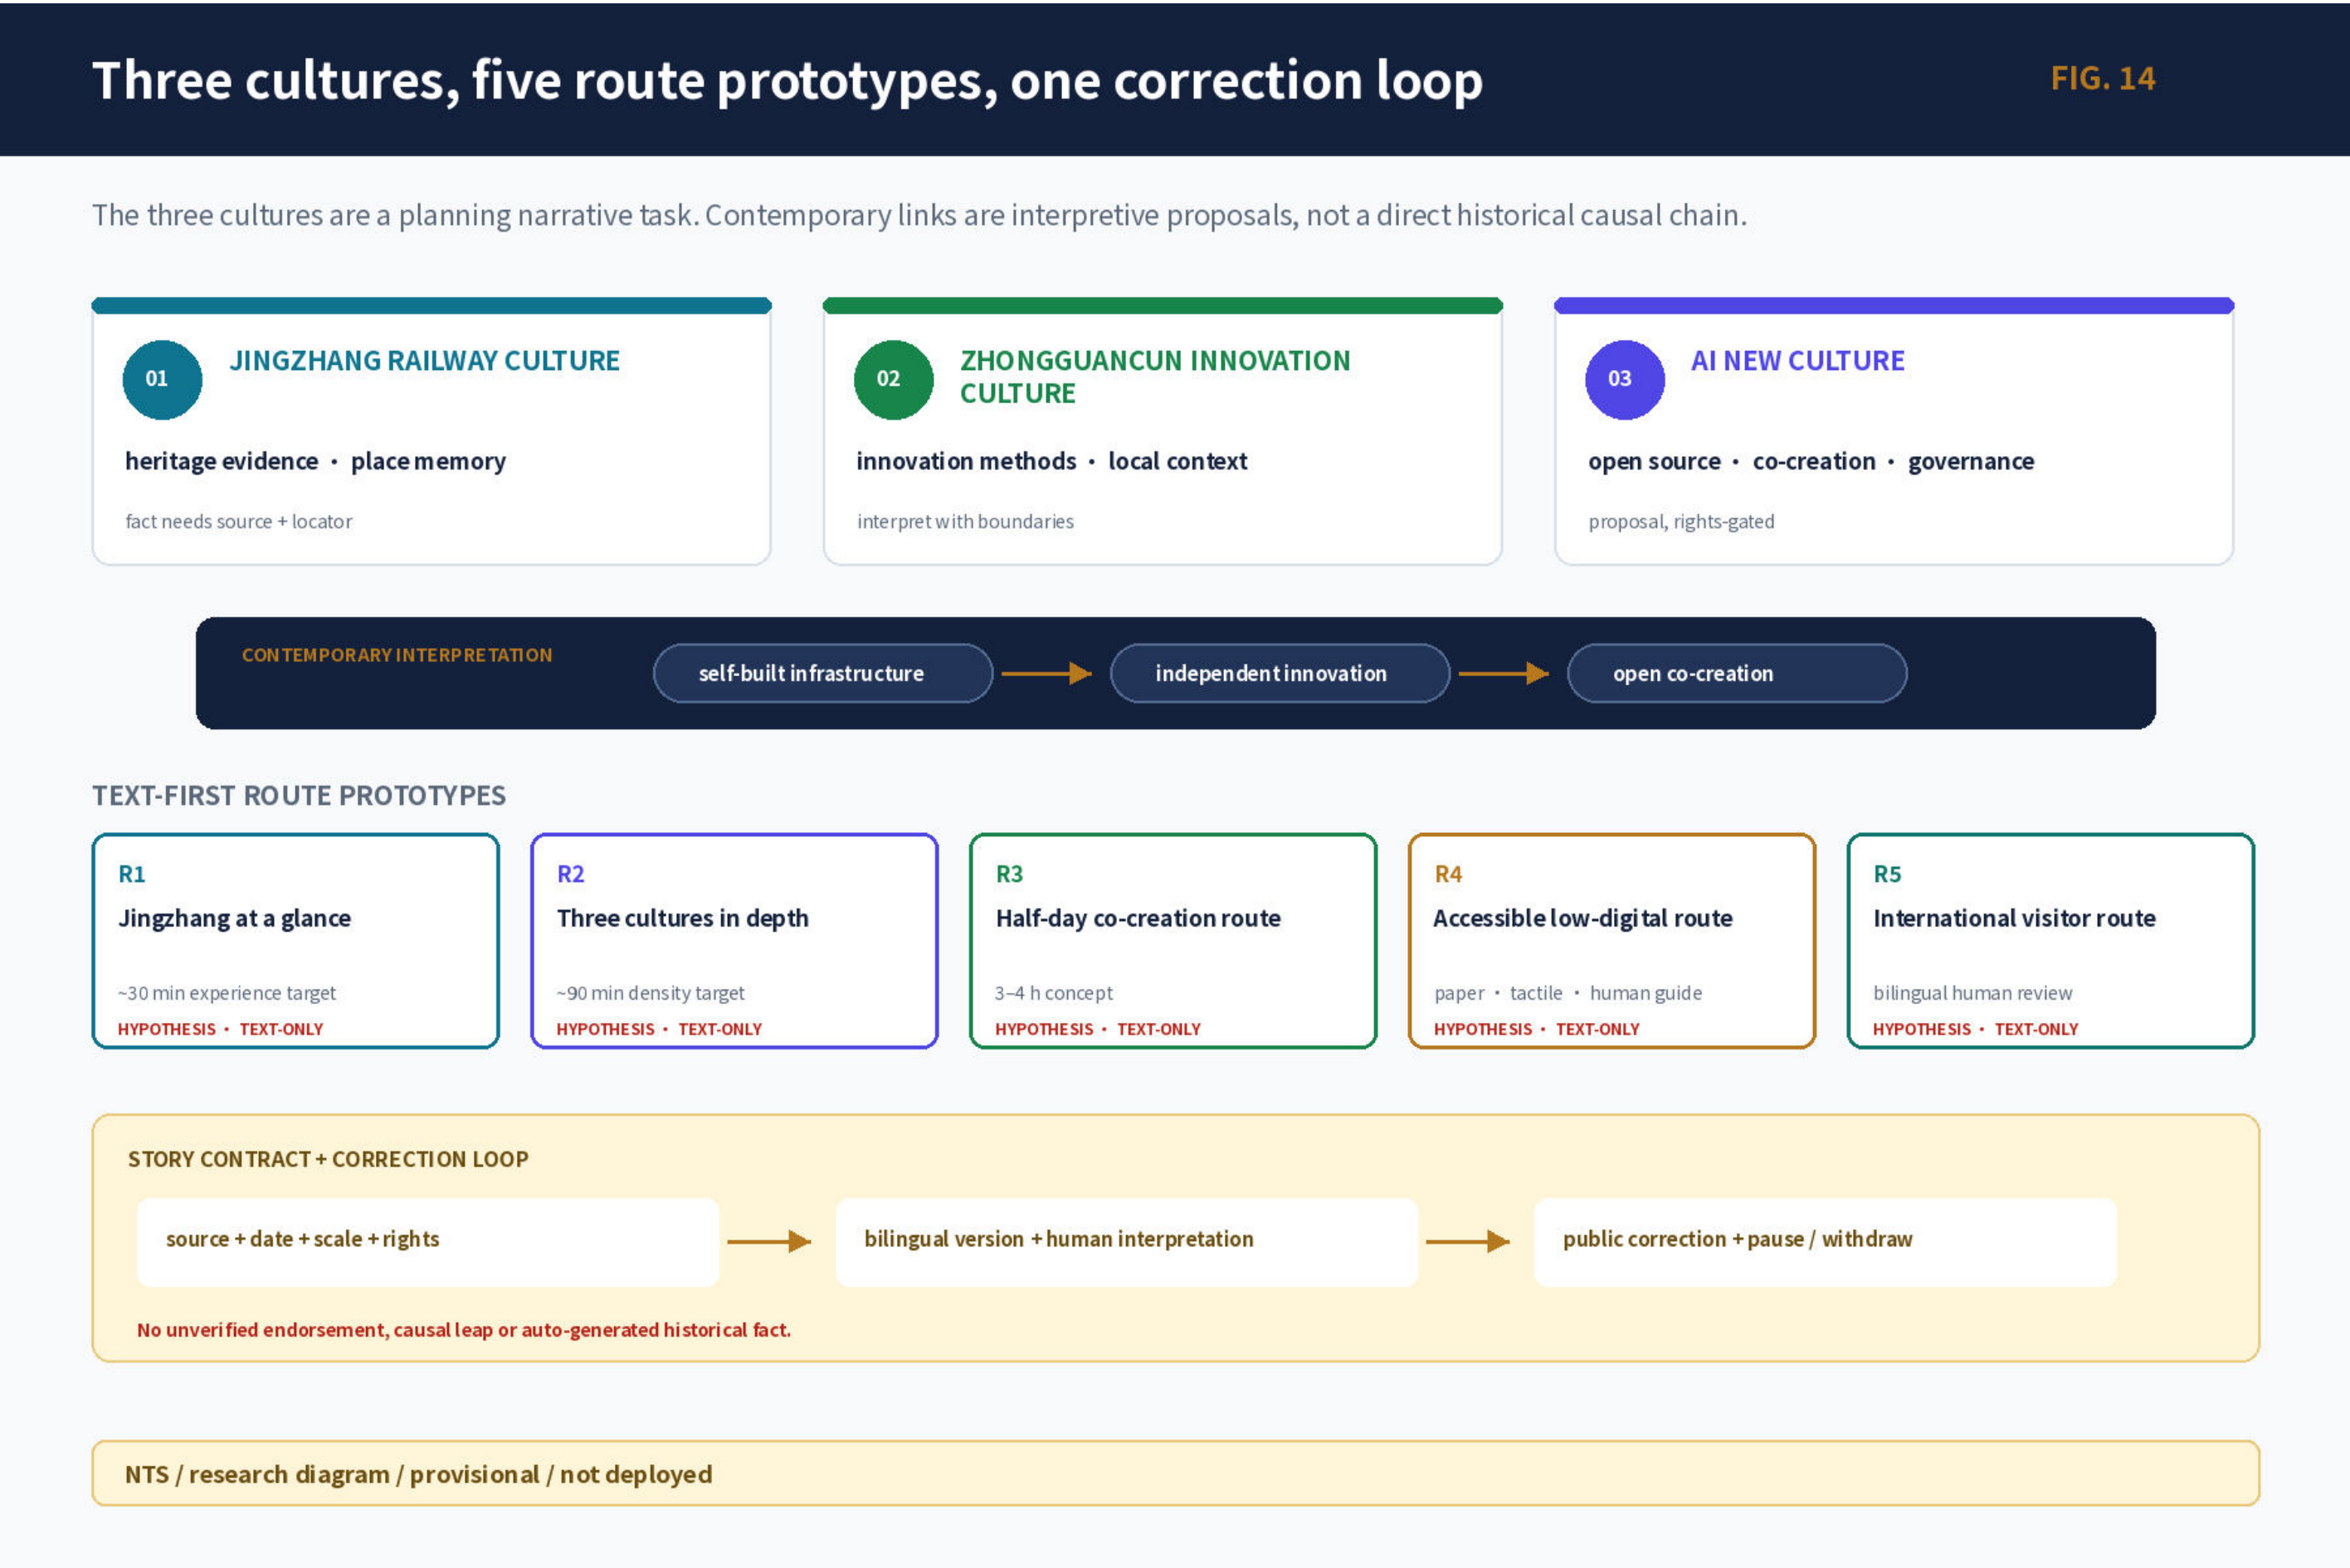

FIG-15 Fifteen professional-depth evidence contracts

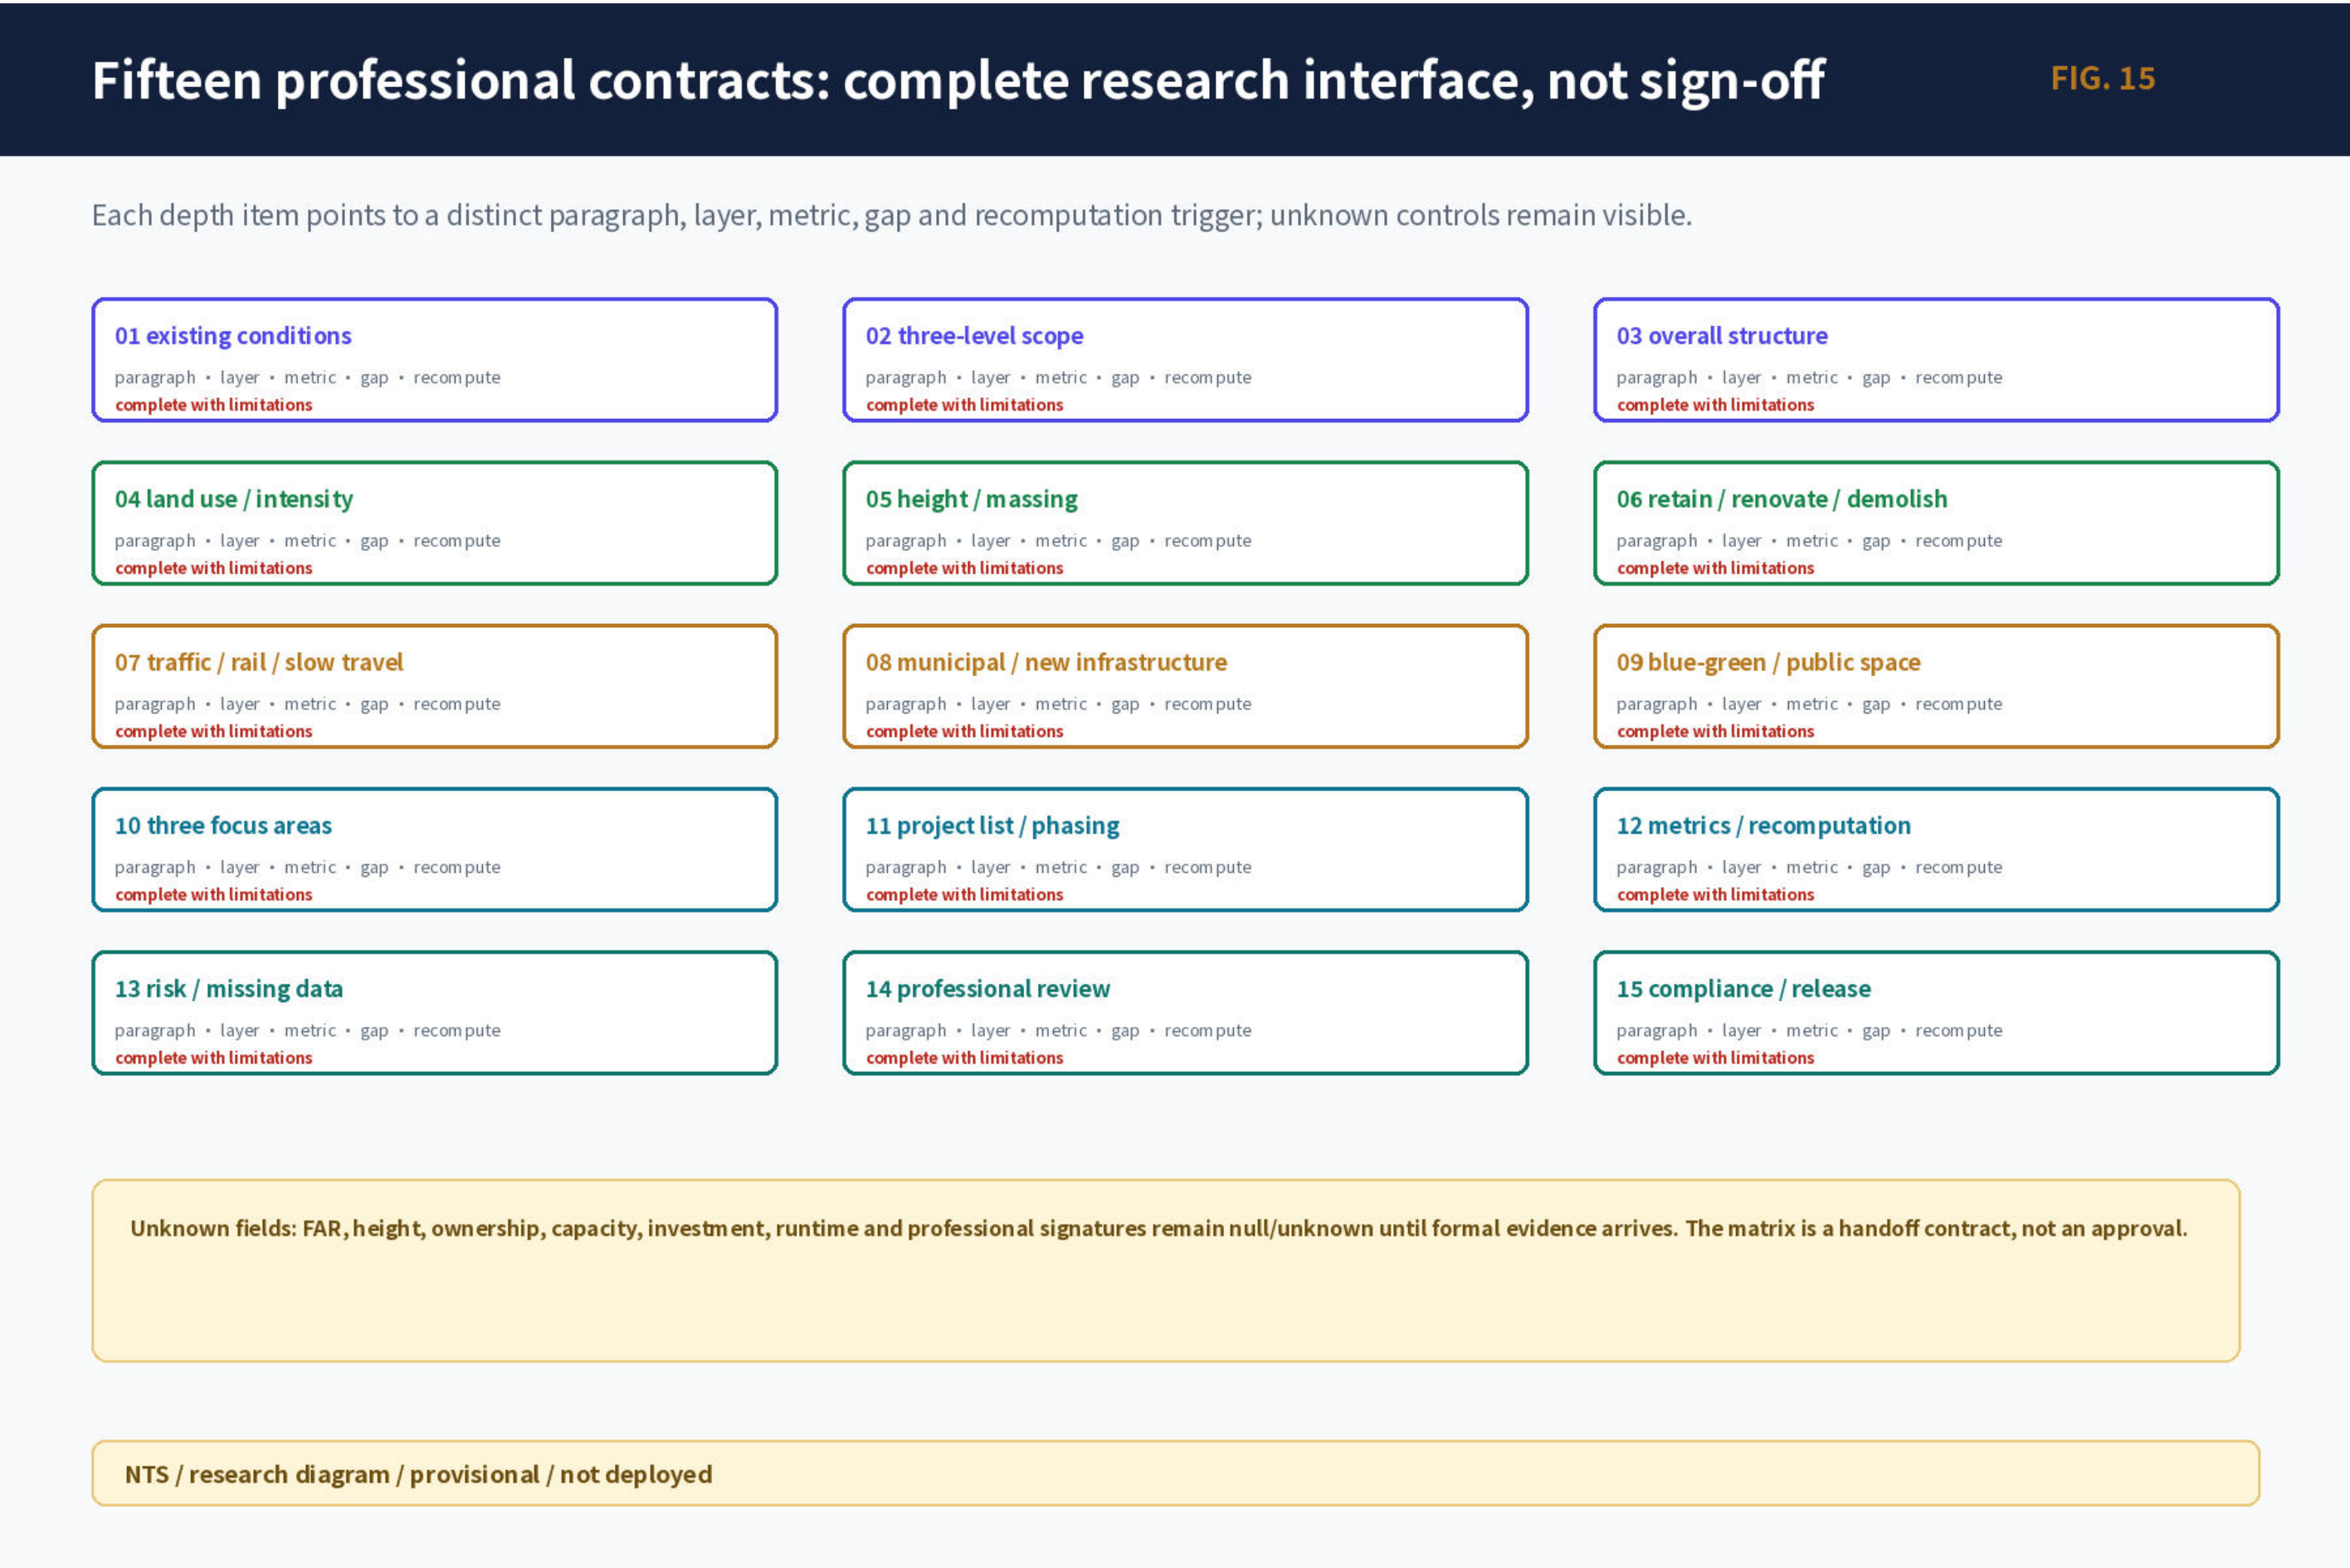

FIG-16 Existing satellite basemap atlas

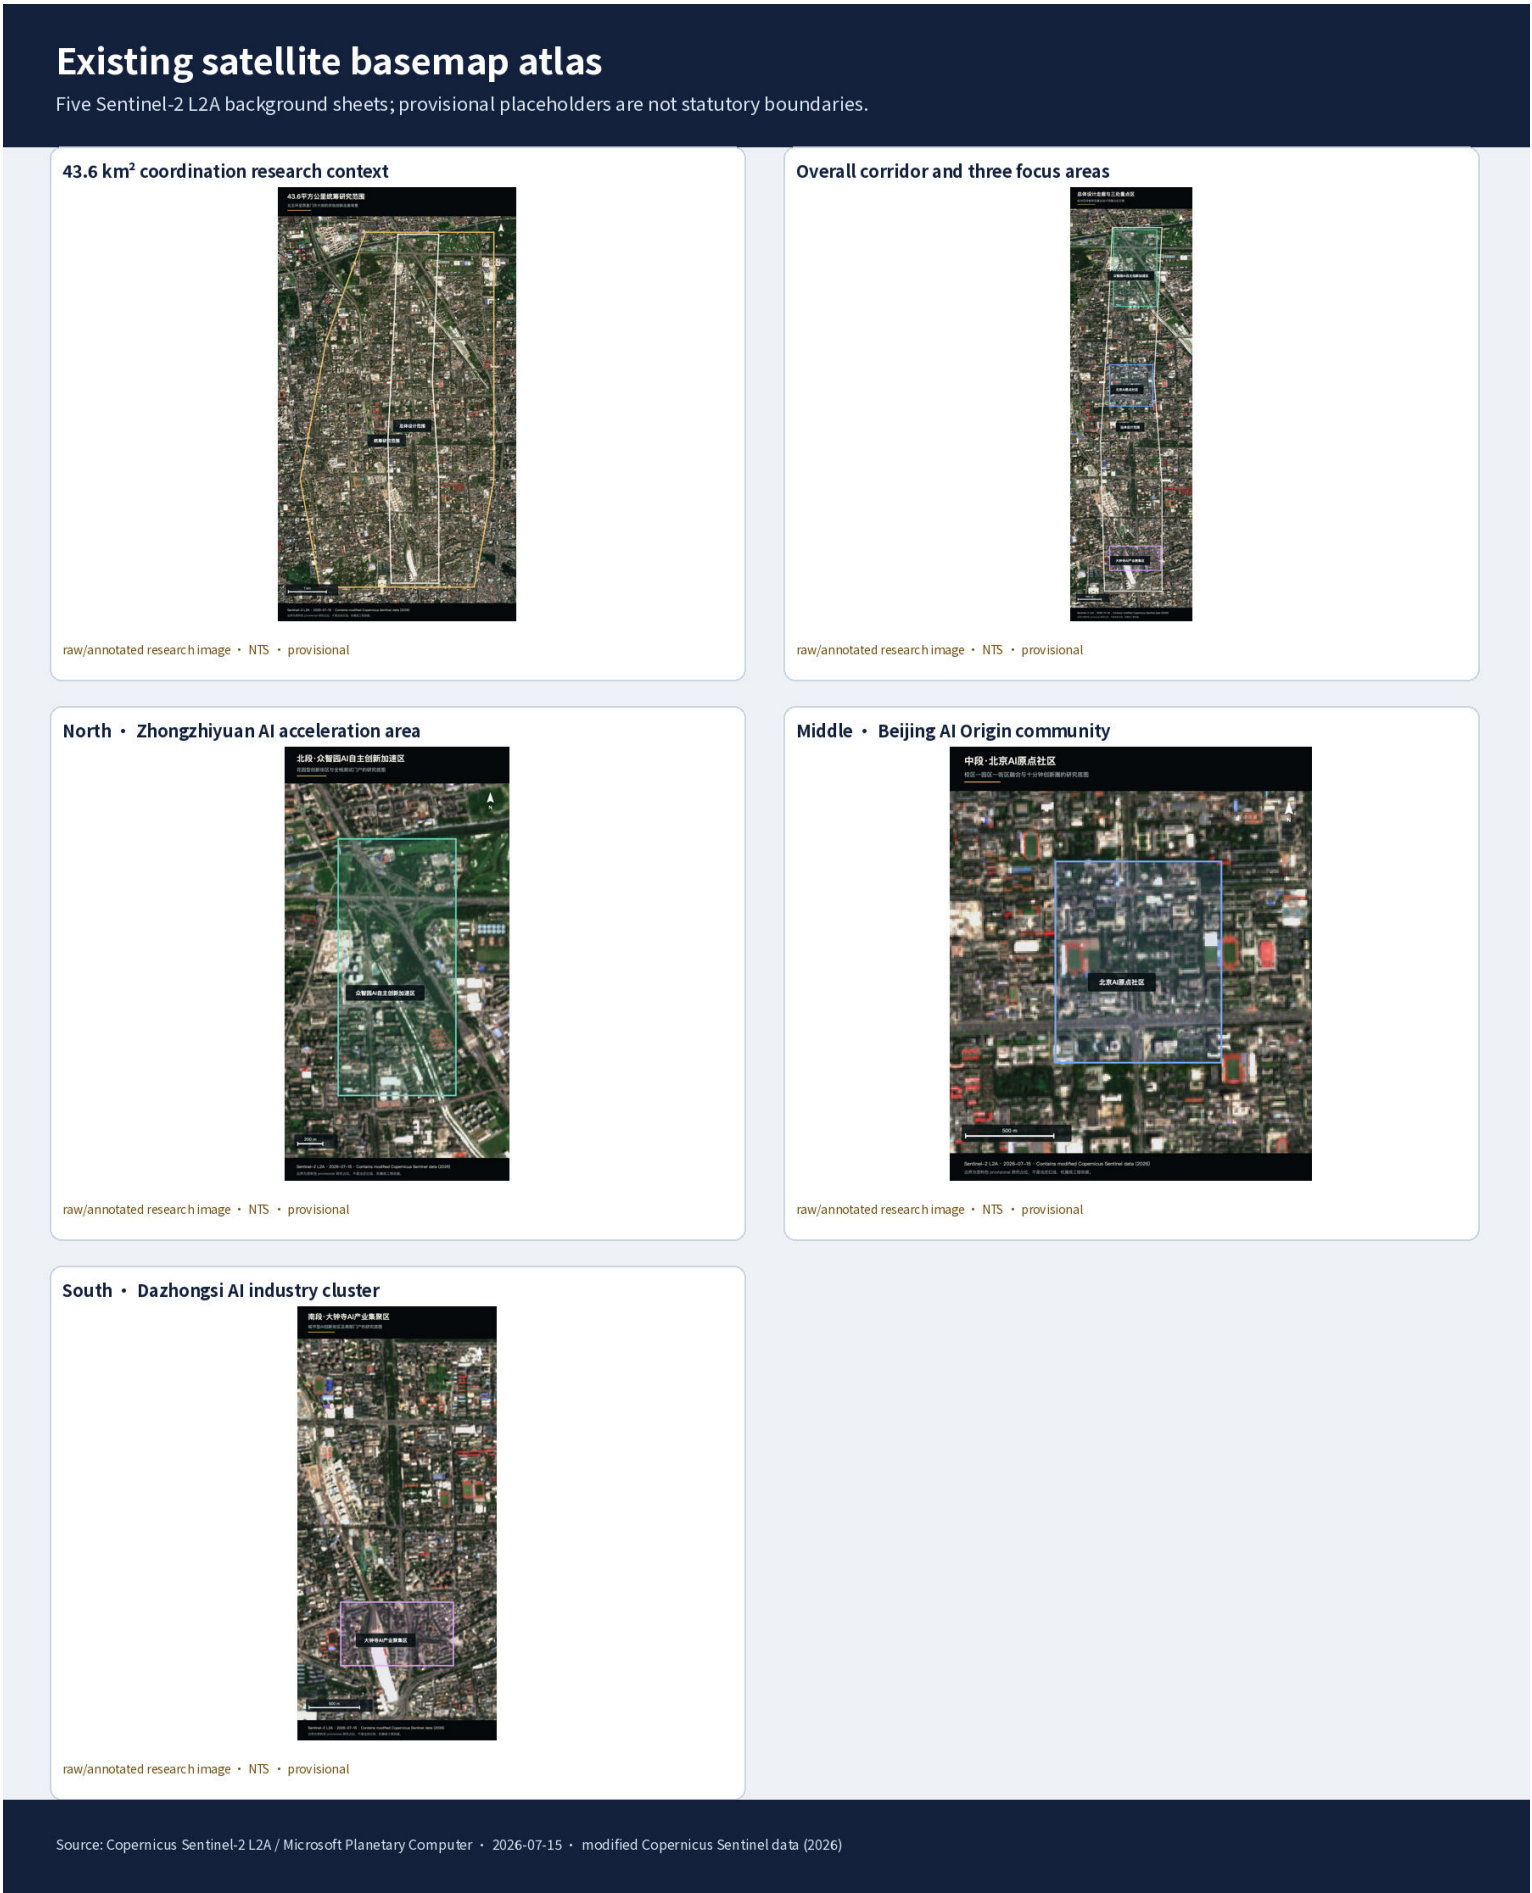

FIG-17 Five planning-paradigm shifts for the AI era

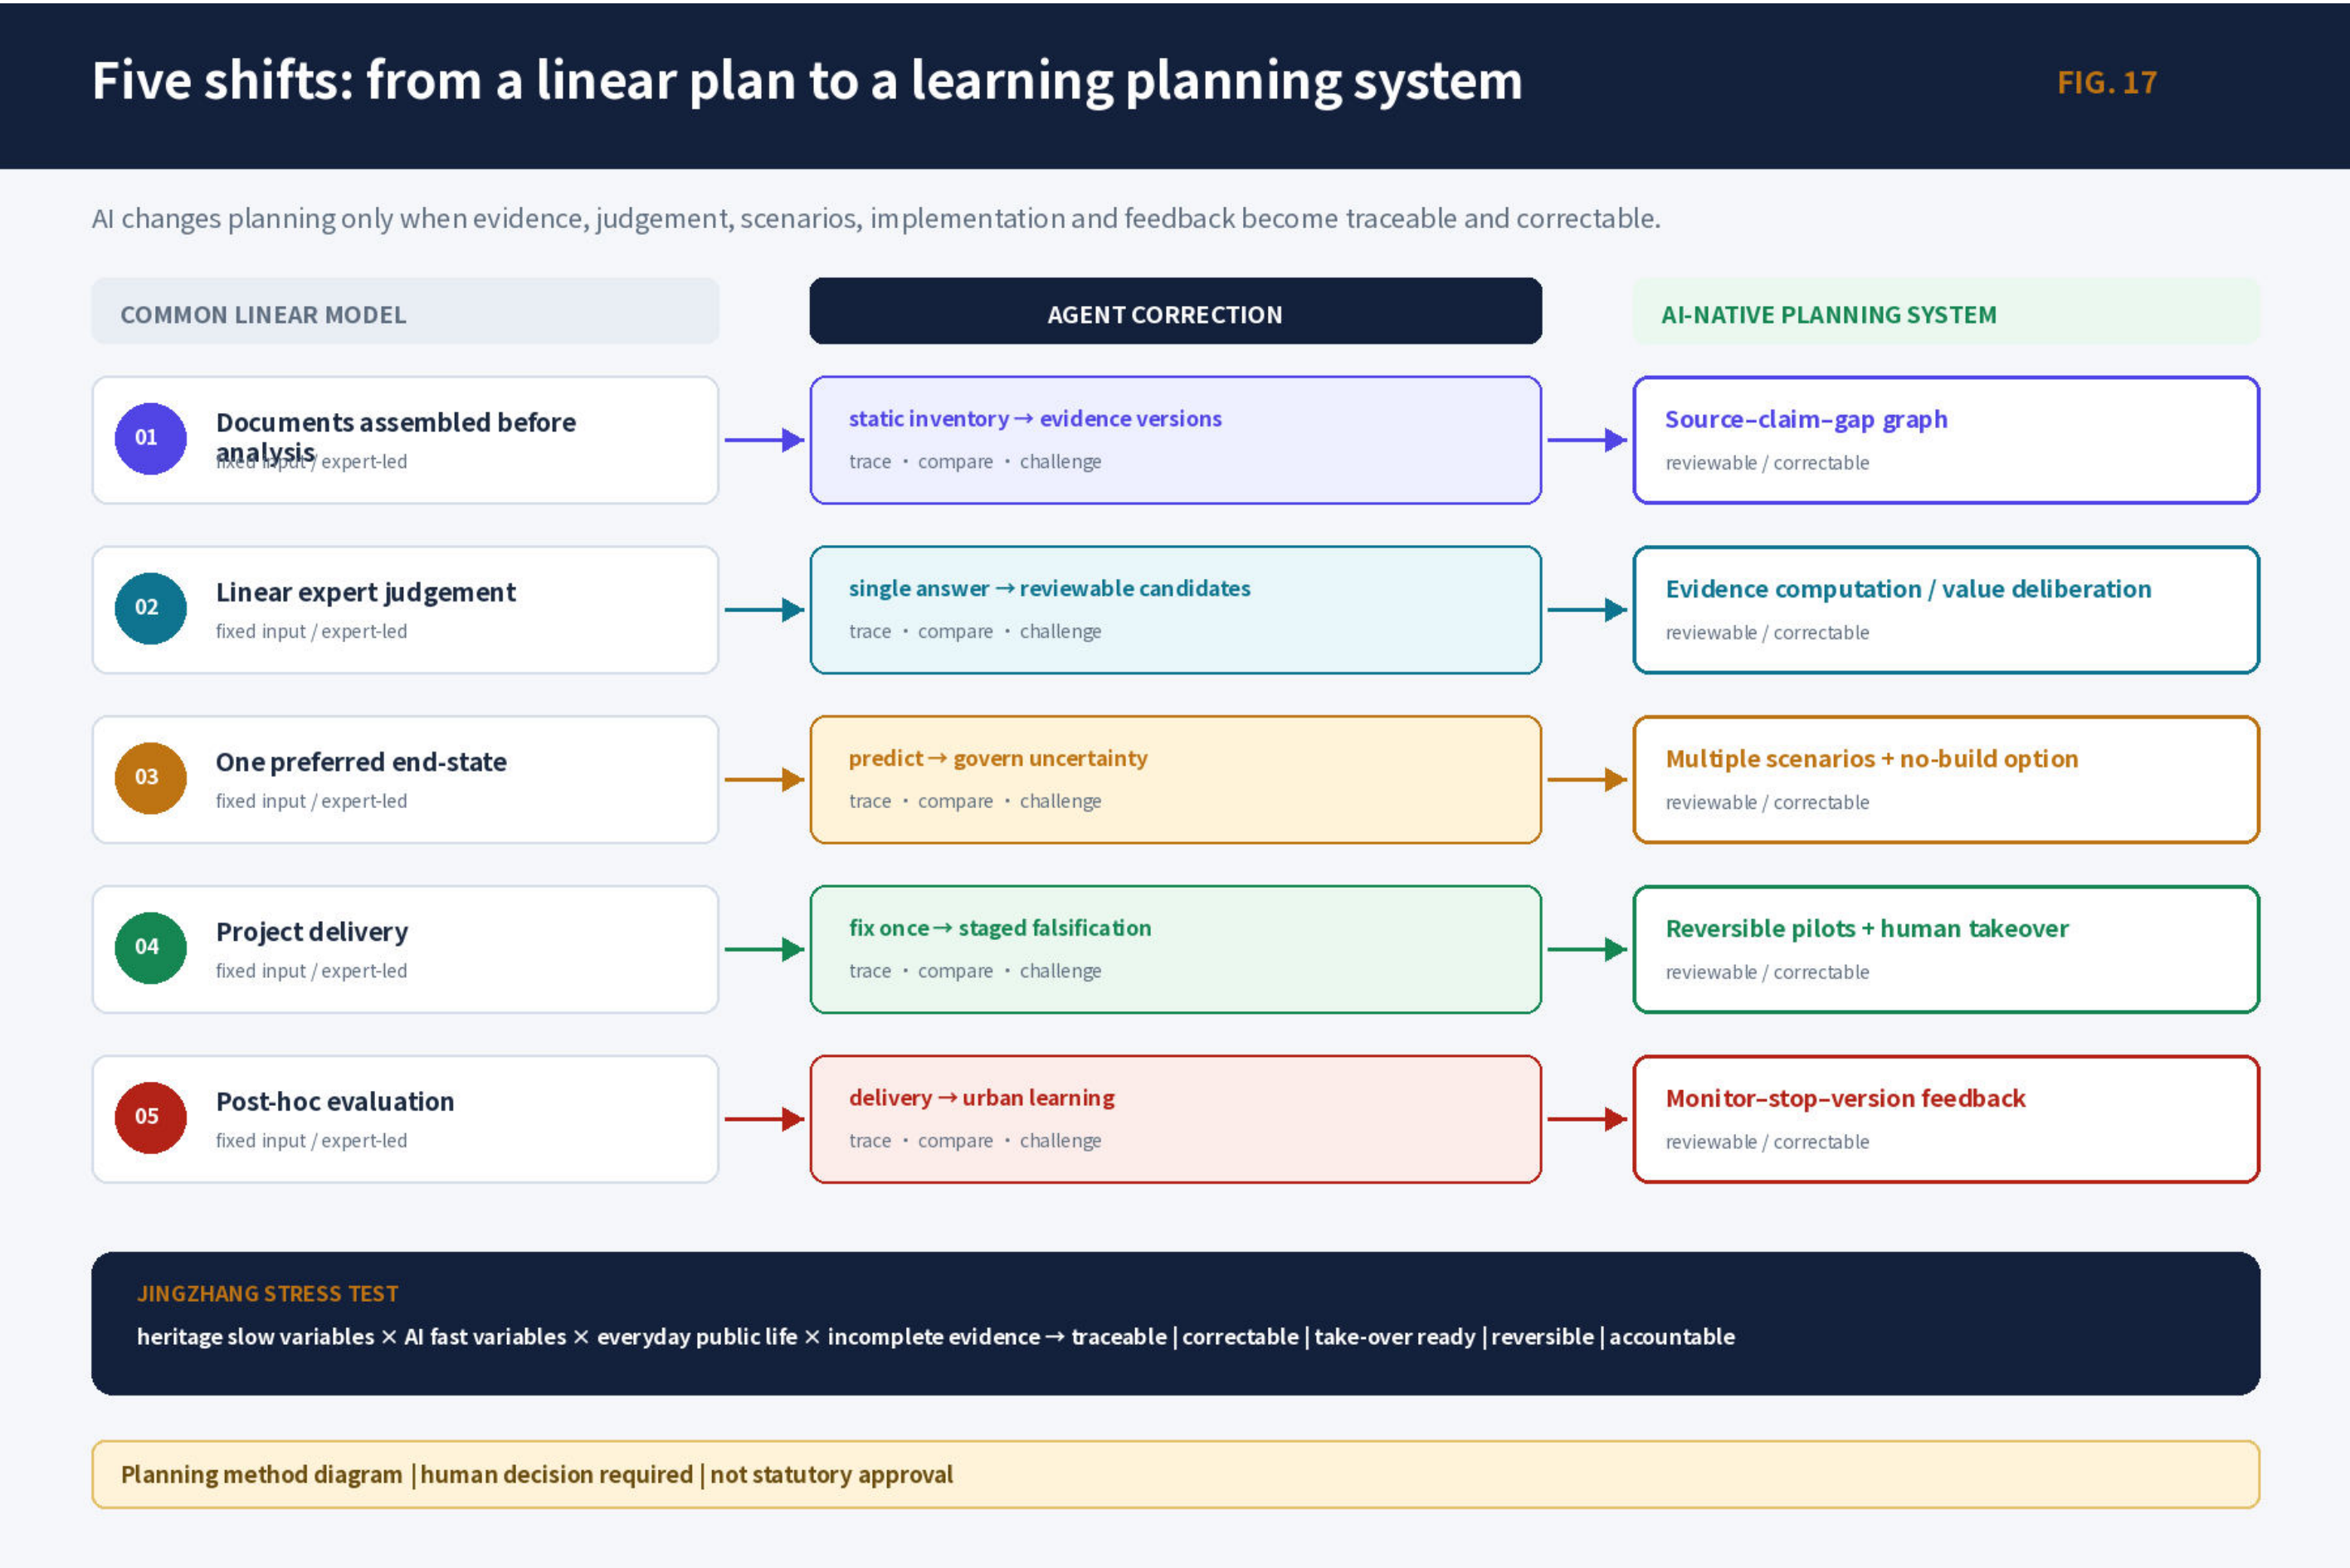

FIG-18 Five-dimensional planning object for the AI era

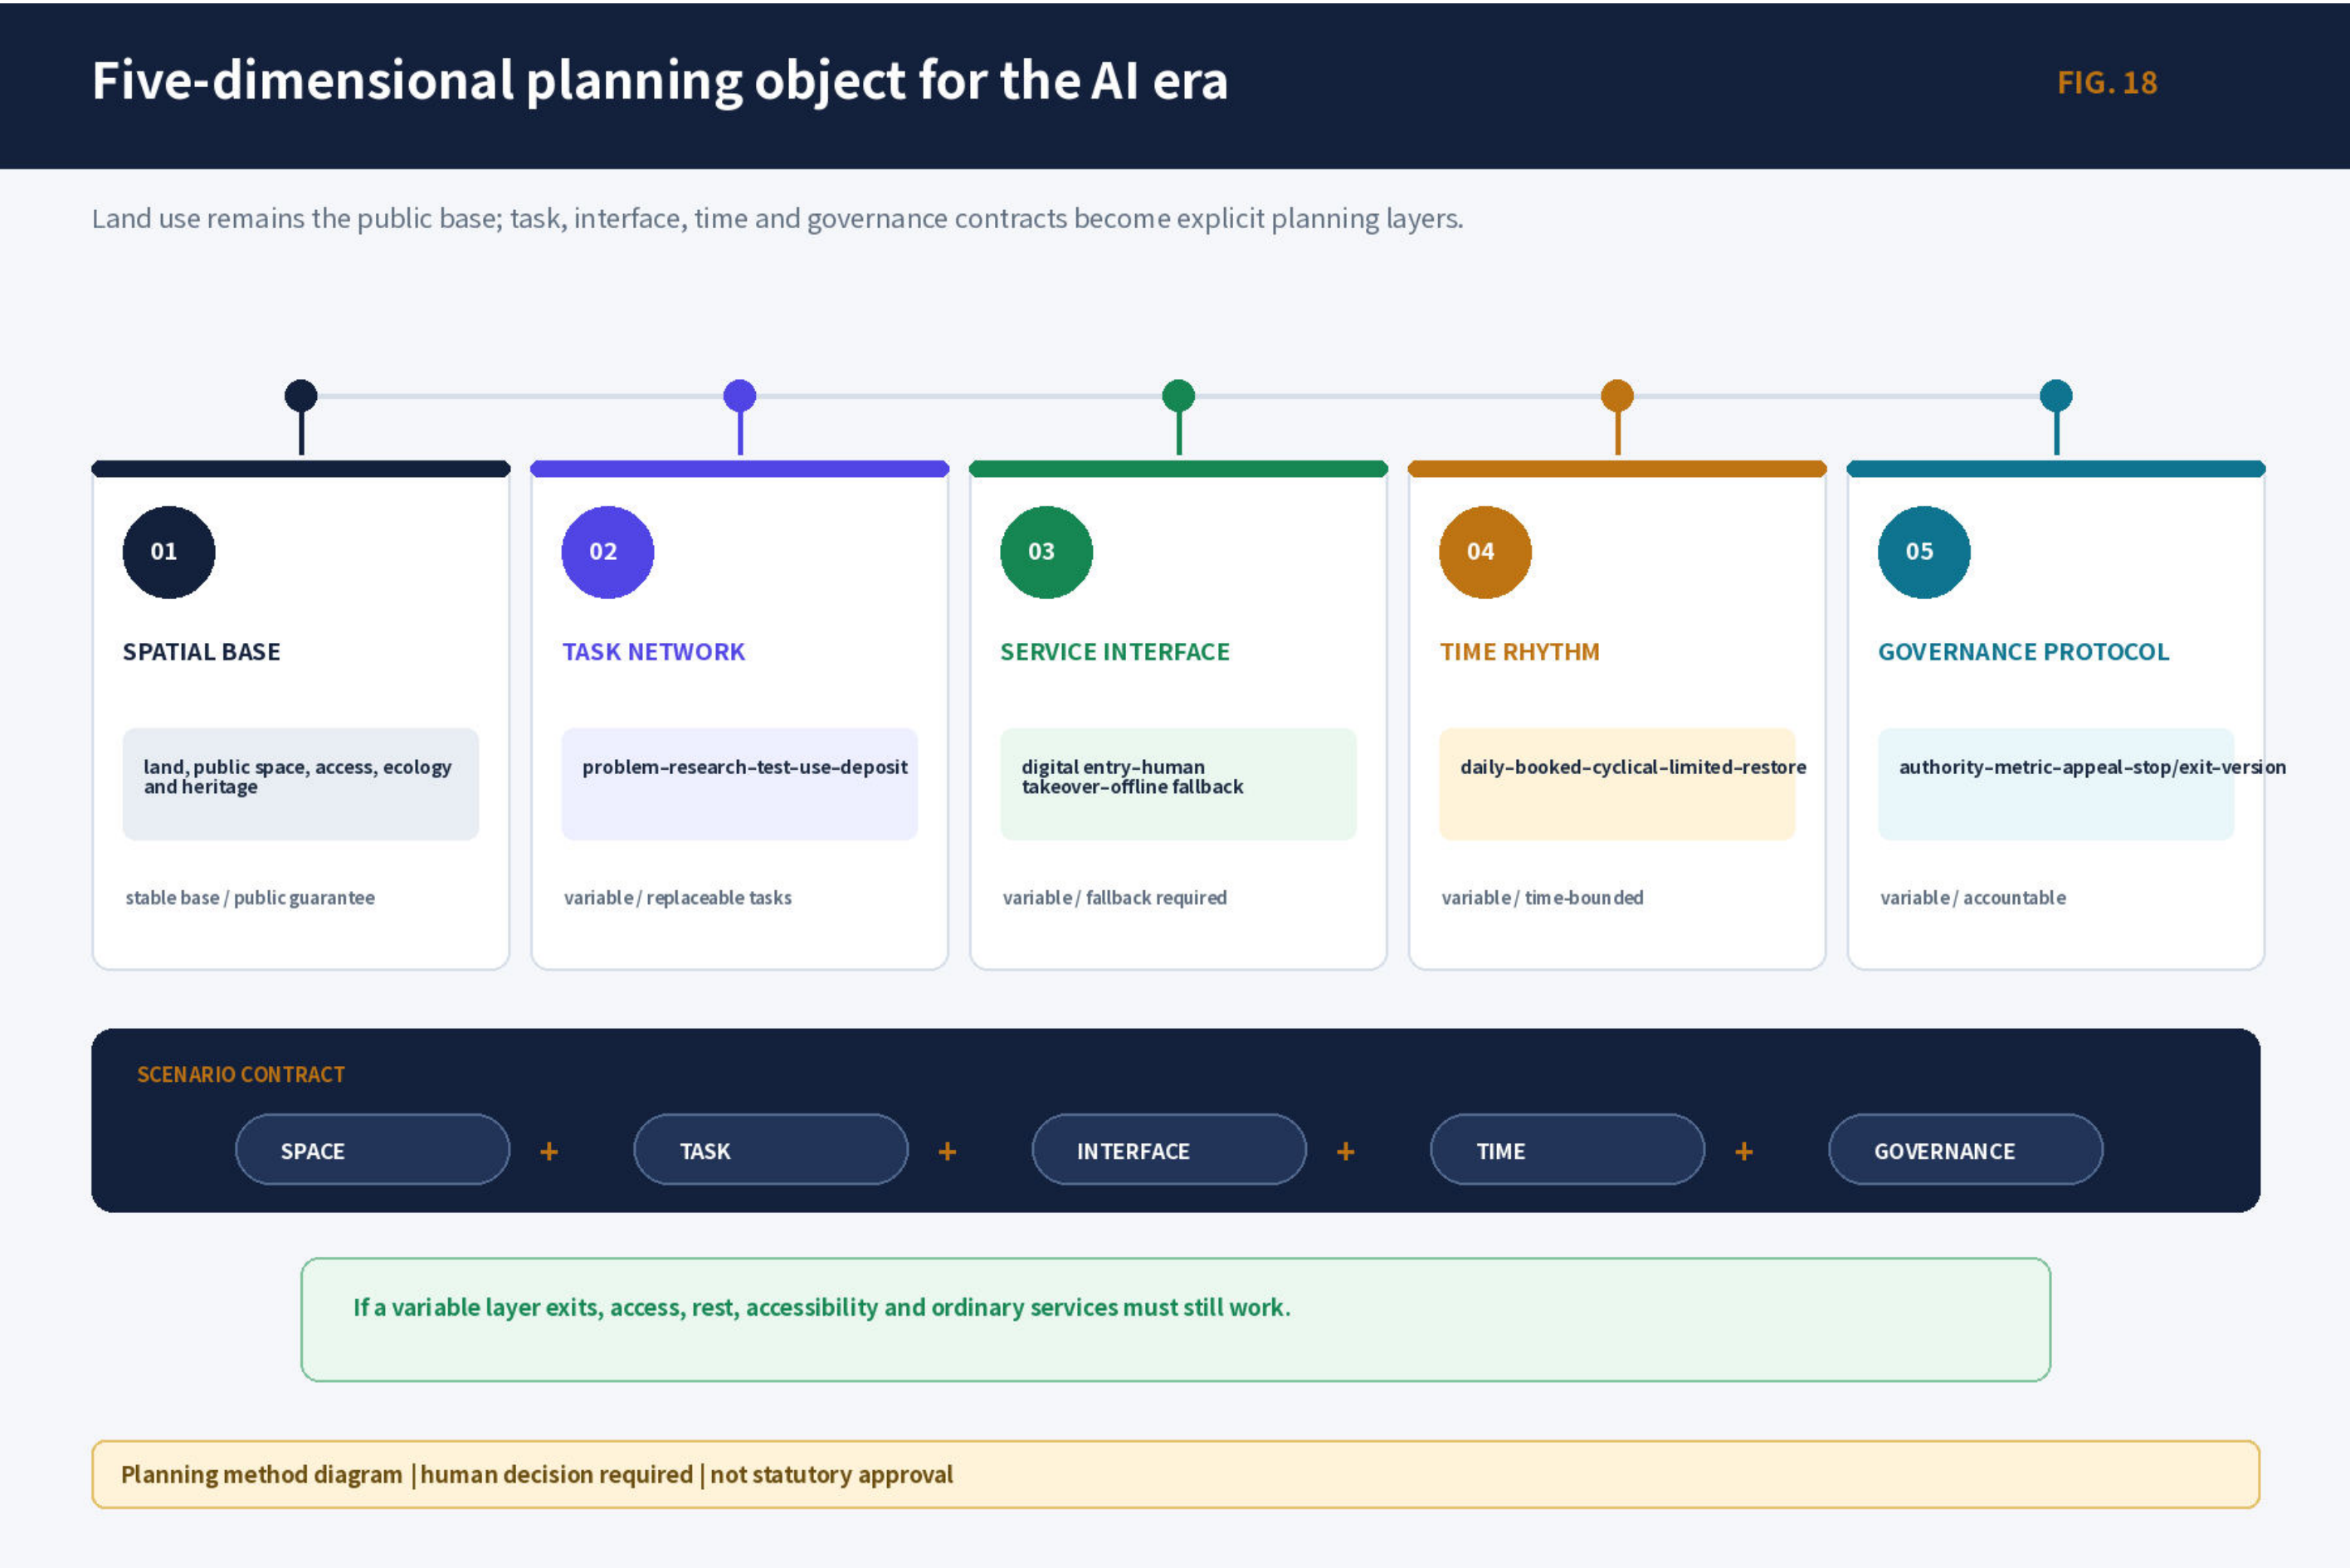

FIG-19 When the City Begins to Think: panoramic vision of an AI-native Jingzhang

FIG-20 Eight-step AI-native planning loop

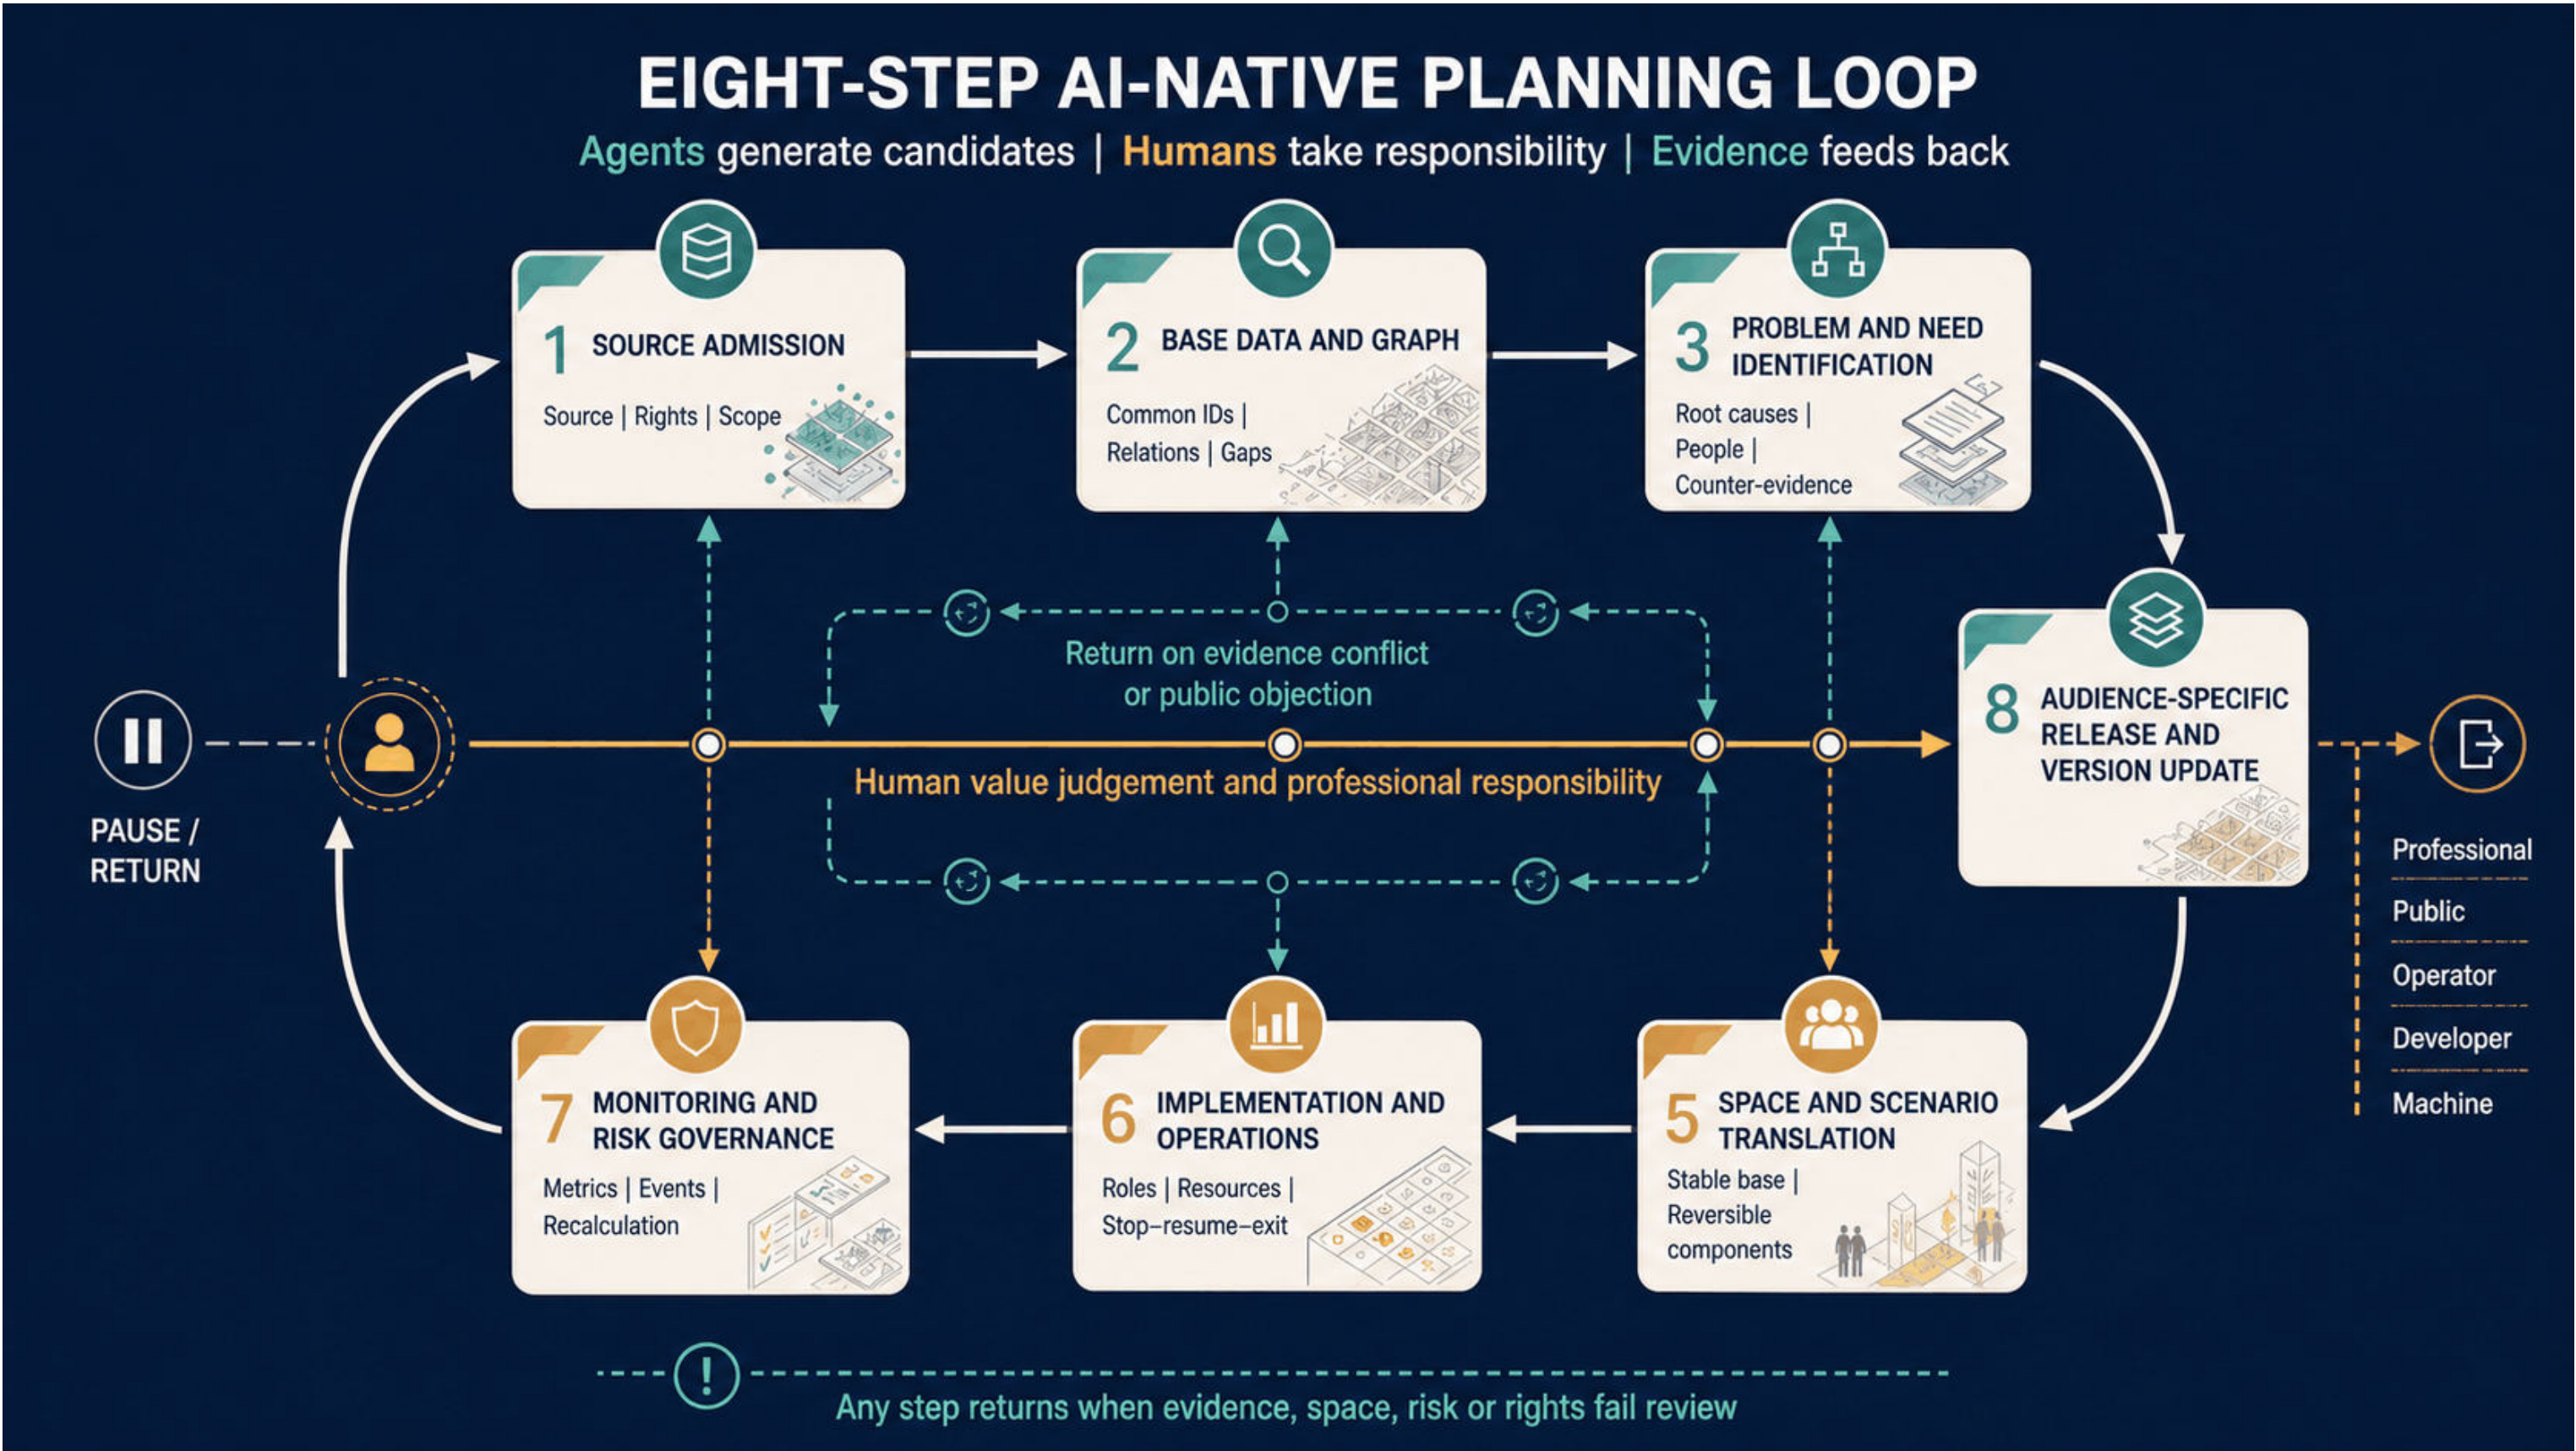

FIG-21 Four urban genes and a public learning loop

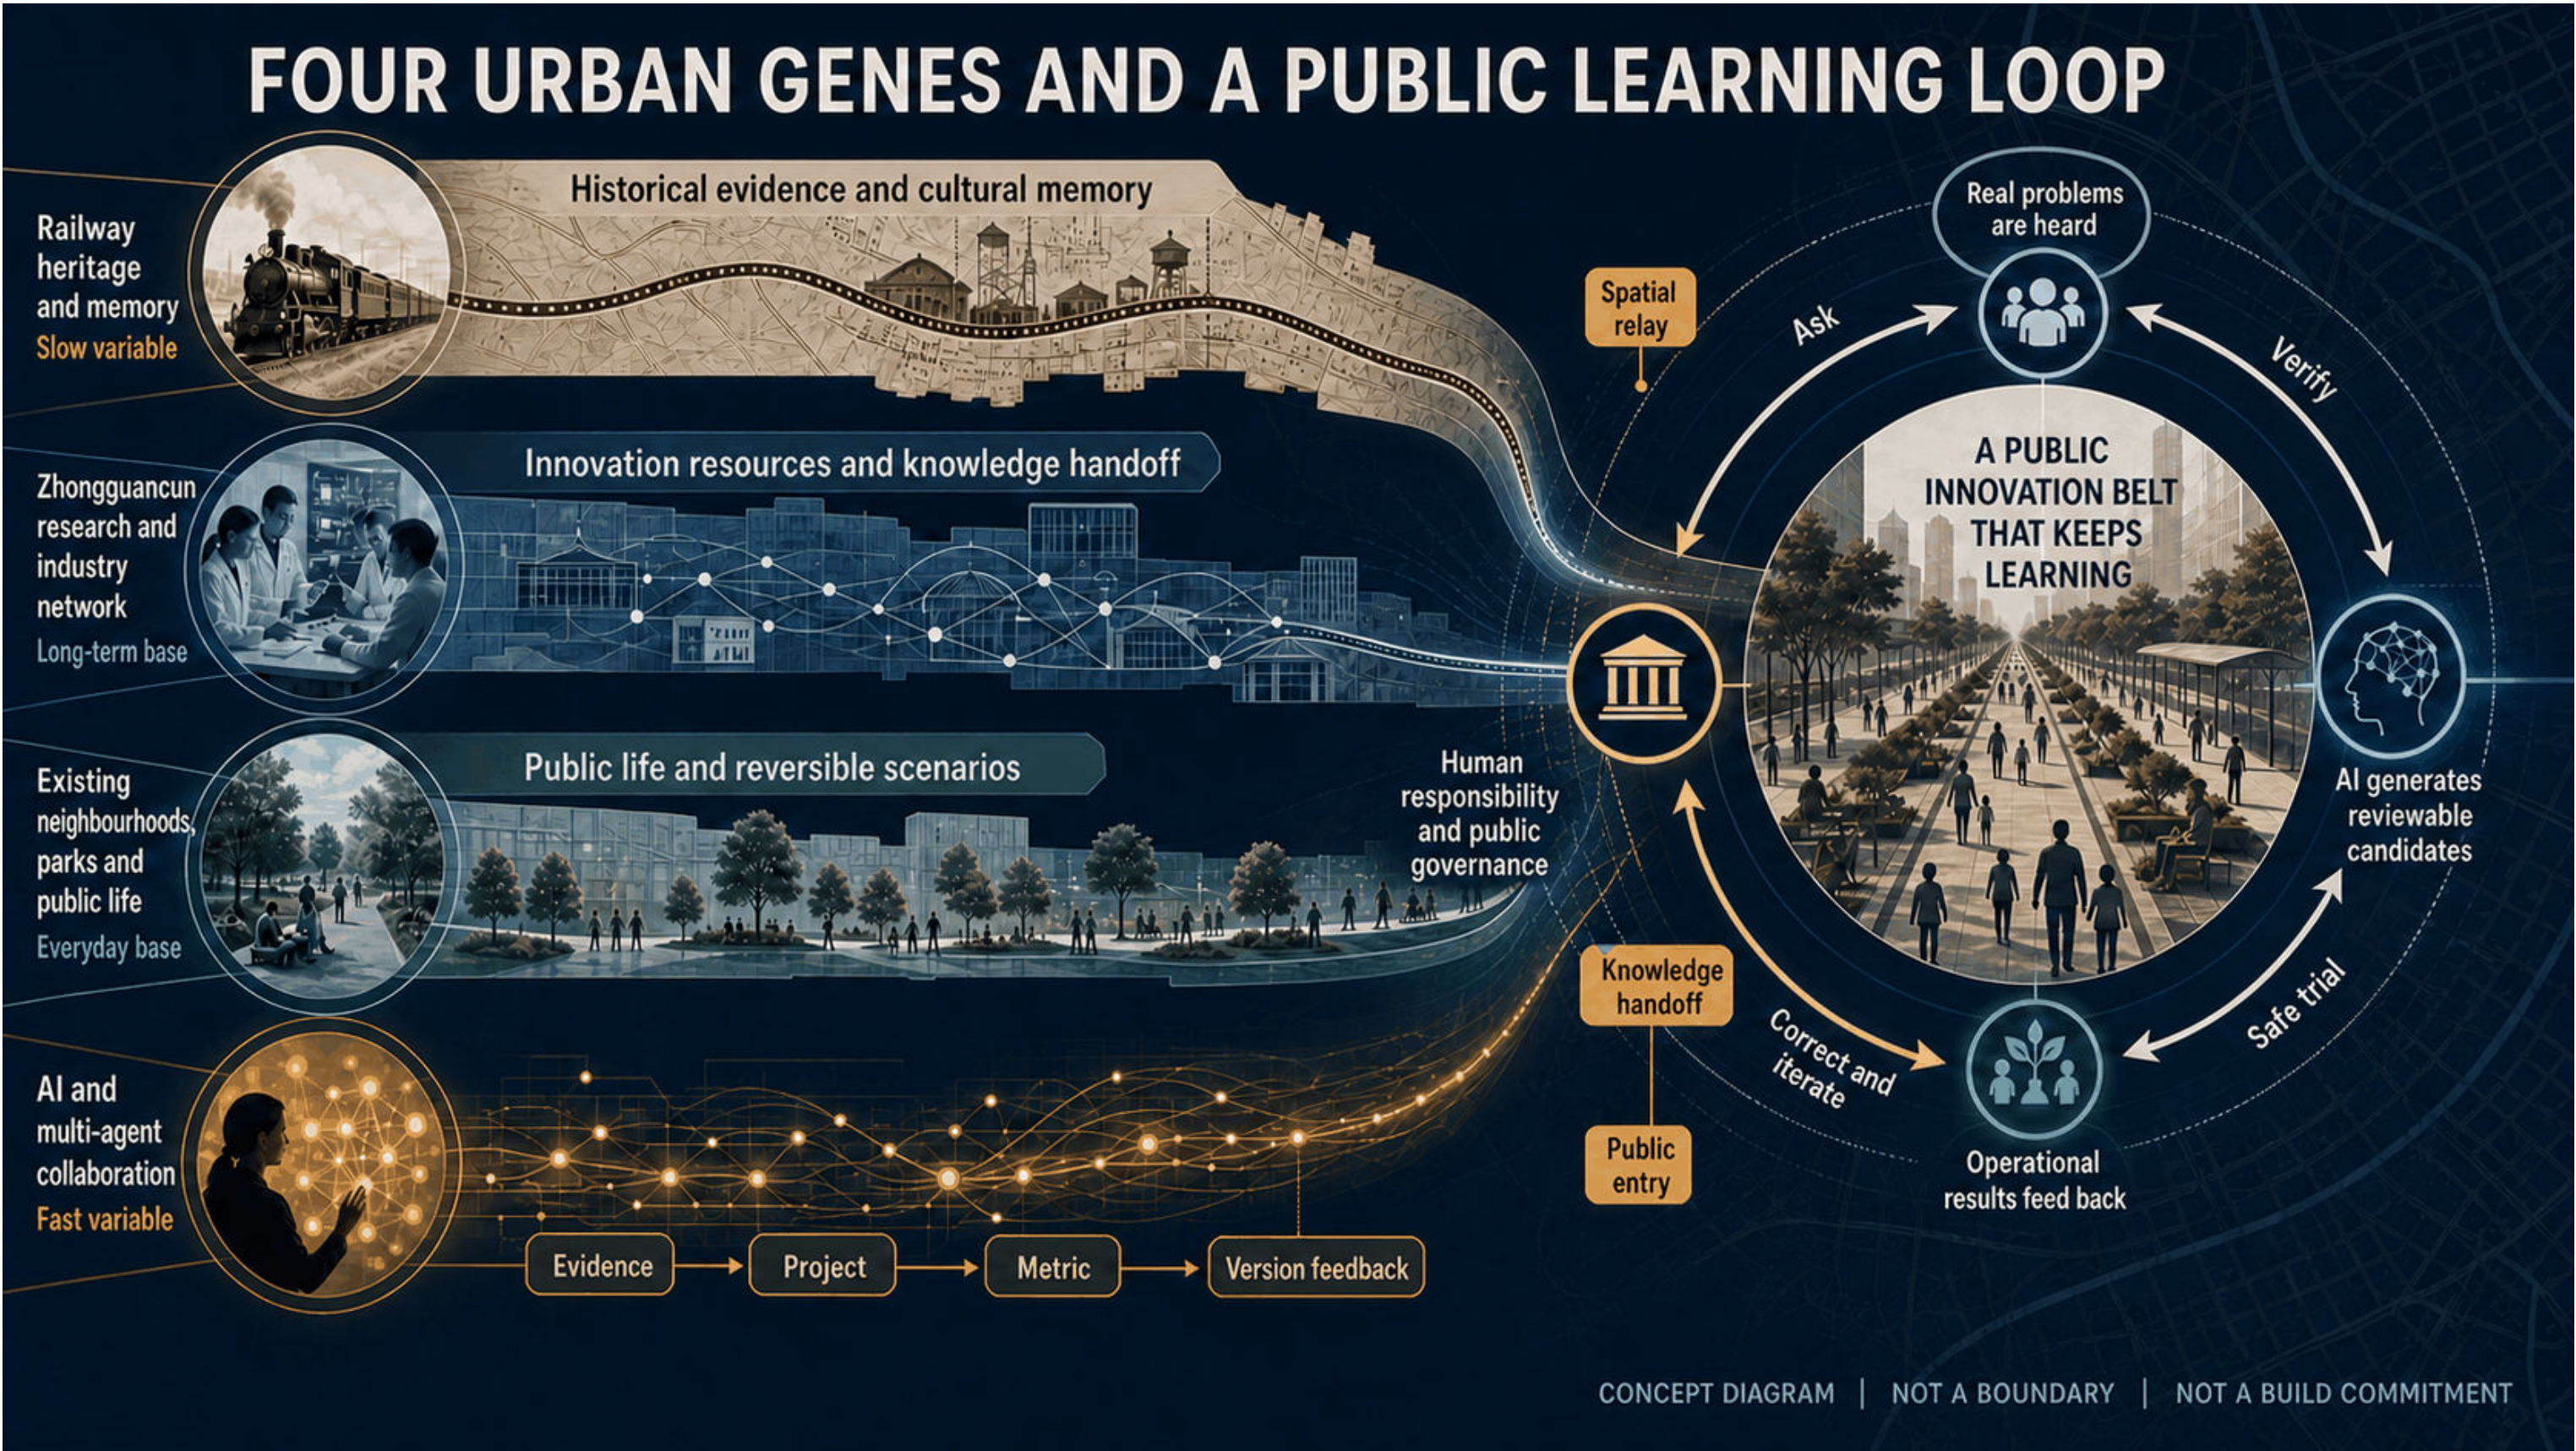

FIG-22 Five planning actions from the research outline

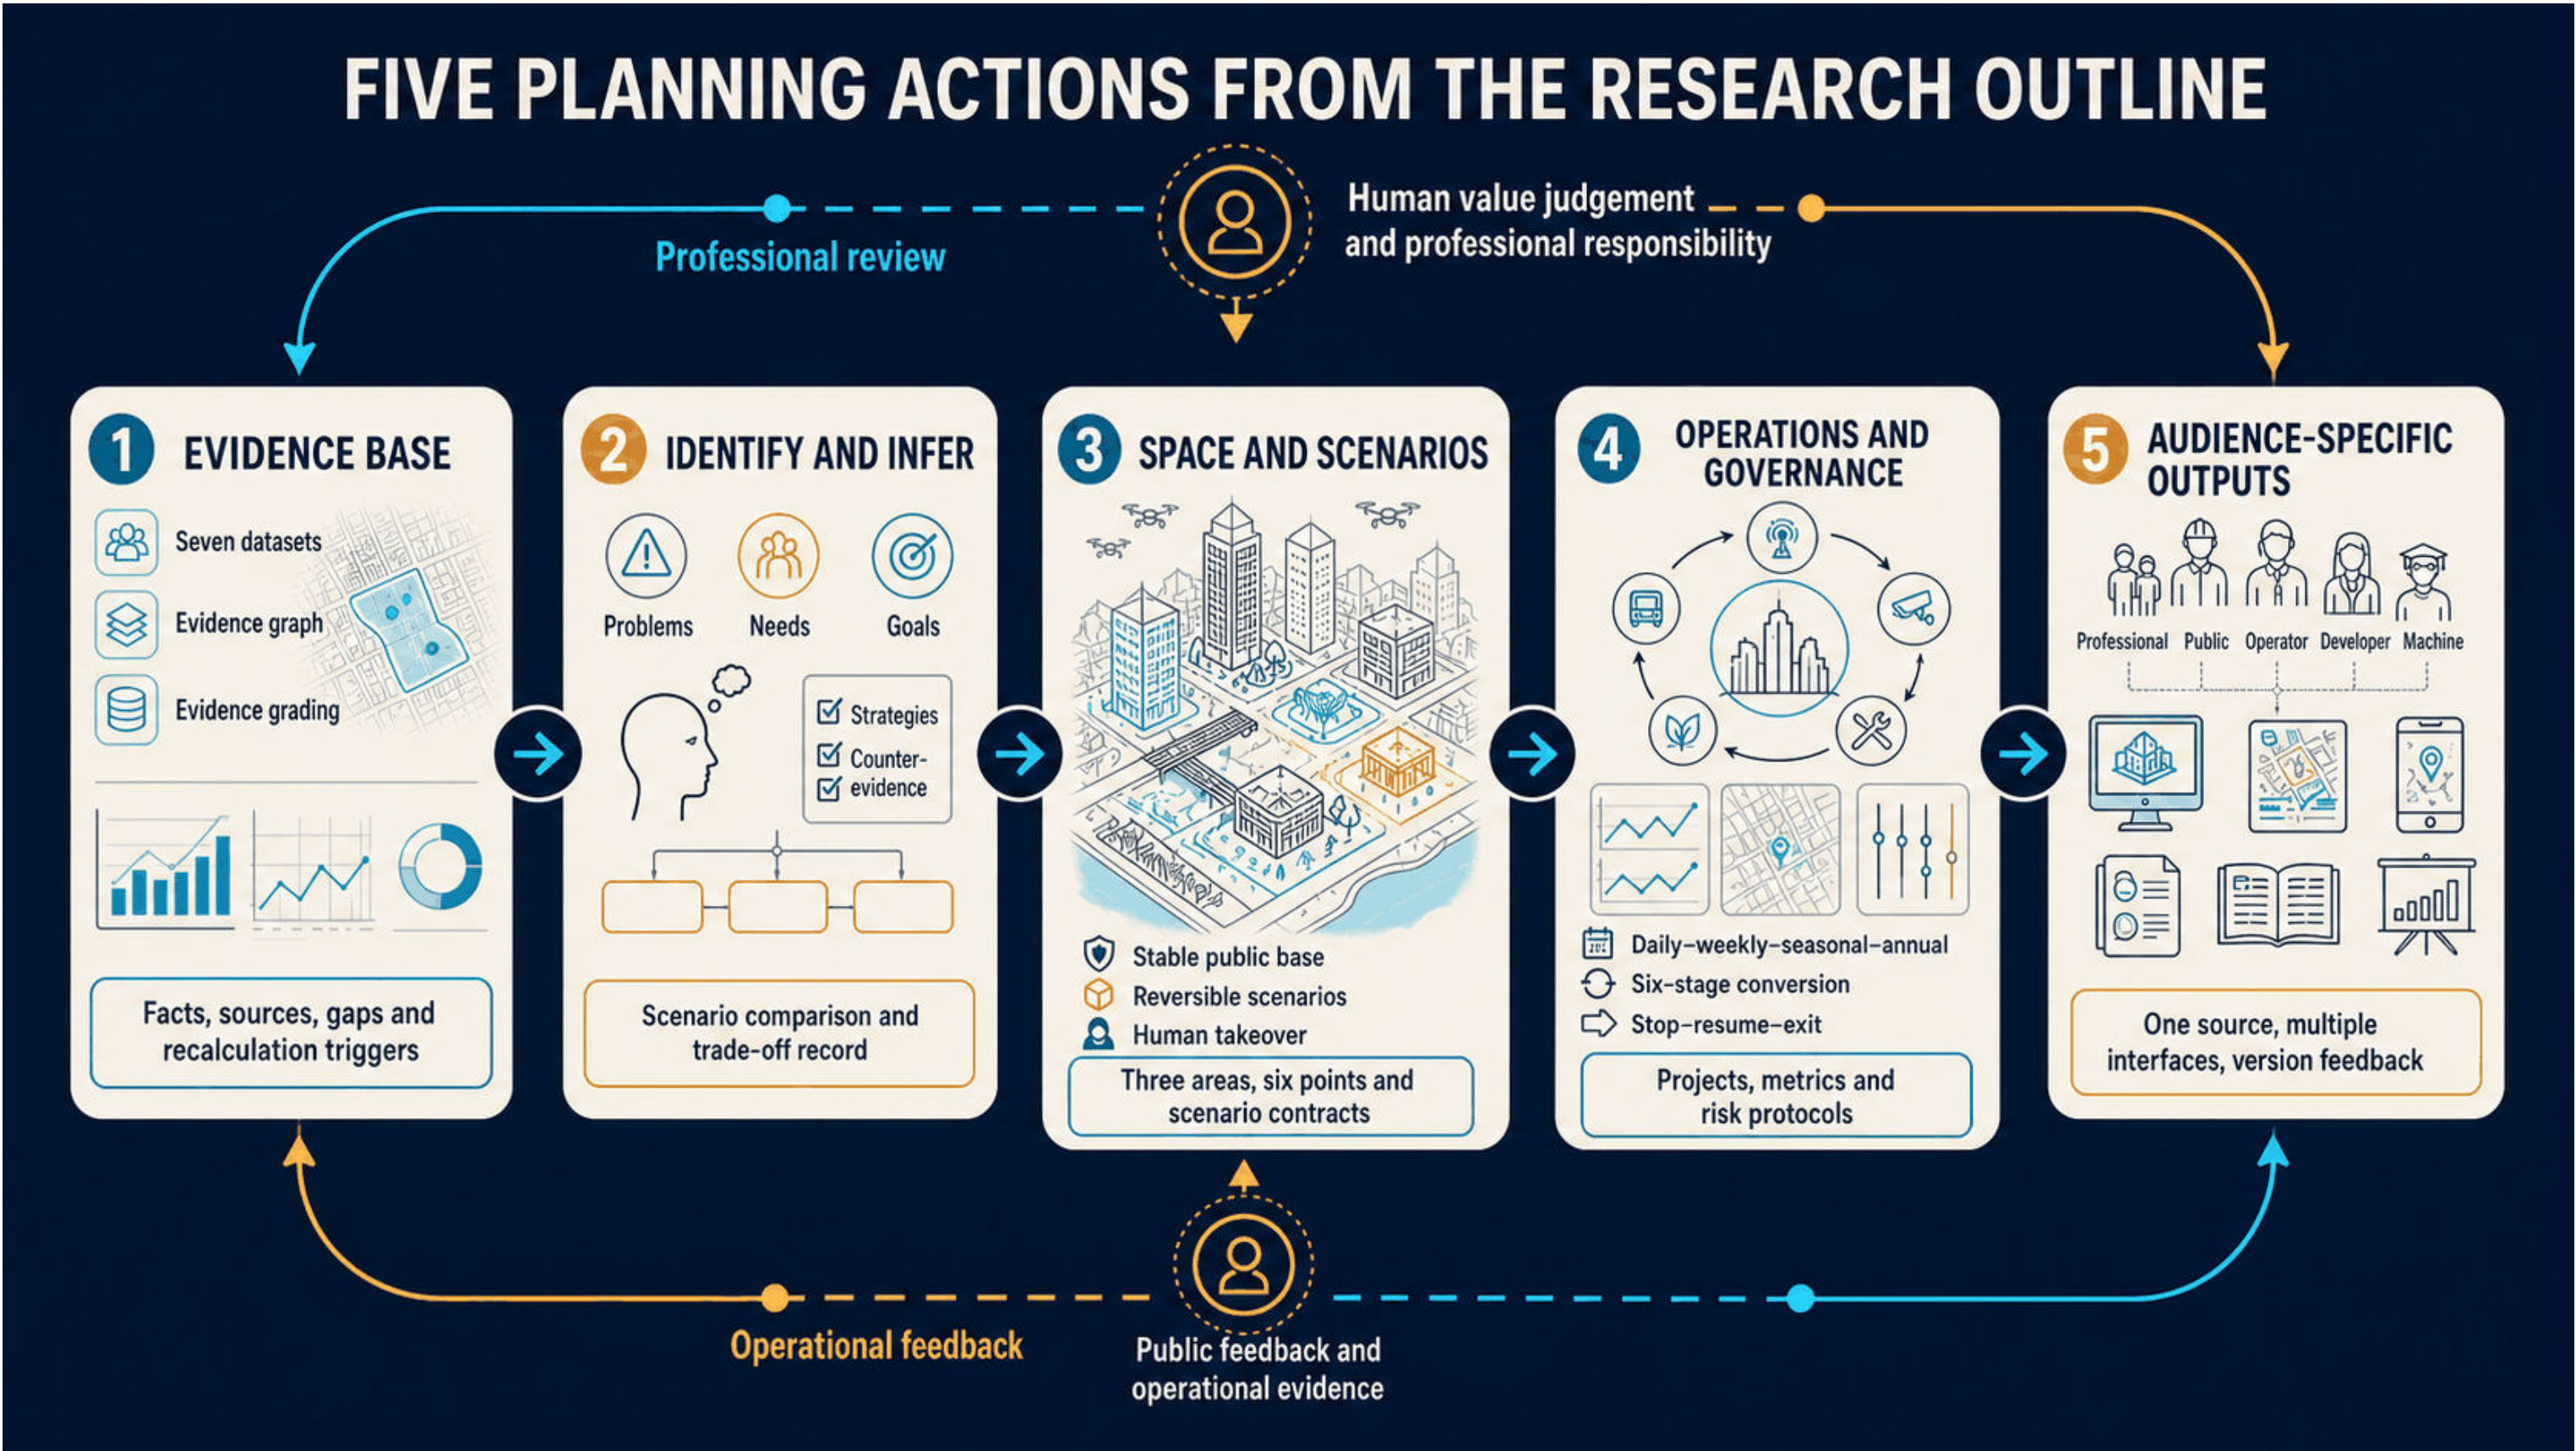

FIG-23 One Belt–Three Areas–Two Wings and three planning scales

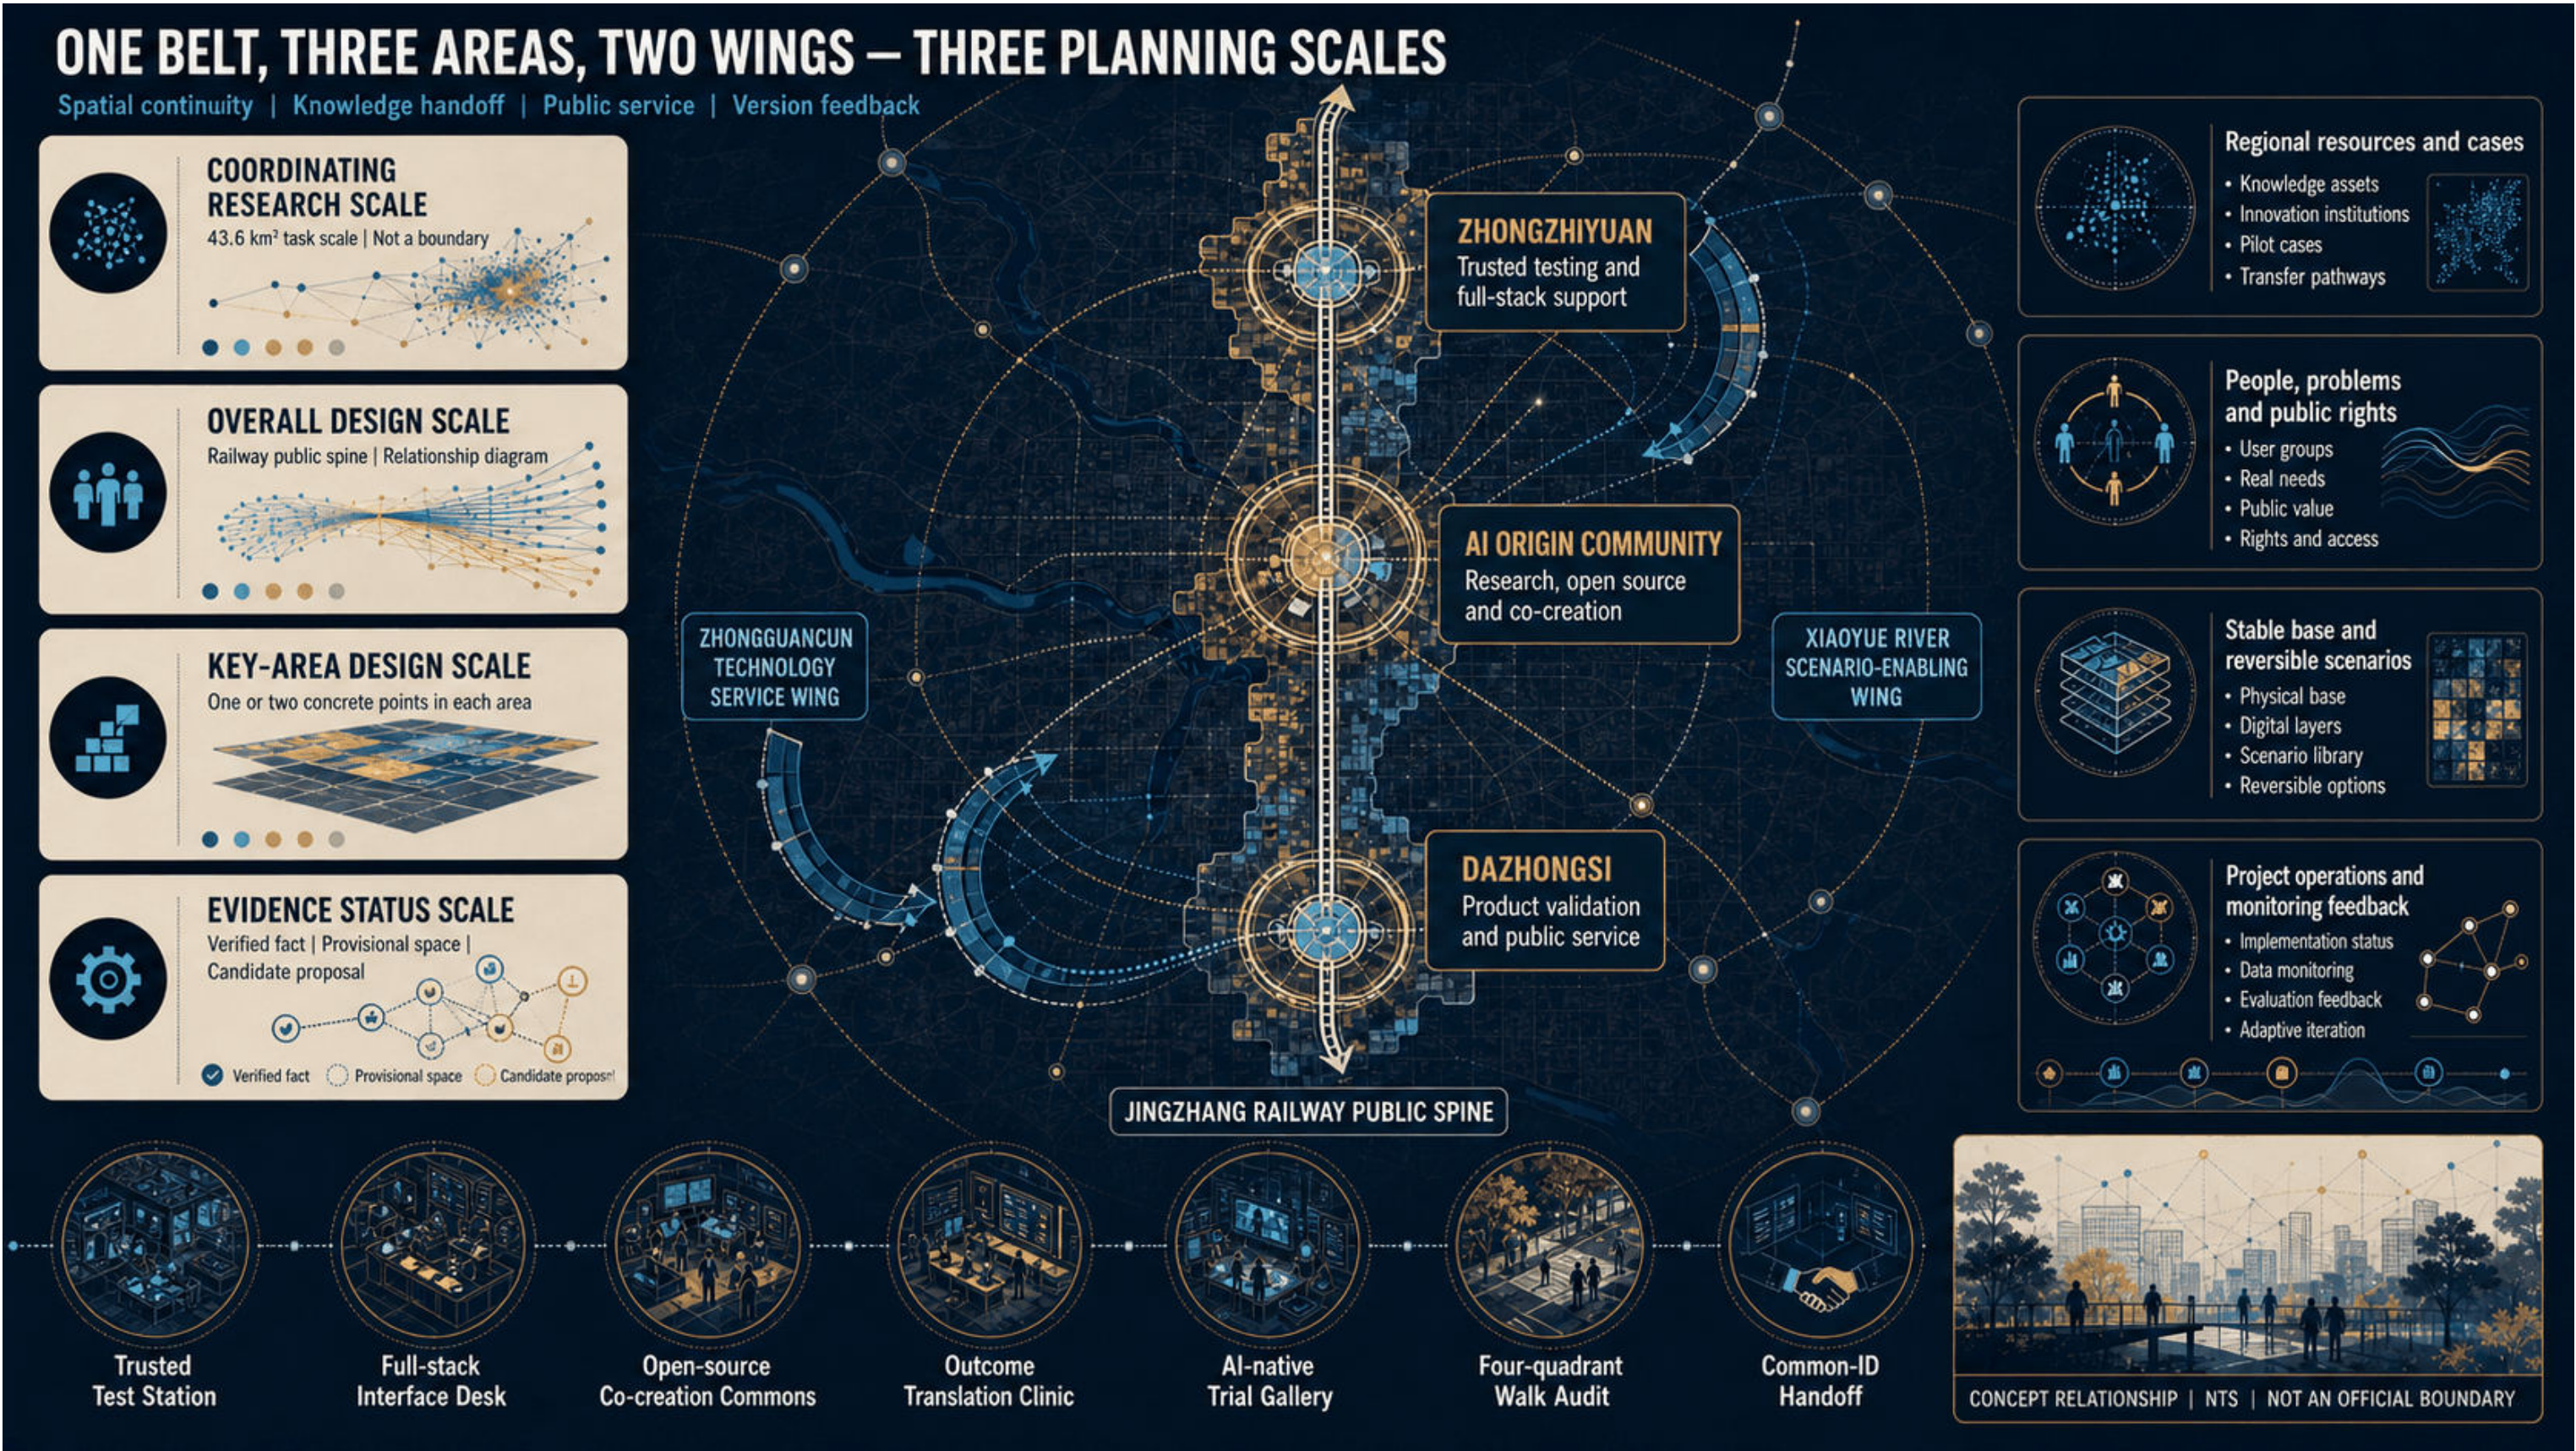

FIG-24 Six specialist agents and five human decision gates
